> *YOU* have no room to talk Mr k4yz !!!!! When are you going
> to post proof k1man was cited by the fcc?

from NEWSLINE RADIO - CBBS EDITION #29 - POSTED 06/20/91:

"Problems seem to be mounting for International Amateur Radio Network net manager Glen Baxter K1MAN. In early February he was served another Notice of Apparent Liability from the FCC. This one to the tune of $1600 for allegedly violating FCC prohibitions on broadcasting in the amateur service. The FCC contends that portions of Baxter's ham news bulletins constitute broadcasting and broadcasting announcements soliciting membership in the IARN. This brings to $3700 the amount that K1MAN may have to antie up if his appeals are turned down by the FCC and by the courts."

---

from NEWSLINE RADIO - CBBS EDITION #35 - POSTED 11/20/91

"FCC field Operations Bureau Chief, Richard M. Smith, has moved to stop the International Amateur Radio Network bulletins from being transmitted on the hambands. In a four page letter dated August 27th, Smith affirmed a $1500 monetary forfeiture imposed on Glen Baxter K1MAN last year by the FCC's Belfast, Maine Monitoring Station. Baxter was cited for alleged broadcasting and alleged interference caused by the broadcasts. Baxter immediately requested reconsideration by the Field Operations Bureau. He argued that his broadcasts were, in fact, FCC authorized information bulletins. He also claimed that the alleged interference was no different than that caused by the ARRL's W1AW when it takes to the air each day.
But Smith disagreed and upheld the charges and the imposed $1500 fine. As a result, K1MAN now says that he will take the matter to the full Commission. On September 29th Baxter filed a six page Petition for Review that requests the commission undertake the resolution of the issues involved in the case. Baxter has also issued a statement that says he will continue to fight even if it means taking the case to the United States Supreme Court. The government also appears to be getting ready for a long and involved legal fight."

3010. For The Benefit Of Lloydie and Toddie

Newsgroup: rec.radio.amateur.policy
Date: 2005-03-18 10:24:36 UTC
From: K4YZ <k4yz@aol.com>
Message-ID: <1111141476.262584.178290@l41g2000cwc.googlegroups.com>
Source record: 104526

A simple search on Google turned up more than 8 pages of articles
on K1MAN.

Toddie's correct that "K1MAN's been around a long time. He's been
fighting the FCC since at least 1988 for as far back as I was willing
to look.

So that means the FCC has quite a few years of documentation on him
for his upcoming October 2005 renewal.

So...If Toddie wants to say "See, I can do what I want too", then
he can look at it from that angle.

I say Riley and Company has had enough and the hammer is falling.

To Toddie, I say go ahead and spend the money on legal issues if
you want...I'd rather spend them on enjoying Amateur Radio.

Of course your posts in here have pretty well set the tone for
what kind of reaction you can expect. People don't want to get
"information" from the decietful, dishonest or the lame.

You're all three.

BTW...The two of you had asked me to post where K1MAN had ever
been cited for misconduct or fines levied. Here's one right off the
top. Granted it's timed, but it was from many to choose from and
establishes the pattern.

I am sure there are far more.

Good luck, Toddie!

Steve, K4YZ

K1MAN FCC field Operations Bureau Chief, Richard M. Smith, has moved to
stop the International Amateur Radio Network bulletins from being
transmitted on the hambands. In a four page letter dated August 27th,
Smith affirmed a $1500 monetary forfeiture imposed on Glen Baxter K1MAN
last year by the FCC's Belfast, Maine Monitoring Station. Baxter was
cited for alleged broadcasting and alleged interference caused by the
broadcasts. Baxter immediately requested reconsideration by the Field
Operations Bureau. He argued that his broadcasts were, in fact, FCC
authorized information bulletins. He also claimed that the alleged
interference was no different than that caused by the ARRL's W1AW when
it takes to the air each day. But Smith disagreed and upheld the
charges and the imposed $1500 fine. As a result, K1MAN now says that he
will take the matter to the full Commission. On September 29th Baxter

filed a six page Petition for Review that requests the commission undertake the resolution of the issues involved in the case. Baxter has also issued a statement that says he will continue to fight even if it means taking the case to the United States Supreme Court. The government also appears to be getting ready for a long and involved legal fight.

3015. Re: N9OGL...Another RRAP Engineering Hero..?!?! Move Over Lennie!

Newsgroup: rec.radio.amateur.policy
Date: 2005-03-18 10:36:38 UTC
From: "Mr. Obvious" <obvious0001@yahoo.com>
Message-ID: <1111142198.022821.142080@z14g2000cwz.googlegroups.com>
Source record: 104531

We're still talking about peer-to-peer software, right?

Which leads to my next question: Where in the Amateur Packet Radio service is there a need to transfer files in such a manner?
Peer-to-peer software was created to facilitate the transfer of FILES. The current iterations of most popular BBS software, on the other hand, can transfer such things as text bulletins, sale ads and so forth just fine.

"...There is a lot of P2P software that is out there that is "Open Source"
Software, meaning you can downloaded a uncompiled version and program it the way you want. So you can create filters so certain files can't go through the system like MPEGS, and AVI files (movie files) or MP3 (Music files) I would suggest if you intrested in it to get some books on P2P..."

(I just -might- know a little more than you think I do about this subject...but that's another discussion for another thread; another time.)

Back to my original thought: How does the introduction of the Internet into a ham-to-ham virtual circuit benefit -RADIO- in any way, shape or form?

I take it that you have never run a packet BBS, correct?

Are you familiar with the file-splitting and transmission capabilities of various existing user-mode software? Joe wants to share a new program with Ralph, so he splits it and uploads it to the local packet BBS, where Ralph downloads it. Acceptable thus far, right? It isn't when the program in question is copyrighted; we'll forego the file size limitations of the current RADIO-based network for purposes of this discussion. Tracking these uploads are a headache that most SysOps will gladly do without, especially if that content will land you in legal hot water.

Further, a number of PBBS SysOps incorporated I-net-based forwarding of traffic years back. A vast amount of non-ham-related 3rd-party traffic began to filter into the packet network as a result; along the circuits were several countries whose 3rd-party traffic laws were different than those of the U.S. Many nights were spent writing filters to keep the U.S.-based systems in compliance...and a system such as you propose would be subject to the same set of dynamics, if it was indeed multinational.

"....Like I stated above the only way you could log into this system would
be over radio. The Super nodes which are on the internet are encrypted and the internet side is mainly a "user Backbone system" so users can connect via 2 meter---over the internet-----to another user on the radio..."

What will all this effort net us? You're still limited by the capabilites of the end-users. I don't care if your I-net circuit consists of gigabit fiberlink; if Joe and Ralph are running 1200bps modems at their end, you're going to realize data transfer rates of no faster than 1200bps.

The current system, as is designed and implemented, works fine. Write a host mode program with a nice, pretty front end and you might sell it to people. Incorporating P2P technology into said program is - as I've stated before - a solution to a problem which simply doesn't exist.

Why no, Len, I've never asked myself what amateur radio in the U.S. is open to anyone. Seems reasonable to me.

> Tsk, tsk, tsk. Mr. "equal opportunity" Heil with all
> the sarcastic arrogance he can muster DOES NOT EXPLAIN
> WHY U.S. amateur radio is essentially a white man's
> "club." Oh, my, how hypocritical can you get?

I've not been tasked with being the official explainer of things, Len. Why don't you drop the League a line. Perhaps they'll be able to provide an answer for you. Amateur radio in the United States is pretty much a white man's hobby. I attended the Washington, PA hamfest last fall. The president of the club there is black. There are several black members. The majority of the membership is white.

The Northern Panhandle ARC which meets in Wheeling is predominately white. The president of the club is John Green WB8WRQ. He is black. He doesn't have a problem with the white members. They obviously don't have a problem with him. Whites folks are a majority of the population. Blacks make up about 13% of the American population. Here in West Virginia, about 3% of our population is black.

When I lived in Sierra Leone, the majority of the Sierra Leone League of Amateur Radio was black. The minority was white. Go figure.

It was different in Botswana. The majority of radio amateurs in the country were white with a few East Indians. I was president of the Botswana Amateur Radio Society for a couple of years. Despite our best efforts in conducting licensing classes, no black locals ever came to more than one or two sessions. As soon as they figured that it wasn't a course in radio repair, they quit coming. Go figure.

You're starting to remind me of Brian Burke. You made a statement about gender in the use of CW. You followed with "That maybe explains why WOMEN's tees are so 'cool!' :-) "

My response to you followed that line. Pay attention. It sort of does away for the necessity for the rest of your rant, huh?

> Dave Heil has NO more control
> over ham radio than I do...believe it or not!

Unlike you, I have a stake in amateur radio. I am a participant in
amateur radio.

> Dave Heil is NOT an FCC commissioner or staffer,
> does NOT "rule" anything but lines on paper pads.

Neither are you an FCC Commissioner or staffer. You are not a licensed
participant in amateur radio. This week you've told us that you are not
interested in becoming a radio amateur.

> All of Dave Heil's "tenure" in amateur radio
> involves keeping his amateur license renewed.

No, most of my tenure involves operating, not worrying about keeping my
license renewed.

> All the rest is arrogant posturing of the type of
> personality that needs to "control" everyone else.

How arrogant is the posturing of the type of personality which is
uninvolved in an avocation in which he plays no part as a participant or
regulator? Talk about the need to control...

> Dave Heil tries to "control" others by attempts at
> humiliation and denigration, then gets sooooooooo
> upset when he gets the same (and more) tossed right
> back in his face. Poor baby...and he thought he
> was "in control." Tsk, tsk, tsk.

"AWWWWWW...poor lil davie is ALL UPSET because he
isn't "loved and respected?!?" He wanna "take it
out" on others?"

--Leonard H. Anderson

"Big badass dave LIKES worms, Alun. :-) "

--Leonard H. Anderson

Sorry, Len, you were saying?

> Does Dave Heil want a nice ARRL-south website where
> all can congratulate him on his long "career" as an
> amateur, rigidly following the league rulebook? No
> problem...easy thing to do ELSEWHERE.

I have no plans to be ELSEWHERE. I'm a radio amateur, posting to an
amateur radio newsgroup.

> Posture and
> preen about yourself all you want (and you do so
> seem to want that) ELSEWHERE.

I'm a radio amateur, posting to an amateur radio newsgroup. You posture
and preen here and you aren't a part of amateur radio. Who are you to
tell others to go ELSEWHERE?

> U.S. amateur radio
> is NOT under YOUR control and won't be. If you want
> to pretend YOU control it, go ELSEWHERE.

You aren't a participant in amateur radio. You have no stake in it.
You currently claim that you do not desire to become a participant. Yet
you attempt controlling of amateur radio. You wish to shape it through
having regulations relating to morse code testing and the instituting of
a minimum age requirement for licening. You haven't gone ELSEWHERE so I
think I'll stick around for the fun.

> Meanwhile, the demographics on U.S. amateur radio
> show de facto that it is a WHITE MEN'S CLUB.

No, it isn't a CLUB at all, Leonard H. It is open to all races and any
of the several genders.

> If Davie
> wanna be "equal opportunity for all" (like he puts on
> to me), then Davie Heil ought to for damn sure go out
> and DO something about that.

Is it your view that it is my personal responsibility to recruit blacks into amateur radio whether they care to participate or not, Lennie Anderson?

> [the rest of the world
> does not exist to serve Davie Heil...or any PCTA]

What does your comment have to do with my being appointed by you to recruit minorities, Lennie Anderson?

> Posturing a lot of bullshit about "...it's open to all"
> may be the SPIN that all flag-waving, arrogant WHITE
> extras wanna rave about, but it's clearly NOT the
> case. It hasn't been the case for half a century.

Amateur radio is administered by the Federal Government. There is no posturing or bullshit about it. Amateur radio is open to all. Women may participate. Minorities may participate. Participation isn't mandatory.

> Davie Heil will NOT address the de facto WHITE MEN'S
> CLUB other than to misdirect into personal denigration
> against another.

Your de facto WHITE MEN'S CLUB isn't de fact at all. Amateur radio isn't closed to any citizen. Even you, could be a participant, little wizened Lennie.

> To me is going to come back with that
> idiotic "promise" that I allegedly made...

I'm sure that in retrospect, it seems idiotic to you now. I'll bet you wish you'd never made it.

> ...about five
> years ago. Tsk, tsk. I NEVER took any "oath" or
> "vows" that I would do such a thing. Got that, Davie?
> NO "oaths," "vows," or promises.

Around here, a man is only as good as his word. Maybe it is different out there on the left coast. You've used "promise", "oath" and "vow" but I've never used those terms in describing your statement. I've used "brag" and "boast" since those words better describe it. Your "about five years ago" is quite correct. In all that time, you've not made good on your boast.

> Doesn't matter on the SUBJECT whether or not I "get"
> a ham license.

It matters to me. It speaks to your character.

> Big badass davie IS going to find some
> sort of personal denigration "charge" to misdirect the
> thread SUBJECT onto my person's alleged "faults." :-)

Little wizened Lennie loves to uses words like "denigration". Is it denigration to point out that you made your well known "Extra right out of the box" claim? Is it denigration to point to one of your factual errors?

> He can't help it. He just doesn't like those having
> differing opinions than his.

You're adding two and two and coming up with the wrong answer. Bill Sohl's opinions often differ from mine. I don't dislike Bill Sohl. I do dislike you, little old piranha.

> Davie Heil has been trying to toss me off this news-
> group for over seven years on all sorts of specious
> "charges."

Tsk. That's incorrect. I've not tried to toss the tosser. If you mean that I've made you the object of ridicule and sarcasm, that'd be correct.
Your grating, pompous manner makes you an inviting target. Weren't you the guy who just made repeated suggestions that I be ELSEWHERE?

> Tsk. He's FAILED! I'm still here. Poor
> guy must be twins (he's beside himself).

Tsk. You're still an inviting target for ridicule and sarcasm.

> Failure is NOT an option, Davie.

Then again, it isn't over, Lennie.

> TRY to get back ON the SUBJECT...WITHOUT resorting to
> all the alleged "faults" of another person. I don't
> think you can do it.

What was the subject again, Len? Was it something about my liking worms?

The full commission dismissed it.....here's a an article from 2004:

ENFORCEMENT: FCC AGAIN WRITES TO K1MAN

The FCC has again written to Glenn Baxter, K1MAN, and the commissions
note
has both good and bad news for the Belgrade Lakes, Maine radio amateur.
On
the positive side, the April 14th letter informs K1MAN that a review of
his
transmissions indicates that he is complying with the Amateur Service
regulations
regarding broadcasting and bulletins and station control.

The negative? The FCC alleges that K1MAN is in violation of rules
regarding use
of his Amateur station for pecuniary interest and those regarding
deliberate
interference to ongoing communications.

Also, the letter again told Baxter that his "felony affidavit
complaints" will not be
accepted by the regulatory agency. He was also reminded that all
frequencies in
the Amateur Radio Service are shared. No frequency is assigned for the

exclusive use of any station, and that Baxter's station has no
greater rights to a
frequency at any particular time than does any other Amateur station.

NEWSLINE ~ 2004

So try again....

Very true. I'm a firm believer in that a person should be able to do
what they want career, regardless of (you know the list).

But there are a number of people in this world that seem to think that
the only differences between male and female is culture driven. How much
is culture driven, and how much is fundamental difference is up for
debate. But to deny any fundamental differences would almost certainly
be wrong.

I think there was some mention in one of the places that I researched
about women who did get an engineering degree, but then got another in
another field such as medicine or legal counseling.

The FCC has again written to Glenn Baxter, K1MAN, and the commissions
note
has both good and bad news for the Belgrade Lakes, Maine radio amateur.

On
the positive side, the April 14th letter informs K1MAN that a review of

his
transmissions indicates that he is complying with the Amateur Service
regulations
regarding broadcasting and bulletins and station control.

So my take on this is the the full Commission got on the Enforcement
Bureau ass for violating the content control rules.

The negative? The FCC alleges that K1MAN is in violation of rules
regarding use
of his Amateur station for pecuniary interest and those regarding
deliberate
interference to ongoing communications

So they are trying something else..

No "keep trying" to it. Perhaps you meant to ask for "proof that the
FCC dismissed" rather than proof that he'd been cited.

(A) There was no "Enforcement Bureau" at the time. The current
Enforcement Bureau has a lot more muscle and leverage in Commission
legal circles than the Field Operations Bureau had at that time.

(B) That was the "old" Commission where content wasn't anything
they wanted to deal with. Although I do not agree with some of
their recent decisions on broadcast media content, there's a whole
new ball game playing at the Portals nowadays.

My own two electron's worth.

>> is?
>
>Why no, Len, I've never asked myself what amateur radio in the U.S. is
>open to anyone. Seems reasonable to me.

Tsk. The question was WHY ARE THERE SO FEW BLACKS
(african-americans) IN U.S. AMATEUR RADIO?

Stay with the program.

>I've not been tasked with being the official explainer of things, Len.

Tsk. You've "tasked yourself" busy big control person.

You seek "control" of who can post in here and who
cannot. <shrug>

>Amateur radio in the United States is pretty much a white man's hobby.

OK, agreement.

The corollary question is, "WHY IS U.S. AMATEUR RADIO SO
PREDOMINENTLY WHITE."

Let's ask a second question on demographics: WHY IS IS
PREDOMINENTLY MALE?

>The majority of the membership is white.

Don't belabor the obvious. Explain WHY.

>When I lived in Sierra Leone, the majority of the Sierra Leone League
of
>Amateur Radio was black. The minority was white. Go figure.

DOS Tip: "Sierra Leone" is NOT a state of the United States.

I can write the following:
When I lived in Japan, the majority of the population was Asian.
That doesn't pertain to the question. [do you understand the analogue or haven't you taken your Alzheimer's medications yet?]

>It was different in Botswana.

Tsk. "Botswana" isn't a state in the United States.

The question concerns the UNITED STATES OF AMERICA and the hobby activity called amateur radio.

>You're starting to remind me of Brian Burke.

You have a serious problem in getting along with anyone thinking differently than you do.

You have a serious problem in discussing anything that is opposite to your own opinions.

Discussion of ALL SIDES of any question should be OPEN and NOT restricted to some little clique of elitists who self-righteously proclaim their "ownership" of some activity.

Both Brian and I have opinions OPPOSITE to yours...yet you feel compelled (perhaps obsessed) with a need to attempt denigration and/or defamation of us because we (and many others who appear from time to time) have opinions differing from yours.

>See above, little wizended Lennie.

Tsk. Attempts at name-calling. Improperly spelled.

Try to concentrate on the SUBJECT instead of name-calling those with opposite opinions.

The USA does NOT include Sierra Leone nor does it include Botswana. It includes Wheeling, West Virginia, but Wheeling is just one city out of thousands in the USA.

>I didn't write that I'm upset.

Tsk. You always SEEM so upset when encountering any opposite opinions.

>I got with the program starting in 1963.

WHAT "program?"

That can't be amateur radio. U.S. amateur radio does
not allow broadcasting. [see another thread largely
of name-calling by anonymous geeks getting their jollies
off]

Tsk. "Get with the program" is a colloquial EXPRESSION,
common in American English. :-)

Tsk, tsk. In 1963 I was working (in the USA) designing
electronics for the Grumman Intruder radar pre-flight
check-out set (Ku-band, portable battery-powered). Not
a hobby and very much involved with microwave radio.

>Well, this discussion has you.

"Has you" what? Try completing a sentence properly.

>Nobody may force me to like you.

Not a requirement, self-righteous self-professed
ruler of ham.

Tsk. You are going to have to LIVE with the fact
that many viewing your arrogant postings in here
do NOT "like you."

You MUST live with the fact that controversial subject
discussion does NOT require capitulation to the
opinions of yours...not even when you are an extremist
in self-righteousness.

[supposedly the State Department does that all the
time...called "diplomacy," something that you've NOT
displayed in any posting in here]

>> The SUBJECT is
>> (or should be) the discussion point...NOT the
>> person or personality of whover YOU disagree with.
>
>Please try to remember that.

I try to remember that, even when some ex-government
employees use phrases like "little wizended lennie"
as a response to me.

>> U.S. amateur radio was NOT created especially for
>> Dave Heil to enjoy.
>
>I figured that was the case when I became interested.

Why did you lose that realization?

>Unlike you, I have a stake in amateur radio.

A wooden one?

You feel you MUST control what all newcomers are
required to do to obtain an amateur radio license.
Why is that? What compells you to attempt acting
like you are "authority" on licensing?

There is only ONE authority on licensing radio
amateurs in the USA and that is the FCC. You are
NOT a member of the FCC.

>Neither are you an FCC Commissioner or staffer.

Tsk. You manufacture a strawman again. I've never
claimed to control radio licensing in the USA.

Since Dave Heil is NOT a member of the FCC, he does
not have ANY authority on radio amateur licensing
matters in the USA. [Sierra Leone and Botswana are
not in the USA]

>This week you've told us that you are not
>interested in becoming a radio amateur.

Irrelevant. Next week I may change my mind. [next
week I may be in a foreign country...such as
Sierra Leone or Botswana... :-)]

Becoming a LICENSED radio amateur carries with it NO
requirements of adopting a strict "life style" of
amateurism or any obeyance of some old "code" of
conduct published by a membership organization. One
does NOT need to "take vows" or "swear an oath" to
uphold some artificial traditions, jargon, patois,
standards and practices of older times. Amateur
radio is a de facto HOBBY. [it is NOT de jure a
"hobby" in regulations but that is just legislative
language cum political speak to satisfy a minority
of over-inflated traditionalist amateur lifestylers]

I am a professional in radio-electronics and have
been one since 1952. I am also a hobbyist in many
different phases of radio-electronics and have been
so involved since 1947. I have been most fortunate
to do work in many different areas of electronics and
radio and have a personal fascination with nearly all
aspects of that broad technological field.

You insist on defining "radio" as ONLY that of radio
amateurism...as YOU know it. Sorry, that isn't
acceptible to the entirety of the radio-electronics
world. Neither does anyone HAVE to "demonstrate any
interest" by becoming a LICENSED radio amateur FIRST.

>How arrogant is the posturing of the type of personality which is
>uninvolved in an avocation in which he plays no part as a participant

or
>regulator? Talk about the need to control...

Tsk. The control-freak is angry at being called out
on how he appears to all others? That is you, Dave
Heil.

The First Amendment of the U.S. Constitution states that
all U.S. citizens have the RIGHT to petition their
government for the redress of grievances. That is NOT
"posturing." It extends to EVERY law, regulation made
by the U.S. government.

The FCC regulates U.S. amateur radio. The FCC is the
final authority on what is required to obtain an amateur
radio license. The ARRL has NO such authority. Dave
Heil has NO such authority...but Dave Heil postures and
preens AS IF he did. Tsk, tsk.

>You aren't a participant in amateur radio. You have no stake in it.
>You currently claim that you do not desire to become a participant.
Yet
>you attempt controlling of amateur radio.

Tsk, tsk. Advocacy in eliminating the morse code test
for any amateur radio license is "CONTROL?!?" :-)

Sorry, control-freak Dave Heil, that's simply a REQUEST
of a citizen, similar to tens of thousands of other
citizens who REQUEST the same thing. Not only is the
code test requirement old and out-dated, the FCC has
stated as far back as 1990 that the code test does not
matter to their purpose in determining whether any
prospective amateur should be granted a license.

NOWHERE in the various Parts of Title 47 C.F.R. is there
any "requirement" to "post bans" or submit any oath of
interest or lifetime vow in becoming "a participant"
through authorized (by the FCC) licensing. Neither is
there some strange perversion of the First Amendment
that allows ONLY "participating amateurs" to rule on
regulations!

> You wish to shape it through
>having regulations relating to morse code testing and the instituting
of
>a minimum age requirement for licening.

INCORRECT. I've not pursued any "minimum age requirement"
in U.S. amateur radio since making that SUGGESTION to the
FCC in January, 1999, on the LAST page of a 14-page
Comment on docket 98-143 (see date of 13 January 1999 in
the FCC ECFS on that docket).

Tsk. A number of middle-aged PCTA extras keep bringing
that up and trying to imply it is something like Treason
Against The State! I've dropped that request, haven't
followed it through with REAL authorities, yet some
self-appointed "guardians of their turf" insist that I
am "constantly advocating age requirements!" :-)

Yes, I advocate an elimination of the morse code test.

Such will NOT affect ANY who are ALREADY LICENSED in
U.S. amateur radio! It does NOT affect their ability
to use what they ALREADY HAVE.

>No, it isn't a CLUB at all, Leonard H. It is open to all races and
any
>of the several genders.

Tsk. You FAIL to recognize the difference between
de facto from de jure.

There is NO discrimination on age or gender in the
regulations of U.S. amateur radio in Title 47 C.F.R.
[that's de jure]

There is an OBVIOUS discrimination in race throughout
the United States in regards to amateur radio
licensing...against blacks (african-americans).
[that's de facto] Observation, casual to studied,
of all amateur radio hobbyist photographs in
amateur publications of the last half century will
demonstrate that de facto condition.

There is a milder "discrimination" (of a sort) against
females in LICENSED amateur radio. That's also been
OBVIOUS but hasn't been much publicized since Harker's
informal study presented on the ARRL website.

>Is it your view that it is my personal responsibility to recruit
blacks
>into amateur radio whether they care to participate or not, Lennie
>Anderson?

Tsk. I just asked a question. Can you EXPLAIN the
de facto condition of U.S. amateur radio being a
WHITE MAN'S CLUB?

>What does your comment have to do with my being appointed by you to
>recruit minorities, Lennie Anderson?

Well, DAVIE Heil, I've NEVER taken on some self-
appointed "authority" to "tell you what to do!"

[I cannot perform miracles...]

Considering your manner of "recruiting" ANYONE, you
are rather deficient in such a "recruiting" task.

>Amateur radio is administered by the Federal Government.

Tsk. It is REGULATED by the federal government.

>Minorities may participate. Participation isn't
>mandatory.

Tsk, Tsk, TSK! DAVIE Heil has insisted and insisted
that ONLY those who "participate" in rule-making of
amateur radio MUST ALREADY have an amateur radio
license!

DAVIE Heil is acting the hypocrite.

>Your de facto WHITE MEN'S CLUB isn't de fact at all.

[baaaad imitation of Amos or Andy... :-)]

Tsk. You keep mixing up "de facto" with "de jure."

Those differences have been explained to you. Try
to keep up with your self-education.

>Even you, could be a participant, little wizened Lennie.

Tsk. More of the "diplomatic charm" picked up while
"living in Sierra Leone or Botswana?" :-)

>I'm sure that in retrospect, it seems idiotic to you now. I'll bet
you
>wish you'd never made it.

No problem to me. I may say the same thing again. Or,
I may not. :-)

I'll be more specific. I do NOT intend to do so
this week. :-)

>Around here, a man is only as good as his word.

"Around there" is NOT the center of the universe nor
of any "center of ethical/moral virtue." :-)

>Maybe it is different out there on the left coast.

Where is this "left coast?" :-)

I live in the southwestern part of the contiguous
United States of America.

In fact, the state of California is, by far, the
most populous state in the union.

If you try for more of such disparaging geographic
comments, I'd say you were so unable to reply

that you've resorted to self-appointed BIGOTRY on
a personal insult level. Tsk, tsk, tsk.

>Little wizened Lennie loves to uses words like "denigration". Is it
>denigration to point out that you made your well known "Extra right
out
>of the box" claim? Is it denigration to point to one of your factual
>errors?

Tsk. More "diplomatic charm" with the phrase "little
wizened Lennie?" :-)

"Well known claim?" :-)

No problem to me. I may say the same thing again. Or
not.

I've taken and passed MANY "tests" in my career of a
half century in radio-electronics. MOST of them were
much more difficult than ANY amateur radio "exam"
given since 1952. I've tested, operated, DESIGNED
radio equipment of equal and FAR-more-complex nature
than amateur radio equipment. No problem to me to
take a little hobby-radio test. I just don't choose
to do so this week. :-)

I'm in a computer network newsgroup. That is NOT
amateur radio activity. No license is required. Yet
DAVIE Heil (who likes to beat up on "little wizened"
people - of his imagination) thinks I MUST have an
amateur radio license to be IN this newsgroup! :-)

>You're adding two and two and coming up with the wrong answer. Bill
>Sohl's opinions often differ from mine. I don't dislike Bill Sohl.

Did Bill Sohl participate in this thread? :-)

>I do dislike you, little old piranha.

TS. :-)

>If you mean
>that I've made you the object of ridicule and sarcasm, that'd be
>correct.

Tsk. Incorrect. You've ATTEMPTED to do so. :-)

Sorry, it hasn't worked yet. Better luck in the future.

>Your grating, pompous manner makes you an inviting target.

Awwwwww...get the great "DAVIE" all upset again? :-)

>Tsk. You're still an inviting target for ridicule and sarcasm.

No problem. I expected that when I first began posting
in here. :-)

Tsk. The "good ol' boys" of the WHITE MAN'S CLUB really
DO get all upset and ornery when their precious tree
house is invaded. :-)

>What was the subject again, Len?

"Demographics in U.S. amateur radio."

Can't you CONCETRATE on SUBJECTS anymore?

>Was it something about my liking worms?

Ah! Now it is clear on what YOU thought was the subject!

"Davie, Davie Hi-el...king of the wild ham bands!"

It seems to be all about Dave and his "battle" with
opponents (who do not love and respect his greatness).
As self-appointed "guardian" of all that is "holy"
in ham radio (i.e., whatever Dave likes), he must do
his "combat veteran" thing and FIGHT anything that
threatens CHANGE to his radio lifestyle! :-)

Understood. :-)

HANS!

I see it's thawed out enough up there for you to start oozing back
out from under the septic tank lid!

I see your first "comments" on your return are not to get into
some meaningful conversations, but to sling a bit of mud yourself!

I don't know what EVER possessed me to think that you would ever
actually live up to your own rhetoric about newsgroup conduct, "not
saying anything unless you ahve something constructive to say"...

But...there you are...Lennie Of The North. No More, No Less.

Steve, K4YZ

I welcome the return of Hans and his rather unique views on various topics.
You might say Hans calls things like they are.
Welcome back Hans!

Oh, you know have a different question! Your original question, "You've
'never' asked yourself (or anyone else) WHY that is?" followed my
statement, "Amateur radio in the U.S. is open to anyone".

My response to your new question is that I don't know and don't much
care.

> Stay with the program.

I've been with the program for over 41 years.

> >I've not been tasked with being the official explainer of things, Len.
>
> Tsk. You've "tasked yourself" busy big control person.

Nope. I'd surely known if I'd tasked myself with something.

> You seek "control" of who can post in here and who
> cannot. <shrug>

How would that be. Did I ever tell you to "Shut up, you little
feldwebel)? You've done that to me. Have I told you to go ELSEWHERE?
You've done that to me. Which one of us is more likely to be seen as

one you attempts to control who can post here?

> >Amateur radio in the United States is pretty much a white man's hobby.
>
> OK, agreement.
>
> The corollary question is, "WHY IS U.S. AMATEUR RADIO SO
> PREDOMINENTLY WHITE."

> Let's ask a second question on demographics: WHY IS IS
> PREDOMINENTLY MALE?

Why not drop the ARRL a line? Surely someone there might have some
insight and be able to enlighten you.

> >The majority of the membership is white.
>
> Don't belabor the obvious. Explain WHY.

You've snipped that portion that would reveal that I was writing of a
local amateur radio club. I stated that West Virginia has a black
population of only 3%. They aren't all radio amateurs and don't all
live in this area. I thought you'd be able to make the connection.

> >When I lived in Sierra Leone, the majority of the Sierra Leone League
> of
> >Amateur Radio was black. The minority was white. Go figure.
>
> DOS Tip: "Sierra Leone" is NOT a state of the United
> States.

> That doesn't pertain to the question. [do you understand
> the analogue or haven't you taken your Alzheimer's
> medications yet?]

I don't take any such medication. Do you?

> >It was different in Botswana.
>
> Tsk. "Botswana" isn't a state in the United States.

I didn't write that it was.

> The question concerns the UNITED STATES OF AMERICA and
> the hobby activity called amateur radio.

What is the question again?

> >You're starting to remind me of Brian Burke.
>
> You have a serious problem in getting along with anyone
> thinking differently than you do.

Your myriad postings here reveals that would be true of you.

> You have a serious problem in discussing anything that
> is opposite to your own opinions.

Your own record here reveals that is true of you.

> Discussion of ALL SIDES of any question should be OPEN
> and NOT restricted to some little clique of elitists

You denigrate and defame, Len. On what basis do you make your decisions
about who to denigrate and defame?

> >See above, little wizended Lennie.
>
> Tsk. Attempts at name-calling. Improperly spelled.

Awwww, shucks. You snipped your comment where you went into the name
calling routine. I cranked it up when you started. You'll note that is
when I've always done it--in reponse to name calling from you.

> Try to concentrate on the SUBJECT instead of
> name-calling those with opposite opinions.

Why not take a couple of tablespoons of your own medicine. If it works
for you, then recommend it to others.

> The USA does NOT include Sierra Leone nor does it
> include Botswana. It includes Wheeling, West
> Virginia, but Wheeling is just one city out of
> thousands in the USA.

> That can't be amateur radio. U.S. amateur radio does
> not allow broadcasting. [see another thread largely
> of name-calling by anonymous geeks getting their jollies
> off]

I wrote nothing of broadcasting. I don't post anonymously.

> Tsk. "Get with the program" is a colloquial EXPRESSION,
> common in American English. :-)

There's another bold statement of the obvious. You're on a roll today
:-)

> Tsk, tsk. In 1963 I was working (in the USA) designing
> electronics for the Grumman Intruder radar pre-flight
> check-out set (Ku-band, portable battery-powered). Not
> a hobby and very much involved with microwave radio.

What's the "Tsk, tsk" for? In 1963 I moved from Hinton to Oak Hill,
West Virginia. I completed the ninth grade and began the tenth grade.
I began studying the guitar and passed my Novic Class amateur radio
license exam. I was awarded the Golden Horseshoe for being a top
student of West Virginia history. I had a paper route and paid for my
first amateur receiver through it. It's nice when we can share our
memories, isn't it, Len?

> >Well, this discussion has you.
>
> "Has you" what? Try completing a sentence properly.

I hate to disagree with a "PROFESSIONAL" but all the parts of a sentence
are there.

> >Nobody may force me to like you.
>
> Not a requirement, self-righteous self-professed
> ruler of ham.

That's my point. It isn't a requirement.

> Tsk. You are going to have to LIVE with the fact
> that many viewing your arrogant postings in here
> do NOT "like you."

Do you wish to take another informal poll? The last one didn't work
out very well for you.

> You MUST live with the fact that controversial subject
> discussion does NOT require capitulation to the
> opinions of yours...not even when you are an extremist

> in self-righteousness.

To heck with the tablespoon, Len. Here, just take a swig from your
medicine bottle.

> [supposedly the State Department does that all the
> time...called "diplomacy," something that you've NOT
> displayed in any posting in here]

I always treat bullying thugs like bullying thugs. You're a bullying
thug.

> >> The SUBJECT is
> >> (or should be) the discussion point...NOT the
> >> person or personality of whover YOU disagree with.
> >
> >Please try to remember that.
>
> I try to remember that, even when some ex-government
> employees use phrases like "little wizended lennie"
> as a response to me.

Go back and read your own stuff. Check what you wrote about me in the
lines preceding my use of that term. If when I was in the employ of the
Department of State and you'd walked into an embassy, I'd have been
courteous to you. I am under no such constraints now. You're a churl.
I'll treat you like a churl.

> >> U.S. amateur radio was NOT created especially for
> >> Dave Heil to enjoy.
> >
> >I figured that was the case when I became interested.
>
> Why did you lose that realization?

I never have. If and when you enter amateur radio, you'll likely come
to a similar conclusion.

> >Unlike you, I have a stake in amateur radio.
>
> A wooden one?

Wooden, PVC, metal--it is not something you have.

> You feel you MUST control what all newcomers are
> required to do to obtain an amateur radio license.

Time for another big swig of your own medicine, Len. Your statement
reflects exactly what you are attempting. You aren't involved in
amateur radio at all.

> Why is that? What compells you to attempt acting
> like you are "authority" on licensing?

More of your medicine, Len? What compels (not compells) you to act like
you are an authority on how amateur radio should be regulated? After
all, you aren't involved in amateur radio.

> There is only ONE authority on licensing radio
> amateurs in the USA and that is the FCC. You are
> NOT a member of the FCC.

You are NOT a radio amateur. You are NOT with the FCC (the ONE
authority on licensing radio amateurs in the U.S.A.). You continue your
twenty year quest to remove morse code testing in an endeavor in which
you play no part. You've lobbied for a minimum age in that same
endeavor.

> >Neither are you an FCC Commissioner or staffer.
>
> Tsk. You manufacture a strawman again. I've never
> claimed to control radio licensing in the USA.

If my statement is a straw man (not strawman), so was yours. Did you
notice the "neither" in my statement. It is a dead giveaway about the
portion you snipped.

> Since Dave Heil is NOT a member of the FCC, he does
> not have ANY authority on radio amateur licensing
> matters in the USA.

Since Leonard H. Anderson is NOT a member of the FCC, he has NO
authority in radio amateur licensing.

> [Sierra Leone and Botswana are
> not in the USA]

That's truly masterful, Leonard.

> >This week you've told us that you are not
> >interested in becoming a radio amateur.
>
> Irrelevant. Next week I may change my mind.

Masterful, Len. How quickly you saw my point!

> [next week I may be in a foreign country...such as
> Sierra Leone or Botswana... :-)]

You might as well go now, while you still have the time.

> Becoming a LICENSED radio amateur carries with it NO
> requirements of adopting a strict "life style" of
> amateurism or any obeyance of some old "code" of
> conduct published by a membership organization. One
> does NOT need to "take vows" or "swear an oath" to

> standards and practices of older times. Amateur
> radio is a de facto HOBBY. [it is NOT de jure a

> "hobby" in regulations but that is just legislative
> language cum political speak to satisfy a minority
> of over-inflated traditionalist amateur lifestylers]

You can stow it now, Leonard. This week you aren't interested,
remember?

> I am a professional in radio-electronics and have
> been one since 1952.

Irrelevant.

> I am also a hobbyist in many
> different phases of radio-electronics and have been
> so involved since 1947. I have been most fortunate
> to do work in many different areas of electronics and
> radio and have a personal fascination with nearly all
> aspects of that broad technological field.

More irrelevance.

> You insist on defining "radio" as ONLY that of radio
> amateurism...as YOU know it.

I've never defined "radio" here ever. You lie.

> Sorry, that isn't
> acceptible to the entirety of the radio-electronics
> world.

You don't speak for the rest of the radio world any more than you speak
for radio amateurs. You're simply a self-appointed advocate for change
in something in which you play no part. In short, you're another
California Crackpot.

> Neither does anyone HAVE to "demonstrate any
> interest" by becoming a LICENSED radio amateur FIRST.

FIRST? In all of your several decades of "interest" in amateur radio,
you've never taken the FIRST step of doing anything at all about it.
You're still on the outside. You're still not a player. You're still
pacing the sidelines.

> >How arrogant is the posturing of the type of personality which is
> >uninvolved in an avocation in which he plays no part as a participant
> or
> >regulator? Talk about the need to control...
>
> Tsk. The control-freak is angry at being called out
> on how he appears to all others? That is you, Dave
> Heil.

That simply can't be. I am a participant. You are irrelevant to
amateur radio.

> The First Amendment of the U.S. Constitution states that
> all U.S. citizens have the RIGHT to petition their
> government for the redress of grievances. That is NOT
> "posturing." It extends to EVERY law, regulation made
> by the U.S. government.

You've petitioned. Now what?

> The FCC regulates U.S. amateur radio. The FCC is the
> final authority on what is required to obtain an amateur
> radio license. The ARRL has NO such authority. Dave
> Heil has NO such authority...but Dave Heil postures and
> preens AS IF he did. Tsk, tsk.

Tsk, tsk, indeed. Come down off your soapbox, Leonard. The ARRL has
input. Sheer numbers and a long history play a part. If you don't like
it, set up your own lobbying group.

> >You aren't a participant in amateur radio. You have no stake in it.
> >You currently claim that you do not desire to become a participant.
> Yet
> >you attempt controlling of amateur radio.
>
> Tsk, tsk. Advocacy in eliminating the morse code test
> for any amateur radio license is "CONTROL?!?" :-)

Yes, it is an attempt to control the regulation of something in which
you are not involved.

> Sorry, control-freak Dave Heil, that's simply a REQUEST
> of a citizen, similar to tens of thousands of other
> citizens who REQUEST the same thing.

You've requested. Now what?

> Not only is the
> code test requirement old and out-dated, the FCC has
> stated as far back as 1990 that the code test does not
> matter to their purpose in determining whether any
> prospective amateur should be granted a license.

The morse code is widely used in amateur radio. The FCC said it would
await a consensus of radio amateurs on the testing issue. It appears
they've left you out.

> > You wish to shape it through
> >having regulations relating to morse code testing and the instituting
> of
> >a minimum age requirement for licening.
>
> INCORRECT. I've not pursued any "minimum age requirement"
> in U.S. amateur radio since making that SUGGESTION to the
> FCC in January, 1999, on the LAST page of a 14-page
> Comment on docket 98-143 (see date of 13 January 1999 in

> the FCC ECFS on that docket).

What's to pursue? You wrote it. You submitted it. You acted on your
belief, despite the lack of evidence that there had ever been a problem
with licensed children not obeying the rules.

> Tsk. A number of middle-aged PCTA extras keep bringing
> that up and trying to imply it is something like Treason
> Against The State!

I've never thought it treasonous, only stupid and short sighted.

> I've dropped that request, haven't
> followed it through with REAL authorities, yet some
> self-appointed "guardians of their turf" insist that I
> am "constantly advocating age requirements!" :-)

You can't drop it. It was written and submitted.

> Yes, I advocate an elimination of the morse code test.

> Such will NOT affect ANY who are ALREADY LICENSED in
> U.S. amateur radio! It does NOT affect their ability
> to use what they ALREADY HAVE.

It has the potential to change the demographics. That effects every
current HF licensee. Sorry, your argument doesn't hold water.

> >No, it isn't a CLUB at all, Leonard H. It is open to all races and
> any
> >of the several genders.
>
> Tsk. You FAIL to recognize the difference between
> de facto from de jure.

> licensing...against blacks (african-americans).
> [that's de facto] Observation, casual to studied,
> of all amateur radio hobbyist photographs in
> amateur publications of the last half century will
> demonstrate that de facto condition.

I implore you to write your senators, your congressman, the FCC and make
a case. Laughter is good for the soul.

> There is a milder "discrimination" (of a sort) against
> females in LICENSED amateur radio. That's also been
> OBVIOUS but hasn't been much publicized since Harker's
> informal study presented on the ARRL website.

As above, I urge you to write, e-mail or call your elected representatives and to contact the FCC. You might even want to involve the editor of your newspaper.

> >Is it your view that it is my personal responsibility to recruit
> blacks
> >into amateur radio whether they care to participate or not, Lennie
> >Anderson?
>
> Tsk. I just asked a question.

Tsk. You implied that I have an obligation to call for changes.

> Can you EXPLAIN the
> de facto condition of U.S. amateur radio being a
> WHITE MAN'S CLUB?

I might take a stab at it if you can explain why "EXPLAIN" and "WHITE MAN'S CLUB" are capitalized?

> >What does your comment have to do with my being appointed by you to
> >recruit minorities, Lennie Anderson?
>
> Well, DAVIE Heil, I've NEVER taken on some self-
> appointed "authority" to "tell you what to do!"

You just did, Lennie The Uninvolved.

> [I cannot perform miracles...]

No kidding.

> Considering your manner of "recruiting" ANYONE, you
> are rather deficient in such a "recruiting" task.

How many folks have you gotten into amateur radio, Len?

> >Amateur radio is administered by the Federal Government.
>
> Tsk. It is REGULATED by the federal government.

What part didn't you understand?

> >Minorities may participate. Participation isn't
> >mandatory.
>
> Tsk, Tsk, TSK! DAVIE Heil has insisted and insisted
> that ONLY those who "participate" in rule-making of
> amateur radio MUST ALREADY have an amateur radio

Oh, perhaps you meant that uninvolved minorities should be regulating amateur radio. I see.

> DAVIE Heil is acting the hypocrite.

LENNIE Anderson, face painted blue, is howling at the moon.

> >Your de facto WHITE MEN'S CLUB isn't de fact at all.
>
> [baaaad imitation of Amos or Andy... :-)]
>
> Tsk. You keep mixing up "de facto" with "de jure."

Why, did you mean to write "de jure WHITE MEN'S CLUB"?

> Those differences have been explained to you. Try
> to keep up with your self-education.

When you write, "de facto" I can only believe that you mean "de facto".
If you mean "de jure", you'll have to so state.

> >Even you, could be a participant, little wizened Lennie.
>
> Tsk. More of the "diplomatic charm" picked up while
> "living in Sierra Leone or Botswana?" :-)

...just another tweak of your nose in response to your (snipped)
rudeness.

> >I'm sure that in retrospect, it seems idiotic to you now. I'll bet
> you
> >wish you'd never made it.
>
> No problem to me. I may say the same thing again. Or,

> wizened Lennie?" :-)

Quit snipping your own insulting terms or I shall find it necessary to
repost with the snipped portions added.

> "Well known claim?" :-)

Yes, your claim to the "Extra right out of the box" is as well known as
your "sphincter post" and N2EY's superb profile of your likely actions.

> No problem to me. I may say the same thing again. Or
> not.

You might as well. It'd be hard for you to look any worse.

> I've taken and passed MANY "tests" in my career of a
> half century in radio-electronics. MOST of them were
> much more difficult than ANY amateur radio "exam"
> given since 1952. I've tested, operated, DESIGNED
> radio equipment of equal and FAR-more-complex nature
> than amateur radio equipment.

You've no doubt tested, operated and DESIGNED radio equipment of far
more simple design too. I'm happy that the test taking went well for
you. You'll still need to pass some additional exams if you want to play
in the amateur radio playground.

> No problem to me to
> take a little hobby-radio test. I just don't choose
> to do so this week. :-)

It'll be far easier now that the morse exam is down to that 5 wpm level.
Don't underestimate that Extra exam or the others you'll need to take to
get to that level.

> I'm in a computer network newsgroup. That is NOT
> amateur radio activity. No license is required. Yet
> DAVIE Heil (who likes to beat up on "little wizened"

I was doing a bit of SWLing this afternoon on the way home from work and happened to catch "The Real Amateur Radio Show" (hosted by the TimTron, WA1HLR) on WBCQ - 7415 khz.

>From what I gathered, the folks at WBCQ donate airtime to Tim for his show - which is used to discuss ham-radio-related topics, propagation, technical matters and so forth.

'BCQ would be a natural to host OGL's broadcasts; at ~250kw ERP on each of their assigned frequencies they're bound to reach a large SW audience.

Todd might wish to call the owners of the station (Becker Broadcast Systems, IIRC) and see about getting some airtime donated...

But that would go against Wannabe Rule Number One which is that one
must do it for oneself, even if it is much cheaper or much more
legal to use purchased or donated airtime.

He probably pays for the time...it normally cost on the shortwave bands
between $50 to $100. I'll stick with were I'm at.

Tell that to CBS and the other broadcasters who after 70 years have been hit with monetary forfeitures which, although miniscule in comparison to the dollar amounts that they normally deal with, are a heck of lot higher than things were in the past, and could be much higher in the future now that The Congress added a bunch more zeros to the amounts, and this new Chairman wants to put cable and satellite broadcasts in the same pot.

Whether the FCC should or should not be doing it is not the question here.

Well, like i said, MSYS and FBB are good programs but they are old and there is software out there that is more "user friendly" amateur only have to change the coding in them to work for ham radio. I'm not suggestion that this be the "National" or "International" standard I'm only suggesting this as an "alternative" to what is being used now.

or
> form?
Look at Echolink, people still use HF but there's also echolink, as a alternative. We uses to have a guy on my repeater from California who would connect to my repeater through echolink, Because the nursing home he was staying in wouldn't let him put up any antenna, thus that was an alternative means to use amateur radio. This system would "benefit" radio as and alternative to the normal 1200 baud packet.

> I take it that you have never run a packet BBS, correct?

I've ran both MSYS and FBB for four years on two computers. I was big
in packet from 1992 to 1997/1998

>

will
> gladly do without, especially if that content will land you in legal
> hot water.

Well the reason I brought up the file size deal is; for BIG files even
on the internet through P2P takes a long time even with high speed DSL
it still takes a while. on this system we really don't want people
tighen yp the frequency because he's trying to download a 700 MB file
(like a Movie) The filter system which would block these "large" would
be in the software and would be unchangable.

> Further, a number of PBBS SysOps incorporated I-net-based forwarding
of

> multinational.

That's were hams would have to be the network both on the radio, and on
the internet from scratch. again the only ones allowed to use the
software and the network would be the amateur radio operators. I'm only
one amateur, but I believe that an amateur radio station is responsible
for their what content they spew out and if they violate any laws it
will be easy to track down because they will be using their callsign. I
would also like to point out that federal law does not ban this type of
programs on the radio; amateurs are allowed to experiment and no
offense but it seems to me that you wan to keep the old system and
don't want any new ideas or programs which would conflict with the
status quo...or maybe i'm reading you wrong. but just remember that no
system is fail proof.

no
> faster than 1200bps.

it would be 1200 baud on 2 meters but amateurs still have I believe 2.4
GHz and some of that wireless stuff will go as high as 10Mbps which
would be better because it would remove the bottleneck.

> The current system, as is designed and implemented, works fine. Write
a

I've
> stated before - a solution to a problem which simply doesn't exist.

well, like i said it seems to me your like these guy on here....you
don't want change....and like I stated in a previous thread without
change ham radio will not grow.

Oh but weren't we blaming all that on the "Bush Religious Fundamentalist
Zealots" just a few weeks ago. You change your mind like people
change their underwear. Same bureaucrats same agency, just different
bells and whistles. Same bureaucrats sleeping at the same desks they
been comatose at for the last four decades.

>From Hal Turners Website...

STATE JUDGE HOLDS HIMSELF ABOVE
UNITED STATES CONGRESS!
RULES FEEDING TUBE CAN BE REMOVED FROM BRAIN DAMAGED TERRI SCHIAVO
DESPITE SUBPOENA FROM UNITED STATES CONGRESS ORDERING HER APPEARANCE IN

U.S. CAPITOL
Florida Judge says he "knows of no cogent reason" for Congress to
involve itself."
It's not for him to know. It is for him to obey. This guy is a little

too impressed with himself. He needs to be knocked down a few pegs. It

is a federal crime to do anything to impede, harm or disuade a person
from appearing before Congress. Cutting off Terri Shiavo's food and
water is a direct affront to the sovereign authority of Congress.
If he can scoff at Congress and get away with it, so can I. I will
wait to see if the judge experiences any consequences for his acts in
defiance of congress. If he goes unpunished, then I will proceed from
that point with the idea that I can ignore Congress too.

EYE WITNESS: TERRI SCHIAVO CRIED WHEN TOLD THEY WERE TAKING THE FEEDING

TUBE OUT AND YELLED "I WANT TO LIVE"
Folks, it is beginning to appear that it may be necessary for a group
of heavily armed men to over-rule the court by forcibly removing Terri
Schiavo from that hospice and from the State of Florida in order to
save her life. I advocate that course of action as a last resort.

Oh, many of us WANT change...but not at the expense of the -RADIO-
portion of the hobby. Internet =! Radio. That fact has been pointed out
numerous times by those who design, maintain and operate the existing
packet radio network.

Do amateur radio operators need a high-speed packet-radio
infrastructure? Probably. Moreover, one can be built to exclusively
utilize RF as its transport mechanism; the Internet need not enter into
the picture whatsoever.

Once it's built and in place, the question arises: What to do with this
network? 10MBPS or higher would give excellent throughput for
high-volume traffic forwarding...which is about all you're going to be
able to -legally- do with it. (See previous remarks re: copyrighted
software, et al. The sentiment of most SysOps involved will be: It
ain't passing through my station. Period. ANY file other than
plaintext, that is...and rightly so.)

" That's were hams would have to be the network both on the radio, and
on
the internet from scratch. again the only ones allowed to use the
software and the network would be the amateur radio operators."

Again - how will you control access to this system? There's also the
matter of network security - put such a "node" on the Internet and I
guarantee that it will be hacked as soon a vulnerability with the
system is found.

"The filter system which would block these "large" would be in the
software and would be unchangable. "

Would you filter based on size alone? Actual content (type) of the
files? MD5 hash? I (and every other comptuer-savvy individual on the
planet) can easily bypass any of these schemes by manipulating the
files in certain ways...if the filtering is done via database, it would
be enormous and a true PITA to keep up to date. Thus, it would be
dropped in short order.

Looking at the whole proposal from a great height, it closely resembles
the existing AirMail/SailMail PACTOR systems...which operate under an
entirely different set of rules and regulations than does amateur radio.

I made a post over 2 years ago after Lennie made more of HIS dispicable "Nazi" allegations and pointed out that it was conduct like that that spawned the types of acts that Brain has taken out of context and used to insinuate that I made "dispicable veiled threats".

What I did was to make refrence to stories that had appeared in the press that told of stalkings, vandalism and acts of terrorism against families after aggrievous online behaviour...Moments of terror on innocents because of the callous and selfish behaviour of others...Sometimes thier own loved ones.

These stories are not new. They've been around almost since the Internet went public. There are stories almost every week of the very same circumstances occurring coast to coast.

Brain has continued unabated, however, since HIS not-so-veiled insinuations of "threats" usually get buried in other threads.

Not any longer.

Here's your chance, Brian...Put up or..well..prove me right once again...Provide the specific posts where you claim I did those things you cite above.

I say you've been lying. I say that becasue I know that no such post exists.

Your turn! Try to snivvel out of this one, Brian!

>>I<< specifically stated that K1MAN has a track record of misconduct issues to warrant reconsideration of a renewal in October 2005.

YOUR post simply acknowldeged what I said...he's got a track record of misbehaviour that continues today.

Other threads in this NG have also that he's returned to his previous patterns of "operation".

Just like I said.

A Marine Sergeant Major is waiting for a plane in a busy terminal when these two pretty young things sit down across from him.

Although impressed by all the ribbons, stripes and hashmarks, one of the young girls was intent on giving him a ribbing...

She walked over to the Marine and said, "Sir, I bet you've been around the world a lot, haven't you?" she asked.

"Yes Ma'am, I have" the Marine replied courteously but appreciative that something was up.

"Well...when was the last time you went 'around the world' with a girl as young and pretty as me?" she teased.

"1953, Ma'am" was his quick response..

"1953..?!?! Wasn't that an alwfully long time ago?" she replied in shock.

"Not really..", he replied, "It's only 2115 now!"

She went back to her seat and didn't say another word.

I take no warnings, instructions nor advice from you.

On the other hand, YOU had better take some advice.

Your eyes are not those of a crazed lunatic. Nor are mine.

But your eyes ARE those of a pathological liar.

One day, your son will want to know more about his father.

He'll put "Brian P Burke" into Google (or it's successor), and
guess what he'll find?

Reams and reams of YOU getting reamed for lying over and over.

Have a nice day.

Steve, K4YZ

CA.

What's to explain?

Why don't YOU explain, Lennie...?!?! Tell us of all those hooded
guards standing at VE sessions to keep the unwashed masses at bay.

Oh...I forgot...You've never BEEN to a VE session...My bust.

Lennie...YOU are the one alleging some sort of conspiracy to keep
women and minorities out of Amateur Radio.

Dave clearly and correctly cited that CW is a field leveller.

It is.

> What do you do on hearing that the other party is
> female, raise the beep pitch with your BFO knob?!?

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley,

CA.

Seems the one taking things out on others is you, Lennie.

Seven years worth.

> Poor guy is looking for love in all the wrong
> places. Tsk, tsk, tsk.

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley,
CA.

I bet he's finding it, though.

How's the "Little Lady" these days, Lennie? Keeping the Geritol
hidden from her?

> GET WITH THE PROGRAM. A discussion of anything
> controversial WILL have all sorts of people "you
> don't like."

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley,
CA.

Funny...with a very small exception...(You, Brain, your anonymous
alter egos), there are no really unlikeable folks here, even those with
"differing opinions".

And that "small exception" are those who have been repeatedly
caught up in lies, deceit and mistruth.

> Sunnuvagun! [as Hans likes to say...:-)]

Indeed.

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley,
CA.

> Here's a newsflash, sweetums, it is NOT necessary

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley,
CA.

And people CAN be "agreeable" even when they disagree on a
subject. Happens ever day...EXCEPT with people who insist on
analogizing thier "opponents" to the Nazis, etc. etc. etc.

> U.S. amateur radio was NOT created especially for
> Dave Heil to enjoy. Dave Heil has NO more control
> over ham radio than I do...believe it or not!

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley,
CA.

Actually, he has a far greater control over it.

That's because Dave has a few things you DON'T...Like reputable
character, practical experience, and peer respect.

Did I mention practical experience...?!?!

> Dave Heil is NOT an FCC commissioner or staffer,
> does NOT "rule" anything but lines on paper pads.
> All of Dave Heil's "tenure" in amateur radio

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley,
CA.

And for the last 32 1/2 years that I have been a licensed Amateur,
(that's to say from my scope-of-experience) that there is not a single
barrier to ANY person obtaining a license should he/she choose.

> Davie Heil will NOT address the de facto WHITE MEN'S
> CLUB other than to misdirect into personal denigration
> against another. To me is going to come back with that

CA.

> Failure is NOT an option, Davie.

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley, CA.

A prediction: I predict that Lennie Anderson's last year on RRAP has arrived.

A good chance I'll be wrong...However when it comes to Lennie I've been right far, FAR more times than I've been wrong.

Stay tuned.

> TRY to get back ON the SUBJECT...WITHOUT resorting to
> all the alleged "faults" of another person. I don't
> think you can do it.

"My only purpose here is to debate the Morse Code TEST issue".
>From the chronicled online lies of Leonard H. Anderson of Sun Valley, CA.

> LenAnderson@ieee.org

I am sure the IEEE is soooooooooooooooooooo proud of you.

Due, in no small part, to all those wonderful, inciteful papers you wrote while you were a "regular hours engineer". (no, I did not mispell
'inciteful')

Lennie...you have one H U G E advantage over your puppetboy sidekick...No offspring to look you up on a search engine someday only to find out what a deceitful, mean-spirited liar you'd been all those years that he had been "looking up to" him...

Interference has nothing to do with his "content"(as I've repeat over and over his content except Pecuniary interest is LEAGAL!. The same go mine, as long as it's amateur related it don't matter if it's opinionated or not it's legal.) and as for Pecuniary Interest, all he has to do is stop advertising his website. But I think your missing the point here...these are NOT NAL or Final "ORDER" from the FCC they are only warning letters, which basically don't mean shit.

Hey all! I found an excellent mp3 music website that is highspeed and has a huge archive and selection. And from what I can see there are many new albums listed for download.

It's better than kazaa and WinMX! It's free and there are very few ads. Check it out before they get shutdown!

You're absolutely right this time, Brain. I know EXACTLY what I said and YOU know EXACTLY what I said...also HOW I said it and in what CONTEXT I said it.

THAT is EXACTLY why you made your "non-response" response in another thread instead of this one where it's right out in the open for all to see.

Thanks, once again, for helping me prove what a liar and COWARD you are, Brian P Burke.

Steve, K4YZ

Nope.

I've not threatened you or your family. You can snort and stomp
in the dirt all you want to, Brain...Won't do you a bit of good.

I HAVE asked you what are you going to do when your son get's
inquisitive years from now and starts to research what kind of guy
"Dad" is....

YOUR words and YOUR actions will be there for him to see. Don't
fear me, Brian...Fear what he will find when he get's old enough to
start snooping around on his own...

You won't always be there to control what and where he "surfs".
Imagine some school project where they tell the kids to learn about
their family tree, etc. Numma Wun Son types in "Brian P Burke" to the
search engine, and Wa LA!

YOUR words, Brian...

YOUR deeds...

And I won't be within 500 miles of anyone you know...

Sucks to be you.

Steve, K4YZ

Yes, but most people outgrow the pirate radio bug in college.
If it's $100 an hour, and the FCC fines are around $11K, that
would buy you 110 hours of legal air time in the BC SW station.
And have better coverage. Few pirates can muster 50KW of RF.

Oh *bull-bucking-shit* in a texas cowpasture!

To quote numonet in alt.slact, who put it rather quite well:

"This whole thing is black humor. One one hand, you've
got a group willing to spend $20M of taxpayer money to
keep a someone with the brain of a left foot alive,
which would conclusively prove that Darwin was wrong
or something. Given their druthers, they'd keep that
feeding tube in until she bloated up from undigested
goop and exploded, which would be "the will of God." "

"And on the other hand, you've got another group that is
just about willing to go into her room and put a pillow
over her face while she screams "Don't kill me! I'm not
dead yet! My husband is trying to murder me! Somebody
please give me food!"; while her husband is desperately
trying to convince the doctors that it's just instinctual
babble and if someone would just let him have a handgun
this could all be over in a minute or two."

Now that Kathleen Anne Quinlan girl, they had to break her
spine to get her to shut up.

Well said N-M!
Let this bint die.
She will be better off for it and the xian luddites will go apeshit nuts
when she finally keels over like a light crusier with a hole in the
waterline...

Liberty Net is on 3.958 LSB - ON RIGHT NOW - with over 20+ check in's!

[Sat 19 March 2005 10:00 PM Eastern 3.958 LSB]

Looks like it's going to be a looooong Net this evening.

Best to get a BIG BOWL of POPCORN, put an extra
log on the fire, and enjoy some real Americans talking
real issues on the Shortwave and Ham bands all night long!

TUNE IN FOLKS...THE NET IS RUNNING RIGHT NOW !!!!

Oh, many of us WANT change...but not at the expense of the -RADIO-
portion of the hobby. Internet =! Radio. That fact has been pointed out

numerous times by those who design, maintain and operate the existing
packet radio network

The internet is there so use it. Let me tell you a story and this is
the truth. In Taylorville there is three repeaters, One owned by the
local club, one owned by N9FU and one owned by me. Out of all three
repeaters the one that gets the most use by people is mine. The reason,
IT'S HOOKED UP TO THE INTERNET. without that internet connect that
repeater would be just as dead as the others. NO ONE, and believe me
there's a lot of people who use our system (within one month we had
over 400 people connected to our system, that's not counting people
reconnecting....we have the logs to prove it) and not one of those
people bitched and complained about how the internet and radio
shouldn't interact. instead, the praised the idea. The people who bitch
about the internet and radio should interact is either 1. Are too old
of an traditionalist and think they shouldn't interact or 2. Don't
understand it, thus fear it and tries to discourage others from doing
it. (most of both groups are IMHO are on QRZ)

Do amateur radio operators need a high-speed packet-radio
infrastructure? Probably. Moreover, one can be built to exclusively
utilize RF as its transport mechanism; the Internet need not enter into

the picture whatsoever.

true, as a matter of fact the system I'm purposing would have both
internet and RF high speed systems....I set te system up into Phases
(which I call Layers..The part you read on my site was part of Layer
01)

Once it's built and in place, the question arises: What to do with this

network? 10MBPS or higher would give excellent throughput for
high-volume traffic forwarding...which is about all you're going to be
able to -legally- do with it. (See previous remarks re: copyrighted
software, et al. The sentiment of most SysOps involved will be: It
ain't passing through my station. Period. ANY file other than
plaintext, that is...and rightly so.)

First off, as a copyright holder, which I am; I would like to point out
that there is some materials that are in one of the following
catagories. 1. FREEWARE: Software that is free to disturbute. 2. FAIR
USE: which is a small portion of a copyrighted material for comment,
educational, critizing, and parody. 3. Public Domain: works that are no

longer copyrighted (currently anything from 1922 on back is in public domain) Public Domain are also works the the creator has put into public domain, either by the own admission or by failing to renew their copyrights (for example the audio from a Greatful Dead concert is in Public Domain and may be distributed as long as that person is making money. The 1968 cult classic Night of the Living Dead is in Public Domain and may be distributed) ALL three catagorize above can be used on the system without the copyright owners permission. But the whole Idea is to make a user friendly system instead of typing ALL that crap like you have to in the BBS systems. Instead it would use a windows based system, the software would automatically connect you to the system (I would like to out at this time BBS could be set up the same way, without internet connection) and instead of typing LL 20 or L @USA you have a search box and type in what exactly what you looking for. It time to move away from this text based crap and move into the 21 century.

Again - how will you control access to this system? There's also the matter of network security - put such a "node" on the Internet and I guarantee that it will be hacked as soon a vulnerability with the system is found.

Just Like echolink does...when a ham first signs up and tries to connect to the nodes. The system will search the FCC database to make sure the callsign is vaild. As for "Hacker" yes, there could be some however the odds of a hacker trying to hack into it is off the scale. Echolink uses nodes on the internet and have not, to my knowledge anyway has ever been hacked. Not only would hackers be in trouble with the FCC but there are some tough hacker laws out now so they would be facing two charges.

Would you filter based on size alone? Actual content (type) of the files? MD5 hash? I (and every other comptuer-savvy individual on the planet) can easily bypass any of these schemes by manipulating the files in certain ways...if the filtering is done via database, it would

be enormous and a true PITA to keep up to date. Thus, it would be dropped in short order.

It would be based on size. A normal text file can be anywhere from 1K to 1M , while Music in a MP3 format is 2 to 3 MB, Movies run between 200 to 700 MB (depending on their format MEG, AVI, ect, ect.) The system I'm purposing is document system either a TXT, RTF, PDF, and all the other text formats. the idea is to create a virtual library which ham can exchange idea's and read and explore new idea (except those in 4 land....they can't read)

Looking at the whole proposal from a great height, it closely resembles

the existing AirMail/SailMail PACTOR systems...which operate under an entirely different set of rules and regulations than does amateur radio.

I've never heard of them......I do know amateurs are not restricted on what they can experiment in.

You're the one with the "homosexual innuendo" problem, Brian...

"Being in bed" with somoene is a common phrase to mean they share
the same goals/intent/purpose. This has been discussed with you
before.

However if you're "feeling the heat" from the phrase, may I
suggest that perhaps you have some unaddressed repressive issues that a
professional may be able help you to overcome (or perhaps open that
closet door for you...?!?!)

Come on now, Brian...where's the "slashed tires" et al post you
keep insisting is out there...?!

Steve, K4YZ

Steve, K4YZ

PS:

As you no doubt notice, Brain, I am re-posting the replies to
comments in other threads here as well as in the thread in which they
originated.

The reason for that is so we can keep your misdirections and
non-compliance with requests for facts and quotes out in the open.

You keep lying and dodging, I'll keep them right under your (and everyone else's, including your kinfolks) nose.

Steve, K4YZ

HERE'S ANOTHER.......

April 14, 2004

Mr. Glenn A. Baxter
RR 1 Box 776
Belgrade Lakes, ME 04918

RE: Amateur Radio license K1MAN

Dear Mr. Baxter:

This letter explains in what ways your Amateur station has come into compliance with Commission rules since our letter to you of January 29, 2002; and notifies you of two areas of operation that, if not corrected, will lead to enforcement action against your license and/or designation of your renewal application for a hearing.

By letter dated January 29, 2002, the Commission notified you that your understanding of various Amateur Radio Service rules was incorrect. We outlined your apparent misconceptions regarding station control, publishing a transmitting schedule and how that related to interference, threats made to licensee complainants, including threats made with so-called "felony complaint affidavits", broadcasting and broadcasting of tape recordings and telephone conversations.

The January 29 letter detailed complaints received by the Commission, and explained that your method of station control, i.e., "a timer from Radio Shack", did not achieve compliance with the Commission's Rules when you were not present at the control point for your station and, therefore, did not satisfy the Commission's Rules regarding automatic control of a station. We explained to you that to comply with the Commission's Rules you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting when your station is locally or remotely controlled; and that if the station is controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments).

By letter dated March 4, 2003, the Commission's Boston Office notified you that Commission monitoring and numerous complaints filed with the Commission indicated that the problems outlined in January 2002 had not been corrected. The letter stated that your Amateur station was apparently being used for broadcasting various programs having nothing to do with Amateur Radio; and that transmissions from your station were

being used for deliberate interference and for communications in which you apparently had a pecuniary interest. The Boston Office letter stated that transmissions started and ended erratically, were sometimes repetitive and abruptly ended with no identification as required by Commission rules, and that such operation indicated that the transmissions were not under proper control of a licensed operator. The letter noted also that you continually broadcast notices of so-called "felony complaint affidavits " that you claimed to have filed with the United States Justice Department against other Amateur Radio licensees whom you perceived to have interfered with your broadcasts, or refused to relinquish their operating frequency to you.

The Boston Office's letter stated that transmissions from your Amateur station included references to a degree program and directed listeners to your website that advertised an "American Radio School Technician Degree in Electronics" for "$299.95". On that web site you solicited donations for radio equipment, advertised a credit card, and solicited donations and advertised for "IARN" and "AARA". The letter from the Boston office pointed out that such use of your station was in apparent violation of Section 97.113(a)(3) of the Commission's rules, which prohibits "Communications for hire or for material compensation, direct or indirect...." and "Communications in which the station licensee or control operator has a pecuniary interest..."

The letter from the Boston Office requested that you provide substantial additional information about the operation of your station, including submission of a log detailing the information on a weekly basis until further notice. In January 2004, the Boston office notified you that you could discontinue the log submissions, and referred the case to this office.

We have reviewed the information you submitted, as well as numerous complaints filed against your station. Additionally we have reviewed tape recordings made by Commission personnel of your transmissions at various times during 2003 and 2004 subsequent to the Boston Office letter of March 3, 2003.

It is the finding of this office that you are, with some exceptions, generally in compliance with the Commission's rules in the Amateur Service related to broadcasting and information bulletins, and we explain as follows. Broadcasting is prohibited in the Amateur Radio Service, with some exceptions. Section 97.3(a)(10) defines broadcasting as "transmissions intended for reception by the general public, either direct or relayed." One-way transmissions are limited in the Amateur service, but an exception is allowed in Section 97.111(b)(6) for "Transmissions necessary to disseminate information bulletins."

Information bulletins are defined by Section 97.3(a)(26) as messages "directed only to Amateur operators consisting solely of subject matter of direct interest to the Amateur service." There are no specific time limits placed upon information bulletins by Commission rules. A review of your programs at random times since March 3, 2003 indicates that

your transmissions were directed to Amateur Radio operators, not to the general public, and that the individual bulletins were related to the Amateur Radio Service. The only notable exception was the offering of a reward for information leading to the identity of parties making threatening telephone calls to you.

The station control problems outlined to you in warnings from the Commission appear, with minor exceptions, to have been corrected. During the monitoring period your station abruptly ended transmission with no identification in one instance, and started transmissions in mid-sentence in another instance.

There are, however, two areas in the operation of your Amateur station that must be corrected in order to avoid enforcement action and/or a designation of your renewal application for hearing to determine if you are qualified to remain a licensee. These are: 1) deliberate interference resulting from your commencing operation on top of ongoing communications, in violation of Section 97.101(a) and (d); and 2) use of your Amateur station for pecuniary interests, in violation of Sections 97.113(a)(2)and (3).

Regarding deliberate interference, we receive continuing complaints, and our monitoring verifies, that your transmissions start up on top of existing communications of individual licensees as well as nets such as the Salvation Army Team Emergency Radio Network. Such operation constitutes deliberate interference. Stations engaging in ongoing communications are not obligated to stop transmitting when K1MAN wants to start transmitting on a frequency, and complainants are so advised by the Commission. You appear to believe that the publication of a transmission schedule gives you the right to begin transmitting on a certain frequency at a certain time, even if the frequency is occupied. It does not.

All frequencies in the Amateur Radio Service are shared--no frequency is assigned for the exclusive use of any station, and your Amateur station has no greater rights to a frequency at any particular time than any other Amateur station. Section 97.101(d) of the rules prohibits an Amateur station from willfully or maliciously interfering with any radio communication or signal. Moreover, publishing a schedule is merely one of the several conditions necessary for the control operator of a club station to accept compensation for transmitting information bulletins, pursuant to Section 97.113(d) of the Commission's rules. Your station K1MAN, however, is not a club station.

Regarding use of an Amateur station for pecuniary interest, we note that your Amateur Radio program transmissions regularly advertise your web page at www.K1man.com, and on those pages you advertise items for sale by the American Amateur Radio Association (AARA), including T shirts, hats and a "Technician Degree Diploma". You advertise the sales commissions and "overrides" that your State Directors and Section Managers can receive, and detail ways in which your Section Managers can earn money by recruiting members, selling hats, name badges or T

shirts.

Section 97.113(a)(2) prohibits communications for hire or for material compensation, direct or indirect, paid or promised. Section 97.113(a)(3) prohibits communications in which the station licensee or control operator has a pecuniary interest.

We remind you that any attempts to threaten or intimidate Amateur radio licensees operating on the Amateur bands will reflect adversely upon your qualifications to remain a Commission licensee, and would be the subject of a license revocation or renewal hearing. By letter dated December 11, 2001, you were warned against the sending of your so-called "felony complaint affidavits" to various Amateur Radio licenses that you perceive to either cause interference to your station or which do not relinquish to you the frequency on which they are operating.

Complainants were advised by the Commission to forward any such "affidavits" they received to the Commission, and that they could otherwise be ignored. The United States Attorney for your jurisdiction also warned you that the mailing of such "affidavits" is contrary to law. Apparently you have discontinued those threats. We also remind you that, in regard to the taping and broadcasting of telephone calls, you must comply with applicable state laws.

In conclusion, failure to correct the deliberate interference caused by K1MAN, and the continued use of K1MAN for pecuniary interests, will lead to enforcement action against your license. Either would be sufficient to designate your renewal application for an evidentiary hearing to determine if you are qualified to remain a Commission licensee.

An adverse finding in regard to threats to complainant licensees, or violation of state law regarding recording and broadcasting telephone conversations, would lead to enforcement action against your license and would be sufficient to designate your renewal application for an evidentiary hearing to determine if you are qualified to remain a Commission licensee. You would have the burden of proof in such a proceeding.

You should be aware that in 1990, the Commission revised its character qualifications policy, expanding the types of non-FCC-related misconduct that it would consider as bearing on licensee or applicant character qualifications (Policy Regarding Character Qualifications in Broadcast Licensing, Policy Statement and Order, 5 FCC RCD 3252 (1990) (Character Policy Statement), recon. granted in part, denied in part, 6 FCC Rcd 3448 (1991), further recon. granted, 7 FCC Rcd 6564 (1992). The Commission concluded that "a propensity to comply with the law generally is relevant to the Commission's public interest analysis, and that an applicant's or licensee's willingness to violate other laws, and, in particular, to commit felonies, also bears on our confidence that an applicant or licensee will conform to FCC rules and policies.

The 1990 Character Policy Statement applies to Amateur Radio licensees just as it does to all other FCC licensees (See, e.g., Herbert L. Schoenbohm, Decision, 13 FCC Rcd 15028 (1998), recon. denied, 13 FCC Rcd 23774 (1998), aff'd in part, dismissed in part sub nom. Schoenbohm v. FCC, 204 F.3d 243 (2000), cert. denied, 121 S. Ct. 405 (2000); Leslie D. Brewer, Order to Show Cause, Notice of Order of Suspension, Notice of Opportunity for Hearing, and Notice of Apparent Liability for a Forfeiture, 16 FCC Rcd 5671, licenses revoked, 16 FCC Rcd 12878 (2001).

Accordingly, we will continue to review the operation of K1MAN in light of the issues outlined above.

CC: FCC Northeastern Regional Director
FCC Boston Office District Director
Honorable Paula D. Silsby, United States Attorney, US Department of Justice, District of Maine
Timothy D. Wing, Assistant U.S. Attorney, U. S. Department of Justice, District of Maine

Excuse me?

WHAT college are you about to graduate from?

I bet they are proud of you, Todd.

If I were you, though, I'd get my money back for whatever English
courses you enrolled in. They obviously failed.

Interfernce is one thing but the content of the station is
another....1. I'm not interferning with any station, 2. I'm not
recording any telephone calls, and 3. I'm not doinbg anything of a
Pecuniary Interest, my programsm are only directed to the amateur radio
service and thus, legal!!

"Bunkbuddy" is a different phrase than "being in bed with."

And if you wished to say that Len and I have the same goals, intent,
and purpose, then you could have said that. Instead you give us
inuendo and obscure your actual goal, intent, and purpose. Or have
you? I think not.

> However if you're "feeling the heat" from the phrase, may I

And you say you don't engage in homosexual inuendo?

You lie.

I asked how not giving someone lumps can make them the antagonizer.

Apparently K4YZ doesn't know.

Can any of the K4YZ apologists help him with this?

You're leaving something out, Steve. You do that when you're trying to worm your way out of something.

You suggested that you should have "equal time" with my son. I suggest that you don't even try.

I've left nothing out, Brian.

Allow me to reiterate:

QUOTE:

"I've not threatened you or your family. You can snort and stomp
in the dirat all you want to, Brain...Won't do you a bit of good.

I HAVE asked you what you are going to do when your son get's
inquisitive years from now and starts to research what kind of guy
"Dad" is...

UNQUOTE

None of that has changed.

By making sure that I prominently address these threads and keep
YOUR lies and YOUR misdeeds up front, I can assure you that any claims
of "whacko" you may make to your son about me will be off-set when he

gets a chance to see what you were REALLY like.

You can keep making all the "whako", "crazy" and "nuts"
allegations about me you want to, Brain But the threads all eventually
funnel backwards to some beginning, and he WILL see just how assinine
you acted in public.

Sucks to be you.

So far, other than refusing to tell you the nature of my military duties, you have nothing to "back up" that assertion, Brain.

And the reason I don't discuss THOSE matters with you is that the time I DID discuss with you (in private e-mail), YOU violated my trust by bringing those private e-mails to the NG contrary to your agreement to not do it.

Now...How's your kid gonna feel about Dad acting like that???

That's not homosexual innuendo, Brian.

YOU are the one who is constantly bringing up homosexuality. You
then try to re-direct the conversation in such a way as to deflect the
comments away from you, but it only makes the act even more glaring.

So how do you know you are not interfering with anyone since you
are making one-way transmissions?

And what are you doing about collecting a rebate for the English
portions of your soon-to-be-finished "college" education?

> This by the way is a warning letter.

Yep. It sure was. And it was proof of exactly what I had been
saying about Baxter's track record of misconduct on the air and his
frequent run-in's with the FCC.

At some point in time the camel's back will have exceeded it's
load carrying capability...then plop...straw all over the place...

So far your rants have only substantiated EXACTLY what I have said
about parallels between you and Baxter.

Why aren't you paying attention?

Steve, K4YZ

When ever I hear the distinctive ring of a silver coin in my change,
THAT'S music!

Jerry
Music is extremely limited at this time.

NICE....coming from a appliance user....like i stated before, you have have an idea first before you do anything...but since your an appliance users, I can understand that you don't understand how it works.....but here's an idea why don't back to QRZ with all the other applicance users....and debate more about BPL, or the CODE issue.

Source record: 104644

So how do you know you are not interfering with anyone since you
are making one-way transmissions?

I pick a unused frequency and ask three times if the frequency is in
use? if no one answers I uses it, Unlike K1MAN and W1AW who just begins
transmitting. If you don't answer or I don't hear then then too bad,
I'm using the frequency.

Yep. It sure was. And it was proof of exactly what I had been
saying about Baxter's track record of misconduct on the air and his
frequent run-in's with the FCC

It seems to me that you 1. don't really know what an warning letter is
or 2. don't know how the FCC process works.

So far your rants have only substantiated EXACTLY what I have said
about parallels between you and Baxter.

Why aren't you paying attention?

In what way???? The FCC if you didn't read stated:

"It is the finding of this office that you are, with some exceptions,
generally in compliance with the Commission's rules in the Amateur
Service related to broadcasting and information bulletins, and we
explain as follows. Broadcasting is prohibited in the Amateur Radio
Service, with some exceptions. Section 97.3(a)(10) defines broadcasting

as "transmissions intended for reception by the general public, either
direct or relayed." One-way transmissions are limited in the Amateur
service, but an exception is allowed in Section 97.111(b)(6) for
"Transmissions necessary to disseminate information bulletins."

Information bulletins are defined by Section 97.3(a)(26) as messages
"directed only to Amateur operators consisting solely of subject matter

of direct interest to the Amateur service." There are no specific time
limits placed upon information bulletins by Commission rules. A review
of your programs at random times since March 3, 2003 indicates that
your transmissions were directed to Amateur Radio operators, not to the

general public, and that the individual bulletins were related to the
Amateur Radio Service. The only notable exception was the offering of a

reward for information leading to the identity of parties making
threatening telephone calls to you."

you can't get it through you dumbfuck head that my Information
Bulletins ae LEGAL!!!!!!!!

Yeah Bathrooman, this Toddy is a real idiot. I can't believe that he was even able to get into a black college. His writing skills are absolutely atrocious.
Also, he has this stupid ass blog that is so totally useless. He should eventually take a course at a real college before he gets on these newsgroups and blog pages and makes a total ass out of himself.

> ability" problems.

Wrong again, idiot. As for mental ability, you are the only one with a problem - and it is clear that your comprehension is less than what many mentally retarded people have. Example:

Over in another place on the internet, www.allaudio.org - in post 10066386, you dared make a claim that I would have a problem with a weasel like you pocketing the cash from running your own church's radio station - simply because it is a

non-profit. Fortunately, your own words prove your ignorance and inability to understand why I may have legal grounds to pursue a criminal complaint against the AR Newsline operators. The problem that you fail to understand is that when ANY non-profit charity solicits donations FOR A SPECIFIC PURPOSE then expends those donations on something other than the declared purpose or its underlying administrative expenses, such is illegal. The solicitation becomes fraudulent and the diversion of funds embezzlement. It doesn't matter that the diverted purpose happens to be another exempt purpose; it's still unlawful. That's exactly what AR Newsline does: They solicit only for "news gathering" activities and divert funds to their scholarship activity - and in their own reports, they admit as much.

I am not trying to shut down AR Newsline simply because I think that Bill Pasternak is a prick for the way that he FAILS to obtain truthful stories. I will be shutting it down because it is a criminal conspiracy to defraud the public hiding behind the guise of a non-profit organization.

> > > Getting tired of making stupid assertions in public then
> getting

> >
> > I haven't made any stupid assertions.
>
> Sure you have.
>
> At least three years of smears, deceit and blatant lies about Bill
> Paternak and Amateur Radio Newsline,

Let's see:
1) His organization was a consistent spammer to this group until I got that stopped about 5 months ago.
2) He defrauds the public by soliciting funds on false grounds, only to divert those funds as "reimbursements" to his own pocket - per AR Newsline's own reports. It's HIS words, so either he truthfully reported his embezzlement or he has lied about it - either way, he has no public trust, and thus there's no lie on my part.

You've now been proven to be the fool that everyone knows you are. PLONK!

> > I have made only one conclusion - and you have failed to provide any

And that's the best you can come up with?

You're an idiot because the understanding of the issue is beyond you.

You're a weasel because you thought that you could "badmouth" me in a place you thought I'd never find out about.

You're a fool because it is clear that if I were wrong, others would have said so. You stand alone.

Ok, so I said you were an uneducated, illiterate, racist, braggart who
is full of BS.
I may be wrong about you being a racist, I'll give you that. I didn't
see you deny the rest, so you are an uneducated, illiterate, braggart
who is full of BS.
Now what would be the word for you belittling everybody else here?
Calling people rednecks, appliance operators, licensed cb operators.
Did you build your radios? If not then you are an appliance operator in
the true sense of the word!

Well me just being an appliance operator, all I do is power it on. I
didn't realize that you had to build your radio to get on a net?
OH, I think your CAPS KEY is stuck again, maybe you should put some time
into inventing a new type keyboard that won't get stuck like that!

I've never posted to "allaudio", Dieter.

Never, not once...Any post in that forum would have to be a
re-addressal from this forum or were comments carried from this forum
by another.

Sorry. You are (again) wrong.

Also, I do not run ANY "curch radio station".

> Fortunately, your own words prove your ignorance and inability to

their own
> reports, they admit as much.

And YOU continue to ignore the fact that there is absolutely NO
attempt by ARN to disguise, divert, redirect or otherwise defraud
ANYone.

And TELL us, Dieter, when did you file those complaints?

When's the trial?

Will they put the Michael Jackson trial on hold so you can
persecute this foul wretch of a man who raises monies for teenager's
scholarships?

> I am not trying to shut down AR Newsline simply because I think that
Bill
> Pasternak is a prick for the way that he FAILS to obtain truthful
stories.

Sure you are. Your one and ONLY reason to be pushing ANY of these
buttons is because you got your toes stepped on and you're going to
insult, harrass and intimidate

> I will be shutting it down because it is a criminal conspiracy to
defraud the
> public hiding behind the guise of a non-profit organization.

No you wont'. You're a loud mouthed punk with a chip on your
shoulder. And even if you do get it in for legal review, there's no
leg to stand on and it will get dismissed. Too many REAL frauds out
there.

> > > > Getting tired of making stupid assertions in public then

there's no
> lie on my part.

Still no embezzlement, Dieter. He's STILL allowed to take a part
of the funds for costs and reasonable expenses. The IRS says so.

Despite crowing about all his alleged excesses, you've not, in over
THREE YEARS, produced a SINGLE bit of evidence to corroborate your
claims. Not a single receipt, bit of testimony or

> You've now been proven to be the fool that everyone knows you are.
PLONK!

No fool here, Dieter. Check the mirror.

YOU, on the otherhand, are still making grandiose claims about
fraud and embezzlement that you have not substantiated with a single
sentence of corroborating evidence.

> > > I have made only one conclusion - and you have failed to provide
any

It wasn't my title.

And since I've been very careful to avoid the adjectives with you
all this time, Dieter, and you've NOT extended me the same courtesy, I
guess I can return the favor...but won't. You ARE your own worst
enemy, Dieter.

> > I was addressing your Quixotie-like crusade style.

>
> And that's the best you can come up with?

What more do I need? You make claims then don't substantiate
them.

> You're an idiot because the understanding of the issue is beyond you.

I understand just fine.

You're trying to persecute Bill Pasternak and Amateur Radio
Newsline for some perceived injustice from a story whose reporting you
didn't care for.

You've not substantiated a single claim.

> You're a weasel because you thought that you could "badmouth" me in a
place you
> thought I'd never find out about.

I didn't make those posts, Dieter. I do not know of any
"allaudio" site, I don't post there, and besides, I can "badmouth" you
from right here with your own words...I don't need to do so covertly.

> You're a fool because it is clear that if I were wrong, others would
have said
> so. You stand alone.

So far, Dieter, no fewer than a half dozen other posters have
chimmed in at one time or another on the Dieter-Vs-Pasternak/ARN issue,
and not a one of them has expressed any support for your claims.

Why is that?

BTW, Dieter...

Went to All Audio and what do I find...?!?! Just another newsgroup reader. The "source" of Dieter's angst is just another source to read this very same newsgroup.

I love it when someone claims another to be an "idiot" and "weasel" for posting in an open forum, yet can't identify the source of the posts he is allegding are supposedly posted covertly.

Thanks, Dieter...E V E R Y T I M E you try to throw your weight around you just manage to make an even bigger fool out of yourself.

Nice job.

One more thing, Mighty Mouth...

Message number 10066386 is an incomplete messsage number. What
messages DID come up within "allaudio" had nothing to do with any of
your claims...

There were Holy Roller posts, "eHarmony" solicitations, and
discussions on anything BUT Dieter Stussy. Perhaps whatever re-posted
post is farther down the message chain, but if you're going to try an
accuse anyone of something, Dieter, yoiu owe it to yourself to get your
accusations RIGHT...and that includes ALL the right attributes.

Hmmmmmmmmmmmmmmm..."appliance user"...

OK, Todd...here's your chance...Impress us with your 100%
homebrew/kitbuilt station set up. Please tell us what gear YOU are
using for your "information bulletins", etc.

Remember...even ONE YaeKenCom rig in your inventory makes YOU and
"applicance user" too.

I say you're busted again.

(Get used to it...It's not the first, it's not the last, and the
way you're going, you'll get "busted" by people who can REALLY "bust"
you ver soon!)

Then explain this: http://www.allaudio.org/detail-10066386.html

If it's not really you, then someone is using/abusing your identity.

You did in your HYPOTHETICAL post you were making there.

Different county, so of course not.

I thought that was your job (to insult, harass, and intimidate). My job, as a
responsible citizen, is to see that the law is enforced.

> > I will be shutting it down because it is a criminal conspiracy to

You won't be saying that after BP is prosecuted. You forget that I am an ex-IRS agent. I know what I'm talking about when it comes to this stuff.

The evidence here speaks for itself: ARN was posted weekly - and it no longer is. It has stopped. You forget that every week for about 2 years, I sent a post to his ISP's abuse mailbox.

> > 2) He defrauds the public by soliciting funds on false grounds, only

Only for the PURPOSE he solicited the funds for; not for OTHER purposes, exempt or not.

>
> I understand just fine.

It's clear from your posts at the other forum at the web site mentioned above
that you do not. You're a liar too, and everyone else here knows it.

> You're trying to persecute Bill Pasternak and Amateur Radio
> Newsline for some perceived injustice from a story whose reporting you
> didn't care for.

You can't even paraphrase that correctly. The parties he defamed should sue
him. It's clear that BP has no interest in the truth.

> You've not substantiated a single claim.
>
> > You're a weasel because you thought that you could "badmouth" me in a

> "allaudio" site, I don't post there, and besides, I can "badmouth" you
> from right here with your own words...I don't need to do so covertly.

Liar. The URL I posted may only be 1 of 2 that I found you referring to me
about, but all indications show that it is clearly you.

> > You're a fool because it is clear that if I were wrong, others would

>
> Why is that?

Because you're only counting one side, just like BP does.

Dieter,

I just thought I'd create one thread to keep all your silliness
under one masthead...I'll quote verbatim my other replies to you today
too, including your comments with attributes.

Steve, K4YZ

I'm looking at it right now. Try this:

http://www.allaudio.org/detail-10066386.html

Your post is the second one of three, entered February 7, 2005 at 03:35:10.

Its presence speaks for itself and demonstrates that you are a liar.

Now, as to YOUR CLAIM that it is just another version of THIS NEWSGROUP, explain why no posts by me show up? I used google's search engine to find my name and it found ONLY TWO instances of my name being used in any way at that site - and BOTH instances were in posts made by YOU.

Tahe that, scumbag. You've been identified as a liar. You have now been proven a liar... and in the face of your own self-generated evidence, everyone can see that you're a back-stabbing weasel too.

Your other post: http://www.allaudio.org/detail-9595312.html
Dated: October 9, 2004 at 12:48:16 (using your K4CAP callsign).

> There were Holy Roller posts, "eHarmony" solicitations, and
> discussions on anything BUT Dieter Stussy. Perhaps whatever re-posted

> accuse anyone of something, Dieter, yoiu owe it to yourself to get your
> accusations RIGHT...and that includes ALL the right attributes.

The accusations are plain and the evidence is there for everyone to see. The URLs are listed above.

Couldn't take the heat, could you? We had a SINGLE thread already - under YOUR name, weasel.

Congratulations! You got the ENTIRE URL right this time!

And here's another HOT FLASH for ya, Hot Rod...That post was STILL not made by me in "allaudio"...It WAS made by me in THIS forum and re-posted there WITHOUT my consent.

Now...I know this is going to be reeeeeeeeeeally hard for you to understand, Dieter, because the foregoing only further proves my assertions of YOUR lack of understanding...But USENET newsgroup readers from MANY other companies and servers pick-up items from other USENET groups and re-post them.

Had you gone back and read the attributes, you'd know better.

But you didn't. Just like Lennie Anderson..Any chance to jump in and attempt a "swipe"...Didn't work, Dieter...

> > And TELL us, Dieter, when did you file those complaints?
>
> You'll find out.

Yeahyeahyeah...You've been making those same "claims" for three years.

> > When's the trial?
>

Oh NO, Dieter! THIS is the Crime of the Century! Any jurist worth his salt will put HIS agenda on hold knowing full-well the attention of every man and woman will be on this!

That being the case, it will be MY job as a responsible citizen to make sure the DA knows exactly how long you've been planning this persecution and why.

Then YOU can suffer the DA's scrutiny as he investigates why YOU tried to manipulate the legal system for personal vendettas.

> > > I will be shutting it down because it is a criminal conspiracy to

stuff.

I wonder why you are an EX-IRS agent.

Have fun, Dieter...You're just a bitter putz with a personal agenda to keep your wounded pride and ego from getting any more bruised than what it is.

I am sure you did. But the FACTS are that ARN stopped for other reasons.

Furthermore, if his ISP actaully found any validity for your claims, they wouldn't have taken 2 years to take action.

Still no embezzlement, Dieter. He's STILL alowed to take a part of the funds for costs and reasonable expenses. Your former employer says so.

Lied...?!?! About what? The only "lie" I am accused of is having
not done the things in my military career that I've mentioned but
refuse to discsuss further...

You are welcome to try and prove otherwise.

If you're depending upon posts made by Brian Burke and Lennie
Anderson to substantiate your claim, you're going to find yourself
behind the power curve yet again.....

> > You're trying to persecute Bill Pasternak and Amateur Radio

> him. It's clear that BP has no interest in the truth.

If the "parties he defamed" were actually defamed, they should sue!

But it's been YEARS ago and YOU are the ONLY putz crowing about it!
It would appear that there was NOT enough "evidence" to persue the
deamation suit in the first place!

> > You've not substantiated a single claim.

to me
> about, but all indications show that it is clearly you.

I am still not lying, Dieter.

I did not post in "allaudio". That a newsgroup reader may have
re-posted from Google is entirely possible...But >>I<< did not post in
"allaudio".

You are welcome to try and prove otherwise!

> > > You're a fool because it is clear that if I were wrong, others

Nope.

Please remind us of all the eliable respondents in THIS forum who have "sided" with you...Please be so kind as to only cite persons who sign thier name and/or callsign...They are the only one's I refer to...Otherwise it would have been more than "a half dozen"....

Again...You come up short, Dieter.

callsign).

Yep..it's there too...But it's STILL not an original post to
"allaudio". I am not a member of "allradio" or I would sign in, get
ALL the headers and feed them to you.

(No problem...I doubt you'd have the gonads to admit your error
anyway...It would take away your basis for calling me weasel,
backstabber, idiot, etc, and it

Good News!

Do you know how simple it is to go to Heaven after this
life has ended?

The good news is that God came from Heaven to earth
in the person of Jesus Christ over 2000 years ago and
died for our past, present and future sins(misdeeds).
He was born in the land of Israel supernaturally to a
virgin Jewish woman named Mary. He lived a sinless life
for thirty-three years and then sacrificed His sinless
blood and died on a cross to pay the death penalty for
our sins.

After Jesus died He rose from the dead three days later
as He said He would. The Holy Bible also tells us that

Jesus Christ ascended into Heaven and that all who accept
Him as their Lord and Saviour will live forever with Him
in Heaven where there is no more death, sorrow, sickness
and pain.

The Holy Bible very clearly explains how simple it is
to be saved and on your way to Heaven, "For if you
confess with your mouth, "Jesus is Lord," and believe
in your heart that God raised him from the dead, you
WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if
you will open your heart to Jesus and pray the following
prayer:

Dear Jesus Christ, I want to be saved so that I can have
a home in Heaven when I die. I agree with You that I am a
sinner. I believe You love me and want to save me. I
believe that You bled and died on the cross to pay the
penalty for my sins. I believe that You rose from the dead.
Please forgive my sins and come into my heart and be my
Lord and Saviour. Thank You Lord Jesus Christ for
forgiving me and saving me through Your merciful grace.
Amen.

You are now a Christian if you said the prayer and allowed
God to save you. Welcome to the family of God.

Have a great day!

Yet another unsolicited rendering of religious fervor...Just what the world needs...Yet another "evangelist" to "save" us from someone else's religion.

I am in the wrong business.

Instead of saving lives, I will save souls...Put up an internet "crusade", then evenutally an HF broadcast station from which to solicit tons of donations from sick, dependent and scared people who think if they don't send me $10 right now they are going straight to Hell.

Eventually I can get a real, live satellite program of my own and really rake in the big bucks. Then I can allow myself to be "found out" having the same sex that every other heterosexual male in the world enjoys, take a huge golden parachute severance pay from my now-mega-million "congregation" and retire to some South Pacific island of my own.

Of course then I will have to contend with Dieter Stussy daring me to 'come out and argue the issues' over donations.

I was going to pursue a career in quasi-professional electronics engineering by hijacking others proprietary work, but they told me some idiot in California already tried that schtick...Now they look out for guys like that! My luck...a day late and a dollar short. Wonder who the idiot was...?!?!

If you're not gay, it's not a problem, Brain...But YOU are the one
always making the "homosexual innuendo" claims from posts that had no
such intent.

> > YOU are the one who is constantly bringing up homosexuality.
>
> I point out your homosexual inuendos, which >>>IS<<< nearly constant.

What "homosexual innuendo"...?!?! That you are politically and
philosophically "in bed" with Lennie?

Do you deny this? Are all your "Lennie is my mentor" claims now a
lie, or have you simply had a change of heart?

It's OK to change your mind, you know...for example, I used to
think you were a pretty stand-up guy...but then there came the lapses
in facts, false accusations, unsubstantiated assertions, etc etc etc...

> You
> > then try to re-direct the conversation in such a way as to deflect

Sure it has. With the exception of keeping my daughter alive,
getting a date with Brittney Spears and winning the Lottery, I'd have

to say I'm in pretty good sorts.

What about "(my) reality" did you think wasn't turning out?

Signed on to the NG this morning to find the following items posted to
the
NG from Blowhard Baxter and Company.

Mr Stussy presumes to express his dismay at the once-a-week, single
postings of the Amateur Radio Newsline, calling it SPAM.

I am eager to see if Mr Stussy is as equally adamant in his "fight" to
get
K1MAN to stop sludging up the Internet with his extension of his
on-the-air
antics or not.

I seriously doubt his actions will match his rhetoric.

73

Steve, K4YZ

Quote or K1MAN "announcement" snipped.

As for "badmouthing" you, I seriously doubt anyone could call
addressing you by your given name or comments made within the context
of your "spam" crusade as "badmouthing"...

Here's the headers from Google:

Subject: Dieter! SAAAAAAVE US DIETER!

Signed on to the NG this morning to find the following items posted to the
NG from Blowhard Baxter and Company.

Mr Stussy presumes to express his dismay at the once-a-week, single postings of the Amateur Radio Newsline, calling it SPAM.

I am eager to see if Mr Stussy is as equally adamant in his "fight" to get
K1MAN to stop sludging up the Internet with his extension of his on-the-air
antics or not.

I seriously doubt his actions will match his rhetoric.

73

Steve, K4YZ

Quote or K1MAN "announcement" snipped.

As for "badmouthing" you, I seriously doubt anyone could call addressing you by your given name or comments made within the context of your "spam" crusade as "badmouthing"...

Here's the headers from Google:

UNQUOTE

So, Dieter, I have PROVEN with DOCUMENTARY EVIDENCE that YOUR assertions that I "posted" to "allaudio", hence allegedly trying to go "behind your back" were FALSE.

What are you going to do now?

K4YZ
By Todd Daugherty N9OGL

I have seen on this newsgroup that Steve, K4YZ is trying to call me out. However, instead of playing his "game" Let's get back to the real issue at hand. In the post "For The Benefit of Lloydie and Toddie" you made the statement towards me
"To Toddie, I say go ahead and spend the money
on legal issues if you want...I'd rather spend them on enjoying Amateur Radio.
Of course your posts in here have pretty well set the tone for what kind of reaction you can expect. People don't want to get "information" from the decietful, dishonest or the lame.
You're all three."
Yet, I posted the warning letter from the FCC stating:

" It is the finding of this office that you are, with some exceptions, generally in compliance with the Commission's rules in the Amateur Service related to broadcasting and information bulletins, and we explain as follows. Broadcasting is prohibited in the Amateur Radio Service, with some exceptions. Section 97.3(a)(10) defines broadcasting as "transmissions intended for reception by the general public, either direct or relayed." One-way transmissions are limited in the Amateur service, but an exception is allowed in Section 97.111(b)(6) for "Transmissions necessary to disseminate information bulletins."

Information bulletins are defined by Section 97.3(a)(26) as messages "directed only to Amateur operators consisting solely of subject matter of direct interest to the Amateur service." There are no specific time limits placed upon information bulletins by Commission rules. A review of your programs at random times since March 3, 2003 indicates that your transmissions were directed to Amateur Radio operators, not to the general public, and that the individual bulletins were related to the Amateur Radio Service. The only notable exception was the offering of a reward for information leading to the identity of parties making threatening telephone calls to you."

Warning letter to K1MAN 2004

Yet, your still on here claiming my "information bulletin" is illegal and voted on my website poll that way, along with your little buddies on here. We'll get to the poll issue here real soon. But, that letter allow proves that what I've been saying is true, as long as programming is amateur related and is directed to the amateur radio service, which my bulletins are both, then under the law it is legal. Broadcasting,

means for you backwater moron "A transmission DIRECTED TO THE GENERAL PUBLIC". As for interference, I'm not interfering with anyone, I pick an unused frequency and call three times "is this frequency in uses?" before I began my transmission, which I believe is the general operating procedure for any amateur wanting to uses a fequency. The programming of an Information Bulletin does not have to be newscast, it only has to be a piece of amateur related information directed only to the amateur radio service. As the FCC point out in their letter to K1MAN in 2004 "There are no specific time limits placed upon information bulletins by Commission rules" thus, despite what those morons on QRZ and you think, an information bulletin doesn't have to be short and to the point. As stated many times before, K1MAN has never been found guilty of violating any FCC rules. A warning letter, and Phil can correct me if I'm wrong, is a letter to specify a possible violation and is to inform the licensee to correct the problem, and if the problem isn't fixed they could face a NAL. As stated above you along with your little buddies on here went to my website and voted in the Poll "Do you think N9OGL information bulletins are legal?" in it you posted no, along with you little buddies. Then I posted another poll, which stated "When you Voted on the orginal poll had your heard N9OGL INFORMATION BULLETIN and did it effect your vote?" on that poll along with your little buddies on here voted YES, and then you got on this newsgroup and started a little thread about the second poll. Let's talk about that second poll, I did the second poll to prove a point, which was that you and your little friends on this newgroup were voting, not because you heard the transmissions, but because you believed the information bulletins I was transmitting were illegal. Yet, you and your little buddies still voted yes claiming that you heard the transmissions. First off, you couldn't of heard the transmissions as I stated many times before most of my Information Bulletins are ran on 10 meters around 9/10 PM CST when the band conditions are dead. Unless you have a SUPER HAM STATION down there in bumfuck Tennessee I REALLY doubt you heard my weak signal. So before you get on a newsgroup call someone decietful, dishonest, lame, and a liar you better know what the fuck your talking about. Because in my humble opinion your not only lying to these people but your lying to yourself.

Todd N9OGL

You say I'm in bed with another guy. You say I need the closet door
opened.

Your intent is crystal clear, so quit lying about it.

> > > YOU are the one who is constantly bringing up homosexuality.

> > I point out your homosexual inuendos, which >>>IS<<< nearly
constant.
>
> What "homosexual innuendo"...?!?! That you are politically and
> philosophically "in bed" with Lennie?

You know what homosexual inuendo. The homosexual inuendo that you
engage in constantly. Maybe it just comes with being a nurse, but I'm
not at all used to it.

> Do you deny this? Are all your "Lennie is my mentor" claims now
a
> lie, or have you simply had a change of heart?

Your homosexual inuendo is a lie.

> It's OK to change your mind, you know...for example, I used to
> think you were a pretty stand-up guy...but then there came the lapses
> in facts, false accusations, unsubstantiated assertions, etc etc
etc...

You are the one changing your mind. You are the one trying desperately
to back away from the homosexual remarks. And you never thought I was
a "pretty stand-up guy." Maybe you just thought I was pretty, but
there's no photo of me in a tight flight suit to judge by.

Oh, No, Todd...I am not "calling you out". That would suggesdt
that I consider you an "opponent", and the the facts are taht you're
not up to the task.

> However, instead of playing his "game" Let's get back to the real
> issue at hand.

The real "issue at hand" was getting you to to own up to the fact
that YOU are "calling people out" by calling them "appliance
operators", etc.

OK...That presumes that YOU are NOT an "appliance operator". All
I want to know is are YOU living up to some higher standard, and if so,
how about some description of your alleged homebrew/kitbuit station.

Instead of just listing it here, you go into a lengthy diatribe
trying to avoid further humiliating yourself.

Too late.

> In the post "For The Benefit of Lloydie and Toddie" you

Uhhhhh....Yup.

> Of course your posts in here have pretty well set the tone for
> what kind of reaction you can expect. People don't want to get
> "information" from the decietful, dishonest or the lame.
> You're all three."

Uhhhhhh...Yup. You are. This post I am responding to is evidence
of it.

You call everyone else "appliance operators", yet don't identify a
single piece of homebuilt gear at N9OGL.

My point made.

> Yet, I posted the warning letter from the FCC stating:...(SNIP)

YadaYadaYada.

Big snippage of same repeated posturing.

> Then I posted another
> poll, which stated "When you Voted on the orginal poll had your heard
> N9OGL INFORMATION BULLETIN and did it effect your vote?" on that poll

> voting, not because you heard the transmissions, but because you
> believed the information bulletins I was transmitting were illegal.
> Yet, you and your little buddies still voted yes claiming that you
> heard the transmissions.

I claimed nothing on the second poll other than to make fun of how
you didn't get the answers you wanted on the first so you went fishing
with the second. You'd just trash THAT poll too, so why bother.

I'm not playing YOUR game. It's just too transparent.

> First off, you couldn't of heard the
> transmissions as I stated many times before most of my Information
> Bulletins are ran on 10 meters around 9/10 PM CST when the band
> conditions are dead.

No...actually you've been citing a 20 meter frequency. But let's
not let facts interfere with your rant, Todd.

> Unless you have a SUPER HAM STATION down there in
> bum##### Tennessee I REALLY doubt you heard my weak signal.

(1) I don't need a "SUPER HAM STATION", Todd. My very modest
station has worked DXCC very nicely from TN. Even Illinois.

(2) The "weakness" of N9OGL is not in the amount of RF being
radiated from the transmitter, but of the weakness of maturity and
competency of it's owner/operator.

> So before
> you get on a newsgroup call someone decietful, dishonest, lame, and a
> liar you better know what the #### your talking about. Because in my
> humble opinion your not only lying to these people but your lying to
> yourself.

I'm lying to neither...least of all you, Todd.

K1MAN >>HAS<< established a pattern of rules violations that MAY
permit the FCC to take some sort of action when his license comes up
for renewal in October. This is not in debate since YOU have quoted
the very same incidents on your rants.

N9OGL is starting on the same path. Therefore, although the "new kid on the block", it is highly likely that he will accumulate the same record of warning letters, attention of federal law enforcement, and scrutiny. This too is true since you've already acknowledged that Mr Hollingsworth is allegedly paying attention already.

N9OGL has made disparging references to other participants of this forum as "appliance operators", suggesting that HE is not. He's been asked to ante up to that insinuation but instead launched into this diversion.

Didn't work.

N9OGL has made direct asserions of being an "inventor" but has yet to pony up a single "invention". He DID make reference to an idea for a bottlenecked point-to-point data protocol that is at least four or five "generations" of data transfer technology old.

Ohhhhhhhhhhhhh....we're so UNimpressed.

He also created another "blog" for the purpose of enlightening the world as to his technical wizardry, but still has yet to make good on that.

So...there's somone lying to himself here, Todd, and son, it ain't me.

Now...back to the REAL question at hand...What equipment makes up the station line-up at N9OGL?

I say that if you can't answer THAT question in the very next reply to this post, that you are proving exactly what I've been alledging.

There's nothing to lie about, Brain.

You ARE politically and philosophically "in bed" with Lennie.

That's not in dispute.

Have you had a change of heart in supporting Lennie's opinions and
behaviour?

> > > > YOU are the one who is constantly bringing up
homosexuality.

Perhaps you're "not at all used to it" because there are some
unanswered question in your life taht you are unwilling to address
head-on? Perhaps because you've been the viction of a condition known
as ACRI? Acute Cranial Rectal Inversion?

> > Do you deny this? Are all your "Lennie is my mentor" claims
now
> a
> > lie, or have you simply had a change of heart?
>
> Your homosexual inuendo is a lie.

Your assertion does not answer my question...Are you or are you
not politically and philosophically "in bed" with Lennie?

Have you not very publically and unabashedly lent your support to
both his content and manner, Brian? Or are you now, as I suggested
above, withdrawing your support for both his opinions and techniques?

BTW, Brain...You and Lennie both make frequent references to
"PCTA Double Standard"...Wellllllllp...Your buddy often makes his own
not-so-transpatent" "homosexual innuendo" (...'shaking your "we-we" in
public'), yet I never see YOU chastising HIM.

What's up with that...?!?!

> > It's OK to change your mind, you know...for example, I used to

> there's no photo of me in a tight flight suit to judge by.

I am not backing away from anything, Brain.

I am clearly stating that if you perceive some "homosexual
innuendo", that it's due to some latent feelings or sympathies of your
own since you revisit the issue so often.

Furthermore, I have, on several occassions, expressed the opinon
that ourarguments in this forum notwithstanding, that you and I share
many of the same basic political and "social" opinions.

As a matter of fact, you and I shared several weeks of "agree to
disagree civil discourse" due to your cessation of assinine rantings
and obtuse accusations and behaviour.

YOU changed those "rules', Brain...Not me.

Besides...My aversion to homosexuality as a lifestyle not
withstanding, I know several persons who ARE "homosexual", and I'd not
dare bring them down to your level by making insinuation that you are
youerself homosexual.

> > Sure it has. With the exception of keeping my daughter alive,
> > getting a date with Brittney Spears and winning the Lottery, I'd
have
> > to say I'm in pretty good sorts.
>
> Exactly. You're all messed up.

I am trying to figure out how you got "Exactly. You're all messed
up" from the statement I made. Life has it's disappointments, the
above three issues being among them. Unlike you, however, I can take
disappointment and make it work for me...ie: motivation to overcome
whatever life DOES throw me.

> > What about "(my) reality" did you think wasn't turning out?
>
> Life in general. You seem very dissatisfied.

Then you have again expressed an opinion that is poorly organized.

That's YOUR reality.

Sucks to be you, Brain.

There's nothing to lie about, Brain.

You ARE politically and philosophically "in bed" with Lennie.

That's not in dispute.

Have you had a change of heart in supporting Lennie's opinions and
behaviour?

> > > > YOU are the one who is constantly bringing up
homosexuality.

I'm
> not at all used to it.

Perhaps you're "not at all used to it" because there are some
unanswered question in your life taht you are unwilling to address
head-on? Perhaps because you've been the viction of a condition known
as ACRI? Acute Cranial Rectal Inversion?

> > Do you deny this? Are all your "Lennie is my mentor" claims
now
> a
> > lie, or have you simply had a change of heart?
>
> Your homosexual inuendo is a lie.

Your assertion does not answer my question...Are you or are you
not politically and philosophically "in bed" with Lennie?

Have you not very publically and unabashedly lent your support to
both his content and manner, Brian? Or are you now, as I suggested
above, withdrawing your support for both his opinions and techniques?

BTW, Brain...You and Lennie both make frequent references to
"PCTA Double Standard"...Wellllllllp...Your buddy often makes his own
not-so-transpatent" "homosexual innuendo" (...'shaking your "we-we" in
public'), yet I never see YOU chastising HIM.

What's up with that...?!?!

> > It's OK to change your mind, you know...for example, I used to

> there's no photo of me in a tight flight suit to judge by.

I am not backing away from anything, Brain.

I am clearly stating that if you perceive some "homosexual
innuendo", that it's due to some latent feelings or sympathies of your
own since you revisit the issue so often.

Furthermore, I have, on several occassions, expressed the opinon
that ourarguments in this forum notwithstanding, that you and I share
many of the same basic political and "social" opinions.

As a matter of fact, you and I shared several weeks of "agree to
disagree civil discourse" due to your cessation of assinine rantings
and obtuse accusations and behaviour.

YOU changed those "rules', Brain...Not me.

Besides...My aversion to homosexuality as a lifestyle not
withstanding, I know several persons who ARE "homosexual", and I'd not
dare bring them down to your level by making insinuation that you are
youerself homosexual.

> > Sure it has. With the exception of keeping my daughter alive,
> > getting a date with Brittney Spears and winning the Lottery, I'd
have
> > to say I'm in pretty good sorts.
>
> Exactly. You're all messed up.

I am trying to figure out how you got "Exactly. You're all messed
up" from the statement I made. Life has it's disappointments, the
above three issues being among them. Unlike you, however, I can take
disappointment and make it work for me...ie: motivation to overcome
whatever life DOES throw me.

> > What about "(my) reality" did you think wasn't turning out?
>
> Life in general. You seem very dissatisfied.

Then you have again expressed an opinion that is poorly organized.

That's YOUR reality.

Sucks to be you, Brain.

I was only on 20 meter for a short time because the tape got jammed in
the machine. But then MAJORITY of my transmissions were on 10 meters.

Warning Letter's are NOT the final action of the FCC, and as far as
I've seen thats all he has recieved so far. If he corrects the problem
then there is no problem. The problem is dumb hillbillies like yourself
who believe that information bulletins can't opinionated...which is NOT
TRUE.

> N9OGL is starting on the same path. Therefore, although the
"new

First off it don't have to be bottlenecked IF it ran on one of higher frequencies where there is commercial available equipment, Secondly I have Posted SOME of my inventions on my website, N9OGL INVENTIONS.

> Ohhhhhhhhhhhhh....we're so UNimpressed.

>

Bottle line slimeball, I have built equipment, I have so many radio's I DON'T USE THEM ALL. But I have Built 2 meter and 440 transmitters. As a matter of fact I'm planning to put my information bulletin om 2 meter, and I'm going to build the transmitter for the bulletin station on 2 meter.

Source record: 104719

Words of wisdom from the Bathrooman, or, switch gears for a moment:

I must reiterate one fact of life - that most of the enlightened don't really care whether you continue with your broadcasts, or not. I think I am almost unanimous in that. I am a little older than you and I have been a ham for 35 years now - although I haven't used my callsign on newsgroups - and I've seen and heard it all - in life as well as ham radio - and I'm still middle aged. Life is short. Someday you may be able to discern what is important from that which is not....some day only you will be able to decide if piratin,' or for that matter, your life, is worthwhile.....

3204. Boy broadcaster N9OGL - Part One

Newsgroup: rec.radio.amateur.policy
Date: 2005-03-23 06:51:37 UTC
From: Dave Heil <k8mn@earthlink.net>
Message-ID: <424111C0.9B110B1A@earthlink.net>
Source record: 104720

Our boy broadcaster/inventor has quite varied interests. Here's some material gleaned from the archives:

---

from rec.radio.amateur.digital.misc, 1999

I'm trying to write a packet program for packet radio and i need some help on serial port communication. i have no idea on how to get the computer to talk to the tnc.

thanks 73
Todd N9OGL

---

from alt.radio.pirate, Dec. 2003

N9OGL ON GREG RUGGIERO VS FCC

First, you must not have to be very intelligent to be a fucking judge of the court of appeal.it seems if they can let this dumb ass bitch and her little bitch whore buddies on the bench then anyone can..

(There's more. This is the cleanest portion)

---

from alt.radio.pirate, Dec. 2003

ummmm....NO! I'm going to bitch and whine till I blue in the face. I'm not
going to let this shit go...Those scumbag at the FCC and the court of appeals isn't going to hear the last of me for a long time. I was never found guilty of a freaking crime and I fucking barred from getting a license. that's the true justice of fucking america. Although you not guilty....your guilty......and your guilty unless you prove yourselves otherwise. well I have my application (all six) and a little piss ant note
from some sandmonkey in the FCC say they couldn't consider my application or
my fucking waiver...I applied long before I went pirate and their are other
"pirates" out there that I know that also applied long before going pirate.
So I'm going to continue to bitch and whine til somethings done about this
injustice.

Todd Daugherty N9OGL
Langely Park Telecommunication

"Dr. Daffodil Swain" <w...@earthlink.net> wrote in message

---
from alt.radio.pirate, Dec. 2003

Hell since
I can't get a license I just go back on the air without....after all it
was
judge Randoph that stated "
No one has a First Amendment right to a
license," Red Lion Broad. Co. v. FCC, 395 U.S. 367, 389 (1969), and it
follows that no one has a First Amendment right to apply for a license

---
This one speaks to Todd's claim to have used various BBS software. It
is from rec.radio.amateur.digital.misc, Aug. 2003, not so very long ago:

What's the Best BBS program and how do you set it up

Todd N9OGL

(and)

Oh packet..I uses to run FBB BBS a long time ago on a different machine.
but I've pretty much forgotten how to set it up. MSYS I could never
figure out how to set up

Todd n9ogl
---
from alt.radio pirate, May 1999

Well mark I tell you what, I applied twice for a licnese and both
time it was returned so your right SCREW THEM!!! I'm going on the air
without a License.

Todd
N9OGL

(and)

Hello John,

To tell you the truth John, I applied for a license twice and both time
they were returned. the last time they sent it back they claim I didn't
file during the "file window" Which is a bunch of crap because they
were
handing out low Power television station licenses and low power
television translator licenses. The FCC are a bunch of liars who do not
serve the public's intrest. I'm going on the air with my low Power
Television station if they want me they can come and get me. It is a
waste of time to apply for a license.

---
from alt.sci.physics.new-theories, April 1999

Very true, the U.S. navy was experimenting in cloaking systems using "electronic stealth" the equiptment used operated in the ELF (Extermly Low
Frequencies) band around 1 hz. to 30 khz. The theory was to resonate a electromagnetic pulse around 4 to 10 hz thus cloaking the ship from radar and other electronic devices. The problem is no one really knows what effects may accure in that region of the spectrum. The human brain operates around 1 to 24 Hz. Black holes can be detected I believe around 10 hz. electricity runs around 50 to 60 Hz. Todd N9OGL

(and)

115 or 120 is your voltage not the cycles. in europe electricity oscilllates at 50 Hz. while here in the united states it oscillates at 60 Hz. go in the bathroom at a fast food place and look at the hand drier it states 60 Hz. now lightning operates around 500 Khz that's why lightning tears up the AM and the H.F. Band. scientist monitor 100 hz. for Black holes which resonate on that frequncy. well, it omittes a gravitation field on that frequency. TODD
N9OGL

(I'm going to check out the hand dryers at McDonald's in an attempt to confirm some of this little known stuff. I'm especially interested in this news that lightning "operates around 500 KHz". I'll "omitt" the rest)

http://www.geocities.com/langleyparktelecommunication/index.html

(note that Todd is now CEO/PRESIDENT!)

---

from alt.radio.pirate, May 2000, Todd's "origization" looks for a type "excepted" transmitter. The name change must reflect some on-air personna.

hello,

My origization is wanting to apply for the LP100 license here in Illinois when the filing window opens in August. We are looking for a ten to twenty watt FCC type execpted transmitter. we mainly want to know what the cost is on the transmitter.

Todd O'Dochartaigh
President
Langley Park Telecommunication

(and from June, 2000, Todd wants to save some money on the power bill!)

The Power is 50 to 100 watts ERP i failed to put the ERP because I was in a rush to beat the thunderstorm.....but it can be easier and cheaper to run low power to a good antenna with lots of DB gain and hardline as the coax. hardline coax really isn't that expensive. if you look around a little.plus hardline will have little lossage. Also running less power
would save a little on the power bill.

Todd
---
from alt.radio.pirate, Feb. 2000

...reality is Public Access has it problems with local authorities trying to censor programming and those access channel they couldn't censor the local authorities has shut down. So sure you have a little radio station but watch what you say over them because if it's something the local authorities don't want broadcast like police's violation of Human rights then they will try every thing to get rid of you. "Oh but Todd were protected by the FCC rules" well some local authorities give a rats ass about the FCC or their rules. They will even go so far to try to ban "radio signals except those all ready established" believe me there are some local governments will try that. The local government tried back in the 80's to ban all amateur radio signals to the city limits. then there is of course antenna laws and sure the FCC can tell you that the towers are exempted but the local governements have found loopholes in the system. I've in the public Access business longer then the "microbroadcasting movement" I know how it works on public access and my opinion that's whats going to happen to these Low Power Radio Stations.

---
from alt.radio.pirate, Aug. 1999--Todd's disability and folks infringing on his right to be a radio/TV pirate

First of you moron, it is my opinion and I have the right to express it. It federal Suckup like you who infringe on peoples constitutional right not only when it comes to busting Pirates but infringe on peoples right who wish to voice their point of view on the internet. It is people like you that have no life instead spend most of their time on the net bad mouthing how people write or their opinion. I really feel sorry for someone like you. It is in fact people like you who are turning this from a constitutional system to a dictatorship. As for my write I do have a disability and in that your lucky I don't get you on discrimination. The FCC is also lucky if they think like you that I don't them on it to. That All i have to say to you.

Todd O'Dochartaigh N9OGL
WLPS TV CHANNNEL 14
Taylorville Illinois #1 Pirate TV station

---

from alt.radio.broadcasting, May 1999, one of Todd's I'm 36-going-on-15 rants. The sig gets even more peculiar.

Hello,

I hear a lot about this low power radio petition and in my humble opinion is a waste of time. I believe the FCC in a whole needs to be changed. Changed back to serving the public's intrest instead of the big Lobbying groups like the NAB and the CTIA. Below are the Ideas that I believe the FCC should be following.

1. The Electromagnetic Spectrum belongs to the people and the people should have a right to Uses the Spectrum.
2. The FCC should only be allowed to license that, which is under 47 USC 151 "Interstate and Foreign Commerce by wire or radio"
3. Not only should a person have the right to listen to not only the broadcast services but all parts of the electromagnetic spectrum. even the cellular band which is part of the radio spectrum and there by belong to the people.
4. The people should have the right to choice his satellite package. The person should have the right if he wants the Network feeds off the satellite and wants to pay for them be allowed to buy them regardless if he recieve local broadcasting.
5. The FCC should eliminate any useless services on the electromagnetic spectrum (There is still some first generation radio services on the air) Any new service like Digital Cellular Phones should be phased into the old cell band instead of allocating them spectrum.
6. The FCC should make it easier for people to obtain a license, they should promote the Idea of waivering fees and other stuff like Techincal rules. The FCC should accept applications regardless if it's a filing window or not.
7. The FCC shouldn't create quick fixs policies instead should try to improve what they have internally.
8. The FCC should stop believing in this "burden on the commission" because there is always going to be a burden regardless. instead the FCC should try to get things done.
9. The FCC should work more closer to the people then the big companies and organizations. The FCC believes they serve the public's intrest but in reality the FAA serves the public's intrest better then the FCC because the FAA listens to the people.
10. The Question of what's Interstate and what's Interstate should be answered.

well that's it.....that's the changes I think are needed I believe the FCC could care less on what I say or anyone in alt.radio.pirate. then again I like everyone else bitching and voicing my opinion

Todd O'Dochartaigh N9OGL
Amateur, Commercial, Television Taylorville (Taylorville Illinois, only TV and Pirate station)

(and)

Sure there has been a few cases with
interferning with
the aircraft band as a pilot myself I wouldn't want that to happen.
However there has been a lot of low power services out there that
didn't
cause interfernce which out weights the cases that do. I am against
thre
LOW POWER RADIO PETITION because to me it is a quick fixs the FCC
should
allow that service now with waivers (which their rules allow) but they
will not. I did apply for a license twice and both times it was
returned
so my view is to HELL with them. Oh one more thing this "chaos" which
accured back in the 20's wasn't by Low power operators but by greedy
Commercial operators and the Navy.

(and)

Right, but there is a lot of broadcast services that don't cross the
line. for example my 8 watt Low power television transmitter which runs
on UHF will not cross the state line because 1. i'm in the middle of
the
state. 2. the power of 8 watts and the antenna height of 60 ft 3. the
terrain. fact is my station doesnot cross the state line and there by
the FCC doesn't have the juridiction over my signal.
---
from rec.radio.amateur.digital.misc, Aug. 2003

Hello,
I'm wanting to be able to uses my laptop and communicate back to my
home computer via packet. I was wondering what software I need to do
this. I want be able to in my computer back home and get files off of
my home
computer when I need them and put them on my laptop.
---
from comp.lang.basic.misc, Feb. 2000

I've written a program which i've written in Qbasic which I'm
wanting to run over a modem. I have no idea how to set a program to have
the program talk to the modem. Any help would be appreciated

3208. N9OGL to bust 2 Meter band Plan With "Information Bulletin" Broadcasts

Newsgroup: rec.radio.amateur.policy
Date: 2005-03-23 12:57:29 UTC
From: K4YZ <k4yz@aol.com>
Message-ID: <1111582649.340435.60620@o13g2000cwo.googlegroups.com>
Source record: 104723

>From Todd's "blog"....

QUOTE:

Tuesday, March 22, 2005
UPDATE: 2 METERS INFORMATION BULLETIN
N9OGL is planning this summer to run his information bulletin / amateur
related programs on 2 meters. It will begin in June on 145.570 MHz
between 5.00pm to midnight.

UNQUOTE

Someone needs to teach this idiot about the 2 meter band plans.

144.0-144.05 EME CW
144.05-144.10 CW and weak signal
144.10-144.20 EME and weak signal SSB
144.200 National calling frequency
144.20-144.275 SSB
144.275-144.30 Beacons
144.3-144.5 New OSCAR subband
144.5-144.6 Linear translator inputs 144.6-144.9 FM repeater inputs
144.9-145.10 Weak signal and FM simplex
145.01,03,05,07,09 widely used for packet
145.1-145.2 Linear translator outputs
145.2-145.5 FM repeater outputs

145.5-145.8 Misc. and experimental modes

Why are you going to use 145.57 for "Information Bulletins" in a
part of the spectrum used for experimenting and other non-traditional
modes and techniques, Todd...?!?! Yes, you can "rationalize" that
"miscellaneous" means you, but why put your sin=mplex 2 meter FM voice
signal where people will not be typically looking for one?

Also, the International Space Station has been operating varying
spaceborne repeater activities in this region...Just think of how many
people you'll REALLY PO if they get jammed by your "broadcasts" on one
of the few clear passes the station makes over thier location.

They'll be talking about N9OGL then, I can assure you.

145.8-146.0 OSCAR subband
146.01-146.37 Repeater inputs
146.4-146.58 Simplex
146.61-147.390 Repeater outputs
147.42-147.57 Simplex

147.60-147.99 Repeater inputs

147.555MHZ is the frequency traditionally used for local information broadcasts, Todd. No, there's no "regulation" demanding it's use for this purpose, but it's far more likely you wouldn't interfere with anyone this way and we'd be less prone to laugh at you as hard as we're doing.

Steve, K4YZ

3209. Todd's "Inventions" Reveraled!

QUOTE:

Tuesday, March 22, 2005

A ELF TRANSMITTER
I have built a ELF audio to pulse transmitter, the transmitter operates on a frequency of 1 to 30 Hz. A person talks through the transmitter which is converted into pulses. The pulse rate can be regulated by a variable resistor. The pulse then go's to a oscillator which is variable and can operate on a 1 cycle to 30 cycles.

posted by Todd Daugherty | 8:27 PM | 0 comments

No evidence that this was ever "built"...Ergo simply and idea, not an "invention".

And at this spectrum, just what do you except to be able to "send", Todd? Do you undertand the principle of bandwidth-vs-throughput...?!?!

Obviously not...

Sunday, March 20, 2005
PROJECT 2
A ELECRTOMAGENTIC CAR

"ELECRTOMAGNETIC"...?!?!

The car runs on electromagnetic current on a elecromagentic plate. The vehicle glides above the metal plate by basic general physics. The road plate is the opposite polarity as the vehicle. Unlike a Monorail system however the road is not a rail but a flat surface. The vehicle moves by reversing it polarity, the vehicle while traveling down the road will cross chargers, which would charge the batteries while the vehicle continues to travel down the road.

"Mag-Lev"

It's already being BUILT, Todd. Again, an IDEA for a different application of technology already developed....NOT an "invention"...

posted by Todd Daugherty | 2:45 PM | 0 comments

PROJECT 1
An apperatus for transfering and containing High Voltage electricity.

The device which I had built is in short, a modified Tesla Coil which a few extras. The coil input is 220 to 440V which is converted up by the coils to 1.4 to 1.6Mv of electricity. instead of disbusting to the

ground, the coil output is surrounded by metal plates which is cooled
on the outside by liquid oxygen. The plates are attached to cables
where the electricity id feed into a LARGE capacitor/battery which
contains metal plates which are sitting in a special solution. The
electricity is then feed off and converted down to what ever power
output is needed.

BBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAAHAHAH
AHA
! ! ! ! ! ! ! !

A cryogenically cooled capacitor! With OXYGEN, which is, of
course, an OXIDIZER!

So....Your cryo plant fails, the oxygen rapidly heats back to
ambient temperature, the capacitor discahrges, and KA-BOOM!

BBBWWWAHAHAHAHAHAHAHHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
! ! ! ! ! ! ! ! ! ! !

Go ahead, Todd! Build it! I just don't want to be within 500
miles of it!

Thanks, Todd....And here I thought this day was gonna be wet an
dreary! Thanks for the LAUGHS, putz!

station
> on 2 meter.

OK...So, tell us about them!

You call others "appliance operators", yet you STILL have not
provided a single bit of evidence of a single bit of non-commercially
built equipment operating at N9OGL.

> > I say that if you can't answer THAT question in the very next
> > reply to this post, that you are proving exactly what I've been
> > alledging.
> >
> > Steve, K4YZ
>
> Todd N9OGL

Not a single line of text devoted to describing ANY
non-commercial equipment in operation at N9OGL.

And in the end, you did exactly what I said you'd do...PROVED that
my allegations of your own "appliance operator" status was valid.

Thanks, Todd!

Steve, K4YZ

More of our r.r.a.p. Tom Swift, gleaned from the archives:

from alt.sci.time-travel

Todd Daugherty
Jun 26 2003, 7:24 pm

I've have this Idea for a "simple" Time Machine. A operator would set up
a
computer up to a high power wireless system. They would then set the
computer to transmit a message say in 30 years and hope that in thirty
years someone would reply back. comments?

Todd Daugherty N9OGL
Amateur Radio Operator

(and)

Todd Daugherty
Jun 26 2003, 10:44 pm

The Answer to your first question is yes. A computer hooked to a TNC
(which is a wireless modem) is set up with a timing system. Most
"Packet" software for wireless communication has a timer system in it.
It's part of the software. Why wait so long for the signal to transmit?
because you want to be able to send the signal to a time period where
high speed communication systems are in general uses. Scientist are now
just experimenting with high speed communication devices. For a person
to send a signal back in time they would have to uses a high speed
communication devices. Just remember it is a lot easier to sent a
particle or a signal through time then it is human or an object. On your
second comment about time travel via the human brain. I believe not only
"time-travel" is possible via the human brain but I also believe while a
person is a sleep the electro-magnetic emissions of say your brain is
connected to the multi-you in every parallel universe. The only time
your able to view those other universes is while your Brainwaves are at
the lowest point of the spectrum (around 1 to 14 hz) This also might
explain
NDE.

Todd N9OGL

(and)

Todd Daugherty
Jun 26 2003, 10:57 pm

The idea is basic....A person hooks a TNC (wireless modem) to VHF or UHF transmitter and setting the parameters to transmit a signal thirty years in the future. With Bandplans changing often the sinal will be heard by someone. The person on the recieving end would have to respond via a high
speed communication system (scientist are just now experimenting with it)
The transmitter would have to be placed in a place somewhere where no one
will distrub it and it would have to be connected to a continous power source. As I stated in a another post it easier to send a signal or a particle through time then it is to send a human or a machine.

this from alt.radio.pirate, in which Todd assists a new "pirate" in breaking the law. Note that Todd's media empire has expanded to cover three towns:

n9ogl
Jan 2 2001, 6:12 pm

There are many places on the internet where you can find kits for shorwave transmitter kits. If you can't find it under shortwave kits try under amateur radio. The hams have a number ofshortwave bands. You can all sorts of Ham kits for the shortwave band. As for what's the best band I would say somewhere in the 6MHz range. 7Mhz is too crowded with hams and high power shortwave broadcast.

from alt.radio.pirate, Todd explains that being a TV "pirate" isn't all it is cracked up to be:

n9ogl
Jul 27 2000, 12:00 am

I agree with that.....I ran a ten watt pirate TV station there for a while. After 3 blocks there was no signal at all.I gave up trying to get it to go farther, so i'm going to try my luck with LPFM which the window is suppose to open at the end of august.maybe I'll have better luck with it.

Todd O'Dochartaigh N9OGL
---

another from alt.radio.pirate. In this one, Todd's plans to up his "pirate" TV power to 100w. He uses an ATV transmitter converted to channel 14 and has issues over the use of three "fowl words":

n9ogl
Apr 7 2000, 12:00 am show options

Hello John,

I had to respond to your letter. You do have to run a lot of depending on your range it can run from 10 watts to 100 watts. The reason is because you are pushing a six MHz wide signal instead of a 10 KHz wide signal. My pirate TV station running at ten watts but we aren't getting the distance we really want so we are raising the power output to 100 watts. Television is also a little more expensive then radio because not only do you have a transmitter you also have cameras, props, amd other things to get a program going; unlike radio where you talk behind a mic. I like television because i've always wanted to get into it, and i had the transmitter so it made it simply for me to get into it. I'm using a ham ATV transmitter which i've converted to operate on channel 14.

Public Access - I've dealt with public access for a long time as well as running my pirate TV station. Public Access is ok but, it depends on the area your in. For example, Taylorville where the Pirate TV station is operating also has a Public Access Channel but no one uses it for one simple reason. They allow anyone to uses the channel but if they don't like anything you say they will not air it. Simple put the Local government and the cable company has a tight control on the public access channel. This was another reason my station was put on the air. Don't get wrong it not just here that they local government have a tight control there are number of cities here in the united states that have the same problem and no one, not even the FCC will do nothing about it. Public access again is great if you are allowed to have creative control over your program and is not forced to be censored. One of the problems I've notice with public Access is the cable companies right to censor "indecent material" Obscene material according the Federal Courts is legal on public access. In other words you can have two people have sexual intercourse and it legal. But, if one is screaming Obscene language in the process they can't air it. The problem is this, What is

really defined as obscene language. Here On of the programs I was trying to air on public access wasn't allowed to air because of three fowl words (two hell's and one dam) The cable company refused to air it; unless I did a "complete editing" of the content. (in other words they wanted the program to be edited in half because it contained "obscenity" anyway...there my two cents. I run a Low power pirate TV station and I'm not under anyones control execpt my own.

Apr 12 2000, 12:00 am

Hi John,
Yes, this town has a lot of dirty little secrets like it other towns around here (Springfield, Home of Human Rights and Decatur, Home of Black Liberation Radio). All have there little secrets. Here in Taylorville they like to suppress any information which needs to get out. That is why I will continue to fight for a right to be one tv. As i told the Chairman Bliley of the House Telecommunication Subcommittee. "I tried it your's and the NAB way (applied for a license) and found that they system is not on a level playing field" "So do want you want I will broadcast with or a license." I also gave Mr. Bliley my opinion on H.R. 3439 and some of the comment he and his colleague's suggested instead of LPFM and one of them was public access. I have gotten no reply so He probably threw it away.

Hi, Not very far were covering most of the community with are signal
and
plan to get better coax and a little more power. the antenna is a
cushcraft 440 beam antenna which has been tuned to the 470 MHz. band
with a 13.0 db gain. The antenna height around 35 feet with the antenna
pointing west. Up to five to six blocks you can pick it up with a set
of
"rabbit ears" while beyond that you need a outside antenna. We plan
soon
to buy a 100 watt amplifier to improve the signal.

WLPS-TV Channel 14

This priceless gem comes from alt.sci.physics.new-theories:

n9ogl
Aug 29 1999, 12:00 am

Hello

To start, I would like to excused for the poor typing of this text. I'm not very good with grammar nor am I with spelling.

1. Objects and Time
In the small community of Taylorville; where I live there once was a house known as Vanderveer House. It was once of course owned by the Vanderveer family. in the 1980's the house was totally destroyed and a Wal-Mart was put in it place. The question is this Is the Vanderveer house still there after being destroyed back in the 1980's The Answer is But it isn't in this "Time Frames". Basic physics dicatates "that no two object can occupy the same space at the same point in time" however the second part should go something like this "but, two object can occupy the same space at different points in time" What most people see as ghost or shadows from the past might be where the time frames are close enough that they can see both way. Time is a mesurement, which we measure by either clock or by "cause and effect" By cause and effect I'm of course refering to events with history. for example many people can remember events from their tenth birthday. So when you think of time or a object like a building or a love one perhaps you should look at it fourth dimensional.

2. Radio Waves

Since the complete comercialization of radio the study of what radio is and how they travel remain somewhat a complexing mystery. Some say that radio waves travel through "aether" But what radio waves are is a fourth dimensional and interdimensional wave. Radio waves are fourth dimensional because they can transcend time. radio waves which travel at a speed of 3.00 X 10/8 ms-1 or 186,000 mps for a radio wave everything around it is going slow time has in fact slow down for it. radio I believe are also interdimensional because a radio wave is "wormhole" it way through not only time but space as well. radio wave could also punching through "parallel universes". if that the case you might ask why can't we hear messages from other Parallel worlds? because their Qunta is different to are universe. just because some is one way in one universe doesn't by no mean make it work in another universe. So we can't them nor can they hear us.

3. life on other planets

i have heard from both sides about life on "other planets" and i've deiced to write on it. there is some theory about what is need for life on other planets. well throw that away. it don't mean squat. humans try to embelish this idea on how life is formed and how it is to operated on other planets. all the theorist on this little planet can come up with

all the little theories about that they want. the bottom line is that human are basing other life on other planet on are own worthless existance Don't; life through evoultion can adapt it self to a enviroment without the need of air, water, food or sunlight.

well that's it for now....some of theses idea i've been working on for a long time i have more stranger ideas that maybe sometime in the future I will post. What do you think???
Again sorry for any spelling or poor grammar.

here the letter I sent to McCain.....

Subject: LPFM
Date: Mon, 02 Apr 2001 21:15:17 -0500
From: daughert <daugh...@chipsnet.com>
To: John_McC...@McCain.senate.gov

Senator McCain,

I am writing you in regards to the FCC New Report and Order dealing
with LPFM (FCC O1-100) in it my groups application was dismissed
because on form 318 was said yes to a question dealing with unlicensed
broadcast; which I will talk about in a minute. The reason we did this
by saying yes was simply put to tell the truth and not perform purgery
which is a Federal offence. The reason we said yes is a looong story.
It started in the late ninties. I had appplied for a Low Power
Television license. I applied for this license six times and each time
I
applied my application was returned sometimes for the dumbest things
like they sent one back because They said I would have to have FAA
approval for my tower. The tower was only 60 ft up....under FAA and FCC
anything below 200ft doesn't require FAA approval. the next was I had
to
pay the licensing FEE although my group is a Non-profit orginization
and
it was stated on the application that it was. Then there was the main
thing.....that I didn't file it through a "filling windows" yet when I
asked when it was they wouldn't tell me and to top it off they were
granting construction permits for Low Power Television. bottom line
they
didn't want a small orginization like us to have a license. So after
applying six times for a licenses for Low power TV and said the hell
with it and began running a low power TV station without a license. My
signal although was putting out 10 watts only went one to two street
blocks. I did it simply because the FCC wouldn't license me and because
some people and congress don't care. I broadcast for two months
december
and january after that my transmitter went out. I was never caught nor
fined by the FCC yet these new ruling states simply that it dosen't
matter. well Senator I come to the conclusion that the FCC once again
has screwed me and my group out of a license and like always I type
these letters to a group of congress that don't seem to care. So my
group and I are going to go on the air without a license because were
sick of being screwed by the FCC, were sick of doing the hard work to
fill out thoses applications and we might even sue the FCC and you all
for all trouble and trama they've caused me and my group

Here's another from alt.sci.physics.new-theories

n9ogl
May 28 2000, 12:00 am

Hello,

There has in the past about time travel and the possiblity of going
back
and forth in time. Some scientist (and in my humble opinion i uses that
term lossly) believe that traveling down a black hole or through a
black
hole could lead to the past, the future or perhaps parallel universes.
that's if you can get pass the gravational field of a black hole not to
mention the huge amounts of radiation a black hole omittes. Some
suggest
going faster then the speed of light (FTL) after all a takon particle
can go faster the speed of light. but, alast, this idea is not thing
but
that a idea. I myself have come up with many ideas on the possiblity of

Time Travel. One of these ideas is so possible that with the techonolgy today makes it very possible. I believe we will never be able to time travel areselves but, i beleive it is possible to send a message to the future by means of the combination of computer techonolgy and radio communication. the idea is simple take a computer hook it to a wireless modem and have it sit on a given radio frequency.wireless modems called Terminal Node Controls can be set to a certian time frame to beacon.so you set it to beacon 30 years into the future this instance tiem travel to the future. it will be however up tothe future how to respond back.

Todd

I guess Todd never thought of writing a letter in the present time and leaving it lying around for thirty years. Perhaps he'd even be around to open it and to be able to read the words of a Todd thirty years in the past. He'd still have the problem of how to respond to the Todd thirty years in the past.

That's Part II of the report from fantasy land. Is there anyone still wondering why Todd wasn't issued a license for a broadcast station?

Dave Heil

Admission of violation of FCC rules and regulations...and he
wonders why he's not a broadcast licensee....

Another question for K2ASP...Phil, isn't this yet ANOTHER
disqualifying act?

Can't we bring this to the Commission's attention and see if we
can't get him off of Amateur Radio too...???

(Some more snippage to....>>>)

> Here On of the programs I was trying

"obscenity"
> anyway...there my two cents. I run a Low power pirate TV station and
> I'm not under anyones control execpt my own.
> (sorry for any grammar or spelling)

Hmmmmmmmmmmmmmmmmmmmmm.....

His motivation for getting on the air is

(1) to watch people swearing while having sex,

(2) use profanity himself (even spelled wrong...Nothing more
humiliating that an ignorant man trying to express himself profanely
that can't even spell it correctly!)

(3) Expresses his complete lack of belief that just because he is
operating illegally that he's not responsible to federal regulations

> Todd O'Dochartaigh
> WLPS-TV channel 14
> Taylorville, Illinois

Then can't even spell his own last name correctly.

(More snippage.....>>>)

I guess it didn't have anything to do with filing incorrectly,
failing to meet licensure criteria, failure to meet technical criteria,
and complete lack of faith that you'd be a credible and trustworthy
licensee...?!?!

> So after
> applying six times for a licenses for Low power TV and said the hell

On Wed, 23 Mar 2005 16:04:29 GMT, Dave Heil quoted Todd as posting:

> Obscene material according the Federal Courts is legal on public access.

Obscene material is unprotected speech (therefore not "legal" on
cable - see 18 USC s. 1468).

As contrasted to broadcast material (18 USC s. 1464) Section 1468
does not proscribe indecent material, which the courts have held
"semi" protected i.e. subject to FCC time-of-broadcast regulation
(see Pacifica v FCC). Todd mixed that one up again.....

Expect that sometime in the near future, Section 1468 will be
amended to proscribe indecency by cable or satellite delivery, again
subject to FCC time-of-broadcast regulation. That will create a
"level playing field".

I'd bet the ranch on it, Todd. It is possible for anyone to copyright original material. It is not possible to copyright original material posted to a newsgroup.

> I hold a number of copyrights

I'll bet you've held some copyrights. You've likely held "Reader's Digest" and "QST". You have apparently have copyrights which aren't copyrighted and inventions which haven't been invented. You know all about packet BBS software but you don't know how to set it up. Oh, and you're the president and CEO of a broadcasting company which has only pirate outlets. Are there other employees or are you the president, CEO and janitor? Do you have offices or is your company headquartered in a bedroom in your parents home?

You seem to have a tough time with reality, Todd.

They do.

And under our Constitution and laws, the FCC ensures, to the best
of it's ability, that this FINITE RESOURCE will be accessible to all.
Of course electronic anarchists like N9OGL who believe that anyone
should do anything they like would make it impossible for anyone to use
it at all.

> 2. The FCC should only be allowed to license that, which is under
> 47 USC 151 "Interstate and Foreign Commerce by wire or radio"

OK.

Let's remove the FCC from the picture for a second. You go ahead
and fire up your LPFM station on 107.9 (or whatever frequency you
choose).

I live next town over and >>I<< want to operate on 107.9...Or
worse yet, I just want to jam you becasue I think your "opinion" or
programming format suck. Who ya gonna call now?

State or local agencies? OK...So Illinois allows you to operate
here...but just across the state line in Podunk, Missouri, THEY
"license" me to operate on that frequency...at 1500 watts, because in
MO they define "low power" as anything below 10,000 watts.

I'd usually expect a rational person to see where this is going,
but hey...it's Todd...

> 3. Not only should a person have the right to listen to not only
> the broadcast services but all parts of the electromagnetic spectrum.

> even the cellular band which is part of the radio spectrum and there
by
> belong to the people.

Hey Todd...waddaya say I park a van outside your place and start
monitoring your cell and cordless phones. I further record them and
play them at local venues. Since everyone can listen to everything
under your "plan", nothing you say on "the phone" is protected.

> 4. The people should have the right to choice his satellite
> package. The person should have the right if he wants the Network
feeds
> off the satellite and wants to pay for them be allowed to buy them
> regardless if he recieve local broadcasting.

Gee, Todd...We have that here in Tennessee...What's up with you in
Ill-annoyed?

> 5. The FCC should eliminate any useless services on the
> electromagnetic spectrum (There is still some first generation radio
> services on the air) Any new service like Digital Cellular Phones
should
> be phased into the old cell band instead of allocating them spectrum.

You are incompetent to hold broadcast licensure, and only hold
Amateur licensure by the grace of God...Why would they consider your
"ideas" for wireless telephone technology?

> 6. The FCC should make it easier for people to obtain a license,
> they should promote the Idea of waivering fees and other stuff like
> Techincal rules. The FCC should accept applications regardless if
it's a
> filing window or not.

Oh, heck yeah! Let's let anyone who get's it in thier head to do so
to have a license! And since we're loading the bands up with all these
citizen-broadcasters, let's screw the technical standards which help to
maximize the already dwindling spectrum! What's a little intermod or
bleed-over among broadcasters! Live out on the fringes of overlapping
stations? Too bad!

> 7. The FCC shouldn't create quick fixs policies instead should try
> to improve what they have internally.

Does anyone other than Todd have an idea what this means?
Todd-to-English translation, please...???

> 8. The FCC should stop believing in this "burden on the commission"
> because there is always going to be a burden regardless. instead the
> FCC should try to get things done.

But Todd! You'd just throw them aside!

Besides, Todd...And I know this will be painful for you to accept,
but it's ill-informed, narrowminided, functioanlly illiterate IDIOTS
like you that create the burden in the first place!

> 9. The FCC should work more closer to the people then the big
> companies and organizations. The FCC believes they serve the public's

> intrest but in reality the FAA serves the public's intrest better
then
> the FCC because the FAA listens to the people.

And what was the last NPRM from the FAA >>YOU<< responded to,
Todd?

What "issues" has the FAA addressed that the FCC has failed to do
so, Toddie?

> 10. The Question of what's Interstate and what's Interstate should
> be answered.

BBBWWWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHAHAHAHAHAHAHAHAHAHAHAHA
! ! ! ! !!

> well that's it.....that's the changes I think are needed I believe
the
> FCC could care less on what I say or anyone in alt.radio.pirate. then

> again I like everyone else bitching and voicing my opinion

I enjoy seeing you act this way in public too, Todd...It reaffirms
my belief that procreation should be licensed, and abortions should be
permitted up to age 30.

> Sure there has been a few cases with
> interferning with
> the aircraft band as a pilot myself I wouldn't want that to happen.
> However there has been a lot of low power services out there that
> didn't
> cause interfernce which out weights the cases that do.

And which case that DOES cause interference to the avaition
allocations is OK, Todd? How many episodes of interference are OK to
the safety of flight?

Do YOU want to be on the flight that winds up two miles short of
the runway because some idiot LIKE YOU was exercising his "free speech"
on an ILS frequency? Do you want to be the guy who kept an FAA
facility from hearing a distress call or warning of a hijacking just so
you could transmit your "bulletins" on "pirate TV"...?!?!

That's EXACTLY what you're proposing with your anarchist licensing
ideas or relaxation of "technical rules"...

> I am against
> thre
> LOW POWER RADIO PETITION because to me it is a quick fixs the FCC
> should
> allow that service now with waivers (which their rules allow) but
they
> will not. I did apply for a license twice and both times it was
> returned
> so my view is to HELL with them.

I am sure your whole life has been full of people realizing what
an idiot you are and did their best to keep you from making a fool out

of yourself or harming others with your "me first" attitudes.

We can only hope the FCC will keep it up.

(I am kinda hoping K2ASP might "drop a dime" on some old friends
in Gettysburg to start the mill moving on Toddie now!)

> Oh one more thing this "chaos" which
> accured back in the 20's wasn't by Low power operators but by greedy

> Commercial operators and the Navy.

Sure it was by "low power" operators! There were "broadcast
stations" popping up on every hotel and newspaper building across the
country!

> Right, but there is a lot of broadcast services that don't cross the
> line. for example my 8 watt Low power television transmitter which
runs
> on UHF will not cross the state line because 1. i'm in the middle of
> the
> state. 2. the power of 8 watts and the antenna height of 60 ft 3.
the
> terrain. fact is my station doesnot cross the state line and there
by
> the FCC doesn't have the juridiction over my signal.

So...it's OK if you're "in the middle of the state"...But what
about folks who live close to state lines? Or people who live at
higher elevations and even low power carries far? Or how about folks
who live in realtively small states ie: Rhode Island, Delaware, etc?

They're just squat out of luck?

Face it, Todd...Not everyone can be or even SHOULD be a
"broadcaster".

L E A S T of all a racist, incompetent, functionally illiterate
idiot like you! But there is an "up" side...You do have a future as a
stand up comic...You've had us in stitches for days!

>
Accually, Part 15 depends on Frequency, 100mw can be ran on the AM
broadcast Band, on 160 to 190 I believe is 1 watt, at 13MHZ part 15 is
10,000 Microvolts per meter at 30 meters, on the FM Broadcast Band it
250 microvolts per meter @ 30 meters, and on Some frequencies it's high
on other's it low. for more information goto:

Time travel isn't possible, if it were someone from the future would
have come back in time to tell us about it.

Ooooooh! A WATT at 160khz. Real quick, Mr Pirate Radio Engineer,
work out the ERP at that frequency based upon the antenna restrictions
for that allocation!

And your Part 15 ERP for the other HF allocations STILL works out
to less than an 1/8th to 1/10th of a watt no matter where you go!

But it STILL doesn't mask your illegal activities, specifically
promoting and facilitating unlicensed radio operation.

Idiot!

I have no use for them, Todd, on 2 meters or otherwise.

Not only are you violating the "no broadcasting" rule of Part 97,
it's now apparent that you have no repsect for established Band Plans.
I cited the exact current plan for the 2 meter plan and this was your
"response".

I think that pretty much sums up what Amateur Radio can expect
from you.

And the reaction you are getting FROM Amateur Radio is pretty much
a result of your lack of respect for the program, Todd.

Is true. You can rationalize it however you want, Todd, but "information" tainted with your "opinion" becomes editorial. Your "editorial" is of no use to me or anyone else in the Amateur Radio Service.

Again dickhead, no where in the FCC rules does it state that information bulletins can't be opinionated.....Like I said prove it.....AS far as I seen the FCC even pretty much stated that in the letter to K1MAN in 2004. Secondly, YOU don't represent the WHOLE amateur radio community, You can believe all you want the bottom line is I'm right. SO you and your little bitches can continue to bitch and complain on here but that's all it will be, A bunch of little bitches on a newsgroup complaining to themselves.

Acutally, no one here is "complaining" to anyone.

We're very accurately pointing out what a profane, functionally
illiterate idiot you are.

So far, you've been doing a pretty good job of helping us do it,
too!

AND....we're doing it in an open, unmoderated, non-copyrightable
but very definitely traceable public forum.

So you go RIGHT ON AHEAD and keep telling us about all these
illegal broadcasts you're making, how you operate pirate TV and radio
stations, and how the FCC can go do themselves...

>I also know that here in
> Illinois 145.5 to 145.8 is used here in Illinois for everything from
> wireless Amateur radio LAN to echolink.

So you were ready to knowingly start using a relatively wideband
mode in a part of the spectrum where low power data is being used...

> if anything I run my
> information bulletin on 146.835 Mhz hehehe

At least you'd be on a repeater OUTPUT, and hence operating on a
frequency planned for simplex and repeater outputs...THEN all you have
to "worry" about will be causing interference to coordinated repeaters
on 146.82 and .85.

So what's your problem with picking an unused simplex frequency
between 146.40-146.595 and 147.405 to 147.585 where simplex is supposed
to be?

Well, well, well! Toddie has his own repeater! I am sure it's the cornerstone of the Amateur net in Ill-annoyed!

An it is, of course, completely scratch built! No commercial gear for Toddie! No "appliance operator" at N9OGL, No Siree!

Please, Toddie! Tell us all about it! What PLANS did you build it from? Power? HAAT? ERP? Controller?

Steve, K4YZ

Amateur Radio to Have Role in Largest-Ever Mass Casualty Exercise

NEWINGTON, CT, Mar 21, 2005--Amateur Radio Emergency Service (ARES) members in Connecticut, New Jersey and several other states in the Northeastern US are preparing to take part in what's being characterized as the most comprehensive terrorism response exercise ever conducted in the US. Sponsored by the US Department of Homeland Security and intended as a realistic test of the nation's homeland security system, the exercise--TOPOFF 3--gets under way Monday, April 4, and continues through the week.

SNIP

As usual...rants derailed by facts.

N9OGL wrote:
> You know steve, your an ###hole, who ever gave you the title
> "HAM-RADIO" needs to be shot.

No one ever "gave" me ANY title, Toddie. I've earned each and every "title" that I've ever used...United States Marine, Private Pilot, Nurse, Paramedic, Amateur Radio licensee...

Unlike SOME people who sign documents as the "CEO" of non-existant companies and organizations, using ficticious last names, etc...

> because frankly you don't deserve that title.

If you mean "licensed Amateur Radio operator", sure I deserve it. Passed the legally required tests, including the 20WPM code test.

And I passed them "BB"..."Before Bash".

> As for my writing skills, as I've probably stated before I'm not
> a writer.

That's obvious.

Nor are you a professional broadcaster, engineer, inventor, lawyer, etc, but you try to impress us with how competent you allegedly are in all those disciplines. The evidence to the contrary is glaring.

You don't have to have an advanced degree in English to be reasonably competent, Todd. It just scares the bee-jeebers out of me that some post-secondary institution in Illinois is allgedly granting you a degree, and yet you are now no more competent in English than you were on Day One of Kindergarten.

You're the proof that the end-product of many of our educational institutions is woefully incompetent in basic social and educational skills.

> but I sure as hell can write a lot better then some amateurs
> around here..

Uhhhhhh...No, you're actually WORSE than most in here. And unless Mark I-Am-A-Drafted-Gay-Pagan-Chemical-Corps-Colonel Morgan, KB9RQZ, returns to the fray, YOU'RE it!

You should to a Google on Mark's past postings herein and see what REALLY terrible can be! (You're not that far off, though...)

> Hell, some of letter's In the past that I've got from the
> FCC when they responded to a question was a hell of lot worse then

what
> I write.

Now you're blatantly lying. I DARE you to scan and post the
letters on your blogs or other publically accessible website.

Now...don't get me wrong...I don't doubt that you didn't
understand what was being said in the letters, however that doesn't
make them worse than anything YOU have written!

Todd...You're borderline incompetent with the written English
language...And considering you're "in college" and have the resources
of spellcheckers, etc, there's no excuse for it.

Everyone, including me, makes occassional typos. Oh well.

You, on the otherhand, make it an Olympic sport. But you'd still
only make the Silver or Bronze...Mark pretty well had the Gold tied up!

> FInally I think people who keep bitching about someone writing
> skills are trying to envade the questions being asked.

But I'm not the one evading anything, Todd.

> Now I know your
> probably going to say, well if the person could write so we could
> understand them....well read the unstructured text and try to make
> sense of it....or is it too much like work....

It's not my responsibility to make YOU legible or understood, Todd.
Nor is it my job to understand your frequent lapses into complete
gibberish.

If you want to be understood, take the time to express yourself
effectively and correctly.

And tying your thoughts together with the "f" word or other
profanities is not "effective expression". That's just profanity, and
that undermines even the most poignant of posts.

>have fun on t newsgroup Mr "Hate Radio"

Who's "Mr Hate Radio"...?!?!

If you mean me, Todd, that's inaccurate on several levels...First
and foremeost because I love radios...Amateur...CB...LMR...Military,
etc. I've been an Amateur since 1972, spent a career in government
service doing aircraft electronics, and am still involved in
radiocommunication, both as a professional and Amateur, to this day.

If you mean that I "hate" on the radio, that's wrong too.

I don't even hate you. I understand you better than you think.

It may be a bit cruel of me to take advantge of someone so
obviously ill-equipped to engage in such toe-to-toe exchanges in this

forum, but you keep coming back for more and making a fool out of yourself, so I just assumed you like being publically humiliated. You do keep giving us so much to work with, after all!

Enjoy!

So just how many people do you think will hear your "broadcast" on 2 meters? You will be lucky if two people listen in and that will only be for maybe 2 minutes as they will quickly realize that what you have to say is of no interest to the amateur radio community.

They do.

And under our Constitution and laws, the FCC ensures, to the best
of it's ability, that this FINITE RESOURCE will be accessible to all.
Of course electronic anarchists like N9OGL who believe that anyone
should do anything they like would make it impossible for anyone to use

it at all.

The finite resourse no longer hold true anymore thanks to digital
radio.....The point of that was that the FCC has over the last 10/20
years, has bent over backworks for the "special interest" and some of
the"special interest" goals sometimes do not reflect the public
interest.

OK.

Let's remove the FCC from the picture for a second. You go ahead
and fire up your LPFM station on 107.9 (or whatever frequency you
choose).

I live next town over and >>I<< want to operate on 107.9...Or
worse yet, I just want to jam you becasue I think your "opinion" or
programming format suck. Who ya gonna call now?

State or local agencies? OK...So Illinois allows you to operate
here...but just across the state line in Podunk, Missouri, THEY
"license" me to operate on that frequency...at 1500 watts, because in
MO they define "low power" as anything below 10,000 watts.

I'd usually expect a rational person to see where this is going,
but hey...it's Todd...

Under the Communication Act of 1934 the FCC has juridiction over
interstate and foreign commerce via wire or radio, Intrastate
communications is the juridiction of the state.

> 3. Not only should a person have the right to listen to not only
> the broadcast services but all parts of the electromagnetic spectrum.

> even the cellular band which is part of the radio spectrum and there
by
> belong to the people.

Hey Todd...waddaya say I park a van outside your place and start
monitoring your cell and cordless phones. I further record them and
play them at local venues. Since everyone can listen to everything
under your "plan", nothing you say on "the phone" is protected.

No, the Electronoic Communication Privacy Act of 1986 was pushed by the Cellphone companies because they didn't want to encrypt their phone systems which they had the ability to do.

> 4. The people should have the right to choice his satellite
> package. The person should have the right if he wants the Network feeds
> off the satellite and wants to pay for them be allowed to buy them
> regardless if he recieve local broadcasting.

Gee, Todd...We have that here in Tennessee...What's up with you in Ill-annoyed?

This post was written long before "Local channels" were placed on the satellites. Before that (thanks to the National Association of Broadcasters) if you lived in a alleged "contour" then you were not allowed to get feeds off the satellite. The NAB pushed congress to pass a law to protect "local services"

> 5. The FCC should eliminate any useless services on the
> electromagnetic spectrum (There is still some first generation radio
> services on the air) Any new service like Digital Cellular Phones should
> be phased into the old cell band instead of allocating them spectrum.

You are incompetent to hold broadcast licensure, and only hold Amateur licensure by the grace of God...Why would they consider your "ideas" for wireless telephone technology?

No dickhead, there is still first generation services on the electromagnetic spectrum, and secondly instead of allocation new frequencies for digital phones have the cell service phase out analog phones and put digital phones in that same band, instead of giving them new spectrum. The point is instead of allocation spectrum for a newer version of a old service have that service group install in the new service on the old and phase out the old...again this was write a long time ago

Oh, heck yeah! Let's let anyone who get's it in thier head to do so

to have a license! And since we're loading the bands up with all these

citizen-broadcasters, let's screw the technical standards which help to

maximize the already dwindling spectrum! What's a little intermod or bleed-over among broadcasters! Live out on the fringes of overlapping stations? Too bad

No, I want the FCC to do is their JOB, the FCC is authorized to grant licenses, and consider waivers, The Federal Courts has gone farther stating the FCC MUST consider waiver, the bottom line is the FCC has not once done that. As for "dwindling spectrum" again digtal radio/ television has pretty well put an end to that. A Digital TV station can run more then one station on the same frequency, the same with digital radio. But hey you licnesed CB operators are still using that old

"analog" system and basical don't know shit outside your own backyard

> 8. The FCC should stop believing in this "burden on the commission"
> because there is always going to be a burden regardless. instead the
> FCC should try to get things done.

But Todd! You'd just throw them aside!

Besides, Todd...And I know this will be painful for you to accept,
but it's ill-informed, narrowminided, functioanlly illiterate IDIOTS
like you that create the burden in the first place

First off you Fucking COCK SUCKER, what I was refering to was the FCC
pushing the burden of proof onto people in the courts, The old saying
you innocent into proven guilty is not true to the FCC is more like
your guilty until you prove yourself innocent, In some instance the FCC
has already made their decision before all the facts are gathered.

> 9. The FCC should work more closer to the people then the big
> companies and organizations. The FCC believes they serve the public's

> intrest but in reality the FAA serves the public's intrest better
then
> the FCC because the FAA listens to the people.

And what was the last NPRM from the FAA >>YOU<< responded to,
Todd?

What "issues" has the FAA addressed that the FCC has failed to do
so, Toddie?

No dumb ass, the point is the FCC should serve the public's interest a
lot better then they do, instead the serve the special interest more
The special interest is only there to serve one person...themselves.
The point was the FAA serves the public interest BETTER then the FCC
does, Just look at the new sports license they recently passed.

> 10. The Question of what's Interstate and what's Interstate should
> be answered.

The point of 10 was, and although it's screwed up i'll explain. The
question of Interstate Communications is not defined, simple for this
reason. the courts and congress believe that ALL RADIO transmissions,
despite their power, antenna height, and frequency is interstate by
nature. This stems from a federal court case dealing with a radio
station from the 1930's and later to CB cases in the late 50's on to
present time.

> Sure there has been a few cases with
> interferning with
> the aircraft band as a pilot myself I wouldn't want that to happen.
> However there has been a lot of low power services out there that
> didn't
> cause interfernce which out weights the cases that do.

And which case that DOES cause interference to the avaition
allocations is OK, Todd? How many episodes of interference are OK to
the safety of flight?

Do YOU want to be on the flight that winds up two miles short of
the runway because some idiot LIKE YOU was exercising his "free speech"

on an ILS frequency? Do you want to be the guy who kept an FAA
facility from hearing a distress call or warning of a hijacking just so

you could transmit your "bulletins" on "pirate TV"...?!?!

The problem with interference of the aircraft band is although there
has been cases of interference there is really no "proof" that it
happened. TV is a different matter because it is higher up on the
spectrum and the olds of interference is lower, compare to a "pirate
radio station" I will point out though that Unlicensed Broadcast has
interfere with airports and so has Licensed Broadcast.

> I am against
> thre
> LOW POWER RADIO PETITION because to me it is a quick fixs the FCC
> should
> allow that service now with waivers (which their rules allow) but
they
> will not. I did apply for a license twice and both times it was
> returned
> so my view is to HELL with them.

I am sure your whole life has been full of people realizing what
an idiot you are and did their best to keep you from making a fool out
of yourself or harming others with your "me first" attitudes.

We can only hope the FCC will keep it up.

No dickhead, the point was the LPFM service was a quick fix, the FCC
had the power before creating that service, but the Mass Media Bureau
didn't and would not act upon it. (ie. they wouldn't consider
applications and waiver for stations less then 100 watts, although the
Federal Courts told them they MUST consider waivers.)

(I am kinda hoping K2ASP might "drop a dime" on some old friends
in Gettysburg to start the mill moving on Toddie now!)

GO FO IT!!! I DARE YOU!!! but you better know what your getting
youself into....

> Oh one more thing this "chaos" which
> accured back in the 20's wasn't by Low power operators but by greedy

> Commercial operators and the Navy.

Sure it was by "low power" operators! There were "broadcast
stations" popping up on every hotel and newspaper building across the
country!

I would really suggest you go back and read the history of radio, including the early years. because that's where that statement is coming from.

> Right, but there is a lot of broadcast services that don't cross the
> line. for example my 8 watt Low power television transmitter which runs
> on UHF will not cross the state line because 1. i'm in the middle of

> the
> state. 2. the power of 8 watts and the antenna height of 60 ft 3. the
> terrain. fact is my station doesnot cross the state line and there by
> the FCC doesn't have the juridiction over my signal.

So...it's OK if you're "in the middle of the state"...But what about folks who live close to state lines? Or people who live at higher elevations and even low power carries far? Or how about folks who live in realtively small states ie: Rhode Island, Delaware, etc?

They're just squat out of luck?

Face it, Todd...Not everyone can be or even SHOULD be a "broadcaster".

L E A S T of all a racist, incompetent, functionally illiterate idiot like you! But there is an "up" side...You do have a future as a stand up comic...You've had us in stitches for days!

again this has to do with intrastate vs Interstate communications.....at lease I'm not some dickhead ham radio operator who gets on a newsgroup and plays HAM COP.

> you innocent into proven guilty is not true to the FCC...

Your archived posts pretty well do you in. It looks like you went from
"innocent into proven guilty" all by your lonesome. Your own archived
words show you to be guilty of breaking any number of FCC regs.
> ...is more like
> your guilty until you prove yourself innocent, In some instance the FCC
> has already made their decision before all the facts are gathered.

Doesn't look that happened with regard to issuing you a broadcast
license.

> No dumb ass, the point is the FCC should serve the public's interest a
> lot better then they do, instead the serve the special interest more
> The special interest is only there to serve one person...themselves.

Wow! That's quite enlightening. The special interests are in reality
just one person?

> The point of 10 was, and although it's screwed up i'll explain. The
> question of Interstate Communications is not defined, simple for this
> reason. the courts and congress believe that ALL RADIO transmissions,
> despite their power, antenna height, and frequency is interstate by
> nature. This stems from a federal court case dealing with a radio
> station from the 1930's and later to CB cases in the late 50's on to
> present time.

Interstate communications regulation was defined long ago. Your lack of
understanding doesn't mean that there is no definition.

> The problem with interference of the aircraft band is although there
> has been cases of interference there is really no "proof" that it
> happened.

Really? And you know this how?

K4YZ: "(I am kinda hoping K2ASP might "drop a dime" on some old friends
in Gettysburg to start the mill moving on Toddie now!)"
>
> GO FO IT!!! I DARE YOU!!! but you better know what your getting
> youself into....

A debate with a mental midget? A lawsuit from a guy who doesn't seem to have enough loot to pay an attorney's retainer? What would he or Phil be getting into, Todd? All that's needed for proof of your misdeeds and lack of character is copies of your archived posts and perhaps some copies of letters you've written to public figures. If you keep acting like a mad man, you could end up getting your amateur radio license yanked. If it happens, you can blame yourself.

>That's simply wrong if you're discussing radio

I suggest you read Section 151 of the communication Act of 1934.

§ 151. Purposes of chapter; Federal Communications Commission created

For the purpose of regulating interstate and foreign commerce in communication by wire and radio so as to make available, so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges, for the purpose of the national defense, for the purpose of promoting safety of life and property through the use of wire and radio communications, and for the purpose of securing a more effective execution of this policy by centralizing authority heretofore granted by law to several agencies and by granting additional authority with respect to interstate and foreign commerce in wire and radio communication, there is created a commission to be known as the "Federal Communications Commission", which shall be constituted as hereinafter provided, and which shall execute and enforce the provisions of this chapter.

As well as 152 of the communication act

§ 152. Application of chapter

(a) The provisions of this chapter shall apply to all interstate and foreign communication by wire or radio and all interstate and foreign transmission of energy by radio, which originates and/or is received within the United States, and to all persons engaged within the United States in such communication or such transmission of energy by radio, and to the licensing and regulating of all radio stations as hereinafter provided; but it shall not apply to persons engaged in wire or radio communication or transmission in the Canal Zone, or to wire or radio communication or transmission wholly within the Canal Zone. The provisions of this chapter shall apply with respect to cable service, to all persons engaged within the United States in providing such service, and to the facilities of cable operators which relate to such service, as provided in subchapter V-A.

or how about 153 of the communication act

§ 153. Definitions

(22) Interstate communication
The term "interstate communication" or "interstate

transmission" means communication or transmission
(A) from any State, Territory, or possession of the United States
(other than the Canal Zone), or the District of Columbia, to any other
State, Territory, or possession of the United States (other than the
Canal Zone), or the District of Columbia,
(B) from or to the United States to or from the Canal Zone, insofar as
such communication or transmission takes place within the United
States, or
(C) between points within the United States but through a foreign
country; but shall not, with respect to the provisions of subchapter II
of this chapter (other than section 223 of this title), include wire or
radio communication between points in the same State, Territory, or
possession of the United States, or the District of Columbia, through
any place outside thereof, if such communication is regulated by a
State commission.

do I need to go on.......

Your archived posts pretty well do you in. It looks like you went from

"innocent into proven guilty" all by your lonesome. Your own archived
words show you to be guilty of breaking any number of FCC regs.
This post dickhead had nothing to do with me...it had to do with the
behavior of the FCC and pirate radio operators and their "alleged
interference" with boadcast Stations. No where in that post did I state
anything about me, but Dumb asses like yourself read into stuff that
isn't there.

A debate with a mental midget? A lawsuit from a guy who doesn't seem
to
have enough loot to pay an attorney's retainer? What would he or Phil
be
getting into, Todd? All that's needed for proof of your misdeeds and
lack of character is copies of your archived posts and perhaps some
copies of letters you've written to public figures. If you keep acting

like a mad man, you could end up getting your amateur radio license
yanked. If it happens, you can blame yourself.

Dave K8MN

Like I said Davy GO FOR IT!!!!! I DARE YOU.

Wise up, Todd. I posted a number of your archived posts in two parts.
In a number of them, you admit to operating pirate radio and TV stations
which operate on self-assigned frequencies in excess of Part 15 power
levels (by a bunch). You confess to operating without a license in some
places and in others you profess that you'll go back to operating
without a license. You've admitted, publicly to being a scofflaw. I
didn't read anything which wasn't plainly stated by you.

Actually, you said, "Go Fo It". What is it that I'd be letting myself
in for, Toddkins?

> Todd O'Dochartaigh N9OGL

Awwww! You've used that fictitious name again. Now you won't have to
ask "what ficticious name?". It is the one thing you've really
invented.

> radio.....

Absolutely one of the most assinine and ignorant things you've
posted, Todd.

The FCC and the NTIA both are getting to the point where they've
gone from 50kHz spacing down to 25, then 12.5, now down to 6.25kHz
spacing.

Aeronautical users are pared down to 8.33kHz channels.

This DESPITE the proliferation of "digital" radio.

NTIA, the agency which regulates and licenses federal and military
users of the electromagnetic specrum is squeezing everyone into 6.25kHz
channels for years.

> The point of that was that the FCC has over the last 10/20

And since any radio may be used in any state at any time, unless
it's bolted the floor of the building in which it's being used, all
radios are controlled by one agency.

Furthermore, propagation that conducts RF outside state lines
exists all the way up to the microwave regions, Toddie!

I am in middle Tennessee, and our paramedic base station at the
hospital I work at routinely hears traffic from KY, MS, AL and GA. We
are occassionally able to check into Memphis MedcComm's AM radio roll
call on 155.34mHz.

On occassion, I can hear the MOBILE side of EMS, fire, police and
even GMRS users at my home QTH from all those locations, and that's
with a simple discone and scanner. The antenna is only at 20ft and fed
with RG-8. Nothing special. Imagine what I could do with some
hardline, a tower and a band-resonant antenna...?!?! Even better if I
was on the mountain!

And if they did your .99 cent cellphone at .20 cents per minute (or
less) would still be a very expensive item operating at a dollar a
minute or more for service.

I've had "local channels" since at least 98. That was before the
post (August 99).

The question remains open...What up with you in Ill-annoyed?

>> > 5. The FCC should eliminate any useless services on the

Gee, Todd....They are re-configuring things here...Don't know
what's up with your folk in Ill-annoyed. And they call Tennsseeans
'backwards'...Sheesh!

>> Oh, heck yeah! Let's let anyone who get's it in thier head to do
so

> stating the FCC MUST consider waiver, the bottom line is the FCC has
> not once done that.

Todd, have you ever learned how to properly use a "period"...???

The FCC >>IS<< doing their jobs, Todd.

They have prevented an incompetent, unqualified, profane little
punk from trashing up the airwaves in Illinois, so I'd say they did
what they had to.

YOU may not like the results, but that's too bad.

Just becasue the FCC is the license issuing authority does NOT
mean they HAVE to grant you a license!

> As for "dwindling spectrum" again digtal radio/
> television has pretty well put an end to that. A Digital TV station
can

And in YOUR case the "facts" are (1) your frequent and liberal use
of profanity (including your assertion that you've 'called them worse
to thier face'), (2) your failure to properly file documents in the
required time frame, (3) the failure to file them correctly, and (4)
your failure to adequately document your financial standing to justify
"non-profit" status have prevented you from getting the license you
seek!

In other words, you're the incompetent idiot that they have been
insinuating you are and that I am point-blank calling you!

>> 9. The FCC should work more closer to the people then the big

> does, Just look at the new sports license they recently passed.

They are doing their job very nicely, I'd say. You are still
without a broadcast license, and that >>IS<< serving the public
interest!

And the "Sport Pilot" license has been a work-in-progress for 20
years or more, Todd. It wasn't something they just popped up and said,
"Oh gee, let's do this...". It started with the introduction of Part
103...The part that authorized ultralights and hang gliders.

If you need a bit more history, go to http:///www.eaa.org. Those
are the folks who have rode herd on that project.

What you were TRYING to seperate was "INTERstate" and
"INTRAstate".

The reason you screwed it up was that you were too impatient to
try and impress us with your opinion that you didn't take the time to
look in a dictionary to get the right definitions.

Uhhhhh...actually there have been quite a few cases of interference
to aeronautical frequencies, Toddie! That's why it's still "an issue".

The LPFM service was NO "quick fix". The issue was debated for
YEARS before the FCC finally decided to go with it.

Who's playing "ham cop", Todd?

And as for the "inter" vs "intra" state, that's already been
decided in the Supreme Court.

No amount of pontification, swearing, demanding, foot stomping or
otherwise childish behaviour by a developmentally delayed adult is
going to make them revist the issue.

The frequent "name changes", threats, admissions of wrongdoing as
they pertain to clandestine radio operation...

I'd say he's digging himself in pretty well.

OK, Toddie...Is your last name "Daugherty", as you have it on your Amateur Radio license, or is it "O'Dochartaigh" as you've posted on USENET posts, recent and current?

>I think your smoking crack.

You're welcome to make that suggestion to the authorities, Todd.

Of course it would be yet another unfounded, "barking at the moon" outburst from one who is already so well known for being an idiot in public.

Lastly, I wonder if "the members" of your "non-profit organization who's purpose is to promote Theater, Telecommunicaitons and the Performing Arts" know that you use thier name in the signature line of posts that are profane, functionally illiterate, acknowledge violation of federal law and are just basically humiliating...???

I know in the programs that I belong to, if I were to "represent" myself as speaking on thier behalf in posts that were as assinine, profane, threatening and irrational as yours, I'd be "removed from office" if not removed from the membership altogether!

Under what chapter of Illinois law are you organized? Do you have IRS 501(c)3 tax exclusionary status? If so, what is the certificate number or date of waiver and who is the authorizing agent?

No, they are NOT the same thing.

Your legal name is either O'Dochartaigh or it's Daugherty.

No they are not. On your FCC license, as any legal document, it must be spelled like your legal name, so if it isn't spelled correctly on your FCC license, then your license isn't valid because it doesn't contain your legal signature and that means every time you get on the air, you are illegal.

> so FUCK YOU!!!!!

If there is a repeater there and you intend to use it, you had better get the permission of the repeater owner. If you don't, he has the right to file an interference complaint and the FCC has a pretty good record of going after people who misuse repeaters.

But is it coordinated? Are there any physically nearby repeaters on nearby frequencies? Based on his general approach, I think there is very little likelihood that he went through the coordination process to determine a suitable pair to use.

By the way, didn't he indicate he was a "poor college student"? If so, how can he afford to put up a repeater?

By the way, Todd...It's illegal to do another illegal act just
because you don't like the way things are going. There is absolutely no
legal justification for going ahead and breaking the law to do what you
were told "no" for in the first place.

> IT'S NOT FICTICIOUS YOU ****ING &&&&.

To quote Mr. Spock..."Nothing unreal exists..."

It's just NOT your legal name. It's an alias. An "AKA" to law
enforcement. It, like your claim to operating a broadcast station,
both on TV, FM-broadcast, and Amateur Radio frequencies, has no legal
standing.

Personally, I think you're just acting silly.

If he really wanted to, he could file a form (in most states) for DBA (doing
business as). Then it has legal standing for a lot of activities. I don't
know whether it applies to radio and licensing though.

The key phrase there, Dee, is " doing 'business' as "...There's
no valid reason for him to file an Amateur Radio application with a
DBA.

Now....M A Y B E if he got a DBA and convieniently forgot to
mention it WAS a DBA, he'd slide in under the FCC's noses and get that

license he's whining about...But I doubt it...

Well, there's where your wrong steve, the capacitor isn't cooled at all. It the chamber where the 1.4Mv of electricity is sent from it output point to the metal plates which collects the electrity, it is sent to the hybrid capacitor. The liquid oxygen flows through pipes like in your car between the plate chamber and the outer skin. Liquid Oxygen is used to keep the plate chamber cool because liquid oxygen is near absolute zero.

Todd, I understand that the voices in your head tell you that if you
transmit in the past on your repeater that it will receive in the future.
If you want to be everyone's hero, here's a hint for an invention.

Invent a motor/engine big enough to propel a motor vehicle at 60 mph and have that motor/engine run purely on stray bpl signals!

Hey...Mr Wizard...

Do you know what you get when you mix fuel, an oxidizer and an
ignition source?

Do you know why liquid NITROGEN is used for cryogenic cooling
rather than OXYGEN...?!?!

Since I know YOU don't know the answer, why don't you ask some Cub
Scout on his first camp-out working on his fire badge...I bet HE
knows...

Hey Jim...Better yet...after we invent the Warp Drive engine,
we'll pick some spot in deep space and fly ahead of his RF and put a
repeater out there, then fly back to Earth and tell him when/where to
listen.

Hopefully while he's trying to figure out how to get a signal back
to himself, medicine will have found a way to repair his deficient
DNA...Or maybe just a non-traumatic way to get his head out of his
intestinal tract...

I don't see any mention of the FCC nor Len.

As usual, rants derailed by facts. Hi!

Who mentioned the FCC, Brain?

(1) Notice the title..."Guess The Government Isn't Paying
Attention to Lennie?"...?!?!

(2) "Sponsored by the US Department of Homeland Security and
intended as a realistic test of the nation's homeland security
system..."(SNIP)

See...?!?! You screwed up...AGAIN.

And you're absolutely right about Lennie...No meniton of him...

However HIS rants in this forum as to how unimportant Amateur
Radio is and how we "self-glorify" ourselves are numerous and well
known.

The news release was absolutely proof positive that Lennie's
assessments of Amateur Radio's disaster related services are unfounded

and, to say teh least, inaccurate.

Just like I said.

> As usual, rants derailed by facts.

You're absolutely right...And you did it to yourself...

"Hi!"

No doubt that's the Gaelic spelling of his family name.

If that is the case, maybe we should suggest that he go to Belfast
and set up his pirate radio there. Let's see what Her Majesty's
Forces would do in that case..... <ggg>

It sure is. Perhaps we should point Mister Wannabe to Section 301 of the Comm Act wherein The Congress gave the FCC jurisdiction over all non-Federal radio transmissions originating in one state and received in the same or another state or foreign country. This codified the law as found by the Federal courts in the _Brown_ case in the early 1980s and the _Betteridge_ case in -- ready for this -- 1942.

The SCOTUS, OTOH, found that the states retain jurisdiction over radio only to the extent that they may regulate radiotelephone rates and service areas. The FCC retains jurisdiction over all other matters.

And finally, thanks to the Finegold Bill, the states and local jurisdictions can pass laws making it a state-enforceable offense to violate the CB regulations of power, frequencies, and type-certified eauipment, subject to appeal to the FCC, and exempting holders of valid FCC licenses in other services.

That's it. "There ain't no more."

If he's sharing tower space with other users (non-ham at that),
I hope he took precautions one needs to to avoid intermod
trash with all those transmitters making lots of RF on that
tower. Things like circulators and such.

You're being mistruthful. As in "again and again"

> > I can understand your desire to do so, though...
>
> Indeed. You are not to be trusted, that's why.

You should talk, Brain...

Your history is one frought with lies, mistruths and overt deceit.

Brian P. Burke will be remembered for these things.

> You're just one of
> > those folks who get's "stimulation" from being publically
humiliated.
>
> Great. More sexual inuendo. Who would have thought you'd do it
again
> so soon after being called out for it?

"Called out"...?!?!

Have you been over to Illinois this week?

And, while you may not care for teh choice of words, the fact
remains that there are those who enjoy being publically
humiliated...Kinda like what I did to you this evening in another
thread.

And "calling out" sure sounds like you're demanding a fight.

Don't do that unless you're ready to accept the consequences,
Brain.

> > You certainly provide plenty of opportunities to do so!
>
> You humiliate yourself, your ancestors, your progeny and amateur
> extras.

How?

By constantly rubbing YOUR nose in yours and Lennie's newsgroup
droppings?

Hardly.

Brian P. Burke is a liar. That you are unrepentant in your
misdeeds makes you a punk liar. No problem to me. I deal with folks
like you every day, Brain.

> > > YOU violated my trust

up.

I am sure you find my constant whittling away of your stories
annoying, Brian, but, as I said, if you'd stop it, I'd have nothing to
do.

> > But it's getting hard to keep up...You are nothing if not
> > prolific.
>

You can see vulgarity in the Bible if you read it right, Brain.

I am sure you see "vulgarity" in many things, Brain. No doubt
they are the same things that keep reminding you that you're not the
man you COULD be.

If you'd just stop lying, and then trying to cover up the lying,
you'd feel much better about a great many things, including yourself.

It IS up to you, Brain....Give it a try...

What ever he's "sharing" with other "users", Robert, it ain't
tower space!

To be sure!

We've already seen his competency in English.

Imagine what it would be like in line at the grocery store where
he will undoubtedly wind up working if we didn't have scanners to "do
the math" for him.

And I am being liberal here when I suggest he can handle THAT
job!

Mount the transmitter in a wx proof box, directly under the antenna to
comply with Part 15. get it high up. >15 feet. keep the antenna 3 meters.
have fun.

The Dept of Homeland Security didn't mention Len either.

> And you're absolutely right about Lennie...No meniton of him...

Right again.

> However HIS rants in this forum as to how unimportant Amateur
> Radio is and how we "self-glorify" ourselves are numerous and well
> known.

The importance of amateur radio is easily overblown. The utility of amateur radio in emergencies is entirely dependent on mostly aging men, who may or may not be available to assist in emergencies. For example, you have the rickyranger kind of guys who volunteer for ARES, MARS, Red Cross, CAP, and probably other acronyms that he has yet to reveal to the group, yet have primary responsibilities as an emergency room nurse. So when the emergency happens, ARES, MARS and CAP are left hanging.

> The news release was absolutely proof positive that Lennie's

Not entirely. It is situationally dependent.

They did consider your application and waiver toddyboy and came to the conclusion that you weren't capable of operating a station in the public interest, and by you post above, it is obvious to the most casual of observers that your aren't capable of operating a station. Just because you make an application for a license does not mean the FCC is required to issue you a license. Grow up toddyboy!!

No it isn't toddyboy, the way it is spelled on your birth certificate is your legal name, unless you have had it legally changed, the other spelling is not. Now if you have the incorrect spelling on your FCC Amateur Radio License, which is a legal document, then your Amateur Radio License isn't valid and you are operating illegally when you transmit using that license.

> so FUCK YOU!!!!!

Grow up toddyboy!!!!!

3348. How to deal with SSB in the 40 mtr CW band

Newsgroup: rec.radio.amateur.policy
Date: 2005-03-26 01:34:44 UTC
From: GeorgeF <av8tor@licensed4funREMOVEBEFOREFLIGHT.com>
Message-ID: <U_21e.3992$z.878@newsread2.news.atl.earthlink.net>
Source record: 104864

How are the rest of the CW operators dealing with all the SSB that is showing up in the 40 meter CW portion of the band?

Here it is the weekend and there's some contest going on and there is more SSB in the CW portion of the band then there is SSB in the SSB portion of the band. What gives with this?

On HF I'm a 99% CW operator, only been licensed about a year and love CW, don't care much for SSB. But I'm starting to wonder why I paid $1800 for a Yaesu FT-1000Mk V Field as it looks like I won't be able to use it for what I bought it for this weekend...

Help
George

For the 40m band, the rest of the world has very different allocations from the US. They are (for now) limited to 7.100 and below. However over the next several years, they will be allowed to go up to 7.200.

What this means is that they other regions of the world operate SSB where we are limited to CW. Most of the time this isn't a problem but there are about 4 weekends per year where they do pretty much occupy the band.

If you look around though, there will still be CW ops down in the 40m CW to work. Or try the old Novice portion from 7.100 to 7.150 as some of the FISTS members monitor a frequency in their (check the FISTS website for exact frequency) and you can pick up a ragchew there.

Dee D. Flint, N8UZE

Source record: 104866

Set "VFO A" to RX below 7100; tune around for contesters...

Set "VFO B" to TX on whatever frequency above 7150 that the contester announces he or she listening to...

Plug in mic and have at it.

My favorite solution - assuming that you have priviledges there - is to switch to one of the WARC bands and have a go. No contesting on those bands, and ops who are fed up with the QRM a contest creates will head there in search of a QSO of more than 15 seconds duration...

OK, so it is a contest week-end, by the beginnig of the week it will be over, I heard some VE stations in the US 40 meter CW allocation, they have a right to operate there on SSB, so relax and operate another mode for the week-end, your rig and you will both survive if you don't get to operate on CW for one week-end.

I'd take the radio back to the store. If all those filters and DSP
aren't allowing you to carry on a QSO, I'd get rid of it.

> The importance of amateur radio is easily overblown.

To whom? The governmental agencies who still spend a lot of time
and money making sure they have Amateur Radio assets in thier
facilities, or the disaster relief agencies that still call on them in
a wide range of natural and man-made disasters...???

> The utility of
> amateur radio in emergencies is entirely dependent on mostly aging
men,
> who may or may not be available to assist in emergencies.

"Entirely dependent"...?!?!

Brian, I'll give you a big hint here...Your mouth is over-running
your common sense again.

Also...I >>>D E M A N D<<< that you cite even ONE instance wherein
ARES, RACES, etc, did NOT respond because they were "...entirely
dependent on mostly aging men who may or may not be available to assist
in emergencies"...

> For example,
> you have the rickyranger kind of guys who volunteer for ARES, MARS,
> Red Cross, CAP, and probably other acronyms that he has yet to reveal
> to the group, yet have primary responsibilities as an emergency room
> nurse. So when the emergency happens, ARES, MARS and CAP are left
> hanging.

Nice try...

Your "one example" of one persson who MAY not be able to respond is
irrelevent. Even with my "duties" here I STILL manage to spend time
for both CAP >>AND<< ARES.

The F A C T S remain that ARES and other Amateur Radio related response organizations ARE still "in the que" as far as Homeland Defense, The Red Cross, etc etc etc are concerned.

That's not "overblown". It's the truth.

> > The news release was absolutely proof positive that Lennie's
> > assessments of Amateur Radio's disaster related services are
> unfounded
> > and, to say the least, inaccurate.
>
> Not entirely. It is situationally dependent.

No, it's not.

Neither you or Lennie can produce ONE example of ANY situation in which ARES or any other Amateur Radio organization did not/could not respond.

> > Just like I said.
>
> I forgot. You're always right.

Not always. Just most of the time when it comes to anything dealing with you...Like right now...

> > > As usual, rants derailed by facts.
> >
> > You're absolutely right...And you did it to yourself...
> >
> > "Hi!"
> >

"Entirely dependent"...?!?!

Brian, I'll give you a big hint here...Your mouth is over-running
your common sense again.

I >>>D E M A N D<<< that you cite even ONE instance wherein ARES,
RACES, etc, did NOT respond because they were "...entirely dependent on
mostly aging men who may or may not be available to assist in
emergencies"...

If we get nuked at multiple sites or if we ever have a cataclysmic
natural disaster like the movie "Day After Tomorrow", I'll give you the
point...

Otherwise you're running off at the mouth again.

So...Gonna ante up some kind of "proof" to back that statement up,
or are you going to slither out from udner it with some "you can't make
me do it" rhetoric...???

I say it's just one more opportunity to call you for what you
are...A liar.

Steve Robeson, K4YZ

Google dropped a line. I don't know why. Oh well...However the
quote was not in error.

You, on the otherhand, were quite anxious to get a swipe in that
you screwed the pooch...Sucks to be you.

> So go ahead and finish your thought if you can recall where you were
> going with it.

Nope. No where to go with it.

But please...YOU go right ahead and tell me:

Where are all the unlicensed devices in major disasters...???

Where are the logs for all your DX operations...???

Which, if any, disaster or emergency situation have ARES, et al,
NOT responded to becasue of all the "aging men" that they are
"dependent" on but who won't show due to other obligations or failing
health...???

Who gave you authority to "operate" from Somalia...???

There's more, but I will let you get started on those...

> > > > And you've never asked me to "keep everything public."

You snipped the part where I said it appears that you're actually
looking for a fight, and to be careful of waht you're saying.

You are, afterall, the one always claiming "victim" status over
alleged "threats".

> > Have you been over to Illinois this week?
>
> I've been up to Toledo.

Good place for you...Now...just a weeeeeee bit further north....

> > And, while you may not care for the choice of words, the fact
> > remains that there are those who enjoy being publically
> > humiliated...Kinda like what I did to you this evening in another
> > thread.
>
> You do nothing except embarass yourself. You're sick.

No...I am actually in quite good health, thank-you.

Now YOU, on the otherhand, still have unanswered question out
there, along with your NEW assinine assertions about how "overblown"
Amateur Radio's commitments to disaster relief are, and how they won't
be able to respond due to demographic of the membership.

> > And "calling out" sure sounds like you're demanding a fight.
>
> Your "toe to toe" remarks to Deiter sound like you think you're in a
> fist fight.

Nope. But you and he have a lot in common...Like making stupid
assertions in public that you can't or won't substantiate...

But so far, UNLIKE you, I've not really caught him lying...Just
making assinine assertions.

YOU blatantly decieve. Big difference.

> > Don't do that unless you're ready to accept the consequences,
> > Brain.
>
> A pudgy 100% disabled vet? I wouldn't embarass myself.

Hey...I've OFFERED you the oppotunity to go around the block a few
times with this Vet, disabled or otherwise, and you've blown it off.

BTW...I'll accept the "pudgy" as your efforts to redirect your own
physical fitness deficiencies off on someon else...But who's the "100%
disabled vet"...?!?!

Why? Do you disagree? Have you done or said ANYthing here that
would make me or anyone else NOT believe you're a punk or a liar?

> No problem to me. I deal with folks
> > like you every day, Brain.
>
> I certainly hope so... sane, law abiding people who don't go around

Then we agree. I've not made any threats.

And while I do not doubt your "sanity", your character and
maturity leave a lot to question.

You're on the edge with threats, though. If you want to make one,
just go right ahead...I'll be in Ohio in the next month or so...If you
have any issues you want to deal with on a personal level, we can take
care of it then.

You DO have hospitalization and long-term-disability through your
employer, don't you...???

And please be so kind as to show where my comments to them were
inaccurate???

Dieter recently jumped in here calling me a "weasel" and
"backstabbing" becasue comments I made in HERE had been cross-posted to
his "allaudio.com" site.

I proved where he was wrong and he's disappeared.

Todd is wrong on so many levels, his profanities, misunderstanding
of federal law, and open admissions of law-breaking notwithstanding.

And Lloyd...?!?! NO ONE likes LLoyd, here, in the CB forum, or
anywhere else he's posted, so I am not alone.

You, of course, are free to find and post evidence to the
contrary...We're not going anywhere and I know you'll never pony up the
data anyway...

> > > > But it's getting hard to keep up...You are nothing if not

If you'd stop lying, stop deceiving and trying to be things you
aren't, your paranoia would, in all likelyhood, abate.

> > I am sure you see "vulgarity" in many things, Brain.
>
> I see it in you.

You see it in me because I keep holding a mirror up to you, Burke.

I am sorry you don't like it, but it's YOUR problem. Deal with it.

> No doubt
> > they are the same things that keep reminding you that you're not
the

>
> I'm good with who I am.

Most people with problems are. It takes too much to fix the
problem, in thier own estimation. You're no different, brain.

>You have a need to lash out at people. That
> tells the story about who you are.

I don't lash out, Brain. I respond to what's said to me.

If you don't like what I say or how I say it, you need to
re-evaluate your own "delivery". I don't "lash out" at anyone.

> > If you'd just stop lying, and then trying to cover up the
lying,

Folks, for those prices for a Part 15 AM "broadcaster", it better
be so hot that audio goes in like Roseanne Barr and comes out like

Celine Dion!

I think Jim's angst was that I didn't cut the post I replied to
down to only a couple sentences, or a paragraph at most.

Normally I try to do that. Especially when Lennie goes into his
umpteenth re-telling of how he and ADA, passing 2.2 million messages,
saved the Free World from Communism and Amateur Radio.

I guess this one post was the proverbial straw for Jim, and he
snapped. It happens.

AMEN Brother!

. . Given an engaged brain SSB signals become just another piece of the
usual collection of ignorable crud any even half-decent low-band CW op
can copy thru. THAT's the beauty of CW in a nutshell.

The AMT-3000 is an excellent Part 15 AM transmitter and well worth the price. I have one and it is a first class kit and gives great audio. As far as the $200 for a coil and 3 meter antenna, I'm not so sure.

> portion of the band. What gives with this?

It's the CQ WW SSB WPX contest weekend and all hell has broken loose worldwide. It'll go away at zero Zulu Sunday nite. In the meanwhile go diddle on 30M to get away from 'em.

> On HF I'm a 99% CW operator, only been licensed about a year and love

>
> Help

The Field comes with factory-supplied 250 & 500 Hz filters of unknown parentage. You should be able to cut down the SSB sigs to something close to a survivable level with either. Maybe. But I dunno. I've never listened with a Field. But for certain they're not the best filters out there by any means. Click into:

http://www.qth.com/inrad/yae_menu.htm

For some really good CW filters for your Field. The 400 Hz 703-C is a good compromise between "SSB crud reduction" and missing ops calling you. I have it's equivalent in my little $1,250 FT-847 crapper and it WORKs. Take it to the next level and get yourself one of INRAD's 250 Hz 704-C filters. Might be a bit too narrow though. To each their own.

You're new and in the right direction. Stick with it George, you're on a very steep slope of a learning curve (assuming you're not just another troll of course). It'll all come together eventually.

Poor Hans, so typical of today's ham radio ops, stuck in the archaic world of 52 simplex, while the rest of the world is using Advanced Mobile Technology.

"Why aren't young people interested in ham radio"? duhhhhhhhhhhh, lets demonstrate 52 simplex for them, maybe that'll get the kids interested.

73,

Rabbi Phil

It may be even more of shock that ham radio operators are important
in their eyes only. Ham radio has been irrelevant for years, hams just
have not realized it yet, and probably never will.

"How come the young kids aren't coming into ham radio anymore."?
duhhhhhhhh, anyone hear about Advanced Technology?

Well sir in Southern California, in the last year or so, we have trained
about 30 school kids who obtained their license.
Donations have been made to set up complete Ham stations at the schools.
In our repeater club there are well over 75 members age 25 and below.
At our field day, we had two troops of boy scouts who got on the radio.
Several went on to get a license.
Ditto for the JOTA day (if you know what that is)
The kids loved PSK31 - no internet they asked.

How many youths have you trained ???

Well sir when theSAN DIEGO COUNTY was ON FIRE:
CEDAR FIRE LARGEST IN STATE HISTORY
16 dead, 2,342 single family dwellings & 383,657 acres burned
I repeat 16 dead, 2,342 single family dwellings & 383,657 acres burned
It was a disaster of unimagined proportions.

I can assure you that Amateur Radio was quite relevant -- to the tune
of over 500 Amateurs participating. Won accolades from local officials and
the media.

Are you a member of ARES or RACES ?

Are you prepared for the BIG one that will surely come your way?

Well are you?

When the cell phones are out, telephone lines are toast, power is
lost, you will wish you had a battery operated mountain top repeater. Ours
was on battery power or portable generator power for 3 days after the
commercial power was lost.

Do you support such a repeater, are you even a Ham?

Support Amateur Radio or rely on your silly phone - the choice is
yours.

You need to do some research before you blather out this stereotype
nonsense.

Considering your request for a waiver and acting favorably upon your request are two very different things. With your history, it doesn't seem very likely that the Commission will ever issue you a broadcast license.
So, the answer to your question about why you should continue to spend the time and money applying is: You probably shouldn't. You should come to terms with the fact that you aren't ever likely to have a broadcast license. Operating without a license can only lead you to grief.

The word is "fictitious", Todd, not "FICTICIOUS" and yes, if that isn't your legal name, it is a fiction.

By the way, I experienced an N9OGL time travel episode this afternoon. I opened a book and there was a message from my father written in the fly leaf. It was from 45 years in the past.

No Dave, The point is the FCC never consider my waiver, and I went on the air LONG AFTER I had applied for a license. That's why I went on the air, because they weren't doing their job. Then those assholes (THE FCC) would go to court against a pirate radio operator abd claim all a fucking pirate radio operator has to do is apply for a license and as for a waiver....they and your little bitches on here are a bunch of fucking liars....and you little bitches on here can tell the FCC I said that.

Well...Guess that's a bit more civil than your other slurs. At
least you spelled "CB" withought the "f" word in it...

REC.RADIO.AMATEUR.POLICY

Let me tell you a story about some ass licking morons on a newsgroup called rec.radio.amateur.policy. I posted on here as well as on there that I was going to began running my information bulletins on HF (first on 10 meters then on 20 meters). These fucking fat bastards then get on there, saying my information bulletins aren't useful (although they've never heard them) and then those assholes say they are illegal (although they wouldn't give a rule or a FCC decision to prove that they are right). Now those fat fucks are "claim" they are going to send the FCC all my past post as well as my previous post from those newsgroup (some of them are 7 to 8 years old). Well all I have to say is go for it, and why your at it you stupid fucking fat bastards, get yourselves a fucking dildo with rusty razor blades imbedded in it and shove it up your asses you stupid fat fucks.

What we're REALLY interested in is when you're going to being
running a remedial English Grammar course.

> These ####ing fat bastards then get on
> there, saying my information bulletins aren't useful (although
they've
> never heard them)...(SNIP)

You've never been to my home. HOW do you know WHAT I have heard or
not heard, Toiddie?

> (UNSNIP)...and then those ###holes say they are illegal
> (although they wouldn't give a rule or a FCC decision to prove that
> they are right).

YOU have already provided more than adequate vindication of our
suggestions that your "bulletins" are bogus, Toiddie.

> Now those fat ##### are "claim" they are going to send
> the FCC all my past post as well as my previous post from those
> newsgroup (some of them are 7 to 8 years old).

Who claimed that?

>>MY<< only "claims" have been that YOU have admitted to FCC rules
violations, and I hope that you get busted for it.

If I >>DO<< send any of your "posts" to ANYone, it will be to your
former gradeschool and high school English and grammar instructors so
they can see what a fine product they delivered to society.

He has made many references to dildos and he seems to want to put things in other people ass's. With the anal fixation, and seeing his picture on QRZ, I would say he's gay.

The other possibility is that he has a sugar problem and ate too many chocolate bunnies and way too many jelly beans since he was all alone at home, having no invites to Easter dinner.

My take is he's just a creep who's losing patience with not getting
what he thinks he has "coming" to him. He's so impressed his own
"genius" that he can't see what a complete idiot he's making of
himslef...

His "hit-o-meter" or whatever logging he's using to see how many
hits his "blog" is taking is probably only slightly more that the
number of "what kind of idiot are you" replies to his blog comments.

I notice he takes them off just as quickly as they go up...So much
for "freedom of speech"...

The FCC may or may not have considered your request for a waiver. If
you went on the air without a license, you're simply a scofflaw and your
lack of character will, no doubt, preclude you from ever having a
broadcast license. Accept it.

> That's why I went on the air,
> because they weren't doing their job.

There is no evidence that the Federal Communications Commission is not
doing its job. There is plenty of evidence that you have no regard for
the law.

> Then those assholes (THE FCC) would

> nice coming from a licensed CB RADIO Operator

You've got the wrong newsgroup. I've never been a Citizens Band op in
my life. I have an amateur radio callsign. I don't engage in playing
pirate broadcaster. I don't rail at the FCC. I don't shift to all
caps. I don't feel the need to use profanity to deal with you.

You have some issues, Todd. You live in a fantasy world. You seemingly
have a mental age of about 14 or 15. You don't understand government
authority.

"But I wanna" is not justification for a broadcast license. I'm frankly
surprised that you've not yet lost your amateur radio license.

There is no indication that *anyone* has ever heard one.

> ...and then those assholes say they are illegal
> (although they wouldn't give a rule or a FCC decision to prove that
> they are right).

If your "broadcasts" are full of nothing but op-ed material venting your
ire toward the FCC, they aren't amateur radio informational bulletins.

> Now those fat f--ks are "claim" they are going to send
> the FCC all my past post as well as my previous post from those
> newsgroup (some of them are 7 to 8 years old).

Some of them are that old. Some are quite recent. It really matters
not.
A number of them have you admitting to illegal radio and TV broadcasting
during the time you've been a licensed amateur radio operator. A number
reveal you have other character issues.

> Well all I have to say
> is go for it, and why your at it you stupid f--king fat bastards, get
> yourselves a f--king dildo with rusty razor blades imbedded in it and
> shove it up your asses you stupid fat f--ks.

Is this a demonstration of your mature, adult behavior, Todd? If
someone forwarded just this particular post of yours to the FCC, what
effect do you think it might have on whether the Commission looked
favorably upon your request for a broadcast license? Do you think it
might some effect on someone in a position to yank your amateur radio
license?

You don't seem to possess an ability to think logically and you don't
seem to have the slightest bit of self control.

Avast ye scurvy dogs! Raise the Jolly Roger and man the guns! Thar be piratin' ta do! Arr!

3404. Selling 52 Simplex Radios

Newsgroup: rec.radio.amateur.policy
Date: 2005-03-28 17:51:29 UTC
From: Rabbi Phil <RPhil@tempwornerspam.net>
Message-ID: <d29g75$ki3$0@pita.alt.net>
Source record: 104920
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

My friend Lennie Schwartz owns a radio store and was stuck with close
to a hundred 52 simplex radios he could not sell. As his Rabbi & chief
Sanhedrin, Lennie asked me for advice. Now Lennie has three gorgeous
college-age daughters, so I had Lennie get them some cute little outfits,
tight tops and tight short-shorts, similar to what the Hooters girls wear.
We had the following message boldly printed on the butt end of the shorts
and across the bust area of the tops:

"I MONITOR 52 SIMPLEX"

In less that 24 hours, Lennie sold all his 52 simplex radios at five times
the
original asking price and had to order more. Every male ham of any
age swamped Lennie's radio store and demanded a 52 simplex radio.

NOTE FOR HANS: It is not the message that is so important, as how you
communicate the message.

73,

Rabbi Phil
Chief,
Sanhedrin Council

Probably when he found out he couldn't muster what it took to pass an exam!
I've seen quite a few of them. The "hand it to me" types. Afraid to put
forth a little effort in life. I knew a lady once who bombed a test like 3
times, blamed everyone but herself. It wasn't our fault she didn't study or
was too slow to be able to comprehend the material.

<trash snipped>
Todd, what I don't understand is there have been no post from you, about you, or even replies to your other post in 2 or 3 days.
Why did you start this post? If somebody wanted to see what was on your site, they would go there and read this garbage. Is it that you like to get beat up? Do you have a need to upset people by calling them names? Is it like broadcasting but with text?
Is it the fact that you think you have an audience here, because if that's your thinking, all you have here is people that don't like what you are doing.
Don't you find it strange that not one person has stepped up to bat for you, nobody here has stuck up for you, you would think that you would have at least 1 friend that would come here and back you up or even put a good word in for you. Don't you see anything wrong with this picture?
Hell, even Glen has some supporters and followers! You don't even have one supporter?

Good show - Congratulations.

You're already at least three countries into your dxcc, now go get the
other 97. If I were you I'd concentrate on 20 & 15M where QRP signals
have a better shot at the long-haul goodies than they do on 40M.

There you go getting things wrong again toddyboy, CB doesn't require a license, in fact you can't get a license for CB, so Dave couldn't possibably be a "licensed" CB radio operator.

Well steve, That's your opinion......however, you are not the 600,000 amateurs out there, your just ONE PERSON; Hence, a minority. Secondly you've never heard my transmissions thus, you can not say they are of little interest, In my humble opinion wht you say on the air is of little interest, but that's my opinion. One thing you fail to grasp is no amateur station can dictate to another amateur station how they are to run their station. As for the Usenets, Newsgroups are "open fourm" and as long as it on topic I can and will post there. So you and your little Commie buddies can try to push people around on that newsgroup but I will not leave!!!

Steve, INFORMATION BULLETINS ARE LEGAL!!!!!!!!! as long as they are
directed to the amateur radio service and contain amateur radio
material. You don't freaking get it because you and your little moron
friends on that newsgroup are narrow minded assholes.

That's the VERY first thing you've gotten right, Toiddie!

And SO FAR, it's the ONLY thing you've gotten right!

> Secondly
> you've never heard my transmissions thus, you can not say they are of
> little interest, In my humble opinion wht you say on the air is of
> little interest, but that's my opinion.

You continue to make this statement that I've "never heard" one of your broadcasts, yet you've never been to my home let alone been where while I was using my radio station.

WHY do you insist on making such idiotic statements in a public forum when it's OBVIOUS that you do not have the means to know the truth...???

> One thing you fail to grasp is
> no amateur station can dictate to another amateur station how they are
> to run their station.

Stations are inanimate things, Toiddie, only able to "do" what their operators use them for.

The only time it's ever been otherwise is when I, the control operator of K4YZ, has used the tonepad on my HT radio to "operate" another station by initiating an "autopatch".

> As for the Usenets, Newsgroups are "open fourm"
> and as long as it on topic I can and will post there. So you and your

> but I will not leave!!!

I don't know any Communists, Toiddie. I did get to meet some Soviet Naval Infantry (their term for what we call Marines in the US) officers and NCO's that came to San Diego in the 80's. I didn't ask them if they were card-carrying members of the Communist party, though.

And as for being "on topic", YOUR above rant had absolutely NOTHING to do with my comments to/about Roger, AB8MQ.

(1) Roger HAS had numerous run-ins with law enforcement at SEVERAL levels of enforcement. This is true.

(2) As >>I<< stated, I would have not known WHAT was on your "blog" if not for your broadcast on USENET quoting it's profane and threatening contents. This is also true.

(3) Based upon those FACTUAL details, my comments were also true.

Yes, they are...As long as they are "information" about Amateur Radio issues.

You are broadcasting "shows" that are nothing more than your opportunity to "air" your opinions to a wider "audience" than what your blog and rants on RRAP are able to take you. Mostly because no one who knows you wants to pay attention to you in the first place.

Too bad you haven't taken the hint.

> You don't freaking get it because you and your little moron
> friends on that newsgroup are narrow minded ###holes.

I "get it" just fine, Toiddie. I've made good use of REAL information bulletins since YOU were only TWO YEARS OLD. I started copying W1AW's CW bulletins as practice two years before I got my license in 72.

I was a licensed Amateur before you entered Kindergarten.

I passed my Extra before you passed your 12th birthday.

Thank God for YOU, Toiddie.

Because if I did, N9OGL would have hit the "suspended" file already while "we" investigated your admissions of violations of FCC regulations vis-a-vis pirate transmissions.

Your own admissions herein are evidence of your ineligibility to be a Commission licensee...One other poster with a career as a Commission lawyer has already told you that, yet you persist in admitting your violations of even more and more FCC R&R's.

Of course, if the FCC does "come after" you, you'll be calling them more names for doing so, despite no one at the Commission twisting your arm to make you make these admissions...

> > That he has a social misfit and ner-do-well such as you coming

Funny how the weak-minded resort to cursing and other junvenile level locker-room behavior when they're backed logically into a corner, isn't it?

I am willing to bet that Toiddie spent a LOT of his formative
years in a corner...Usually with his nose in it and a "DUNCE" cap on is
head.

Hey Toiddie...

We're still waiting for you to enlighten us as to the station line-up at N9OGL, to now include the gear at N9OGL/R.

Remember..!?!? You kept calling everyone else "applicance operators"..?!?! You've been asked several times now to tell us about all that homebrew/kitbuilt gear that gives you "bragging rights" over any other Amateur, Toiddie, yet no response.

What gear is running at N9OGL for your HF transmissions? Must be an impressive array of homemade gear to handle that heavy duty load of continuous key-down that you are bragging about.

And how about that repeater...?!?!? Don't disappoint me and tell me you don't have a homebrew station there, either, Toiddie. Afterall, you're going to be making all those VHF transmissions, and that's a lot harder on a transmitter since it is continous duty cycle...

C'mon, Toiddie! Some pics on your world famous "blog" of you sitting at the mic of N9OGL showing us all that homebrew gear on the shelf* would be a great way to prove me wrong!

Steve, K4YZ

(* PS:..."On The Shelf" is exactly what I would expect of anything you built, Toiddie!...Good as paper weights and dust collectors only...Not "on the air"...)

I'm certainly not Dee, but I was trying to figure out where you might be going with this, espeically since I couldn't find any reference to 10 meters in the article.

However I think the article itself is misleading and will misdirect potential HF operators.

I realize the INTENT was to provide some encouragement to those who might be interested in HF operating but are intimidated by the Morse Code exam.

The PROBLEM, however, is that when you approach ANY learning curve with the idea that "I only need to know 'this much' to pass", you usually wind up having to spend even more time IN the training curve because you wind up having to re-do a lot to get to where it is you want to be.

There has to be a dozen different learning "systems" out there to learn Morse Code...One of them is going to work "for you"...Just sit down, devote some effort to it, and get it done. Trying to "get by" with only half or less of what you need to know, Morse Code or any other topic, will just leave you ill-prepared, frustrated and short of your goal.

I don't know where I was going with 10 meters either, talking before I
think.
This is what I saw that was wrong.
" In the United States the General class license is the minimum
requirement for an amateur to have HF privileges."
Novice and Tech plus both have HF privileges, don't they still?

Maybe because of 10 meter voice was my reference to 10 meters, I don't remember why I said that? Brain farct, doing too many things at once, operating appliances, oops there goes the toaster.

Yes Sir...they still do...The author might have made some comment
acknowledging that.

See what I mean about cutting corners? The author didn't mention
that currently licensed Novices and Techs with 5WPM have access to 10M
and it brought a bit of confusion with it!

Like the toaster is one of the appliances I operate! :)

Speaking of appliance operaters, this is a nice looking Danish made
appliance, just a strange color.

About half w/a 66' doublet and the other half w/a Carolina Windom 40 LP.

>> Next goal is WAC, then DXCC.
>
> On 40 meters? Can be done!

True, but I'm starting to love 20 now. Belarus this morning. I've worked
about 15 countries total already. DX Q's are a breeze compared to CONUS
ragchews.

My standard power level will rise from 5 W to approx. 20 W. (With 100 W
available for those ruff cpy rpts.)

Congrats to you Bert....but I disagree....WAC is simple. Just hang around on 20 long enough and they will come to you.

I real accomplishment would be WAS on 5bands....I.E. 5BWAS. Now that is tough.

Actually he is overlooking the Tech with code who is then allowed to access
10m voice, 10m cw, 15m cw, 40m cw, and 80m cw.

The author of the article made a major error in that he stated General is
required for HF where as in reality, Techs with code have CW on several
bands plus voice on 10meter.

I was wondering the same but it's just coincidence I guess. However, I'm
just a casual operator often stopping at a couple of dozen contacts.
Sometimes I and the OM use his callsign (K8BSG) instead of mine so he can
count some of the DX towards his DXCC instead of mine. He's a General and
I'm an Extra.

What contests do I work? Well I like Sweepstakes, State QSO parties, and
the DX contests. If you are one of the very fast CW ops, I probably passed
you by. For ragchewing, I'm only reliable at 15wpm although somehow I
managed to pass my 20. In contests, I can do 20 to 25 for the limited

exchange but generally have to listen several times through before trying the station to be sure I have it right. So I stick to seek and pounce.

The most contacts I ever made in a contest was 384. It happened to be the Feb 2004 ARRL International DX contest on CW.

I did hear you calling CQ one day within the last few months and an African station came back to you if I remember correctly. So I went on by.

Looking at my log, I've only worked 16 stations in Alabama.

That's what I thought, as well as some still existing Novice class. And
I guess thats why I thought of 10 meters, Novice and Tech both have
voice, I wasn't thinking about all the cw segments they have.
Thanks

I am the great bathrooman. I am looking for assistants to stay after school to help clean the restrooms or at least to restock the soap and toilet paper. We will do anything it takes to get assistants including sending out requests on ham radio nets. Those little brats should clean up their own %$#&*ing mess. Putting a log in a book is not what we meant by 'logbook.' Throwing toilet paper all over the floor is not what we meant by 'spreadsheets.' 'Contesting' had nothing to do with #%&$ing. If they can learn CW by operating the plunger, so much the better. We are also looking for security assistants in the event of a bomb threat or mass school shooting, and some ham to teach them how to solder. If they do well they get a supervised field trip to Polly Parrot's shack. If they do poorly, they get an UNsupervised field trip to the parrot's shack. hehehehehe

I agree, been there, done it and then some, a 48-hour dxcc is almost a no-brainer IF you have a reasonably competitive station, dxing experience, the sun spots are with you and you stay in the seat. Those are all big "ifs" though. If Bert sticks to 40M with 5w and some air-cooled wire he has a *real* slog ahead of him (years?) I for one simply don't have the patience to deal with. All that aside yupper, his best shot at new ones per hour by far is during the cw dx contests.

> Without the QSL's of course...hi

Boo! No counter!

Hey Bert - How many states do you actually have confirmed so far?

One of Bert's possible fast track routes to a 5w dxcc would be to do a
bit of traveling and put BY7/WA2SI/QRP on the air . . Navassa would
work too.

I do a lot of that, especially in a SSB contest. I just don't care that
much for phone contesting, although I did manage over 500 qso in the ssbwpx
this weekend.

It's these "Which way did he go?" screw ups that form my opinion
that there ought to be a stabilizing of the licenses and grandfathering
of existing Advanced and Novices into one of the three existing
classes.

He was fundementally correct that a General class license is the
"basic" HF license...NOW. Of course we still have the "loophole" for
Techs who pass the 5WPM being allowed to use the Novice sub-bands, and
the Novice class license itself...

Waddanitemare!

Anybody read the April fools article in CQ?
Too bad that it's not true!

On page 44 of April, '05, it reads:

The FCC is in the process of developing rules that will mandated the
administration of psychological tests to new amateur radio applicants
as well as to operators applying for the renewal of their licenses.

I prefer 20 for hunting DX. The contacts seem to come mush easier and my 5 W appear to goe much farther, literally. I can't really do much re. my antenna situation but I'm increasing my pwr out tho. Anywhere from 40 W to 100 W should suffice. I'm swapping the Carolina Windom for an 88' doublet, hoping for favorable lobe placement of the 20 EDZ.

You better believe that you'll find me (Or vice versa, hi.) during CW contests. Some of my states were nabbed during the ubiquitous "bacon runs."

> > Without the QSL's of course...hi
>
> Boo! No counter!

I have a very good return rate so far. I always include a self-addressed Air Mail envelope along with the appropriate green stamp/IRC(s). If a US station requests a SASE, I comply. Life's too short and I'm havin' too much fun to sweat the $0.37, although I certainly respect those who do.

> Hey Bert - How many states do you actually have confirmed so far?

Well, I just checked my QSL cards and I currently have 18 "in hand" with Belarus, The Dominican Republic, Ecuador and Sweden expected in the mail. I'm encouraged by the fact that theses were all casual "contacts of opportunity" while hunting down the final few states for WAS.

Hello Everyone,

In the thread about " Selling 52 Simplex Radios", the following comments were made by Mike Coslo, "Rabbi Phil" and myself:

QUOTE:

Michael Coslo wrote:
> Rabbi Phil wrote:
> > My friend Lennie Schwartz owns a radio store and was stuck with close
> > to a hundred 52 simplex radios he could not sell. As his Rabbi & chief
> > Sanhedrin, Lennie asked me for advice. Now Lennie has three gorgeous

> Come on, you can do better! 8^)

Hey Mike...It's not THAT far fetched...Burghardt in NY has had that young lady in the tight fitting sweater for years...Musta beem selling SOMEthing!

UNQUOTE:

So...later this morning I received a private e-mail from one of RRAP'S regular posters.

I have snipped the person's name, call sign and e mail headers since the letter was sent in private e-mail. However the e-mail made some very damning comments and a not-so-subtle threat.

QUOTE:

In rrap Steve Robeson wrote:

> Burghardt in NY has had that
> young lady in the tight fitting sweater
> for years...Musta beem selling SOMEthing!

> 73

> Steve, K4YZ

Burghardt Amateur Center is not in NY. It's a family business which was established by Stan Burghardt, W0IT (SK) 68 years ago in a small South Dakota town.

A few years ago one of Stan's long-time employees, Jim Smith W0MJY, purchased the business from Stan and became the second owner. It remains a family owned business, and the lady you mention is Jim's daughter, Michele, KC0MYV, a wholesome midwesterner who is very active in running the "business side" of the store. Often she is pictured standing alongside her dad in their QST ads, never in my knowledge in a provocative sweater.

The sleazy nudge-nudge insinuation in your "Musta beem seeling SOMEthing!" comment is one of the lowest forms of attack I've ever seen on rrap. I'll expect to see a sincere unconditional apology on rrap by the end of today, or I'll consider forwarding your trashy comments to Michele and Jim.

UNQUOTE

Here's my response to this "letter", made in a very public forum so that the correspondant can't make any other assinine insinuations or out-of-context editorializing:

(1) I stand corrected on the South Dakota -vs- New York. My bust.

(2) I am sure the young lady is very good at what she does, and is every bit the "wholesome" person you report. I NEVER said anything to the contrary. You are welcome to cite the part of the post wherein I said differently, but you and I both know it's not there.

(3) The young lady's character and wholesomeness notwithstanding, THEY obviously had NO PROBLEM in posing her in a tight sweater, profile, in order to attract some male attention to thier ads. "Rabbi Phil" commented about someone else "selling radios" with pictures of pretty women. I pointed out that another Amateur dealer had been doing the same thing, and obviously it worked. Pictures of pretty women sell everything from soft drinks to firearms to high speed automobiles.

Amateur Radio is no different. No problem.

Now, Dear Anonymous Writer (anonymous HERE...since you and I both know who you are)...You can go RIGHT AHEAD and forward ANYthing you like to ANY one you like. Tell them about "how trashy" the item was, if you want, but it IS archived right ehre in Google.

You took offense...Too bad for you. You know as well as I do that people can "take offense" at the most innocent of comments all-the-while letting morbid profanity and bold threats roll off thier backs. This is one of those moments.

Have a nice day.

Steve, K4YZ

Folks...sex, or the suggestion of it, sells everything in this
country...Even those who argue AGAINST "sex" are using it to thier
advantage by the mere suggestion of it. (Before "NYPD Blue" ever hit
the airwaves, Jerry Falwell and his ilk were protesting it. The
producers said the best advertisement they could get was Jerry railing
against it!)

I think the idea was cute.

Also, we have people fussing about the "greying, all white male" demographic of Amateur Radio in the United States...so maybe this gave it a kick in the rear...? We're not talking about child pornography here...Young ADULT women, the same like of which adorn the sidelines of any NFL game on Monday Nights, showing some booty and cleavage to get YOU to look twice. It works. Deal with it.

Of course there will always be the "we could do it without that" contingent...But that contingent hasn't done a whole lot to promote the program either. So...given your choice between a poster with Fred Maia or Gordon West promoting Amateur Radio, or a diverse selection of scantilly clad cheerleaders holding HT's I am sure none of whom are licensed to operate...which do you think would garner more "check-outs"...?!?!

There's no "appears to" about it, it's absolute fact. 40M rules the domestic scene and to some extent is OK for working SA and western EU but when it gets down to working ZLs, VUs and JAs on 40 from the east coast it gets really gruesome even with 100W. When 15M is open it's even better than 20 as far as long-haul "big signals per watt" is concerned, *don't* ignore 15M. If you have a packet spots network up and running in your neighborhood by all means plug into it.

> I can't really do much

Model it? .

> You better believe that you'll find me (Or vice versa, hi.) during CW

Sure. Around midnite during one of the recent Field Day operations not much was going on on 20M CW so I switched to doing some dxing. Quickly worked JA, VK, OA, a couple Ws and a DL. Jim was there. If I'd been able to find an African I would have made a one-hour midnite Field Day CW WAC. It gets in your blood. Ya can't help it . .

It's all an ancient and accepted part of the game. Coaxing QSLs out of the dx can get expensive and tedious though when done in volume. I've run into gnats which probably have better clerical skills than I have. Gathering up the 500+ cards for my 5BDXCC was a bookeeping chore from hell I'll never forget.

> for WAS.

You're obviously well on your way. If you get yer watts up and pound the two major DX contests on 40/20/15 I'm betting your dxcc will come in less than a calendar year. Good luck with it.

When I said "without QSL's" I meant this. I don't usually count contest QSO's for my dx hunting. So I forgot about all the thousands of cards I have here from the bureau over the last many years. So I am sure I have enough cards for most, if not all, of the awards offered.

I'm just not much of a paper hunter....except for contest certificates.

Maybe he forgot to mention that the only way today to get
on HF from no license at all is to get the general or an
extra? Or can an old tech still take a code test and
become a tech plus?

Smelly Stevie better quit his public lies
if he doesn't want to hear from Roger's
lawyer. Roger has never been in trouble
with the law and has told shithead Stenger
to fuck off when he listened to Hi El once
too often. Roger's lawyer talked to Stenger
and Roger was never bothered again.

Stevie needs to shave his pubes and wash
with black soap to get rid of his stink.

Roger has indeed been "in trouble" with the law. Roger has also had
repeat visits from his local chief of police. Roger may receive one of
those visits again.

Roger has had repeated run-ins with the FCC as well. Roger's been taped
QRMing other stations on 20m. A local dropped a dime on him. His
retesting is legend.

Roger should take his lithium and try to avoid places where his
sociopathic behavior will get him in additional trouble. If his lawyer
has any questions, have him give me a buzz. We'll start him off on a
Google Search and then print him up some copies of swell e-mails. If
Roger needs some time to come up with retainer money before contacting

his lawyer, I can be patient.

Roger talks big. Roger doesn't act.

Roger--the unWiseman.

Any Tech, old or brand new, can take the code test and get the HF
privileges. It is not called Tech Plus since the code credit, while
permanent for operating, is only good for one year for upgrading purposes.
The old Tech Plus was & is good for code credit even for upgrading even if
it has been more than a year since passing the code.

Kelly gives a lot of good DXing advice in his message, but the above sentences is really BAD advice.

Packet clusters are for slugs. Real radiomen work DX without being led to it by the nose. There's a french tongue twister which puts it like this:

"Un chasseur sachant chasser chasse sans son chien."
(A hunter who knows how to hunt hunts without his dog)

Hee! Options, options, options . . if we didn't have all the options we
have there wouldn't be anything to bitch about and we'd all live
peacefully together. In which case you'd be in a helluva fix.

There are all sorts of directions one can opt to go in this game.

I wouldn't ignore a Q with Sprately just because I happened to work him in the CQ WW or some such. Particularly these days when the expeditions to rare places go there specifically to operate in the contests. I also collect paper but for the most part only the really tough ones. A 5BWAZ is about as tough as they come and I'm not even close. Ya got an 80M Zone 23 card in your stacks?

Source record: 104997

N9OGL,

Copyright doesn't apply to "educational, discussions, ng posts etc" (It applies only to websites, magazines, music, broadcasts etc) so therefore IMHO any court in any democratic society would rule anything on a newsgroup, to be public domain. Another example is the Metallica v Napster issue. Whilst Metallica was succesful in having Napster made to comply with copyright law, there is nothing Metallica can do legally to stop me and my band playing "Enter Sandman" in the pub. If I was to sell this music afterwards on CD-for a profit-then I would be obliged to pay Metallica royalties. Further, for you to sue anyone for breach of copyright, you must first prove it was at a financial loss to yourself (or company) and that the person 'stealing' it is making money from it. As it's Amateur Radio, 'without pecuniary interests,' you, nor anyone else can claim to be making money from/or losing money from something involving Amateur Radio.

Anything transmitted or done about amateur radio belongs, by default, to every licensed amateur in the world, not me, not you or anyone else.

Only if someone takes your news bulletin, edits it a little and replays it, you may have a chance, provided the broadcast was on commercial bands (otherwise laws of commerce such as copyright don't apply). If you use the amateur band for your bulletin, then under copyright & amateur laws, the court would rule there was no commercial interest in the copyright and that by transmitting it on amateur bands you expected for it to be recorded and replayed by others at a later date. (Otherwise it would be illegal for the FCC/ACA to monitor and record ham transmissions), but anyone putting anything out on non-commercial radio frequencies can not have 'a reasonable expectation' of copyright. (This sounds like Down Under, a couple of UHF CB'ers (477MHz) tried to sue someone for re-transmitting their audio on 27MHz, but guess what, "How could they expect privacy and copyright on a public radio band?" and wasted all their money)

Whilst I sought permission from ARNewsline to re-transmit ARNewsLine on UHF CB in Melbourne out of courtesy, Mr Pasternack said he appreciated the courtesy, yet I could have started re-transmitting it without his permission, but if AR News Line was on a commercial FM frequency then I would have to enter into a commercial agreement with AR Newsline. Or if I was to copy his website and claim it as 'mine', as the website is in a commercial domain. The contents of the ARRL Handbook is copyright. If I photocopy a band plan and give it to another ham I have not breached copyright. If I upload the entire book to the web for all to use, I have breached copyright, or re-print it and give it away.

Names, trademarks etc are "copyright" such as I own the copyright to the magazine name "VicNews" ISSN 1038-6971, but that doesn't prevent teachers

and educators photocopying my magazine for their students, nor does it prevent anyone here saying "I read in VicNews this week....this guy is wrong". There is nothing I can do about it. Let's see, by your logic, if I write here I hate Coca Cola, then Coca Cola could sue me for using their brand name without permission!

Instead of wasting your time, effort & money on a pirate TV station, fighting the FCC (our ACA isn't much better btw) why not volunteer your time and expertise to the local community radio and television stations as I do? Not only could you broadcast what you want, you could help save the community station thousands of dollars by carrying out free maintained and repairs. I leave my broadcasting to broadcast services and amateur to amateur.

And two questions for US ppl on here: 1) Why does the cable channel control community television? In Melbourne UHF Ch 31 is community tv, and is run by Melbourne's Uni's as an independent organisation.

2) Why does the ARRL handbook list cable channels on your free-to-air tv bandplan. Yes, we have cable tv, but our system is ABC 2 (VK's BBC), HSV 7, GTV 9, ATV 10, SBS 28 & UNI 31 on the normal tv (just plug an antenna into the set and tune) plus cable via Coax (Fox only downunder). If I wanted to do a show on Channel 31, I could, what's broadcast is up to Uni's Student Union, not a tv company.

Perhaps by 'time travel' N9OGL is referring to the fact that when USA hams QSOs with hams Down Under or in New Zealand you are speaking to us tommorow and we are speaking to you yesterday :)

PS N9OGL: To run even a 10% successful television, print or radio show/program/station/publication you must first learn that there is a certain 'way' of operating broadcast to amateur, the 'hype' factor I call it, but for this to be effective requires a well-spoken, educated, grammatically correct (or incorrect on purpose for desired effects, not just because you can't spell) (just watch your nightly news or listen to the radio, not the content, but how that content is presented) (Almost all media outlets use a book called a "Style Book" which maintains content and how that content is presented for all media formats in that organisation)

Also, you'll need to get much better at punctuation, as punctuation is expression. If you are one of those guys who at school read mono-tone then you haven't a hope. Remember the kid that reads with expression (usually resulting in getting teased and laughed at hi hi) usually go on to be radio announcers, journalists, etc. And punctuation, grammar, spelling and expression go hand in hand.

Example: (From "To Kill A Mocking Bird" by Harper Lee).

With Expression: "Jem heard me. HE THRUST HIS HEAD AROUND THE CONNECTING DOOR. As he came to my bed Atticus's light flashed on. We stayed where we were until it went off; we heard him turn over and we waited until he was still again"

Without: "Jem heard me. He thrust his head around the connecting door. As he came to my bed Atticus's light flashed on. We stayed where we were until it went off; we heard him turn over and we waited until he was still again"

Also, I read in the posts about you 'getting upset' at the editing of the context of your program. Rather than call it 'censorship', and complain, do what any journalist worth his/her salt would do, re-word your show to still have the same impact and meaning without the profanity.

You should also note, that NOT swearing is more effective THAN swearing. Example: you start your show tonight and include lot's of 'hells' 'dams' 'shit' etc, and people watch. Ten years down the track same thing. But, if you didn't swear for ten years at all, then one day came on air and said "This is bullshit" it would be 200% more effective.

Who out there knows someone who never swears? How shocked are you when "That's ####ed" come out of thier mouth, as opposed to someone who uses it as every second word. The former has such an impact as most people will interpret that as "He's really annoyed," "Whatever they did must have been pretty bad for him to use the f word. Whereas in the latter, it's just "There goes that gutter mouthed lout again"

Having worked, albiet briefly, for the Herald & Weekly Times (Rupert's first company, and the one that started News Ltd & Fox) every employee is given a book which contains information on how certain articles and other issues are to be dealt with by the journalist. Example alright-those that allow this word into our media will be made to write "all right" 1000 times. (p.16, HWT Style Book, 8th Ed, 9/1990)

Listen to AR newsline, an example of 'the format'
"I'm Bill Pasternack W?ITF for Amateur Radio News Line"

This is a post from the future.....(Sent from VK 1438hrs AEST, Thursday 31 March 2005) (UTC: 0338hrs, Thursday 31 March 2005)
Looking forward to my next QSO with the past :)

Ashley Geelan
VK3HAG

Australian Radio Amateur & Stand-In Volunteer Radio Announcer @ Plenty Valley FM 88.6FM Melbourne, Australia.

I, too will be starting an on-air news bulletin, two in fact. One on the local community station, about amateur radio and a brief amateur bulletin for amateurs only who can call in to the studio (when I'm there) via amateur radio and go 'on air' with thier thoughts to help promote AR (instead of using the phone). This won't happen until I have co-ordinated a frequency to use with the local amateur club. Perhaps, N9OGL I could send/show you the correct way to format/run a newscast of any description.

N9OGL, if you have an Echo or IRLP node nearby would you like me to connect to it and give a demonstration on this. No point having a broadcast of any description until you have the fundamentals in place-grammar, pronunciation, spelling, don't bother, it's hard enough to capture a (any) audience with

these traits.

Like I said...Prolific profanity an sandlot threats...None of
which impress me in the least.

> Roger has indeed been "in trouble" with the law. Roger has also had
> repeat visits from his local chief of police. Roger may receive one
of

I know he has...I've seen copies of the documents.

And I am not at all impressed by people who sneak in to people's
mailboxes with anonymizers that wont't take replies back to the coward
that sent them in the first place.

As for Roger's "lawyer"...I bet he makes good money off of
him...Sounds like Roger keeps him plenty busy.

> Roger has had repeated run-ins with the FCC as well. Roger's been

I bet it is. I've seen the pics of him on line. Looks like he's
got a cousin in Illinois, to tell you the truth.

Toiddie doesn't care what courts or governmental agencies do.
They're all "against him without any reason" anyway...! ! !

> Whilst I sought permission from ARNewsline to re-transmit ARNewsLine
on UHF

Bill's a fine fellow.

He read an item I wrote on line and asked to re-print it in
"Worldradio". I told him yes, of course. About 2 months later I got a
check from him for the use! I sent it back. It was free in the first
place...Nothing had changed, but I sure appreciated the offer.

> Instead of wasting your time, effort & money on a pirate TV station,

to
> amateur.

You miss the point, Ashley...This is ONLY about Toiddie being able
to express his own opinions as forcibly and frequently as he can. It's
got NOTHING to do with the business of operating a station or promoting
the arts.

> And two questions for US ppl on here: 1) Why does the cable channel
control
> community television?

What we call "community television" or "public access" is so local
promoters, presenters, etc can "get on the air" without having to spend
all the cash to build thier own station.

The local cable company has the studios, the cameras, processing
gear, etc, and it can be rented to the "user" ready-to-go.

> You should also note, that NOT swearing is more effective THAN
swearing.

said
> "This is bullshit" it would be 200% more effective.

Toiddie doesn't have anything to say unless he connects it with
profanity.

> I, too will be starting an on-air news bulletin, two in fact. One on

with
> these traits.

We've tried to tell him...

The sad part is he's about to "graduate" from a "local" community "college", yet his grammar and vocabulary, well..suck! I used to (blindly) think that American education was above and beyond just about anything else out there...To my chagrin Toiddie proved me wrong.

I find it to be a bit-too-convienient that Brain suddenly has
business out of town (or what ever...) that prevents him from answering
any questions in a timely fashion...Especially when it's in response to
one of his own silly assertions...

Still waiting, Brain....Just ONE example...c'mon!...YOU insist
that this is a problem...Let's see you come up with SOME sort of

validation of your claims...

It's now March 31st. The original post was March 21st.

I guess the answer to my question was "Run and hide". I would
have been SERIOUSLY shocked if Stussy had been "stand up" and admitted
his error.

Oh well. Good thing I wasn't holding my breath on his answer!

I figured the comments about the QSLs would get mixed into this thread. I have said many times the stations that I've had contact with while on HF--and they've all been questioned and discounted because I "don't have a QSL" to prove it. Ha!! Don't need the paper--I knew I did it; although I am not all that sure that the contacts I've had are all that "special."

Not a paper chaser at all, never was even intrigued by it. Not a QSLer, although I design them all the time--THAT's the part I like. I really enjoy designing them.

So, it appears Dan must've said something, again, about not having QSLs for a contact. Pfffffttttttt, who cayas?

Wrong again, Fucktard. Roger didn't even post that. Try Lloyd
Davies, N0VFP.
And you had better keep your immense ignorance to yourself, shit
for brains, fatass. Now go cry because that retard daughter died.

BWHAHAHAHA..wrong again, shit for brains. Goddamn are you one
stupid fat fuck.

> Roger has indeed been "in trouble" with the law. Roger has
also had
> repeat visits from his local chief of police. Roger may
receive one of
> those visits again.

And High-el doesn't know what the fuck he is talking about.
Roger hasn't recieved "repeat visits with the chief of police".
You ar a liar. He isn't about to get another one either, dumbass.
Goddamn, are you one stupid fuck.

> Roger has had repeated run-ins with the FCC as well. Roger's
been taped
> QRMing other stations on 20m. A local dropped a dime on him.
His
> retesting is legend.

You having some reading comprehension problems in your old age,
Muddy Water's ex cocksucker?

You mean you made forged tapes of him and sent them in. You and
your fatassed buddy Bertie, who when talks about a hard drive
describes the physical dimensions, not the capacity.
And Roger passed his retest, which in the FCC letter had no
reason given other than the FCC can at any time, retest somebody
under the VE program , and upgraded, while you still do nothing
for amateur radio.
For somebody who says they've been a ham as long as you are, you
sure don't know Part 97.

> Roger should take his lithium and try to avoid places where his

And your Medical and /or Psychology degree is from what school? Oh, you mean you don't have one? So you are talking out of your fat ass again.

> sociopathic behavior will get him in additional trouble.

High-el forgets to mention the years of therapy he had to endure after his daddy assraped him repeatedly as a child.

> If his lawyer
> has any questions, have him give me a buzz. We'll start him off on a
> Google Search and then print him up some copies of swell e-mails.

I would imagine he's seen your threatening e-mail to Roger, about posting flyers illegally on utility poles in his neighborhood. In fact he probably has said that you are an ASSHOLE.

> If Roger needs some time to come up with retainer money before contacting
> his lawyer, I can be patient.

Since when? You seem to be having some mental problems, since you couldn't intimidate Roger. Just like the lie that he left before the "meeting was over. He asked the person in charge if the meting was over, when that person said yes. Roger left. Not quite the outcome you and your giggling fatassed faggot butt buddy Bertie wanted, eh?

> Roger talks big. Roger doesn't act.

Pot kettle black. You have been running your mouth and doing nothing. Tell us how your deceased Episcopalian priest daddy didn't molest you and the other altar boys.

> Roger--the unWiseman.

Oh, a name lame. Showing your 3rd grade mentality, are you?

> Dave K8MN

Known for his kookiness and Anti-American & Nazi leanings.

That's our Glen Dale burden, Mike. The man is a complete sociopath with nothing whatever to redeem him. He is an embarrassment to this area, this state and to amateur radio.

I'm unfamiliar with that acronym, and Google is returning way too many hits for any permutation I can come up with.

I'm assuming this means "Worked All States?" and you only have Wyoming to finish. Is this continental US only, or does one count Hawaii? I'm assuming that state is literal and does not include the various protectorates?

In my case I guess I could look forward to "Worked All Provinces" though I have no idea if Canadian Amateurs have such a tradition. Hmmm, I'd like to include the territories, as well. Maybe the acronym is now WAP/T? WAP&T? WAPaT?

I'm tempted to use the acronym WAPATI, which is a nice homage to the aboriginal place- and animal names found in the US and Canada.

Yeah, it's pretty low, Mike, but considering who we're dealing
with here, it was not unexpected.

Of course facts don't deter the ignorant:

(1) I never wanted to be an MD. MD's don't do th things I do, so
why go to school for something I didn't want to do?

(2) You HAVE to have a bit more feminine side to be a Nurse..It
requires that extra bit of compassion as...But hey...I'm straight and
surrounded by women all night!

(3) I was hardly "second best" for Taelor. She was only given
less than two years to live. I kept her for six.

And as for obese..?!?! Well...Some folks will just have to find
out the hard way.

It is the Worked All States (WAS) award, that is all 50 USA states
(including Alaska and Hawaii) no territories. See URL:
http://www.arrl.org/awards/#was

> In my case I guess I could look forward to "Worked All Provinces" though I

Canadian Amateur Radio Awards via Canada's National Amateur Radio Society
(RAC)
can be found at URL:
http://www.rac.ca/service/awards.htm

Includes:
Canadaward
5 Band Canadaward
Provincial Capitals Award
Seaway Award
Trans Canada Award
Worked All RAC Award

For a challenge try USA Five Band WAS: URL:
http://www.arrl.org/awards/5bwas/
Another tough one is WAS on Six Meters -- tis possible
And you can try WAS CW
WAZ -- Worked all CQ Zones will keep you busy
http://www.cq-amateur-radio.com/wazrules.html

Especially a single band WAZ or 5 band WAZ
And of course the Worked All USA (USA-CW) Counties (3077 of em)
http://www.cq-amateur-radio.com/usacarul.html
AND http://countyhunter.com/

--
CL -- I doubt, therefore I might be !

I imagine that any "flyers" posted on phone polls were
appropriate. Many communities are starting to demand that such posters
a be put up when deviants live in them to warn the good citizens.

Seems pretty appropriate to me...And a bit ironic of a complaint coming from a coward who just weaseled his way through several paragraphs of profanities and insults via an anonymizer.

Coward.

Steve, K4YZ

Poor Davey, he never gives any specifics.......all hearsay
"evidence".

> I know he has...I've seen copies of the documents.

And yet, you never provide "details" of these "documents", of
course you are talking out of your fatass, nursie....again.

> And I am not at all impressed by people who sneak in to
people's
> mailboxes with anonymizers that wont't take replies back to
the coward
> that sent them in the first place.

Aww, poor Nursie, he gets so frustrated when he can't stamp his
little flabby feet.

> As for Roger's "lawyer"...I bet he makes good money off of
> him...Sounds like Roger keeps him plenty busy.

Boy, are your fucking stupid, Nursie. You must've cheated on the
Nursing board exams.
>
> I bet it is. I've seen the pics of him on line. Looks
like he's
> got a cousin in Illinois, to tell you the truth.

We've seen your pics online too, Nursie, how is it a "health
care professional" like you is fucking morbidly obese. With your
beady eyes and that so-called moustache along with your size 50
inch gut makes you look like a pregnant weasel, nursie.

> Thanks for the head's up Dave.

Now be a good little bitch and give him a reach around.

It's a looooooooooooong way from 50...Perhaps you'd like to see
first hand?

> > Thanks for the head's up Dave.
>
> Now be a good little $$$$$ and give him a reach around.

Sure must be rough being as weakminded as you are all-the-while
having such big dreams for yourself. Maybe if you roll off of your mom
long enough for her to catch her breath she'll tell you who your father
was and you can feel a bit better about yourself...(Of course I am sure
"grandpa" will make her shup up first...I wonder why???)

Part of the reason I upgraded from tech plus to extra was to
"lock in" the credit I'd have for passing the old tech (general
written) and 5wpm I had from 1976. Also getting access to
all of ham radio privs was nice too.... HF turned out to be
more fun than 2m ever was.

He's lucky! My landlord doesn't allow antenna's so I had to sneak a portable
whip above the enterance
to my apartment. Check out how I ran my coax.....notice the screening I
made.....nice eh?

Wiseman owns you, dumbass. And you live in an even more
embarassing area, Cameron, where the father regularly fornicates
the sister and the farm animals. You live in the worst section
of the state. But then your posts don't do anything for "amateur
radio's image" either, you Nazi fat fuck. Maybe you could go
back to the Cashew Capital of Africa and be dictator over there,
you'd have more success in that venue than on the newsgroup.

Steve, that people like this creep below are allowed by the "powers that be" are the truest puzzle left behind for we mere mortals.

This creep insults multiple belief systems and defies that naturalness of humanity.

I won't apologize for the creep, but I will say that I am sorry your little girl was the brunt of such ignorance.

You said it well, Kim. The "creep" posting the tawdry rants is indeed a
shame not only to himself and his family, but a shame to Amateur Radio as
well.
The 49 year old man/child, Roger Wiseman, lacks the mental capacity to
realize this. Is it, therefore, little wonder that he has no friends?

Tony

Thanks, Kim...But Taelor knew more love and gave more love than most "normal" people I ever knew. I am willing to bet that the cowardly creeps that wrote that have been devoid of that kind of warmth in thier lives, hence their behaviour.

They are ignorant souls struggling to be something they'll never be. Sorry I can't help them in life. Maybe God will be able to do something with them later.

I appreciate your kind words!

73 es double on the 88!

Yes it does stand for Worked All States. And all 50 states are needed,
including Alaska and Hawaii. It is indeed literal and territories,
protectorates, etc. are not included.

Sorry, Nursie, maybe the reason you got into Nursing is to play
drop the soap with your male patients, but not everybody is into
that sort of thing. So it is MORE than 50? You need to sharpen
up your "detective skills," too. As well as your English, your
QRZ profile and "website" are rife with spelling errors.

That's a big R R R! The SSB problem also represents one of few times when an amp is useful when using CW. (The other times are - sometimes - in DX pile-ups & heavy QRN on the lower frequency bands.) ak

"Seems" to me you need some remedial English, Nursie. How *do*
you ever fill out a patient's charts correctly?

>

Then you need to have somebody read 97.519 (d)(2). Check that,
you'll have to have somebody read it to you.
At least you spelled "seems" correct this time, without the

unnecessary apostrophe.

> > And your Medical and /or Psychology degree is from what
school?

Dave is just a former bolt tightener and messenger boy for the Dept. of State. I noticed they gave him all the "plum" assignments in the backwater holes. Like the Cashew capital of Africa. And Finland.
Perhaps you'd better quit using that info from a couple of introductory psychology classes they make you take in first year nursing, Nursie. You get so confused when you see the "big words."

> > High-el forgets to mention the years of therapy he had to
endure

Speaking from experience, since half the Fleet screwed your mommy when your drunk daddy was not on leave.
Nice support of your "friend", too, agreeing that his daddy assraped him.

> > I would imagine he's seen your threatening e-mail to Roger,

appropriate.

Nursie, what are "phone polls", is that anything like a survey over the phone? Oh, Nursie, you are as ignorant of the law as you are of everything else. It is illegal to post anything on a utility pole. The power company needs a clear path in case a worker has to climb them.

>Many communities are starting to demand that such posters
> a be put up when deviants live in them to warn the good
citizens.

You should know, since they put a few up about you, Nursie.

newsgroup and elsewhere.

> coming from a coward who just weaseled his way through several
> paragraphs of profanities and insults via an anonymizer.

And still made more sense then the stupid statements you made,
Nursie.

> Coward.
>
> Steve, K4YZ

Oh, Nursie, you are so cute when you get angry.

Our community has one FM broadcast station and no television station. The local station will not allow you go in and run a show on their station. My group in the 90's tried starting a low power tv station for the purpose of allowing people in the community to use it. unlike someone (K4YZ) who thinks it's all about me.
We also have a "Public Access" channel unfortunately the cable company has complete control over it. (something they are not allowed to do) My group has tried repeatively to get programs on the public access channel (including programs from the University of Illinois and the University of Chicago) but the cable company refuses to allow us access to the channel. We complain to the city and the cable comes back say Oh we will give you access but lets wait for a few months and we will call you. when the few months are up the proccess starts all over again.

> And two questions for US ppl on here: 1) Why does the cable channel
control
> community television? In Melbourne UHF Ch 31 is community tv, and is
run by
> Melbourne's Uni's as an independent organisation.
>

Public Access channels are created through the franchise agreement. Cable companies are not allowed to have any editorial control over the channel. However, there are some cable companies and in some places local governments who censor and "control" the access channel.

Wiseman owns you, dumbass. And you live in an even more embarassing area of Marshall county from all reports, Cameron, where the father regularly fornicates the sister and the farm animals. You live in the worst section of the state. But then your posts don't do anything for "amateur radio's image" either, you Nazi fat fuck. Maybe you could go back to the Cashew Capital of Africa and be dictator over there, you'd have more success in that venue than on the newsgroup.

Why do you write of yourself in the third person? Is Wiseman just one
of your personalities? Wiseman wouldn't own the home he lives in had he
not inherited it.

> And you live in an even more
> embarassing area of Marshall county from all reports, Cameron...

From all reports? Whose reports? Haven't you ever been to Cameron? I
don't actually live in Cameron, Roger. I'm several miles away.

Your town, for the most part, isn't embarrassing. You're one of the
things which makes it embarrassed.

> ...where the father regularly fornicates the sister and the farm
> animals.

Your posts show a fondness for sexual deviance. You see it everywhere.

> You live in the worst section of the state.

Apparently there is much of the state you've never seen. It is likely
hard to see the rest of West Virginia from your house.

> But then
> your posts don't do anything for "amateur radio's image" either,
> you Nazi fat f--k.

Let's see....I've never been given a warning by the FCC for anything.
I've never been required to retest for a license. I've not become the
internet poster boy for writing restroom stall material over any number
of newsgroups and web sites.

> Maybe you could go back to the Cashew Capital
> of Africa and be dictator over there, you'd have more success in
> that venue than on the newsgroup.

I would? How in the world would you know? Do you know anything of
Africa or of cashew production? Anything?

I think you'll have difficulty finding those positions listed on the State website employment area, Roger.

> I noticed they gave him all the "plum"
> assignments in the backwater holes.

That's what happens when you "notice". Department of State assignments are made on the basis of bids. One chooses places of interest and bids on them.

> Like the Cashew capital of Africa.

No sentence here. Yep, the cashew capital of Africa. The African hardship posts mostly come with a 25% hardship differential. In Guinea-Bissau, I received that and lots of nice, fresh cashews too. Why would you have a problem with it?

> And Finland.

No sentence here either. Finland isn't a backwater, Roger. It is choice assignment with no hardship differential. It certainly has a healthy cost of living allowance though. Then again, you seem to know as little of it as you do of Guinea-Bissau. Do you have a problem with Finland? Ever been there? Ever been anywhere?

> Perhaps you'd better quit using that info from a couple of

> > > neighborhood.

Threatening e-mail, Roger? I asked how you'd like it if your mother, your sister or your kids saw some of your output? I asked if you thought your neighbors would like to see some of your work from the newsgroups pasted to telephone poles in your area.

> > > In fact he probably has said that you are an
> > > ASSHOLE.

He has probably said that? My, my--you must have one of those high powered Moundsville lawyers (Psssst--Roger! You don't have an attorney).

> appropriate.
>
> Nursie, what are "phone polls", is that anything like a survey
> over the phone? Oh, Nursie, you are as ignorant of the law as
> you are of everything else. It is illegal to post anything on a
> utility pole.

It is illegal to put guy ropes for radio masts across a public sidewalk too, but you did that. The city of Glen Dale told you to take them down.

> The power company needs a clear path in case a
> worker has to climb them.

Yep, those utility workers would surely have trouble climbing over an 8 1/2 x 11" sheet of paper four feet off the ground. People having garage sales put 'em up all the time without problems from any utility.

> >Many communities are starting to demand that such posters
> > a be put up when deviants live in them to warn the good

Roger was warned. Roger is now being warned.

> > > Just like the lie that he left
> > > before the "meeting was over. He asked the person in charge
> if
> > > the meting was over, when that person said yes. Roger left.

The "meting"? The "person in charge" was in the communications van when you intimidated yourself out to the car and skedaddled. You've never been to another meeting. I guess Roger can be intimidated.

> > > Not quite the outcome you and your giggling fatassed faggot butt
> > > buddy Bertie wanted, eh?

Butt buddy? Bert doesn't smoke. What is your fixation with homosexuality, Roger? Did you see something you shouldn't have seen as a child?

> > retesting is legend.
>
> You having some reading comprehension problems in your old age,
> Muddy Water's ex c--ks--ker?

What is your fixation on homosexuality, Roger? Okay, you've visited my
web site. You've seen a photo of me with Muddy Waters. Now what?

> You mean you made forged tapes of him and sent them in.

Well now, that would have been tricky. You see, I was in Tanzania when
you had your run in with the FCC.

> You and
> your fatassed buddy Bertie, who when talks about a hard drive
> describes the physical dimensions, not the capacity.

I see another problem with your theory, Roger. Bert was on active duty with the military in Germany during that period. That leaves you locked on the horns of a dilemma. By the way, I know the local who did it, but I'm not telling. Needless to say that the FCC found the tape convincing.

> And Roger passed his retest, which in the FCC letter had no
> reason given other than the FCC can at any time, retest somebody
> under the VE program , and upgraded, while you still do nothing
> for amateur radio.

Let's ask Phil Kane if he has ever heard of an instance in which the FCC forced a retest for no reason at all. By the way, do you consider your upgrade as "doing something for amateur radio"?

> For somebody who says they've been a ham as long as you are, you
> sure don't know Part 97.

There is no proof of your statement. I've never had any problems with the FCC--none.

> High-el forgets to mention the years of therapy he had to endure
> after his daddy assraped him repeatedly as a child.

What is this homoerotic fixation you have, Roger? Have you sought help for it?

> Pot kettle black.
> You have been running your mouth and doing
> nothing.

You can check in with your local police. You'll find that they have a large number of your newsgroup posts and e-mails to me on hand. I've visited them a number times when you were the only topic. That isn't exactly "doing nothing". In this case, you are both the pot and the kettle. It is evident that you have a problem with "black".

> Tell us how your deceased Episcopalian priest daddy
> didn't molest you and the other altar boys.

Is that from one of your fantasies? Do you have a thing about altar boys?

Source record: 105041

When I asked the respondent where his/her self righteousness was after the attacks on my daughet, this was the response I got and my reply:

(QUOTE: HEADERS AGAIN SNIPPED FOR PRIVACY OF RESPONDENT)

The shots against your daughter are low-life, as was the one you made about Jim Smith and his daughter.

There were no "shots", (Name Deleted), ...The point was that a pretty face was able to sell radios. There are others in QST, CQ, etc.

If you see anything more sinister than that, I submit that YOU have a very serious problem.

But the difference is that you are present on rrap to defend your family while the Smith family is not represented on rrap against your "Musta beem selling SOMEthing!" insinuations.

I reiterate the above. You are the one with a problem, (Anonymous Writer). You're looking for evil in everything you see. I could quote Genesis in RRAP and you'd portray me as the evil landlord.

Having said that, I must credit you with having the nads not to hide your attack behind an anonymous email address.

There was no attack. You are still challenged to cite an "attack". There was only (YOU) looking for a fight. At least you kept this one private. Bravo.

UNQUOTE:

I think there's some real significant mental issues with someone who finds some sinister evil in commenting that pretty faces sell radios (an "attack", as (s/he) called it), as opposed to those who defile the memory of a dead child.

But...ya pays your money and you takes your choice.

Steve, K4YZ

And your prolific use of profanity and defiling the memory or a
dead child is?

In any case, hitting Lloydie, Wogie and Toiddie with such
accusations is like shooting at manure. No matter where the round
goes, you're going to hit manure.

Nope. No profanity there, Anonymous Coward. Nor were there any
threats.

You've still not impressed me. Or shall I say "positively"
impressed me..!?!?

You're still an anonymous coward, and proof evident of the liar,
too.

Too bad you're not half the man you IMAGINE you are...You could
stand up behind your words...Instead you've ducked behind the
anonymizer.

Coward.

> to do).

Sure they can. They own the cable, the studios, the equipment,
etc.

What makes you think they can't exercise control over thier own
assets, Todd?

> My group has tried repeatively to get programs on the public

You're profane, demanding, poorly organized, functionally
illiterate and rude.

What part of those personal traits do you think the cable company
finds endearing?

> > And two questions for US ppl on here: 1) Why does the cable channel

The FCC has stated that communities have the right to determine the
nature of content of what airs on thier communities systems.

Obviously someone in Taylorville is unimpressed with your ability
to meet community standards, Todd.

Judging by the way you represent yourself in this forum, I'd say
they are spot-on.

> mouth.

It's not badmouthing, Todd.

You suggested using a storage capacitor cooled by liquid oxygen.
That was stupid on so many levels as to be hillarious.

And in the realm of communications, you "propose" a
networking/datalink system that is several developmental generations
BEHIND current technology.

They are not "inventions"...They are really bad ideas. I just hope
I am at least 500 miles away from your power capacitor project if you
ever try to buid it.

Big Snip:

> > N9OGL, if you have an Echo or IRLP node nearby would you like me to

Yes, Todd...you still have yet to tell us about all those
homebrew/kitbuilt features of N9OGL...remember..?!?! You were
"badmouthing" all those "appliance operators"...??? You have yet to
give us an accounting of your station or repeater lineup.

Google dropped a line here. I was a Navy-certified USMC Suture
Tech. A priviledge extended to me for volunteering in the USN ER at
Camp Kuwae on Okinawa.

There are, of course, many USN suture techs.

Tell us of YOUR "plum job assignments".

Oh wait...You refuse to be a man and sign your name, ergo you can't
discuss your life's works lest you give yourself away..

Or worse yet...Prove to us what an incomplete, social ner-do-well
you really are, which is far mor likely.

> > Anything?
>
> Apparently, you don't know anything of correct English.

Nor you. You keep avoiding the fact that your failure to stand up
in public and take responsiblity for your words leaves you in the
unenviable position of being labeled an anonymous coward. And until
you gather up the gonads to be a man and come out, you'll always be a
second place human being.

Just like you are right now.

You need to check around a bit! WAS and DXCC applies to VHF also.
There's grid square hunting, the satellites, numerous VHF contests
that promote award hunting, etc.

There's sidebanding on VHF (more on 6 and 2 meters, but used for
satellites, too.) Digipeaters, Echolink, etc etc etc.

There's more to Amateur Radio than 2 meter repeaters and HF DX!
(Contrary to the assertions of certain UNlicensed antagonists in the
NG)

73 es Good Luck

Wrong again, on both counts. But then, you are pretty much
always wrong.

Roger thought you are just a big fat cunt. You know, he's
right. Your warnings are about as palitable as well, some

homeless person babbling to himself. Your posts on Google can be used against you, as well.

For Techs (and others) try six meters DX particularly during sporadic E "season" May, Jun, July (prime months) -- other months also.

Tis possible to work all states (including Alaska and Hawaii). East coasters may get the Caribbean and SA as well

With 100 Watts and a Mushcraft 1/2 wave vertical -- got all but 2 states in a year (need KY and AR)

3546. Merger

From: ARRL [mailto:press@.arrl.org]
Sent: Friday, April 1, 2005, 4:01 AM
To: Headquarters [mailto:hq@arrl.org]
Subject: Important Organizational Announcement

AARA Founder Glen Baxter to Join ARRL As Third Vice President

NEWINGTON, Conn., April 1, 2005 - The American Radio Relay League (ARRL) announced today that it will acquire the American Amateur Radio Association (AARA), a leading provider of Amateur Information Bulletin Services. The deal unites the two most prominent Amateur Radio organizations in the United States. Financial terms of the acquisition were not disclosed.

"The acquisition of AARA complements ARRL's already extensive offerings to include up-to-the-minute information and interactive discussion on what is happening in the world of Amateur Radio," said Jim Haynie, W5JBP, president of ARRL. "Together, we will be more effective in taking on some of the challenges facing Amateur Radio, such as BPL and Spectrum Defense. This brings us one step closer to being the national membership association for Amateur Radio operators."

The acquisition also brings the strong leadership skills of Glenn Baxter, K1MAN, to the ARRL organization. Baxter has been named ARRL Third Vice President in the move. "Mr. Baxter is a welcome addition to our management team here at ARRL," said David Sumner, K1ZZ, and ARRL Chief Executive Officer. "I look forward to his fresh perspectives and enthusiastic approach to running a service organization like the ARRL."

"Water under the bridge," said Glenn Baxter of AARA about past frictions between the two organizations. "Today marks a new beginning for all of us. We're in this together now." Plans for collocating Mr. Baxter and Mr. Sumner in adjoining offices at ARRL headquarters are currently underway.

In an official statement, Mr. Riley Hollingsworth, K4ZDH, FCC Legal Advisor for Enforcement added, "Over the years, Glenn and I have become very close. I look forward to continuing our professional relationship as he assumes his new position."

In an effort to accelerate the shift to its new on-the-air image, ARRL has already filed the paperwork necessary to make W1MAN the official call sign of the combined organization. Joe Carcia, NJ1Q, ARRL station manager was thrilled with the change, saying, "What a creative way to reflect our traditional roots while also letting our bold, new face shine through!" Broadcast operations at the facilities of ex-W1AW will be shutdown immediately. AARA's state-of-the-art studios in Belgrade Lakes, ME will become the new source of all ARRL transmissions.

Amateur Radio insiders applauded the move. "These are interesting times for Amateur Radio," said Gordon West, WB6NOA. "I sense a likely shift in the ARRL views on many areas of the service. I think we'll be feeling the positive impact of this merger for years to come."

"This is big . . . really big," said Joe Walsh, WB6ACU, lead guitar player for the Eagles. It's exactly the kind of thing that will send our ticket sales through the roof. With Glenn on vocals, and Sumner on drums . . . this tour season will be our best since '73"

Audio aficionado and Amateur Radio entrepreneur Bob Heil, K9EID, also supported the move. "This is a good thing for Heil, and it's about time these guys got together", said Mr. Heil. "We are already working on a special commemorative W1MAN microphone to honor the event."

ARRL was founded in May 1914 by Percy Maxim, a leading Hartford, Connecticut, inventor and industrialist. Today ARRL, with approximately 152,000 members, is the largest not-for-profit organization of radio amateurs in the United States.

> What makes you think they can't exercise control over thier own

> assets, Todd?

The only "power" the cable company has over the content is setting what time the program may air and the availability of the channel. As for studio and equipmet, the only equipment that have is a VCR hooked into the cable line. They don't have any "Studio" and as for cable, the local goverment created public access in turn the cable company was given the "right of way" The problem here is NO ONE is allowed to use the "public access" channel. But if you want to more about what controls cable comapnies have over "public access" go talk to Media Alliance @ http://www.media-alliance.org/

the

> nature of content of what airs on thier communities systems.
>
The FCC has no juridiction over public access channels, that is let up to the community who, in term is to have available to the public what the rules and regulations of the public access channel is; which this group doesn't.

> Obviously someone in Taylorville is unimpressed with your
ability
> to meet community standards, Todd.
>
First of dickead, I happen to be a very very very old friend of the mayor of this community, before him it was my uncle who ran this town. (my family is very political) Secondly the cable company has been in trouble with the mayors office because of this matter. Recently my group filed a complaint on behave of a small church who didn't want to start trouble. The complaint was the church wanted to use the public access channel for their services but the cable comapny told them they were switching the public access channel over to Beta format. For the small church to now use the channel they would have to spend out $14,000 on equipment, money they didn't have. So when I had a meeting with the mayor it came to our attention that not only where the church's complaining but the schools were too. to make a long story short the city told the cable comapny if they did switch to beta that the city would cancel their franchise agreement....so the cable didn't switch formats.

What's wrong with that, liquid Oxygen can be used as a coolent as well as rocket fuel. The coolent is no where near a spark and the coolent circulates through pipes around the displacement chamber, between two sets of walls. (not the capacitor as you keep claiming)

> And in the realm of communications, you "propose" a
> networking/datalink system that is several developmental generations

REALLY dickhead, what amateur stations are running what i'm purposing.......NONE!!!! steve, I think your stupid, or lying, but I do think you don't get all the facts

> They are not "inventions"...They are really bad ideas. I just
hope
> I am at least 500 miles away from your power capacitor project if you
> ever try to buid it.
>
I would point out steve, that what's on that website is NOT the complete system, and I will not post the compete system on here or on that website. So there really is more to then what I'm ALLOWED to say.

frankly steve, the way you've treated not only me or anyone else one
here. I'm not under any obligation to tell YOU or anyone else what
equipment I have, the bottom line is, I DO build things, a lot more
then what you think.

You didn't answer my question.

Does the cable company NOT have control over thie own assets?

Yes or no wil suffice nicenly, thank-you.

I didn't say the FCC had jurisdiction, Todd. Please stay focused.

I said that the COMMUNITIES have the right to determine the nature
of the content in thier communities.

> > Obviously someone in Taylorville is unimpressed with your
> ability
> > to meet community standards, Todd.
> >
> First of ####ead...(SNIP)

Gee...You're right, Todd. Threre's one of those "dum### hams
badmouthing people on USENET" right now!

And PROOF of what I've been saying all along.

> I happen to be a very very very old friend of the
> mayor of this community, before him it was my uncle who ran this
town.
> (my family is very political)

Obviously not political enough.

> Secondly the cable company has been in
> trouble with the mayors office because of this matter. Recently my

Doesn't matter, Todd...LOX is not used as a refrigerant because
it's an O X I D I Z E R. It makes things burn, in some cases very
rapidly (please see any film clip of a Saturn 5 rocket ascending).

And if you plan on using LOX A N Y W H E R E near an electrical
source, you are introducing an I G N I T I O N source.

Now, going back to ELEMENTARY SCHOOL scinence, guess what happens
when you mix an oxidizer, an ignition source, and any FUEL...???

> > And in the realm of communications, you "propose" a

There's that " dum### ham badmouthing people on USENET" again....

>...(UNSNIP)...what amateur stations are running what i'm
> purposing.......NONE!!!! steve, I think your stupid, or lying, but I
do
> think you don't get all the facts

Oh, I have all the "facts", OK, Todd.

I didn't say ANYthing about "amateur stations"...

I said your protocol is several developmental generations behind
current technology. That's NOT untrue.

Frankly, Todd, this is EXACTLY the answer I expected.

The "bottom line" is you can't build a kit unless the instructions
are written in crayon and it has those little cartoon pictures of
people doing things so you can follow along.

You've had over a week to pony up all your non-"appliance" station
line-up, Todd, and it's taken you THIS long to figure a way to weasel
your way out of the corner you've backed yourself into.

Nice try. It didn't work.

Sure you are, Todd, and this "picture" was a prime example of it.

Other than my face, it's obviously NOT me in the picture, although
you titled the thread "A Picture of K4YZ".

You lied. Then you posted your picture to a public forum and
claimed it to be me.

Don't get mad, Todd...You provided the evidence!

You're right. That's why I am a Nurse instead of a CNA.

And I asked you a question that you've not answered. How is what
I do "mediocre"...?!?!

> > Do you propose that ALL healthcare providers beccome MD's?
> No
> > Nurses? No CNA's? No Paramedics?
>
> We weren't talking about anybody but a loser, you, Nursie.

You still haven't answered the question.

You claim that going "toe-to-toe" with me is "child's play", yet
you can't seem to answer simple questions.

What's up with that? A comprehension problem?

> > > You mean MD's can communicate in English, don't you?

And the issue is still there.

I dropped the "e". You seemed to have gotten confused over one
dropped vowel. I still contend that if that was too much for you, you
have a problem.

You still have not cited the post wherein you insinuate I am
"stupid" for suggesting homeowners have landlords.

You still haven't provided the cite.

> > Oh...wait...I didn't...Guess who's "stupid" now, Anonymous
> > Coward...???

Robert Casey is not, to the best of my knowledge, a Nurse. Yet
the original insinuation that I was stupid over a comment made about
landlords.

I didn't make the original comment, and you've now compounded your
OWN stupidity despite the fact that I pointed it out to you yet you are

still arguing the point.

Sucks to be you.

> But...ya pays your money and you takes your choice.

After asking the respondant to cite, publically and/or privately
where the alleged "attack" was made, the party closed by telling me
they wouldn't talk with me anymore and blocked e mail.

Guess it didn't matter that they started the exchange. Some folks
just don't like to have thier wisdom challenged. Or maybe they were
too embarrassed when they realized they had jumped the gun on thier own
accusations.

Of course the issue wasn't addressed, nor were questions posed
answered. I didn't really expect as much, but considering the
respondant, I HAD hoped for better.

Chubby Nursie,

I've been valiantly trying to follow this one-sided thread about threats made on you by some anonymous person (or maybe not) in some private(?) email exchange (how do you exchange emails with someone anonymous?). I've come to the conclusion that

a) you're making it up, or
b) you're corresponding with a phantom who is invisible to the rest of us here on rrap, or
c) you've found a miraculous way of exchanging email with anonymous senders

If the answer is a) then shame on you.
If the answer is b) then seek mental counseling
If the answer is c) then consult a patent attorney because you've a gold mine on your hands.

73,

M.A.N.

NOT true, a digital BETA is out there and is used by a few public
access as well as some commerial broadcasters. The cost of digital beta
equipment is $14,000 to $16,000

I am not a Nazi, Todd.

And a "new mode of communications" that is several developmental
generations BEHIND current technology is NOT what Amateur Radio needs.

Am I, Roger saw fatassed Bertie in a computer store querying about a replacement hard drive. And it sure as hell wasn't in Germany.

> By the way, I know the local who did it, but
> I'm not telling. Needless to say that the FCC found the tape
> convincing.

Really, since when is a warning letter to Roger with alledged evidence convincing.

> Let's ask Phil Kane if he has ever heard of an instance in which the FCC
> forced a retest for no reason at all. By the way, do you consider your
> upgrade as "doing something for amateur radio"?

Oh, does Phil Kane have a role as the "official FCC spokesman"?
Apparently, you are in denial. What have you done for amateur radio. Your posts sure don't do anything for it.
And Roger still passed the "retest" and even upgraded....much to your chagrin.
I noticed you dodged the question of what you have done for amateur radio.

> > For somebody who says they've been a ham as long as you are, you
> > sure don't know Part 97.

Hamshack Hack is a 're-master' of the KNOPPIX Linux distribution made especially for Amateur Radio Operators (Hams) who have no prior experience with Linux. It provides a complete Operating System (OS), software for the hobby, web, and word tasks. All contained in an .iso file ready to burn to CD.

FREE downloads and instructions are available at:

http://hamshack-hack.sourceforge.net/

Download the .iso image file and burn it to a CD and it becomes a 'Live CD' system.

Put the CD in the drive and re-boot your machine and you'll boot up with a fully functional Linux system. Your usual operating system will remain on your hard drive and all its files will be accessable but untouched until you say so, Linux will be running the show. When you quit and reboot, the Linux system will 'vaporize' and you'll be back with your regular system from your hard drive.

The CD contains a wide and varied selection of Ham software ... everything from PSK, RTTY, Packet, MFSK, and SSTV, to programs for weak signal, aurora, and moon bounce. There are programs for the International Beacon Project and APRS. XLog and the XDx dx-cluster terminal. Even a Smith Chart computer and EchoLink.

In addition to the Ham software, there are web browsers, several text editors, AbiWord for word processing, the GNUmeric spreadsheet, and gLables for making QSL card or mailing lables.

If you've been wondering about all the Linux 'chatter' lately, here's a chance to find out whats happening with that 'other OS'. And, no need to install it ... just re-boot your machine.

LINUX! Not just for Guru's anymore!

Harv, AI9NL

Ah but "the devil is in the details." Now if I just knew who said that!

Dee D. Flint, N8UZE

The bottom line, Dee, remains the same. Roger strongly dislikes
condescending posts, or what he percieves to be condescension. (anybody who
can author more than a sentence without a single profanity is, in Roger's
eyes, condescending). Roger especially comes apart when a woman is the
author.
As said before, the Sociopath has a penchant for sending anon emails and by
necissity must hide behind a cloak of anonymity.

These are the numbers of current, unexpired amateur licenses held
by individuals on the stated dates:

As of May 14, 2000:

Novice - 49,329
Technician - 205,394
Technician Plus - 128,860
General - 112,677
Advanced - 99,782
Extra - 78,750

Total Tech/TechPlus - 334,254

Total all classes - 674,792

As of March 31, 2005:

Novice - 28,908 (decrease of 20,421)
Technician - 267,391 (increase of 61,997)
Technician Plus - 50,966 (decrease of 77,894)
General - 137,134 (increase of 24,457)
Advanced - 76,746 (decrease of 23,036)
Extra - 106,434 (increase of 27,684)

Total Tech/TechPlus - 318,357 (decrease of 15,897)

Total all classes - 667,579 (decrease of 7,213)

Note that these totals do not include licenses that
have expired but are in the grace period. They also
do not include club, military, RACES or other
station-only licenses.

Your post shows you are, Nursie.

3584. Goodbye Roger...Why You Lose ISP's

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-02 05:30:15 UTC
From: Pam <PamHoffer@nosplam>
Message-ID: <424e2e7c$1_1@127.0.0.1>

Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.policy

Hello. My name is Pam. I once ran an ISP in the West Virginia/Ohio area.

Roger Wiseman was at one time a subscriber to my services, but that didn't last long.

Why, you ask?

Mr. Wiseman was never the best of customers and from the very first week of him signing with us the complaints rolled in. The majority of the complaints centered on the fact that Mr. Wiseman was posting libel and did so with a before unheard of amount of filthy verbiage.

I, Pam, warned Mr. Wiseman on several occasions. Mr. Wiseman responded by placing the blame on others, others whose names or IP addresses he could not provide. He assured me that the violations would stop.

Then, about three years ago, I received a printout from a person who called himself Arf! Arf! In the printout were numerous posts, with headers, made by Mr. Wiseman in which Mr. Wiseman described me in the most vile of terms. After receiving these printouts I decided that it would be useless to issue any further warnings to Mr. Wiseman. I then terminated his account.

Mister Wiseman was with us for less than a year and was told that he would not be allowed another account.

It is our policy to refuse service to anybody who violates our terms of service, those being the use of abusive language and the posting of libelous statements. Mister Wiseman was placed on notice that he is no longer welcome and need never again apply for another account with us.

Mister Wiseman has been informed that he is a "persona non gratis".

Pam

Tarapia Tapioco...what an oddity.

Posted via an anomymous remailer, nonetheless.

Of course we all know the street address.

610 Glen Haven is easy to find.

MapQuest shows it all...

You are making Marie proud, Roger.

Seems to me you can't read nor understand 97.519 (d)(2).

> Not al of his assignments were "plums". He stated that
himself.

"What is "al", Nursie?

> I am quite sure of it.

But considering the source, you have no credibility, Nursie. You are long on accusations but short on facts to back it up.

> To whom do you refer? No one I know, drunk or othrwise, has passed
> away since my daughter died.

Your daddy didn't pass away? Lying on your website?

> What? English, please.

Oh, do tell "phone-poll" boy.

> Did you mean "doesn't wash"...?!?!

You mean like "Not al"????......

> At least I can stand up and admit my errors. You just wallow in
> them.

No, you make excuses, Nursie. Yeah, looks like I left out a word, Nursie. Not that you could really tell, you can't even spell "all".

> You're welcome to re-post the items wherein you claim I am lying,
> Anonymous Coward, but I bet they won't be forthcoming.

Aww, is Nursie getting upset?

> And why would I need to? I am working as an ACLS ER Nurse.

> > You never hear anything, Nursie, your balding skill is tickling
> > your prostate.
>
> Dodge, dodge, dodge.

Pot kettle black......

> Why should I? I'm not the one with a morals and ethics problem.

That's not what your neighbors say, Nursie.

> A letter transposition is not an English skills deficiency,
> Anonymous Coward.

Sure it isn't, excuses-making Nursie.

> Nope. Nice snip, though.

That's what they should have done to you, snipped you so you couldn't procreate, Nursie. You wouldn't produce defective kids that die too young.

> > > Oh, I'm not angry. Quite the contrary. It's not
necessary.

> Then you have a comprehension problem that exceeds even my
> estimations. Seek remedial assistance.

Nursie, you should follow your own advice...especially when you
type "not al" for "not all".

You must not have had any completing report "privileges" with
your spelling skills.

> There are, of course, many USN suture techs.

Poor fumble, Nursie.

.....

Roger not only fumbled, he ran the wrong way when it came to spelling
skills.

Below you will see actual misspellings (he had the supidity to call them
"typos") by "Not Roger". These are actual words used in "Not Roger's" many,
many diatribes. Of course we had to read between the filthy lines to get
these....

�shreeched� Wasn�t he the guy in a sit com? Screech?

�stuid� Pot calling the kettle black?

�heared� That�s West Virginia for heard.

�assuslted� Rog just makes em� up as he goes along.

�experieince� Oh, DUH!

�abouve� Is this a French word?

�Cosast� Some place by a body of water?

�mebership�, Just a typo, right?

�retqards� Regards or Retards? Who can tell?

�coordinbator� Huh?

�Realy� Really?

�Nitoiced� Keyboard error or stupidity?

Becasue

Licence

Convienince

Myabe

�occurance� Say what?

�srtuggling�

�definatrely�

�delapidated� What a dufus.

�picutre�

�permenatly� Ebonics again?

�Arest� You need a rest, Wogie.

�Sentenceing� No comment.

�Narcotices� What?

�Undre� Is this a city in Germany?

�Surgeoun� And this would be?

�Commuications� Who is laughing at who?

�Ovre� Ovre and out!

�Wondreful� It�s a �wondreful� day in the neighborhood?

�Derivitave� Still no spell-checker, eh?

�You lose, shit for brians.� Woger showing who real loser is.

�Deisowned� Deis what?

�Deeppest� Roger strikes again.

�Dodgeing�. Is he talking about a car?

�Staedy� Steady?

�Linme� Transmission line?

�Getr� Nobody knows.

�Experieince� Wogie is good, ain�t he?

�Appropiate� What kind of opiate?

�Laywer� Lay what?

�Visitpors� You never have any, ergo you don�t know how to spell it.

�It's "complaintant," you sniveling weasel.� (Roger Wiseman on spelling complainant.)

�Irreevant� Good going, Wogie.

�Forwared� Forward HO!

�Glady� Glad Bags?

�Neighborhod� It�s a wonderful day in Wogie�s neighborhood.

�Mena� Mean? What you mean, Wogie?

�Notr� Not?

�Sassifyed� ALA Rolling Stones�No Sassifaction..

�Fantasises� That is �fantasizes�, Wussman.

�Illarate� West BY GOD Virginny!

�Reveresed� Must be one of those off-brand keyboards.

�Soem���as in Some? What a loser.

�VIRIN���What Wogie was before he met the Lavender Lads.

�Minisule���he mussa meant miniscule. Like his IQ.

�Champoin���Whassup, Wiseman? No dictionaries in the mental ward?

"Anoinymous"...a cross between anonymous and annoying?

�Acident� Roger�s mom got preggers by accident.

�Alreaedy� Alright, already!

�Amouints� Roger amounts to nothing.

�Aposterphe� This guy is a hoot, ain�t he?

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?

�Coiward� As in peeking from behind his mommy�s curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.

�Ghet� Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.

"Seperation". Why? Because Roger cannot "seperate" from his mommie!
�Sisnce� He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)
"strill" (still?)
�shoitgun� 12 ga or 20 ga?
"Snoip" (How they spell �snip� in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can�t spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It�s a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

� Stgop� Roger�s version of Stop.

�Fahter's� He meant Father�s Day.

�fserting�..would that be festering?

�poists�. Roger meant �posts�.

�snadwich� As in peanut butter and jelly?

�regualr� Glen Dale rendition of �regular�.

�aftrer� After? Aftrer what?

�soory�. Sorry Roger fucks up again.

�didnb't� He didn�t?

�whoile�. He ate the whoile thing?

�Woamn� He�s hooked on West Virginia phonics, all right.

�prrof� And he kin prove it, too.

�beforfe� Was that before he lurned to spell?

�yoiuy� Roger�s version of �y�all�.

�illerate� Only illiterate Roger can spell like this.

�haeart� Aw, how heartless of me to laugh!

�valule� Roger has no values. No wonder he can�t spell it.

�proch� Doesn�t everyone have one on their house?

�inmstitution� Where Roger�s mom put him in June 1999.

�timne� It�s Howdy Doody time?

�whgo� What? Who dat?

�gnetically� Only Roger knows what this one means�

�crfy� Like, cry, Roger, cry.

�stutrtering� Some stutter, Wiseman stutrters.

�Whjere� Where is Curtain Boy?

�Webiste� That�s Website to the rest of us.

�Youire� Your? You�re? Who knows.

�fiored� As in fired?

�Parety� Roger gave a party once. Nobody came.

�Bouynce� Bounce?

�Varification� Verifiable mental case.

�Probelms� Poor Rogie�has many problems of the mental sort.

�Partricipate� Oh, DUH!!!!

�Cryed� Gee, Wogie..cry me a river�you dolt!

�Stoick� What a dork. His old 386 has no spell check program.

�Partiall� More WV Phonics, I see.

�Obsucred� Either obscured or Rogie has �sucre� on his mind.

�Infinate� Stupid. Think finite, Rogie.

�Sustinance� As in Sustenance?

�Juvinile�. This is the way Roger likes his boys.

�Piut� Put it where, Rogie?

�Toyus�. �Toyus R Us?

�Diminuative�. Roger�s height.

�Definitely� Definitely

�Percriptions� Say what?

�Credibiliy� More Glen Dale intellect.

�Thsoe� Yet another Glen Dale gaffe.

"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd's got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does "dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is "disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make good sentence
"jellous" - Most of LARDASS Lloyd's cellulite body is "jealous" of skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those nutsacks for pizza topping, Pappa John's terminated him saying he didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him an education
"extrodinare!" - LARDASS is a moron "Extraordinaire"

"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven
"Must've struck a cord" - LARDASS confuses his favorite sex fetish of
tying his penis with a light cord and masturbating to the word "chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good
sentence!
"straming" - Lardass usually has to wash his sheets from the "stream"
of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of
stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd
talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's"
them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd
revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head
collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his
stupidity, however.
"You could have posted it, for we know!" - LARDASS make good sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging
with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's
department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school
because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared
of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be said
about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack
thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad
LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy
by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain
neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears

"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!
"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has "despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say "sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses" on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to, to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to get English lessons and

not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza delivery and trashcan robots is really something to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the English language.
"conquor" - Lardass Lloyd has yet to "conquer" his idiocy.
"I always new that your stupidity would trip you up, Mr. Wiseman." - I just "knew" Llardass Lloyd couldn't pose as "Christy Davies" without fucking it up and outing himself.
"I have given it some though and decided to come back" - Mongolloyd has never given anything any "thought." (from another "I'm leaving" speech/lie)
"usaul" - As "usual" Lardass lloyd Davies fucks up!
"Secwet Woger " Llardass Llavender Llad Lloyd's been sucking so many cocks he's got a lisp!
"douters" - Even though he has his "doubters", it's "doubtful" Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a "bipolar bisexual".
"desperite" - Lardass Lloyd is so "desperate" to win at something, anything.
"situtation" - Most people get in "situations, " but not our total fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets "a hold" of himself on a Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, "mysterious" survivor of a coat hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time" now.
"mommie's" - When Mongolloyds say "Mommy's" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!,

and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.

"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites by now
"red head" - Little Red is shoving his big ole black dickhead in Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets "harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide "whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity "activations" ready to show themselves.

"steganographic" - Mongolloyd takes his "stenographic" duties as a pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
"turd in the punch bowel." - Mongolloyd knows about bowels, not "bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one get "refused" by any military? Especially when he was honorably discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a 90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off" himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless self." - Mongolloyd has no listeners or anything useful to say. He's so "useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people flush "used up toilet paper, " Mongolloyd eats used up toilet paper, "don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart as a rock.

"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!

"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!

"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.

"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.

"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!

You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!

"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.

""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."

"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.

Mongolloyd make good spells!
Mongolloyd fumbles, ALWAYS.

"Retest twice????"... You never do get it right, do you total
fuck up?

July 11, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47
C.F.R.
Section 97.519(d)(2), the Commission has the authority to re-
administer any
examination element previously administered by Volunteer
Examiners (VE's).
The Commission may either administer the examination itself, or
under the
supervision of a Volunteer Examiner Coordinator (VEC) or VE
designated by
the Commission.

Accordingly, we are requiring you to re-take the General Class
Amateur
Examination, (Elements 2, 3(A) and 3(B)) under the supervision
of an
American Radio Relay League Volunteer Examiner Coordinator. This
examination
must be completed on or before September 11, 2000. The required
code speed
that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present
a photo
identification. Pursuant to Commission rules, your license will
be cancelled
if you do not appear for re-examination. You will be granted an
Amateur
Radio license consistent with the elements you pass upon re-
examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

Now where in the letter does it say "interference(qrm) is the
reason for the retest?

Oh, Holsten, is Lardass' buddy, a registered sex offender. Are
you still molesting your Grandson Jason and that little mulatto
mongrel newborn baby of yours?

Steve Holsten
611 W 9th St,
Kennett, MO 63857

Assuming it is true, which it ain't. Then in order to pass it and get a
license you would have to fail the test. Get it?

http://www.arrl.org/news/enforcement_logs/2000/0503.html
GLENDALE, WV [UPDATE]: The FCC had written General licensee Roger L. Wiseman, KC8JBO, on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and Advanced licensee Steven A. Tunder, N8WGM, that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Tunder and Wiseman to review ï¿½97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited the two licensees to contact him to discuss the matter. Wiseman alleged in a subsequent communication to the ARRL that Tunder had been harassing him and that he had made the FCC aware of it in the first place. Wiseman indicated that he had been in touch with Hollingsworth to clarify the situation. The FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

http://www.arrl.org/news/enforcement_logs/2000/0719.html
GLENDALE, WV: The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled. Applicants appearing for re-examination are granted an Amateur Radio license consistent with the elements passed. The FCC had written Wiseman on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and another licensee that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two licensees to contact him to discuss the matter. Additionally, the FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

http://www.arrl.org/news/enforcement_logs/1999/1119.html
GLENDALE, WV: The FCC sent a Warning Notice November 9, 1999, to General

licensee Roger L. Wiseman, KC8JBO, citing evidence that the licensee had been "deliberately and maliciously interfering with the radio operations of other licensed amateurs" on 20 meters. "This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions," said a letter from FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth. Hollingsworth warned that continued operation of the type described could result in a fine or license revocation proceeding, and he requested that the licensee contact him to discuss the allegations.

Roger is still, to this day, maintaining that he did nothing wrong. He says that the FCC can re-examine any licensees who have been through the VEC administered programs. Roger <chuckle-chuckle> stupidly asserts that he was "ramdomly" chosen and that nowhere in the letters does it say that he caused malicious interference to another Ham. So there you have it. 'Not Roger' is dancing a fine line between being guilty or being allegedly guilty, but he was not ordered to retest due to some random, willy-nilly pick-of-the-hat lottery that Riley Hollingsworth uses. So, is 'Not Roger' guilty? You bet your a** he is.

Yup, those look like the real McCoy and I note in the November 9, 1999
letter that the FCC cites *evidence* of deliberate malicious repeated
interference on 20 meters, which is one of the conditions under which
Riley orders people to restest.

Innocent comments - hi, hi! Robeson likes to make inuendo.

If you call him on it, he'll try to turn you into the deviant.

He's always the victim. Probably learned that tactic while rehearsing
for his 100% disability hearing.

Funny, it's a copy of the actual letter, which was posted on the Rain Report website when Hal posted the letters from the FCC. But, since you can't even differentiate between the Marshall County WV and the Marshall County, AL websites, your blatheringas carry little weight. The same cannot be said for your legs, since they haul that fat ass of yours around.

> But, alas, he isn't. He said so.

Just like you said you weren't Lardass, Lardass.

July 11, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47
C.F.R.
Section 97.519(d)(2), the Commission has the authority to re-
administer any
examination element previously administered by Volunteer
Examiners (VE's).
The Commission may either administer the examination itself, or
under the
supervision of a Volunteer Examiner Coordinator (VEC) or VE
designated by
the Commission.

Accordingly, we are requiring you to re-take the General Class
Amateur
Examination, (Elements 2, 3(A) and 3(B)) under the supervision
of an
American Radio Relay League Volunteer Examiner Coordinator. This
examination
must be completed on or before September 11, 2000. The required
code speed
that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present a photo
identification. Pursuant to Commission rules, your license will be cancelled
if you do not appear for re-examination. You will be granted an Amateur
Radio license consistent with the elements you pass upon re-examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

Now where in the letter does it say "interference(qrm)" is the reason for the retest?

No answer for that, huh?

I have asked this before , but did get not a single response so I will try again ...

When I open the "history" window, it shows two folders.. One for URLs visited TODAY and another for URLs visited more then 6 days ago..

There must be a option somewhere that would allow me to see those from one to five days ago..

Thanks for any assistance offered..

Bill

Tnx for posting the true AND accurate copies of the FCC letters sent to Roger, which clearly proves he was retested for repeatedly causing intentional malicious qrm on 20 meters.

Nope. but the person involved emailed me also. And since it was private email, I won't divulge the name.

As for the content of Steve's post, a person can either take it to mean that an attractive person used in an advertisement is a successful tactic ala "must be selling something", or that an attractive person in an advertisement is selling sex. I chose to read it as being a successful tactic, because most ads with attractive people are selling other things.

Too bad, that. Otherwise I might have a career as a supermodel..... ;^)

Oh, well. I have been absent from this NG for 20 months and return to find
the same children still calling each other names over the same nonsense.
Time to drag the cooler back into the stands and wait a while longer.

It's known as "arrested development" -- some folks just never get out of the
6th grade.

Dunno Bill,

Foxfire has a lot of similarities to Netscape. In my history folder, I have several different days and weeks worth of history items.

Perhaps the amateur radio policy group is the wrong place to ask. I would wager that most people in here use the evil program, Internet Exploder......

Funny, it's a copy of the actual letter, which was posted on the Rain Report website when Hal posted the letters from the FCC. But, since you can't even differentiate between the Marshall County WV and the Marshall County, AL websites, your blatherings carry little weight. The same cannot be said for your legs, since they haul that fat ass of yours around.

> But, alas, he isn't. He said so.

Just like you said you weren't Lardass, Lardass.

Absolutely unlikely. The respondant was asked both here and in
private e-mail to show where an "attack" or an intent to attack was
expressed.

The respondant failed to do so...That being because there wasn't
one.

The "attack" was the respondant picking a fight with me for no
other reason than it WAS me making the comments.

> > You took offense...Too bad for you. You know as well as I do

Who is it?
Brain or Brian?

"there goes Brain with yet another lie..."

You really should get this right. If you don't, that oddball 'Not Roger'
miscreant will take you to task.

Of course nobody gives a healthy hoot what 'Not Roger' has to say. The guy
is a Bottom Feeder who ranks in the lower world of Nowhere.
Poor 'Not Roger' has been thrashing about in his own self-made cesspool
version of Purgatory for most of his adult life.

: Funny, it's a copy of the actual letter, which was posted on the
: Rain Report website when Hal posted the letters from the FCC.

But the Rain Report only received copies of the original letter, as
did the ARRL and some others. Only Roger Wiseman has the original
letters, as well as *all* of the original letters. He is the only one
who can prove that the letters under discussion were not post-edited.

That is, he is the only one who can prove that he wasn't retested at
least twice.

: But, since you can't even differentiate between the Marshall
: County WV and the Marshall County, AL websites, your

But I'm not Lloyd; I'm someone else. So your "logic" simply doesn't
apply.

: blatheringas<STOMP!!!>

Now if you *were* Roger, your claims might carry some weight. But,
alas, you aren't. You said so.

Until the real Roger posts, I'm going to assume that he was retested
at least two or three times.

Perhaps. But you're still an anonymous coward.

> > Then send me your money, anonymous coward, because it's a
> lost bet.
>
> That hard up for money you have to beg for it, Nursie?

Hardly. YOU said "you'd bet" and I said you los the bet. So now
you're an anonymous coward AND a welch!

> > Oh? ANd where IS that place of employment, Anaonymous
> Coward?
> > What shift do I work? With whom?
>

> work.

Hey, YOU'RE the one who claims to have been to my place of
employment.

So go ahead...Impress everyone here with the name of the facility I
work at, the shifts I work, etc.

So now I say you're ALSO a liar, on top of being an anonymoous
coward AND a welch.

> > Remember now...You've stated you've "seen it". So let's

Ohhhhhhhhhhhhhhhhhhhhhh! ! ! ! Now who's "getting defensive",
anonymous coward...?!?!

Ran your mouth off and got backed into a corner! Need some facts
to back up your broggadaccio and can't ante up!

> > > Good thing she didn't live long enough to realize how

> >
> > =)
>
> Oh, so you are glad she dies, Nursie? Not very fatherly.

She died at home with the one's who loved her. You should read the
AOL Homepage I wrote about her. She was a blessing and a gift.

> > Then you are again confused. Sucks to be you, I suppose.
>
> No, you are in denial girdle boy. It does suck to be you, you
> have people dying around you all the time.

I do? Since when? Thee are a lot of folks in other jobs and
professions that see people dying more than I do. MY job is to keep
them alive. Thank-God I am better at that than you are at being a
commpassionate human being.

Hearing no further whining from Roger about *random retesting*, based on
the above letters, we now know Wogie was retested because of his repeated
deliberate malicious jamming of ham radio operators on 20 meters.
Case closed.

It get's more confusing every morning Brian. Now it appears this "private" real but anonymous person has threatened both Steve and Mike but doesn't have the decency to do it in public, forcing them into the embarassing position of publicly exposing their victimization without knowing who threatened them.

Strangerer and strangerer!

M.A.N.

No, YOU posted a copy of the letter to the newsgroups after it
came out, tubby. It was available on the Rain Report website
before Hap decided not to keep posting them.

> That is, he is the only one who can prove that he wasn't
retested at
> least twice.

One does not get retested "twice." You must be Lennie. Too
stupid to even get a ham license.

: Dumbfuck, the Marshall County ARES doesn't have a webpage, try
again,

Then what is at http://www.geocities.com/skywarncanwarn/ doodle
brain?
It sure looks like the Marshall County ARES, and it even has a
place
to send email.

> : blatherings<STOMP!!!>

Waddle away, tubby.

>
> Now if y<STOMP!>

Now if you had a brain, you'd still be too stupid to use it.

And it still doesn't change:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47
C.F.R.
Section 97.519(d)(2), the Commission has the authority to re-
administer any examination element previously administered by
Volunteer
Examiners (VE's).
The Commission may either administer the examination itself, or
under the supervision of a Volunteer Examiner Coordinator (VEC)
or VE
designated by the Commission.

Nothing else was mentioned in the retest letter. You should
know, you posted a copy of it, cackling when he got it.

>
> Until the real Roger posts, I'm going to assume that he was
retested
> at least two or three times.

Well, you always do make an ass of yourself.

Ah thanks for the try -- but lent my antenna out to a friend so he could
make new parts for his AR-6.

I'm in So Calif

But summer is sporadic E season for 6M-- so the best time would be May June
July
Will need double hop for KY
Maybe single hop for AR.

: > who can prove that the letters under discussion were not post-
: edited.

Also, Google's word wrap is terrible. Look how badly my own post is
quoted. I guess that you've run out first rate USPs. Been kicked off
too many of them, eh?

: No, YOU posted a copy of the letter to the newsgroups after it
: came out, tubby. It was available on the Rain Report website
: before Hap decided not to keep posting them.

I think you have me confused with someone else. There were many who
(re)posted the copies of the letters, including Woger Wiseman. Too
bad he's not around to straighten this whole thing out.

: One does not get retested "twice." You must be Lennie. Too
: stupid to even get a ham license.

I would think that you can be retested as often as the FCC directs.
In fact, I'd be willing to bet on it. Too bad Woger isn't around to
let us know how many times he was retested. I personally think that
anyone who believes in negative SWR might have to be tested several
times. Add the jamming to that mix, and I can envision four or five
retests.

: Oh, you are the one who posted that the Marshall County, Alabama
: website was the one for Marshall County, West Virginia.

No, I just said it was Marshall County. And it was. WOGER was the one
who assumed that I meant West Virginia.

And how is it that you retain and bring up that post after years have
elapsed? After all, you're not Woger and the comments were clearly

directed at him.

If I hadn't accepted your word that you aren't Woger, I'd start to suspect that you could be prevaricating. [Jbtre guvaxf gung ynfg jbeq ersref gb xvaxl frk.] What a terrible thought.

I claim *SPANK* on Roger. The FCC letters being self-evident.
Too bad, only Roger could possibly refute the spank, but then he is not
here, only someone who claims he is "Not Roger."

73,

Lloyd

Hmm, you dumbasses, need to review what "citing evidence" mean.
And it still doesn't change:

http://www.arrl.org/news/enforcement_logs/1999/1119.html
GLENDALE, WV: The FCC sent a Warning Notice November 9, 1999, to General licensee Roger L. Wiseman, KC8JBO, citing evidence that the licensee had been "deliberately and maliciously interfering with the radio operations of other licensed amateurs" on 20 meters. "This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions," said a letter from FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth. Hollingsworth warned that continued operation of the type described could result in a fine or license revocation proceeding, and he requested that the licensee contact him to discuss the evidence.

Oh, so you have been swallowing cum, Nursie. It was a little too
white for snot.

> Oh, I acknowledge my occassional spelling errors.

"Occassional," Nursie? "Occasional" means from time to time, but
you make them in every post.

> And you're still an anonymous coward.

Nursie, you are just a whiny little bitch, aren't you?

> So far, the only excuses being made here are why you're
not man
> enough to stand behind your comments with your real name.

And so far, all you offer up are more excuses.

> And I've answered them. They've been archived in several
different
> newsgroups before and are public records.

No, you offer up these faked "documents" which shows you are
dishonest, Nursie.

> How? I understand the situation fine. You're a coward and
> unwilling to be a man. No problem.

Only in your tiny little mind, Nursie.

> Since you're pontificating on spelling errors, anonymous
coward,
> it's "screw-up".

I suppose you know, since that term has been applied to you more
than once.

> Perhaps. But you're still an anonymous coward.

Bleat, little Nursie, bleat.

> Hardly. YOU said "you'd bet" and I said you los the bet.
So now

It sure looks like the Marshall County ARES, and it even has a
place to send email.

Now waddle, away, tubby.

> And how <whines>

Would you like some salt with those words being shoved down your
throat? A search of your posts on Google, and just like that I
have that post where you posted that Marshall County WV and
Marshall County Alabama are the same.

And the FCC won't keep retesting somebody. That statement shows
what a clueless imbecile you really are.

Keep backpedaling, like you always do. Always.

> If I hadn't <whines flushed>

Yeah, if your whore mommy would've just used protection when she
fucked that retard, you wouldn't be posting your idiocy today
and every day. Like the Marshall County Ares screwup, the
"International Radio License" that was proven wrong, or the
"Eric Clapton wrote Layla" for a fat dumbassed ham's wife
instead of Patty Boyd Harrison.

I see no attack. (S)he asked you to apologize for an off comment. I certainly have no problem with that person forwarding your comments to the young lady and her father whether you apologize or not. You made your comments in a public forum, right?

Maybe you'd like to have 30 minutes at the Dayton Hamvention banquet to explain yourself, your view of how people are always misunderstanding what you say, and why you are the victim.

> > > You took offense...Too bad for you. You know as well as I

Strangereer indeed.

You know, Mel, if that real but anonymous person had suggested in his/her quasi-"private" email with CC's to Mike and who knows else, that brick would fly through windows, tires would be slashed, and wives terrorized, I could see Steve Robeson/K4YZ characterizing the email as a threat. But the person merely indicated that Steve's publicly made inuendo would reach the person to whom he made the comments about. I see no threat. I see Robeson posturing and pretending to be a victim himself. At best he's merely a #1 jerk who may have once worn a marine uniform. At worst he needs to seek counseling.

No one at the FCC or VEC is qualified to make up that question pool.

Besides, if the FCC published the question pool, what would be the
point?

I would guess that you have to pull two shifts because there are not
enough amateur volunteers.

By your own admission, you are "Not Roger," so what you say has
no validity, much less is it even logical in the face of self-evident
FCC correspondence. Once you resorted to profanity, you lost any
hope of convincing anyone here.

73,

Lloyd

Lardass, you also "claim" that you are a "TimeLord" and you
hqave "daleks", you mentally ill reatard.
But in reality you are just a mentally challenged pizza delivery
boy. Your "claims" are like your malformed empty skull, hollow.

There are no Daleks under your command 'tard boy. You have been
a failure in everything you have ever done, PERIOD!

You are indeed "pale" (you post as pale dalek on NIM) you never
venture forth outside except for your minimum wage "job," and to
buy more light beer.

You need to seriously take a long hard look at yourself in a
properly lit mirror and then take action. Lose weight, get
mental help, stay off the computer for hours on end and face
reality. You are 31 years of age, you deliver pizzas, you play
with dolls, you get drunk and spew your filth and delusions on
NIM and usenet. Nobody, I repeat, nobody except for a couple of
geeks like yourself can stand you.

You need to either kill yourself or get help, thats it, do it!

"The unforgiveable sins this earth must confront and overcome are
Nationalism, capitalism, and hoarding. The idea of every nation
should be forgot, price should be struck from the commons, and
princes should be seen for the devils they are. The sins include
our church, secret societies, and other religions which make of
the spirit of God a divide."

Last rites declaration of Ioannes Paulus PP. II (Karol Wojtyla)
2nd April 2005

--
like the trees in winter, or like seed in the
spring suppressed under a hard clod of earth. Many in such cases have
labored to their utmost to divert their minds from the pleasing and
joyful views they have had, and to suppress those consolations and
gracious affections that arose thereupon. And when it has once come into
their minds to inquire, whether or not this was not true grace, they
have been much afraid lest they should be deceived with common
illuminations and flashes of affection, and eternally undone with a
false hope. But when they have been better instructed, and so brought to
allow of hope, this has awakened the gracious disposition of their
hearts into life and vigor as the warm beams of the sun in the spring
have quickened the seeds and productions of the earth. Grace being now
at liberty, and cherished with hope, has soon flowed out to their
abundant satisfaction and increase.

There is no one thing that I know of which God has made such a means of
promoting His work amongst us, as the news of others' conversion. This
has been owned in awakening sinners, engaging them earnestly to seek the
same blessing, and in quickening saints. Though I have thought that a
minister declaring his judgment about particular persons' experiences,
might from these things be justified; yet I often signify to my people
how unable man is to know another's heart, and how unsafe it is to
depend merely on the judgment of others. I have abundantly insisted,
that a manifestation of sincerity in fruits brought forth, is better
than any manife

It's a two-day exercise, and I can make it both days.

>I would guess that you have to pull two shifts because there are not
>enough amateur volunteers.

Actually, we have six operators qualified for that location, and we work in teams of three (county voice net, inter-hospital voice net, county-wide packet net) so we'll have plenty of operators. I didn't duck fast enough so I got designated as "assistant station manager" - that and two bucks will get me a cup of bad coffee that I don't drink anyhow.....but they do feed us if we hang around long enough. <ggg>

We did get called out today for an AMTRAK derailment because the ER didn't know how many casualties would be diverted to our hospital. Fortunately there were none so we stood down after two hours.

How do you come up with "pathetic", Brian?

YOU have made yet another anti-Amateur Radio statement, but then
when asked to substantiate the claim, you duck and hide, again trying
to redirect attention from YOUR silly statements.

THAT is pathetic. Not even the King's New Clothes were THAT
transparent!

> threatened them.

Neither of us were vicitimized. The person making the "threats"
didn't have the "stuff" to make the threat he claimed he would. And if
s/he carried out the intended threat, s/he would have looked sillier
than the quotes s/he was claiming to be inappropriate.

And if you had paid attention to previous posts, YOU would know
that we know exactly who the third person is. The comments were
discussed here since they related to an on-going post.

Just as I expected, no one perceived the same "impropriety" that
the un-named author did.

Of course, we can presume with equal validity that the "evidence"
was based on bad information and was therefore improperly
presented. Or fabricated.

Better run along to your mommy, little Jimmy.

I did. And why would I apologize for an "attack" that didn't
occur?

> Maybe you'd like to have 30 minutes at the Dayton Hamvention banquet
to
> explain yourself, your view of how people are always misunderstanding
> what you say, and why you are the victim.

(1) I am not a victim

(2) It seems there are only three people here who have a problem
with what I say, and that would be you, Lennie, and the person in the
e-mail. I'm not impressed that any "explanation" needs to occur.

And what would you care anyway? You said you had other plans much
too important to atttend Dayton.

You're calling yourself an "English-impared jack###"...?!?!

That's bizzare.

> > Hey, YOU'RE the one who claims to have been to my place of
> > employment.
>
> And you still can't disprove it, Nursie.

What's to prove?

You claim I'm "obese", "flabby" and work with a "bunch of heifers".

None of those are true. You've not even taken a GUESS at which facility I work at and there are only six possible ER's within an hour's drive of my home.

Make the claim all you care to, Anonymous Coward...You can't provide one substantiating bit of relevent fact, therefore we now know that you are an Anonymous Lying Coward.

> > So go ahead...Impress everyone here with the name of the
> facility I
> > work at, the shifts I work, etc.
>
> Bleat, Nursie, you are so cute when you get angry. Well, except
> for your receding hairline and ### soaked moustache.

I'm nor angry.

I'm laughing at you.

And it's "receeding", since you're so insistant about typographic erros, Anonymous Lying Coward.

As I said...Go ahead...Impress everyone here with your investigative skills...Tell everyone which facility I work for, which shift, etc etc.

> > So now I say you're ALSO a liar, on top of being an
> anonymoous
> > coward AND a welch.

:
: I see you still hide behind an alias. But that yellow streak
: running down your back is something you can't hide. You whine
: about somebody using a remailer, yet you hide behind a fictional
: black man and a fictional isp name. Hypocrite.

What is it the flamers say? PKB or IKYABWAI? Either appellation would fit the incredible case of Secwet Not-Woger becoming indignant about someone who uses a pseudonym. At least I can be traced, provided that one has a legitimate reason to provide to my USP. The real Woger has made several attempts at that, all of which have failed. The last time he sent a poison pen email to my USP, I responded by outing him at his Stratuswave ISP. A few months later, Stratuswave kicked Woger off their service.

: And, the last time I checked, I'm still not Roger.

And it's a good thing too. The real Woger has lots of enemies who are eager to try and get him dumped from his ISPs. If you were Woger, it would be tempting to release the identities of your current ISPs to your enemies and to let them do the rest.

:
: Since when? You post things that have no basis in reality.

And you do?

[DRIVELSNIP]

This is a very Woger-like thing to do: Post something which absolutely isn't to be found on groups.google.com. I just looked at the entire archived thread on google, and there is no such post there. Could it be that you have it saved on your own machine, or are you simply a post-editing liar?

But I digress: The topic is supposed to be the multiple retests which were apparently ordered by the FCC. Some people claim that the FCC letters posted here have been post-edited to omit the additional tests, and the group has been attempting to get at the truth of the matter.

Unfortunately, Woger is nowhere to be found and can't shed any light on the topic. Since you yourself say that you've looked in a mirror and noticed that you aren't Woger, I'm afraid that the real question remains unresolved.

What a pity.

Glad you brought that up, Brian.

You've claimed that I have made such threats.

I have asked you over and over to quote the posts wherein I
allegedly made such threats, but all you do is continue to make the
insinuation.

Of course you and I both know the threats were never made...I just
enjoy rubbing your nose in your frequent retelling of already disposven
lies.

> But the person merely indicated that Steve's publicly made
> inuendo would reach the person to whom he made the comments about.

The statement was made that this was an "attack", and
characterised as such. The respondant was asked to demonstrate where
the "attack" was. S/he did not...COULD not, since one was not made.

> I see no threat.

Claiming to be ready to tell third parties that they were
"attacked" in a public forum when no auch attack occured could be a
threat...However no such "attack" was ever made.

> I see Robeson posturing and pretending to be a victim himself.

I'm not a victim. I refuse to be one. That's why YOU can't get
away with your misrepresentations about Amateur Radio. I >>AM<< a
licensed Amateur, and such misrepresentations necessarilly include me.

I refuse to allow you to lie about me.

> At best he's merely a #1 jerk who may have once worn a marine

Those are the ARRL reports, not the official letters, dumbass.
And where in the letter does it say "malicious interference" was
the cause of the retest?

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission’s
Rules, 47 C.F.R. Section 97.519(d)(2), the Commission has the
authority to re-administer any examination element previously
administered by Volunteer Examiners (VE’s). The Commission
may either administer the examination itself, or under the
supervision of a Volunteer Examiner Coordinator (VEC) or VE
designated by the Commission.

Accordingly, we are requiring you to re-take the General Class
Amateur Examination, (Elements 2, 3(A) and 3(B)) under the
supervision of an American Radio Relay League Volunteer Examiner
Coordinator. This examination must be completed on or before
September 11, 2000. The required code speed that you must
demonstrate is 5 words per minute.

"Allegations" = "assert without proof"

Perhaps with some "manufactured" evidence?

Funny, Wiseman never had his license suspended or revoked, nor
has he ever been fined. A "retest" as a form of punishment? Hmm,
let's see he passed the test and upgraded to Extra. Yeah, that's
some "punishment." You are a moron, Davies.

There is not in existence a single filth-laden posting or e-mail
generated by me. There are hundreds and hundreds of them authored by
you. Any interested person can look at those you sent before resorting
to hiding behind a number of anonymous remailers by searching on
"KC8JBO", "AB8MQ" or "Roger Wiseman".

> You can't help but see Roger everywhere, can you? If you ever
> had a thought, it would die of lonliness.

I don't see Roger Wiseman everywhere. I see Roger Wiseman in several
newsgroups, including this one. Since you see fit to give Steve a rough
time over spelling, I'll have to ask you what "lonliness" is.

> > Why do you write of yourself in the third person? Is Wiseman
> just one
> > of your personalities?
>
> Let's see, maybe it's because I'm not Wiseman. Goddamn, are you
> stupid.

Well now, it writes like Wiseman. It knows things only Wiseman could
know. It seems to have a familiarity with this area. Must be Wiseman.

> > Wiseman wouldn't own the home he lives in had he
> > not inherited it.
>
> Wrong again. But you've made a career out of being wrong,
> haven't you?

If you aren't Wiseman, how would you know? If you intend to play
"I'm-not-me", you should at least have the sense to clam up on things
which Roger would know but which you wouldn't.

> > From all reports? Whose reports? Haven't you ever been to
> Cameron? I

> > don't actually live in Cameron, Roger. I'm several miles away.
>
> Even they have standards and didn't want you in town, eh?

It must be a difficult concept for you but I live where I choose. I bought the place in which I live because it is where I wanted to be. If I'd wanted to live in an RF trap, I'd live in Cameron or Glen Dale.

>But you still have a Cameron maling address, don't you?

Thinking of sending me a belated birthday card?

> > Your town, for the most part, isn't embarrassing. You're one
> of the
> > things which makes it embarrassed.
>
> Again, you don't even know what "town" I live in.

Sure I do, Roger-Not-Roger. You're up Glen Dale Creek without a paddle. You're in an RF suck hole, surrounded by hills.

> > > ...where the father regularly fornicates the sister and the
> farm
> > > animals.
> >
> > Your posts show a fondness for sexual deviance. You see it
> everywhere.
>
> Your response indicates you are sexually aroused at the
> discussion of such topics. You seek such topics obviously to
> fuel your perversions.

I seek? I didn't ask you to write of sexual deviance. You came up with it all by yourself. If someone write "FCC retest", you come up with something about fathers having sex with their sons or daughters.

> > > You live in the worst section of the state.
> >
> > Apparently there is much of the state you've never seen. It

>
> What a coincidence, neither have I.

I get it, Roger-Not-Roger. ;-) If you *were* Roger Wiseman, you'd have received such a warning letter.

> > I've never been required to retest for a license.
>
> What license?

I get it, Un-Roger. If you were Roger Wiseman, it'd be the amateur radio license that he has but which you don't have. ;-)

> > I've not become the

>
> Ye, I can read.

I didn't ask if you cold read. What is "ye"? Have you been reading "Ye Olde Encyclopoedia?

> I know they sent you to such "plum jobs like
> that backwater hole.

They certainly "sent" me. I bid on the job. Do you have issues with that?

> That speaks volumes about your job
> qualifications and job assignments.

Actually, it doesn't. You don't know the first thing about my qualifications. It does speak to my job assignments though. It *was*

one of my job assignments.

> > Anything?
>
> Apparently, you don't know anything of correct English.

I know enough to know that you wrote of my plum jobs with only an
opening quote and no closed quote.

> This message was sent via two or more anonymous remailing services.

In correct English, the above sentence means that you're hiding.

Apparently not, Roger. I asked the question which begged asking after reading your racist drivel.

> You see Roger behind every goddamn tree.

Nope, just here.

> > Is there any group of people you haven't insulted?
>

Good. You may run along and peruse your lying, evil heart out. When you've finished, come back and post just one in which I've used a term like you did in reference to blacks. Find just one Google-archived post in which I've insulted Jews. Find one statement by me which suggesting that someone is having incestuous sex with his son, sister, daughter or mother. That should keep you busy for a time, you human sludge.

: And if you had paid attention to previous posts, YOU would know
: that we know exactly who the third person is.
:

Sorry, I missed that, and going back over the thread history I now see that you have identified the anonymous person who privately threatened you.

Which raises the question as to why you and Mike (I'm still confused as to how Mike is involved) didn't just reply to her (him?) instead of bore us here with your one-sided diatribe. I thought the fact that she (he?) has blocked your email must be the reason you need to use this medium to communicate, but on examination that block seems after the fact. Maybe you just needed to vent.

On the other hand, I still haven't ruled out the notion that she (he?) is a phantom and you're just staging an entertainment for us here.

73,

M.A.N.

"What just a transposition of letter"? Nice job, Grog. What makes you veer toward discussions of father-son homosexual activity? Is this something from your childhood?

> > > You ar a liar.
> >
> > What is "You ar"?
>
> Looks like a dropped letter. Do you need glasses?

Nope, I saw right away that something was wrong. Why is it that you can notice every typo in Steve's posts, but none on your own?

> > Yes, Roger, you've had a number of chats with Chief
> > Stenger.
>
> No, I haven't. Still not Roger, dumbass Dave.

Ah, I see. If you were Roger, you'd have had a number of chats with Chief Stenger.

I don't know about any Nazis or any sniveling and whining, but I'll be quite pleased to forward this recent series to the Chief, using the e-mail address provided me for just this purpose.

> I'd still bet he won't get one.

I don't suppose you're very good at cards.

> > > Goddamn, are you one stupid f--k.
> >
> > Then again, I'm not the one getting into scrapes with the law
> and with
> > the FCC.
>
> Neither am I. And you still are a stupid f--k.

I get it. If you were Roger, you'd have had a number of encounters with law enforcement and with the FCC. In your world, one who has never had such encounters is stupid and you're the sharp guy. That's interesting.

> > What is your fixation on homosexuality, Roger?
>
> What is your fixation on Roger?

You answer my question and I'll answer yours.

> > Okay, you've visited my
> > web site. You've seen a photo of me with Muddy Waters. Now
> what?
>
> Oh, so you did have an "intimate" relations with him.

I've said nothing like that. I admit to having a web site and to having a photo of me and the late Muddy Waters on it. Now what?

I see. You haven't had any such run-ins, but Roger has. What about your accusation that I submitted "forged" tapes and sent them to the FCC? What happened to that?

> > > You and
> > > your fatassed buddy Bertie, who when talks about a hard drive

The FCC was concerned enough to send you the letter based upon the existence of the recordings. The FCC was concerned enough to have you retest. Oh, and the word is "alleged".

> > Let's ask Phil Kane if he has ever heard of an instance in

> > upgrade as "doing something for amateur radio"?
>
> Oh, does Phil Kane have a role as the "official FCC spokesman"?

Phil was a career FCC employee. He'd know about such things. Would you like me to drop a line to someone currently in the employee of the FCC?

> Apparently, you are in denial. What have you done for amateur
> radio.

You left out the "?" I'm not in denial. You spewed something about your upgrading your license as if that were "doing something for amateur radio". I'm a VE under the Laurel, Maryland VEC. I've administered many Novice exams in the pre-VE days. I've provided time and money to third world amateur radio licensees and clubs. I've served as the President of a IARU-affiliated amateur radio society in Botswana. I've provided an opportunity for tens of thousands of DXers and contesters to work a new country, a new band-country or mode-country from seven DXCC entities. I've written articles for CQ and Ham Radio Horizons magazines. I served as President of the Southwest Ohio DX Association. I acted as moderator for the Dayton Hamvention DX forum for a number of years. I've made presentations on my DX operations at the Dayton Hamvention, SWODXA annual dinner, the W9DXCC dinner, the Greater Cincinnati Amateur Radio Association and the NPARC.

Your turn.

> Your posts sure don't do anything for it.

Maybe I don't have the hang of it. Perhaps if I spent a number of years posting vile filth and lies about any number of people, threw in a number of references to the deaths of loved ones, tossed in some material about homosexual or incestuous activity and spewed some filthy material about spouses, I could reach your level. I might go in for

some sociopathy lessons.

> And Roger still passed the "retest" and even upgraded....much to
> your chagrin.

Yes, he did, much to my chagrin. He can't keep from shooting himself in the foot though--so there's still a goodly chance that he'll not be involved in amateur radio for very long. You see, Roger is never heard on the air in a QSO. There's never a, "Hello, Jack. I've been busy in the garden" from AB8MQ. Roger lurks and hides, just like he does here.

> I noticed you dodged the question of what you have done for
> amateur radio.

I provided some information above. Your turn. A single, truthful line of your contributions will suffice.

> > > For somebody who says they've been a ham as long as you are,

> >
> > What is this homoerotic fixation you have, Roger? Have you
> sought help
> > for it?
>
> What is this homoerotic fixation you have on Roger?

You seem confused. I wrote nothing homoerotic about Roger Wiseman or anyone else. I simply responded to the lies you wrote, Roger-Not-Roger.

> Maybe you
> are in denial about your homosexuality.

You write frequently about homosexual acts and incestuous sex acts with children and that is supposed to make me a homosexual? There are some flaws in your thinking processes. Then again, that has been obvious for quite some time.

> > > Pot kettle black.

>
> Since I'm not Roger, how would my local police have your e-mails.

I get it. ;-) If you were Roger, the local police would have a large number of your newsgroup posts and e-mails on hand.

> They probably don't have Roger's either.

Run down and ask them. Since you aren't Roger, you won't have anything to worry about.

> > I've visited them a number times when you were the only topic.
> That isn't
> > exactly "doing nothing".
>
> No, it's showing what a sniveling whining c-nt you are.

That isn't correct. Your lack of respect for law enforcement is likely based in your experience with them. Folks who don't get involved on the wrong side of the law aren't ever likely to have any such feelings.

> > In this case, you are both the pot and the
> > kettle. It is evident that you have a problem with "black".
>
> Do you always get your logic from Pee Wee Herman?

We're you the fellow you used the "N" word? Aren't you the fellow you uses the word "Jew" as a weapon?

> > > Tell us how your deceased Episcopalian priest daddy

> >
> > Is that from one of your fantasies? Do you have a thing about
> altar
> > boys?
>
> No, but weren't you an altar boy in your daddy's church?

Are you writing a book or an article about me? If I was an altar boy, would that make me the victim of molestation? Would it make my father the perpetrator? What is your interest in the topic? Have you had such an experience? Are you looking for one?

You brought up the topic. You asked me to "Tell" about something which never took place. It isn't the first time you've shown such an interest.
What is the basis for your interest?

Crawl back into your closet until nightfall, Roger. Then you can emerge with all of the other creepy-crawlies. You might make an interesting "Fear Factor" episode, though there are some things people with simply choose not to be around--not even for big money.

I come up with "pathetic" quite easily. The word handily describes the guy who attacks anyone who holds an opinion other than the one you hold.

Prove you opinions.

Now c'mon Phil. I used to write duty schedules, so I know how many
times two teams of three fit into a calendar day. Is this a two-day
ORI?

I'm just trying to see how these volunteers fit into County EMA, Red
Cross, etc., needs.

Doesn't make me happy or sad. It's just a fact that you posted just those scenarios. Maybe you thought you were giving some "friendly advice."

> You've claimed that I have made such threats.

If you view someone saying that they were going to forward your comments to the very person that you made the comments about as a "THREAT," I can only wonder how you might have reacted had that person suggested that you might have your tires slashed, windows broken, and wife terrorized (by other people, of course) all because your shot off your big mouth?

> Claiming to be ready to tell third parties that they were

Hmmmm?

In another post you said that no one other than the mystery e-mailer
saw any impropriety in your comments. So which time were you lying?
Then or now?

Now you say that other than me, Len, and that mystery e-mailer...

But I don't see Len posting on this subject. So are you making yet
another lie?

There's no lying involved, Brian, other than your attempt to
redirect the specific comments being made.

Nice try. Very transparent.

> Now you say that other than me, Len, and that mystery e-mailer...
>
> But I don't see Len posting on this subject. So are you making yet

You still say you're holding up a mirror, yet all the foolish
assertions are still yours and still unanswered.

You try to redirect, and I refuse to allow you. No problem.

> > > You would have to matter for that to happen,and you just don't

Oh, I make no "warranty" about what and how I post. I quite
readily acknowledge that I am quite ready to stand toe-to-toe with
those who are obviously lying, misrepresenting Amateur Radio, or
inisist on acting foolishly in public.

Thankfully that sub-group of ner-do-wells is fairly narrow. You.
Lennie. Todd. Mark Morgan. The fairly few number of anonymous
cowards who haven't got the guts or strength of conviction to stand
behind thier already lame game.

> > >You simply have an emotional defect and you cannot help yourself.
> >
> > What emotional defect, Brian?
>
> The one you exhibit daily on rrap.

You've not yet defined or identified any "emotional defect",
Brian. That comes from a lack of understanding of the words you're
using and from a lack of training/education in any healthcare related
discipline from which to draw the requisite knowledge from.

Try again.

There are several people in here with whom I have disagreed and/or carried on length discussions at opposite ends of the verbal see-saw.

Only you, Todd, Lennie, and a couple others have huffed up the tone.

> Prove you opinions.

My "opinions" are that you are not truthful and/or will not prove your assertions.

(1) "I operated legally from Somalia". As of today, still not a single reference to a single bit of evidence that corroborates your claim.

(2) "Unlicensed devices play a major role in emergency communications". Again, not a single bit of evidence that there is anything but some distant, ancilliary role that "unlicensed" deveices play in ANY emergency communications, and certainly not a single reference to any communications plan of any organization that makes them a "major role". Even REACT has all-but-abandoned Class D CB in favor of using GMRS for it's operations!

(3) "I've worked enough DX from my other duty postings in Korea and Guam to make DXCC several times over." An obvious paraphrase on my part, but you've still not ponied up any evidence of having accomplished DXCC even ONCE, from ANY location, let alone FROM a DXCC

location.

(4) "Amateur Radio's role in emergency services is overplayed because in an emergency, they won't be able to respond due to too few operators or operators unable to do it due to age or health". Again, a paraphrase, but an accurate and very, VERY recent one. You've still not ponied up a SINGLE example of ARES or any other Amateur Radio based service NOT fulfilling it's promised responses. Not a one.

So there are four prime examples of YOU not substantiating YOUR claims, thereby proving MY opinions that you are NOT truthful and that YOU do not prove YOUR assertions.

Anything else?

Yes he did, and no I didn't.

You need to go back and re-read what was written in the part you
SNIPPED in the previous response AND my resposne above.

(comprehension, anonymous lying coward...there's that
comprehension issue of yours leaking out again!)

And Dad didn't drink.

> > You're welcome to re-post the items wherein you claim I am
> lying,
> > Anonymous Coward, but I bet they won't be forthcoming.
>
> Aww, is Nursie getting upset?

Nope. Just giving the Anonymous Lying Coward a chance to prove the
accusations. Of course, the "proof" is not forthcoming.

> > And why would I need to? I am working as an ACLS ER Nurse.

So far, I've not dodged anything, least of all the weak,
underhanded soft-ball slow pitches you've been trying to field!

> > Why should I? I'm not the one with a morals and ethics
> problem.
>
> That's not what your neighbors say, Nursie.

Again with claims...Again with not a single bit of any
evidence...Still an anonymous lying coward.

> > A letter transposition is not an English skills deficiency,
> > Anonymous Coward.
>
> Sure it isn't, excuses-making Nursie.

What excuses? You've not proven an "excuse".

> > Nope. Nice snip, though.
>
> That's what they should have done to you, snipped you so you
> couldn't procreate, Nursie. You wouldn't produce defective kids
> that die too young.

I didn't "produce defective kids that die too young". The crop
duster that laid cotton defoliant over our house by mistake did,
though.

Nast what that stuff can do to a woman in the first trimester.

> > Then you have a comprehension problem that exceeds even my
> > estimations. Seek remedial assistance.
>
> Nursie, you should follow your own advice...especially when you
> type "not al" for "not all".

Typographic errors are not "comprehension" deficiencies, anonymous
lying coward.

You still have comprehension problems that are not being
addressed. And you still have an ego and character deficiency that
prevents you from being a self-actualizing human being.

Always at a deficit for information, aren't you, Brian?

http://www.dhs.gov/dhspublic/interapp/editorial/editorial_0588.xml

TOPOFF-3 will be four days. More than ample time for any one
person to pull more than one "shift" during the exercise, depending on
how you're defining "shift".

12 hour shifts: Four (assuming 12 on / 12 off)

8 hour shifts: Six (assuming 8 on / 8 off)

4 hour shifts: Eight (assuming 4 on / 8 off)

Brian...You CAN pull more than two shifts under ONE of those
formats, couldn't you...??? I sure could, and will. CAP is a
participating agency in this.

Who's "chased away" Techs from 6 and 2 meter SSB, Brian?

The idea doesn't make sense on several levels. First and foremost is the fact that there's absolutely no evidence of anyone being chased anywhere.

Secondly is that VHF contesters are no different than HF contesters...They need those "casual" contesters or participants in order to get thier scores up...No "motive" for them to chase anyone away.

Thirdly, the manufacturers push VHF capable gear in order to make more profits. What would be thier motive to "chase away" anyone?

Next is the ARRL and it's ancilliary branches such as ARES. They need Tech in order to "flesh out" ARES and other programs. QST is ripe with PRO-VHF operating...CQ Magazine even moreso with it's resurrection of "CQ VHF" magazine.

So...Here we are again...Brian P Burke making yet another assinine anti-Amateur Radio assertion absolutely unsubstantiated by even a single paragraph of corroborating fact.

And he says >>I<< have some undefined "emotional" problems. Go figure.

The Avenging Angle is purely responsible for his own
actions...but, as noted, he can't see that in the
non-reflection (of himself) so, ergo, he is NOT
accountable for anything... :-)

It's ALWAYS "everyone else's fault!" :-)

Stebie has NO accreditation in accounting, by the way.
Without credentialed expertise in accounting, he
cannot account for it. :-)

>> >You simply have an emotional defect and you cannot help yourself.
>>
>> What emotional defect, Brian?
>
>The one you exhibit daily on rrap.

1. He CAN'T see that...

2. Stebie is ALWAYS right, anyone disagreeing
with him is ALWAYS wrong...

3. This whole newsgroup seems to be all about
Hero Stebie Fighting The Forces of Evil... :-)

The original intent of this newsgroup was to discuss
amateur radio policy. It's turned into an sort of

professional wrestler arena of the old B&W TV days
where everything is about everyone doing battle with
everyone else on personalities... :-)

Hmmm last June on 6M, we had several double hop sporadic E openings and the band was filled with signals from 50.125 to 50.300 with SSB signals -- lots of CW below 50.125 as well. This was not contest time and virtually the whole US was coming in.

On field day we had single hop to the North West -- made 50+ contacts.

CL (Sporadically)

about
> your accusation that I submitted "forged" tapes and sent them
to the
> FCC? What happened to that?

You tell me, apparently Wiseman only got a warning letter and a
retest. No fine, no suspention or revocation, so you tell me.

> ...and it sure as hell wasn't during the period in which Roger
(not you)
> got his ass in a crack with the FCC over malicious
interference. Bert
> was on active duty with the Army in Europe. Now, what about
your silly
> accusation?

Uh-Huh. Nobody but you said it was during that period.

> The FCC was concerned enough to send you the letter based upon
the
> existence of the recordings. The FCC was concerned enough to
have you
> retest. Oh, and the word is "alleged".

Which means unsubstantiated or poorly presented "evidence." And
readingf the much posted retest letter, there is no reason other
than the FCC can at any time retest somebody under the VE
system. Looks like you are puting 2 + 2 and coming up with 5
again.

> Phil was a career FCC employee. He'd know about such things.
Would you
> like me to drop a line to someone currently in the employee of
the FCC?

Go ahead, dumbass. Why dont' you even go so far as to ask the
Rilkey guy, too?

> You left <blatherings and bullshit>

You left out your proof. As usual, Methings you are lying.

>
> > Your posts sure don't do anything for it.
>
> Maybe I don't have the hang of it.

You never got the hang of anything, eh, Nazi?

> Yes, he did, much to my chagrin. He can't keep from shooting
himself in
> the foot though--so there's still a goodly chance that he'll
not be
> involved in amateur radio for very long.

Oh, does Miss Cleo have you as a "psychic consultant?"

> You see, Roger is never heard
> on the air in a QSO. There's never a, "Hello, Jack. I've
been busy in
> the garden" from AB8MQ. Roger lurks and hides, just like he
does here.

Oh, so you are saying you are obsessed with him, you keep tabs
on him?

> I provided some information above. Your turn. A single,
truthful line
> of your contributions will suffice.

Mheh. You provided unsubstantiated bullshit.

> Cough it up. Post it here. Otherwise, you'll remain forever
a liar.

Obviously, you are in denial about it.

> I understood what you wrote. It isn't even close to being
true.

Uh-huh. Sure it wasn't true.

> You seem confused. I wrote nothing homoerotic about Roger
Wiseman or
> anyone else. I simply responded to the lies you wrote, Roger-
Not-Roger.

Yet you still keep tabs on his amateur radio qso's and so forth.
You claim every anonymous poster is him. Sounds like obsession
to me.

> You write

Yep, you are in denail about it.

> I get it. ;-)

That's doubtful.

> Run down and ask them. Since you aren't Roger, you won't have
anything
> to worry about.

Exactly, Nazi. I don't.

> That

Yep, you are a sniveling whining cunt. And had in the past
unfavorable contact with law enforcement.

> We're you

"We're" you? "Wern't" you the fellow who said something about
typos above?

> Are you

Yep, you were a molested altar boy.

> You try to redirect, and I refuse to allow you. No problem.

Big problem(s). You lied. You lied four times. You lied about your
inuendo, you lied when you characterized the anon e-mailer as and
"attacker," you lied about all of it not being a problem for anyone
except your anonymous "attacker," and then you lied about Len's
involvement in this thread.

I wonder how many lies you'll tell tomorrow?

> > > > You would have to matter for that to happen,and you just don't

> inisist on acting foolishly in public.

Toe to toe?

Welp, you got called on your inuendo, you got called on characterizing the anon e-mailer as an "attacker," you got called on your lying, and now the mirror is being help up for you to see yourself as the liar that you are.

> Thankfully that sub-group of ner-do-wells is fairly narrow.
You.
> Lennie. Todd. Mark Morgan. The fairly few number of anonymous
> cowards who haven't got the guts or strength of conviction to stand
> behind thier already lame game.

"Thier" lame game?

Look, you're the one playing off-duty COP on rrap. You've shot off your mouth once too often and someone is now trying to get back at you with vile comments about your daughter. You shot off your mouth again about a young woman in an amateur radio advertisement, and some anonymous rrapper called you on it.

You stand alone. No one supports your latest gaffe.

> > > >You simply have an emotional defect and you cannot help

Newly recruited marines are sometimes discharged for non-adaptability
to military life. Steve should be put back in the Corps for
non-adaptability to civilian life. Let them deal with his lies,
assinine assertions, impossible delusions, and generally disrespectful
attitude.

Your singularly distinctive acheivement on RRAP has been "huffing up
the tone." In the past few days you've told at least four new lies.
One lie on top of another just so that you don't have to accept
responsibility for shooting off your mouth about a YL in an amateur
advertisement. I can only wonder what new lie you'll tell tomorrow to
CYA.

3731. Re: Where's Todd in all this ?

I should have read the whole paragraph first! I really needed a laugh! :)

"Iï¿½ve deiced to write out some of my old idea and explain in greater detail about some of the theories and concept behind it. The reason behind this revamping of some of my old idea and theories is due to a group of people in are society who have little or no intelligent. These people are called Amateur Radio operators, and it is no wonder television and movies and poked fun at these people, who are nothing more, then licensed CB radio operators. It has always been my philosophy that Iï¿½m not here to prove myself to anyone. Nor, it is my intent to share my ideas to half-wit ï¿½licensedï¿½ CB radio operators who narrow minded and whose only real skill is keying down a microphone."

First I thought it must be an April Fool posting, but it was over a week early.

Then I read some of the other nonsense on that blog, and was overwhelmed by the over-reaching lack of technical acumen of this guy.

Go there and see for yourself. I warn you, you'll laugh till you cry!

If you liked Todd's ELF transmitter, you're gonna love his time machine (or maybe not).

- - - - - - - - - - - -

3. Time Travel

I had written a few articles on alt.sci.physics.new-theories about time travel. Time travel (i.e. The transferring of people through time) is impossible the theory that I wrote was based on the concept of storing a message on a wireless computer network and in 30 years the signal will transmit out. A person hearing the signal could (if technology was available send a message back by using tachyons. Tachyons are particles that start off traveling faster then the speed of light, thus causing them to go back in time. Many people ask if this works then why hasn't anyone heard any transmissions from the future?? Well probably for two simple reasons, the first being although tachyons have been around since the 1960's the uses of tachyons as a mean of communication is still 15 to 20 years from now. The second reasons is the fabric of space-time is a delicate system and any interference from the future could destroy the space time as we know it, or it could create a "parallel universe" thus, although the future us are talking to the past, they are in fact probably talking to a parallel universe. Many non-science/ham radio operators probably don't believe in the concept of "parallel universes" however, physicist are able to prove through an experiment that parallel universe do exist. The Second mean wasn't really "time travel" but more of a way that the human bran could receive brainwave signals from your parallel self. This is done by means of a machine that can change you "quanta" to their "quanta" this of course is done artificially via computers. Amateur's can grasp the idea that communication 15, 20 or even 30 years in the future may be a hell of lot different and tachyons communication may be used in the future (even for long distance space communications). But hey, the only thing amateur radio operator know is to key down a microphone of an analog system.

Subject: TOS-Abuse Report, Request for Assistance

Dear Sirs,

My name is Steven Robeson. I participate in a USENET discussion group known as "rec.radio.amateur.policy", which is a group for licensed Amateur Radio Operators to discuss matters pertaining to Amateur Radio regulatory matters.

For the last several weeks, one of your members, Mr Todd Daugherty of Taylorsville, IL, has been using the group to promote wanton violation of federal regulations and to make threats against other citizens.

In this latest round, he has started taking pornographic pictures and superimposing our faces over the pictures.

Here is one specific offending item wherein he has done so with me:

> key down a microphone of an analog system.

You would think if he's going to create a web site and write about
technical subjects and attack others intellect, that he would at least
proof read what he is posting. Just what is a human bran, is that like
raisin bran?
If you want to see what kind of nutz believe this crap, look here.

http://www.csicop.org/sb/9409/reality.html
http://skepdic.com/takionic.html

NASA says "So far any attempt to observe a tachyon has come up dry, and
most physicists have abandoned the idea that tachyons might be real."
http://www.nasa.gov/centers/glenn/research/warp/warpfaq.html#tach

But this is probably just a government cover-up!

If you want to play question and answer, you'll need to do some
answering, Roger.

> > Nope, I saw right away that something was wrong. Why is it
> that you can

Watch this, Rog. It really is this easy: I made a typo.

> > Ah, I see. If you were Roger, you'd have had a number of

> > Chief Stenger.
>
> You are slowly cating on, aren't you?

Cating? I caught on a long time ago. You deny that you are you. You
hide behind anonymous remailers because you can't afford to have
yourself identified with your posts. You've had so many run-ins with
law enforcement and have lost so many internet accounts that it just
wouldn't be prudent.

> > I don't know about any Nazis or any sniveling and whining, but

Of Roger?

> > > You answer my question and I'll answer yours.

> > I've said nothing like that. I admit to having a web site and
> to having
> > a photo of me and the late Muddy Waters on it. Now what?
>
> Uh-Huh. Yeah, right, faggot.

You seem to believe that any two adult males who have a friendship or a business relationship are homosexuals. Do you have any males friends, Roger? Any female friends? Any friends of any of the several genders?

So, you visit my web site. You've seen a photo of me with Muddy Waters. Why is it a fetish for you? Are you a musician? Do you have a problem with black men? Do you have a problem with white men or do you simply dislike anyone who speaks out against your newsgroup-posted filth?

> > I see. You haven't had any such run-ins, but Roger has. What

>
> Uh-Huh. Nobody but you said it was during that period.

Why sure "somebody" said it. You said it. You claimed that N8NN and I sent "forged" tapes of you to the FCC, resulting in your getting a letter from the Commission. The fact that I was in Africa and Bert was in Germany just zooms over your pointed head.

> > The FCC was concerned enough to send you the letter based upon

...your much-posted retest letter...

"Readingf" indeed.

> there is no reason other
> than the FCC can at any time retest somebody under the VE
> system.

That the Commission can have a licensee retest at any time does not mean that the retest is done for no reason whatever, Roger.

> Looks like you are puting 2 + 2 and coming up with 5

(I reinserted the portion you snipped as "blather" since it was in
direct response to what I've done for amateur radio, a question you
asked a number of times. Now that I've responded, I'm quite curious to
learn what you, aside from posting filth in a number of amateur radio
newsgroup, participating in malicious QRMing on 20m and being retested
by the FCC, have done for amateur radio.)

> > You see, Roger is never heard

Denial that you're a liar? Hardly. Where's the information from any
FOIA request which states what you claim?

> > I understood what you wrote. It isn't even close to being
> true.
>
> Uh-huh. Sure it wasn't true.

Yep. Uh-huh. It wasn't true.

> > You seem confused. I wrote nothing homoerotic about Roger
> Wiseman or
> > anyone else. I simply responded to the lies you wrote, Roger-
> Not-Roger.
>
> Yet you still keep tabs on his amateur radio qso's and so forth.

What amateur radio QSOs? I've just written that you/him are never heard
on any of the local repeaters or FM simplex channels. I've never heard
you check into a net, involved in a casual ragchew on 2m, 70cm or any of
the HF bands. I'm on the air a lot.

> You claim every anonymous poster is him. Sounds like obsession
> to me.

> > You write frequently about homosexual acts and incestuous sex acts > > with children
and that is supposed to make me a homosexual? There are > > some flaws in your thinking
processes. Then again, that has been > > obvious for quite some time.

> Yep, you are a sniveling whining c--t. And had in the past
> unfavorable contact with law enforcement.

Gee, Roger, that'd would have made it tough for me to obtain a security
clearance and to pass the frequent DS background updates. It looks like
your claim is vapor.

> > We're you

It's so easy: I made a mistake. You should try it sometime.

Let's put that snipped material back in. I asked:

"Weren't you the fellow you used the "N" word? Aren't you the fellow
you
uses the word "Jew" as a weapon?"

Care to provide a truthful response?

You indicated a fixation on incestuous homosexual activity but you
seemed to become nervous when you snipped the following:

"Are you writing a book or an article about me? If I was an altar boy,
would that make me the victim of molestation? Would it make my father
the perpetrator? What is your interest in the topic? Have you had such
an experience? Are you looking for one?"

"You brought up the topic. You asked me to "Tell" about something which never took place. It isn't the first time you've shown such an interest. What is the basis for your interest?"

Have you had time to formulate some answers? Would you like to share them with us?

What makes it difficult for you to relate to other human beings on the planet?

Don't you ever feel silly playing Len's game after his numerous posts in which he inevitably claims that he is here only to engage in civil debate over the removal of morse code testing, accuses others of engaging in personal attacks and denigration and then proceeds to do that of which he accuses others?

Tachyon were orginally discovered in the 1960 by some japanese guy
who's name I can't remember. There are a number of physics who are
working to create takyons particles. But I think your missing the
point, just because we can't product takyons now don't mean we can't in
30 or even 50 years.

The "cover up" is Todd Daugherty trying to pass himself off as an educated or enlightened scholar.

What he is is a post-pubescent comic book reader who is still hoping for E.T. to drop some M&M peanuts in his back yard and show him the way to his spaceship.

Sheeeeesh.

It's in this thread chain, Brian. Help yourself.

> > You try to redirect, and I refuse to allow you. No problem.
>
> Big problem(s). You lied. You lied four times. You lied about your
> inuendo...(SNIP)

There was no "innuendo". There was YOU trying to make something
out of something else said.

> (UNSNIP)...you lied when you characterized the anon e-mailer as and
> "attacker,"...(SNIP)

I didn't say he made an attack, Brian. I said he made a threat to
forward my other comments to the family of the young lady whose picture
we were discussing. The word "attack" was the other correspondants,
not mine.

> (UNSNIP)...you lied about all of it not being a problem for anyone
> except your anonymous "attacker," and then you lied about Len's
> involvement in this thread.

I didn't say Lennie was involved in the thread. Re-read what was
written originally, Brian!

Seems you and the anonymous lying coward have the same reading and
comprehension deficits, Brian.

> I wonder how many lies you'll tell tomorrow?

None...So far, you've not shown where I lied at all, Brian.

> > > > > You would have to matter for that to happen,and you just
don't
> > > > matter.
> > > >
> > > > Obviously not true, since responding to posts I make

There being none, there is none to honor.

> I quite
> > readily acknowledge that I am quite ready to stand toe-to-toe with
> > those who are obviously lying, misrepresenting Amateur Radio, or
> > inisist on acting foolishly in public.
>
> Toe to toe?

Yep.

> Welp, you got called on your inuendo, you got called on
characterizing
> the anon e-mailer as an "attacker," you got called on your lying, and
> now the mirror is being help up for you to see yourself as the liar
> that you are.

I didn't make any innuendo. You injected your own opinion.

I didn't call the e mailer an "attacker".

Here are all of my comments from March 31st, the date of my
original post. For brevity, I have snipped everyone else's comments,
however you can easily cross-check the other thread to see that I have
not "edited" my own words, even for typos:

QUOTE:

Hello Everyone,

In the thread about " Selling 52 Simplex Radios", the following
comments were made by Mike Coslo, "Rabbi Phil" and myself:

QUOTE:
Michael Coslo wrote:
> Rabbi Phil wrote:
>> K4YZ wrote:

(SNIPPAGE HERE)

Hey Mike...It's not THAT far fetched...Burghardt in NY has had that

young lady in the tight fitting sweater for years...Musta beem selling
SOMEthing!

UNQUOTE:

So...later this morning I received a private e-mail from one of
RRAP'S regular posters.

I have snipped the person's name, call sign and e mail headers
since the letter was sent in private e-mail. However the e-mail made
some very damning comments and a not-so-subtle threat.

QUOTE:

In rrap Steve Robeson wrote:

> Burghardt in NY has had that
> young lady in the tight fitting sweater
> for years...Musta beem selling SOMEthing!
> 73
> Steve, K4YZ

Burghardt Amateur Center is not in NY. It's a family business which was established by Stan Burghardt, W0IT (SK) 68 years ago in a small South Dakota town.

A few years ago one of Stan's long-time employees, Jim Smith W0MJY, purchased the business from Stan and became the second owner. It remains a family owned business, and the lady you mention is Jim's daughter, Michele, KC0MYV, a wholesome midwesterner who is very active in running the "business side" of the store. Often she is pictured standing alongside her dad in their QST ads, never in my knowledge in a

provocative sweater.

The sleazy nudge-nudge insinuation in your "Musta beem seeling SOMEthing!" comment is one of the lowest forms of attack I've ever seen

on rrap. I'll expect to see a sincere unconditional apology on rrap by

the end of today, or I'll consider forwarding your trashy comments to Michele and Jim.

UNQUOTE

Here's my response to this "letter", made in a very public forum so

that the correspondant can't make any other assinine insinuations or out-of-context editorializing:

(1) I stand corrected on the South Dakota -vs- New York. My bust.

(2) I am sure the young lady is very good at what she does, and is every bit the "wholesome" person you report. I NEVER said anything to the contrary. You are welcome to cite the part of the post wherein I said differently, but you and I both know it's not there.

(3) The young lady's character and wholesomeness notwithstanding,

THEY obviously had NO PROBLEM in posing her in a tight sweater, profile, in order to attract some male attention to thier ads. "Rabbi Phil" commented about someone else "selling radios" with pictures of pretty women. I pointed out that another Amateur dealer had been doing

the same thing, and obviously it worked. Pictures of pretty women sell

everything from soft drinks to firearms to high speed automobiles. Amateur Radio is no different. No problem.

Now, Dear Anonymous Writer (anonymous HERE...since you and I both know who you are)...You can go RIGHT AHEAD and forward ANYthing you

like to ANY one you like. Tell them about "how trashy" the item was,
if you want, but it IS archived right ehre in Google.

You took offense...Too bad for you. You know as well as I do that

people can "take offense" at the most innocent of comments
all-the-while letting morbid profanity and bold threats roll off thier
backs. This is one of those moments.

Have a nice day.

Steve, K4YZ

UNQUOTE

OK, Brain...YOU show US wherein I called the anonymous
correspondant an "attacker".

Matter of fact, go back to the original thread and go through any
of the posts I made and find one where I called the correspondant an
"attacker".

> > Thankfully that sub-group of ner-do-wells is fairly narrow.
> You.
> > Lennie. Todd. Mark Morgan. The fairly few number of anonymous
> > cowards who haven't got the guts or strength of conviction to stand
> > behind thier already lame game.
>
> "Thier" lame game?
>
> Look, you're the one playing off-duty COP on rrap.

What "cop"...?!?! The only thing I have "arrested" is the
promulgation of further lies, mistruths and assinine assertions by you,
Lennie and Todd. So far, while not 100% effective, it's worked.

> You've shot off
> your mouth once too often and someone is now trying to get back at
you
> with vile comments about your daughter.

They are vile and speak to the character of the "author". He'll
get his eventually.

And you never acknowledge my thanks to you.

> You shot off your mouth again
> about a young woman in an amateur radio advertisement, and some
> anonymous rrapper called you on it.

There was no "shooting" off of anyone's mouth. There was a
comment about how effective the presence of a pretty woman in an
Amateur Radio advertisment helps to sell Amateur Radio equipment.

Unless you know something I don't know about it, "sex" is a
multi-billion dollar selling tool. I can't drive the few minutes to
work without passing a half dozen biilborads that have beautiful women
and handsome men hawking some goods on it...

> You stand alone. No one supports your latest gaffe.

So far, Mike Coslo made a statement that very celarly said that
the statement could be read as such. He was correct.

And so far, neither you, any of the anonymous lying cowards, the
original correspondant or Lennie have disproven otherwise.

> > > > >You simply have an emotional defect and you cannot help
> yourself.
> > > >
> > > > What emotional defect, Brian?
> > >
> > > The one you exhibit daily on rrap.
> >
> > You've not yet defined or identified any "emotional defect",
> > Brian. That comes from a lack of understanding of the words you're
> > using and from a lack of training/education in any healthcare
related
> > discipline from which to draw the requisite knowledge from.
> >
> > Try again.
>
> Nope. I don't have to be a psychiatrist to recognize a nutcase.

But it would help. So far you've made countless accusations of
mental defect, but have yet to prove a one.

On the OTHER hand, YOU have made COUNTLESS assertions and
misrepresentations that you can't or won't substantiate, your LATEST
being the one that ARES can't/won't respond to any "major" emergency
due to alleged age, infirmity or previous obligations of the members.

Someone here HAS some issues to deal with Brian...But it's not me.

Now...THIS post asks you to explain several of YOUR "gaffes", and
provides SPECIFIC quotes that DISPROVE your silly allegations.

So how are you going to climb out from under THIS one, Brian?
Disappear for another couple weeks and hope we forget about YOUR lying?

Steve, K4YZ

You keep saying I've told these lies, yet you've not shown where
I've lied.

> One lie on top of another just so that you don't have to accept
> responsibility for shooting off your mouth about a YL in an amateur
> advertisement. I can only wonder what new lie you'll tell tomorrow
to
> CYA.

"CYA"...Very appropriate.

YOU made your own "innuendo" that Phil, K2ASP was somehow being
obligated to pull "two shifts" during an exercise due to a lack of
Amateur volunteers, an assertion you've been asked repeatedly this past
week to substantiate.

I proved with some simple elementary school math that there were
plenty of opportunities to pull "two shifts" in the 96 hour period that
TOPOFF-3 will run.

Your "response" was the above drivvel and dodge. A "non-answer"
answer.

Try again, Brian...

No Steve, but it does show what an asshole you really are. BTW, this part here I didn't really understand "promote wanton (warrent) violation of federal regulations and to make threats against other citizens." First off I am not "promoting warrent violations of federal law, (i'm running a Legal Information bulletin) and as for threats all I've said is to go for it, and be prepared for any legal action. But you can be happy now your whinning like a little bitch to my service provider has ONLY force me to remove that picture, and proven what a total asshole you really are!

The term >>IS<< "wanton", Todd.

And yes you are. Your BLOG comments about shoving razor blades
into our rectums IS a threat. And you have repeatedly stated that you
have operated a radio and TV station in contravention of federal law,
ergo you are condoning violation of federal law.

> (i'm running a Legal Information bulletin) and as for threats all
> I've said is to go for it, and be prepared for any legal action.

After being presented with YOUR profanities, misrepresentations,
deceit and misues of your ISP, just WHAT do you think your lawyer would
recommend to you, Todd?

> But
> you can be happy now your whinning like a little bitch to my service

And I think you'd better ask a lawyer about where the line is
drawn, Todd.

"Abuse", as defined in current case law, need not be what you said
or how you said it, but in the perceived message of the recipient of
the alleged abuse.

> > Would you be any less likely to react if I pasted your face on the

Yes, Todd...the item WAS directed at me...I am a participant in
this forum and I am a licensed Amateur Radio Operator, ergo it WAS
directed at me.

Only the lame and the cowardly would try to claim otherwise.

So which are you?

I didn't forget anything, there are more sites that put tachyons in a
class with witchcraft and the occult or the supernatural!

As far as a first draft, lets help you a little, remember as I said that
I'm uneducated.

"I've deiced to write out some of my old idea" should read
decided deiced is something done to aircraft wings.
Also if these are some of your ideas then they are ideas not an idea.

"The reason behind this revamping of some of my old idea and theories is
due to a group of people in are societies who have little or no
intelligent, these people are called Amateur Radio operators."

If this is a first draft, how can this be a revamping of your old idea?
Or should that be ideas as in more then 1 idea?

"are societies"
Did you possibly mean OUR society?

"little or no intelligent"
Again, do you mean intelligence?

"these people are called Amateur Radio operators"
Are you not one of these yourself?

This is just a start Todd, non of these are inventions, they are ideas
or dreams and the page just shows you lack of intelligence or as you
would say " lack of intelligent"

I see your ISP is yet another group that won't let you pratice free
speech. I can't beleive that you backed down so fast and took that
picture off of the page, what happened to your right to free speech?
Why did't you tell Robert Koester off? Cuss him out!

Well Todd, better luck on you second draft!

You need to re-edit the entire site. You make idiotic assertions,
poorly veiled threats, and generally make a complete and total fool of
yourself.

There's more of that recently minted college education at work.

"physicists"

"produce"

"tachyon"

Only God can create "particles". Man can create compounds, and
even break other compounds back down to their basic particles.

And in 30 to 50 years from now they will be using your posts as what NOT to do in public speaking and writing...if they can stop laughing long enough.

Steve, K4YZ

Or should that read "Our you knot one of these yourself?"

I know I make many typos and mistakes, but not on a web site that tells everybody how intelligent I am! Or as you would say "how intelligence I'm"

Google has archived your posts, Nazi.
You do have filth posted.

> I don't see Roger Wiseman everywhere. I see Roger Wiseman in
several
> newsgroups, including this one.

But as usual, you are talking out of your ample ass. You see
Roger Wiseman everywhere. Too bad I'm still not Roger Wiseman.

> Since you see fit to give Steve a rough
> time over spelling, I'll have to ask you what "lonliness" is.

What is "cold read"???? (see below)

> Well now, it writes like Wiseman. It knows things only
Wiseman could
> know. It seems to have a familiarity with this area. Must be
Wiseman.

You really are mentally impaired, aren't you, Nazi?

> If you aren't Wiseman, how would you know? If you intend to
play
> "I'm-not-me", you should at least have the sense to clam up on
things
> which Roger would know but which you wouldn't.

Mainly, I can read this newsgroup and see for myself. Tell us
how you got all those "plum" assignments in the backwater
countries.

> It must be a difficult concept for you but I live where I
choose. I

> bought the place in which I live because it is where I wanted
to be.
> If I'd wanted to live in an RF trap, I'd live in Cameron or
Glen Dale.

Yeah, right, Cashew boy. Tell it to Nursie, he might be dumb
enough to believe you.

> >But you still have a Cameron maling address, don't you?
>
> Thinking of sending me a belated birthday card?

No, another year older and you are even more stupid then ever.
You still have a Cameron mailing address, dont' you. It's on
your FCC license which is easily looked up, isn't it?

> Sure I do, Roger-Not-Roger. You're up Glen Dale Creek without
a paddle.
> You're in an RF suck hole, surrounded by hills.

I am? Well, at least you are consistent in being wrong.

> I seek? I didn't ask you to write of sexual deviance. You
came up with
> it all by yourself. If someone write "FCC retest", you come
up with
> something about fathers having sex with their sons or
daughters.

Sounds like you are well familiar with it, judging from your
previous posts.

Nice sentence.... "If someone write "FCC retest" .... Don't you
mean "If someone "wrote" FCC retest" ??????

> What? You CAN see the rest of West Virginia from your house
along the
> creek?

Since my house isn't along a creek, nor is it close to West
Virginia, your statement makes you look even more foolish.

> I get it, Roger-Not-Roger. ;-) If you *were* Roger Wiseman,
you'd have
> received such a warning letter.

Finally a glimmer of hope. But you quickly disappoint.

> I get it, Un-Roger.

Doubtful.

> If you were Roger Wiseman, it'd be the amateur
> radio license that he has but which you don't have. ;-)

Finally, you got something through your granite like skull. But
as always, you'll manage to screw it up.

> > No, you are the internet poster boy for supression of free
> > speech, you fat Nazi fuck.
>
> Free speech meaning any bilious, foul phrase which enters your
head?

Yes, and Nazi fucks like you don't like it, do you, you've tried
to be the "moderator" for this group for some time now.

> What is "definately"?

What is "cold read"? (see below)

> I didn't ask if you cold read.

"cold" read? Are you auditioning for a play? You "couldn't" mean
"could", "could" you?

> They certainly "sent" me. I bid on the job. Do you have
issues with
> that?

Sure you did.

> Actually, it doesn't. You don't know the first thing about my
> qualifications. It does speak to my job assignments though.
It *was*
> one of my job assignments.

Uh-Huh. Yeah, right. They don't sent the "best and the
brightest" to such backwater holes.

> I know enough to know that you wrote of my plum jobs with only
an
> opening quote and no closed quote.

I know you asked if I "cold read" above.

> > This message was sent via two or more anonymous remailing
services.
>
> In correct English, the above sentence means that you're
hiding.

Only in your narrow little pea brain.

Dave Heil, aspiring actor, yet English impaired said
In article <425179BB.84722748@earthlink.net>:
"I didn't ask if you cold read."

And you have to be a complete jackass to think everybody is
Roger Wiseman.

> What? I guess you really told me, Un-Roger.

Yes, you must revel in looking foolish.

> No, I'm just typing, sharp guy.

No, you are talking out of your ass, dullard.

> Of Roger?

Yep. You seem to have an obsession on him.

> You seem to

You seem to have all kinds of excuses. Not surprising.

> That doesn't answer the question I posed to you, Un-Roger.

If Roger Wiseman lives in such an RF "hole" as you claim, how could he have "interfered" with anybody, dumbass?

> Why sure "somebody" said it.

Yes, YOU did, you malodorous twat.

> "Readingf" indeed.

Ha..."I didn't ask if you cold read," indeed.

> That the Commission can have a licensee retest at any time does not mean
> that the retest is done for no reason whatever, Roger.

Then why doesn't Wiseman's "retest" letter state a reason?

> I haven't been "puting" at all.

No, you've been backpedaling.

> Remember that you've acquiesced.

Remember, you are talking out of your ass.

> You may do that if you like.

Why would I? Wiseman's "retest" letter has been posted to Google before. It has no reason stated in the letter for the retest. It must not be much of a "punishment", since he passed it and got the Extra class license.

> (I (More unsubastantiated blather)

Well, Dimmy, better luck on "your" next attempt.

That's right, I do maintain that. One can't keep tabs on what isn't
there.

> > Any of the information I posted is easily substantiated.

> So you ARE stalking him.

Then I'm stalking Madonna, Senator Byrd and David Letterman too. They
aren't heard on the ham bands here either.

> With the thousands of frequencies
> available in the ham bands, wouldn't you think it would be
> possible not to hear him?

A local station not heard one time in a five year period? That'd be
highly unlikely. That'd be while I operate all HF bands from home and
in the car. That'd be while scanning all area 2m and 70cm FM repeaters.
You've not been heard a single time. But I know you *listen* to 2m as
you've posted material here which would be unknown to anyone except
someone overhearing a conversation on 2m FM locally.

> > Gee, Roger,
>
> There you go thinking everybody is Roger, again.

Everyone? Nope.

> > that'd would have made it tough for me to obtain a security

> looks like
> > your claim is vapor.
>
> More unsubstantiated bullshit.

Easily substantiated, Roger. No one may be hired without a security background investigation. No one may retain his clearance without a periodic update to that background investigation.

> > Have you had time to formulate some answers? Would you like

Have you?

> > What makes it difficult for you to relate to other human
> beings on the
> > planet?
>
> You aren't classified as a "human being".

In all of the Google archives of your postings, please produce just a single one which reveals you to be other than what I've stated.

Anyone can do a search on "KC8JBO", "AB8MQ" or "Roger Wiseman" and come up with hundreds and hundreds which prove my statement.

Stick a pin in my QRZ address and draw a fifty mile radius of it.
Then look in a phone book for all the cites within that circle.
(Hint...You can exclude AL and GA since I don't have any out-of-state
nursing licenses at present)

> aren't so little, given your waist size.

Nope. Simple typo. "r" and "t" are side-by-side on the keyboard.
If that's the BEST you can do for a "gotya", thyen you're even lamer
than I gave you credit for!

> > And it's "receeding", since you're so insistant about

>
> Not at all, Nursie. Now go do what you do best, empty a bedpan.
>
> > You're still alive, aren't you?
>
> More than you, Nursie.

Lying in public behind an anonymous screen name is "living"...?!?!

Hardly.

You're a lying anonymous coward. The only thing that makes you
THINK you are more "alive" than anyone is that you think you are
somehow in "control" since your immeidate screen name and identity are
anonymous.

Since you are able to keep that bit of information from public is
your ONLY "control" over your life. You're a loser with no where to go
and nothing to show for what you claim is your life.

Sucks to be you.

Steve, K4YZ

Yet, you continue to talk out of your ass.

Now that is original, Roger...

What is your fixation of Roger?

...and what is YOUR fixation with Lloyd? Huh?

Oh, so you are saying you are obsessed with him, you keep tabs
on him?

...as in posting Lloyd's home address, work address, phone numbers, and
other personal information???

Obviously, you are in denial about it.

...just as you are in denial about being Roger.

Yet you still keep tabs on his amateur radio qso's and so forth.
You claim every anonymous poster is him. Sounds like obsession
to me.

...just as YOU claim every anonmyous poster is Lloyd? Sounds like obsession
to me.

Yep, you were a molested altar boy.

...it makes you wish YOU were an altar boy, doesn't it Roger?

You said
"The reason behind this revamping of some of my old idea and theories is due to a group of people in are societies who have little or no intelligent, these people are called Amateur Radio operators. (It is no wonder television and movies and poked fun at these people). Amateurs are nothing more, then licensed CB radio operators."

I'll ask you again, are you not an amateur radio operator? If you are, then you are nothing more, then a licensed CB radio operator. If you are, then you made this statement about yourself, "a group of people in are societies who have little or no intelligent, these people are called Amateur Radio operators"

Does this sentence make sense?
"(It is no wonder television and movies and poked fun at these people)"
What television? What movies? Are these true statements?

You're an Amateur Radio operator also, Todd...And from what I've
seen so far, YOU don't have any more idea about science, "theoritical"
or otherwise!

> All things are possible, but more things are probably

Are "probably" what, Todd? You didn't finish the sentence. Or
did you mean "...but more things are probable"...?!?!

All things are NOT possible. For example, it's "possible" that
you could construct a proper sentence, but it's obvious that you can't.

It's "probable" that you are a developmentally delayed adult with
severe disassociative issues, but I'm not eye-to-eye with you to make a
first-hand assessment. The evidence here certainly lends itself to
that conclusion, however.

Levy your "attack" on Phil. Phil said it was two days, and that he
would be working both days.

> Brian...You CAN pull more than two shifts under ONE of those

You've already been provided with specific quotes that disprove
your assertion that I refered to the e-mailer as an "attacker", Brian.

So why do you persist in lying about it?

You also asked me to "prove" that I have had "opposite end" or
disagreements in this forum with others. I did so, but I see you're
weaseling your way around it.

Are these traits you teach your kids? Is snivvelling, lying and
deceit things you teach them to do at home?

But that's where YOU are travelling, Brian.

And you're right...I "can't grasp the concept of ignoring idiotic drivvel"....Because you keep loading us up with more and I keep trying to get you to substantiate your claims.

But you keep making more of them, and I get to keep making fun of them. It's so eeeeeeeeesay to do.

Was that the end of your statement, Todd? No period again.

Well...if making fun of your idiotic "ideas", your idiotic
statements and your idiotic plans makes me an "###hole" I guess I am
one. However that would ALSO have to INCLUDE you since you ARE a
licensed operator and you DO continue to post in this forum.

BTW, Todd...at least the "###hole" performs an important function
in life. We have yet to see you perform one.

There was no attack. Either on you, nor especially on Phil.

YOU, however, were the one making the comments about how many
shifts he was pulling-vs-qualified operators to do it.

> > Brian...You CAN pull more than two shifts under ONE of those

I don't engage in heroics, Brian. By the book...safe and
responsible. That's how I got through my tour in the USMC with my tail
intact, that's how I have spent 30+ years in CAP without injury, and
that's how I practice Nursing.

Now...about your assertion that ARES can't/won't respond to
emergencies...Are you going to provide some validation of that
statement?

Sorry Steve, anyone with more than half their brain tied behind their
back would see your inuendo. How's Jim?

> > (UNSNIP)...you lied when you characterized the anon e-mailer as and
> > "attacker,"...(SNIP)
>
> I didn't say he made an attack, Brian.

You characterized him/her as an "attacker."

I'm curious how you define an "attacker?"

Perhaps an attacker is a person who makes attacks???

Seven hostile attacks???

I said he made a threat to
> forward my other comments to the family of the young lady whose
picture
> we were discussing. The word "attack" was the other correspondants,
> not mine.

So you define as a threat someone who passes your comment on to the person you made the comments about?

You're pretty weak in the knees on this one.

> > (UNSNIP)...you lied about all of it not being a problem for anyone
> > except your anonymous "attacker," and then you lied about Len's

> is every bit the "wholesome" person you report. I NEVER said
anything
> to the contrary. You are welcome to cite the part of the post
wherein
> I said differently, but you and I both know it's not there.

That's what makes it inuendo. If you had meant that she was actually selling radios rather than "SOMEthing" else in a tight sweater, you would have typed a five letter word (radio) without capitalization rather than a 9-letter codeword implying "SOMEthing" else in that tight sweater.

> (3) The young lady's character and wholesomeness
notwithstanding,

"character and wholesomeness notwithstanding???"

Is there any question about her character and wholesomeness???"

Your an idiot.

> THEY obviously had NO PROBLEM in posing her in a tight sweater,
> profile, in order to attract some male attention to thier ads.
"Rabbi

We're focusing on your problems here. Don't try the old dodge, plymouth, and chrysler routine.

> Someone here HAS some issues to deal with Brian...But it's not me.

Of course you don't. You're unable to take that very first step because you're in denial.

> Now...THIS post asks you to explain several of YOUR "gaffes", and
> provides SPECIFIC quotes that DISPROVE your silly allegations.

Oh, geez, some old man having to pull two shifts and complaining that he has to pull two shifts?

Hang me high because a tired old man complains about two shifts!

> So how are you going to climb out from under THIS one, Brian?
> Disappear for another couple weeks and hope we forget about YOUR lying?
>
> Steve, K4YZ

Me climb out??? Hi, hi!

This must be the place where you would type, "BWHA ha ha ha ha ha ha.....
.....!"

You made the inuendo, you made another four lies to cover it, and today you produce yet another lie -as- predicted. Too bad for you.

Todd's "political capital" was having had lunch in the same
restaurant as the mayor of Taylorsville once upon a time....Probably
waved to him across the room, got a acknowledging "nod" and now thinks
he's got "juice" with City Hall.

Obviously not, however...

Len isn't involved!!!

Len is not engaged in K4YZs attack on the YL in South Dakota (or New
York or wherever she may happen to be). Len is not engaged in K4YZs

attack on the supposed anon e-mailer. Len is not involved in my comments to, and my opinions about Steve.

Now don't you feel silly backing up K4YZ on his latest gaffe, just so you can comment on someone who isn't involved???

Go monitor the cluster or something that you have some very small amount of expertise in.

How much more uninformed could a "person" be? Len has been saying this
for years.

> Up until recently this forum been solely about the "Morse Code
Test
> Debate"...Or so he's claimed...

He's said its been about bad celestial calculations and seven
completely undocumentated hostile actions.

It's supposed to be about Morse Code.

So which Peter Jennings are you talking about?

Obviously, the news anchor is in the news with cancer.

Are you saying the other Peter Jennings is also in the news with
a health problem?

Because while the Canadian callsign is to a "Peter Jennings" that
US callsign is not. And using the name and callsign, finds a webpage
that includes a reference to "Microchess" which was written by Peter
Jennings.

I doubt the guy on tv is the guy who wrote software.

There is no "fact" of parallel universes, theories maybe but no facts. Even if it were so, what happens in another parallelo universe is of no consequence in this universe and vice-versa. There may be zillions of parallel universes but we can only know of the universe we are in. So again, if time travel were possible in our universe, someone from the future would have traveled back in time to tell us about it.

As far as knowledge, I probably have more knowledge of science in my little finger than you will ever have. You being an amateur radio operator I guess you fit your own description of amateur radio operators.

And by the way toddyboy, I took my ham exam when it was a real exam which would scare you to death, not just an exercise in memorization such as when you took yours.

They certainly are two different guys. VE3SUN/AB6WM/C31LJ was born in 1950,
and the TV anchorman was born in 1938.

Maybe it runs in the family and they both have lung cancer?

73,

M.A.N.

What inuendo, and which Jim? There's at least four that post in
here on a semi-regular basis.
Also, I kow at least two "Jim's" at work and a couple each in CAP and
the local Amateur Radio club.

> > > (UNSNIP)...you lied when you characterized the anon e-mailer as
and

> You characterized him/her as an "attacker."

Ahhhhhhhhhhhh...Now I CHARACTERIZED them as an "attacker"....Nice
way to try and get around yet
another comprehension/attetnion gaffe, eh, Brian?

> I'm curious how you define an "attacker?"

Why? The issue here is not what >>I<< consider an
"attacker"...It's about you substantiating
claims you've made.

> Perhaps an attacker is a person who makes attacks???
>
> Seven hostile attacks???

I guess you were trying to say something there, Brian...but it got
lost in the silliness.

> I said he made a threat to

>
> So how is Jim?

Which Jim? Why should I know? What does "Jim" have to do with
your refusal to substantiate an
obvioulsy flawed assertion?

> > > I wonder how many lies you'll tell tomorrow?

Your opinion. YOU editorialized on my comments. The context you
took it in was not what was
stated or intended.

> > You injected your own opinion.
>
> Opinions are not allowed, Oh Master Gunny?

I wasn't a Master Gunny...And sure, opinon is allowed...as long as
you remember what is opinion and
what is fact. And the FACTS are that my comments were neitehr stated
with the intent or objective that
you and the respondant were implying.

> > I didn't call the e mailer an "attacker".
>
> You repeated it often enough.

I didn't repeat ANYthing, Brian.

I have YET to call the other party an "attcaker".

Everyone reading this KNOWS that YOU are lying, Brian...Becasue
they can go back and read the thread and
see that you are yourself lying.

Register more hits on what? I am not selling anything. And if
you're refering to me about the flight
suit, it's not tight. Matter of fact, it's a bit too baggy.

My daughter doesn't need your help, Brian. But it WAS me that
uttered the gratuity. Guess that it was
too much to expect you to acknowledge it.

Yep. YOUR statement was that I "stand alone".

You were AGAIN proven wrong.

Sucks to be you.

> > And so far, neither you, any of the anonymous lying cowards,
the
> > original correspondant or Lennie have disproven otherwise.
>
> I know the difference between a "radio" and "SOMEthing in a tight

There's nothing to deny other than it's great fun rubbing your
nose in your own mistruths and aborted efforts
to redirect attention away from your other on-going efforts to "dodge"
the questions posed to you
vis-a-vis ARES and it's supposed inability to respond to emergencies.

today
> you produce yet another lie -as- predicted. Too bad for you.

You claim I've lied five times.

You've not provided a single one of them.

Now...what were they?

Steve, K4YZ

Who wrote what was attributed to him?

> Len is not engaged in K4YZs attack on the YL in South Dakota (or New
> York or wherever she may happen to be).

Attack? I've seen no attack by Steve on any YL.

> Len is not engaged in K4YZs
> attack on the supposed anon e-mailer.

He isn't?

> Len is not involved in my
> comments to, and my opinions about Steve.

You're right. You're involved in Len's comments about Steve. You know that what Len is doing is not part of any civil debate over the morse code issue. You know that Len's comments are personal attacks and denigration of Steve--the kind he likes to squawk about in others.

> Now don't you feel silly backing up K4YZ on his latest gaffe, just so
> you can comment on someone who isn't involved???

You become more strange with each newsgroup post.

hyperdimensional photons are nonexistent, so nobody discovered them!
If they do exist, how would you protect yourself from them? Would the
use of an AFDB device protect us from them? If you're interested todd
you can obtain one from this very reputable source.
http://zapatopi.net/afdb.html

I really suggest Mr. CB Operator that you put down your high power
microphone and go to some REAL physics sites and read more on tackyons.
If you like I will be happy to give you websites where scientist are do
research in the field of producing Tackyons. Or perhaps you would
rather stay here and give your boyfriends (DAVE and STEVE) knob jobs,
which in my humble opinion that what your only real good at.

If I have the wrong call, then I was wrong and I stand corrected.
However his name/call was on a list of "celebrities" who were also
licensed Amateurs. I crossed the calls since each call refers to the
other.

If they are not one-in-the same, my apologies to THIS "Peter
Jennings".

And why couldn't the news anchor Peter Jennings have not been the
author of the program you cite? He's obviously a very well educated
person. I bet he walks and chews gum very easily!

Yep...and in this case, we'd be speaking of both of you--if you'll think about it. <GRIN> The only true idiots I've had exchanges with on this newsgroup are probably true idiots in life also. That would be the idiots that can't have disagreements and remain fairly human in the process.

By the way, I am shocked that I happened to click on this post among those that I scrolled this morning. Heck, this "newsgroup" has gone to shit. Literally. What the Hell are you, Steve, and you, Brian, even doing engaging these freaks? Do you notice that no one else (well, unless they are posting under other IDs) of the usual gang is even posting? Where's everyone gone? OH, and Brian, I didn't even realize "bb" is you. Is that you, really?

Anyway...yes, Steve and Brian both, we have had disagreements. The part about being a real human being is recognizing that it takes all kinds, that all have something constructive to offer, and that if we all agreed with each other it'd be a damned boring world.

Then, there are the freaks....My favorite worst freak has a name that reminds me of bread..as in roll. LOL

<GRIN>

Give the board a rest and let these freaks get outta here...

Well gayboy, I'm using a keyboard and not a microphone, and I've never
owned a cb radio. Why are you so hung up on badmouthing cb anyway?
> If you like I will be happy to give you websites where scientist are do
> research in the field of producing Tackyons.

Producing tackyons? First you say they "were orginally discovered in the
1960 by some japanese guy who's name I can't remember". If so many
scientist are producing them, why is this japanese guy's name not known?
Then you say "just because we can't product takyons now don't mean we
can't in 30 or even 50 years."
I thought we can't "product" them? How are so many scientist in the
field producing them as you say?

> Or perhaps you would rather stay here and give your boyfriends (DAVE and STEVE)knob jobs,
> which in my humble opinion that what your only real good at.
OH ? You have an opinion? Look in the mirror gay boy, you look like the
type to give knob jobs and have "boyfriends", and you know what they say
about opinions, "Opinions are just like a--holes, everybody has one,
but, yours is full of crap and stinks".
Gay boy, you don't know what the word humble means!

Todd, you never answered the question!
Are you also not an amateur radio operator todd? Why do you belittle hams?

****.

It's th usual, Kim...The entrance of Todd Daugherty and his
following of anonymous lying cowards is the worst of it...They usually
get weary after being slapped around with truth, however. They can't
stand being bested.

> Literally. What the Hell are you, Steve, and you, Brian, even doing
> engaging these freaks? Do you notice that no one else (well, unless
they

> are posting under other IDs) of the usual gang is even posting?
Where's
> everyone gone? OH, and Brian, I didn't even realize "bb" is you. Is
that
> you, really?

Yes...that's Brian. He went gutless and won't sign his name to his
posts. He tried to "disguise" who he was for a while, but just like
Lennie before him, he slipped up one day and "signed" one of his "bb"
posts...Got caught lying and STILL won't own up to it.

> Anyway...yes, Steve and Brian both, we have had disagreements. The
part

Oh, C'mon now, Kim...You two had a "thing"...!!!! =0

> <GRIN>
>
> Give the board a rest and let these freaks get outta here...

Good idea. Besides, I've been nipping at Brian's heels to own up
to his OTHER assertions, but the little coward won't answer questions
vis-a-vis his OWN assertions.

Sure is a terrible way for a Veteran to be remembered....Skulking
behind (not so) anonymous screen names and not having the intestinal
fortitude to back up his own rhetoric.

> can't in 30 or even 50 years."

That's because he can't remember which comic book he read it in,
Jim....Personally, I think he got it from "Star Trek: The Next
Generation"...You know...When Geordi creates the tachyon field in which
to see the cloaked Romulun War Bird by re-routing the Main Deflector
Dish throught the Phaser Bank Array...?!?!

> I thought we can't "product" them? How are so many scientist in the
> field producing them as you say?

I'm still amazed at the fact that Mr. Wizard insists that
scientists can produce "particles". Guess he was asleep in high school
physics.

I know...that shirt he's wearing on the QRZ picture has "cheap and easy" written al;l over it...And that mop on his head...Can you say "bad hair day"...?!?!

> and you know what they say
> about opinions, "Opinions are just like a--holes, everybody has one,
> but, yours is full of crap and stinks".

And like I told him, Jim...I might be the ###hole he accuses me of being, but at least an ###hole has an important function in life...I am still trying to figure his out...Unless it's to be used as a milestone by which to gauge "idiotic" or "assinine".

> Gay boy, you don't know what the word humble means!

I doubt he could spell it, even after having seen it here.

> Todd, you never answered the question! Are you also not an amateur radio operator todd?

Unfortunately...

> Why do you belittle hams?

Because despite being licensed himself, most OTHER Amateurs have an IQ and English comprehension skills well in excess of his. And since he insists on acting a fool in Amateur Radio forums, it's mostly Hams who get to point out his errors to him.

And they are not few in number!

Todd is Steve's new sparring buddy. I made an early post to Todd that
his language wouldn't earn him any points here, and then left him
alone. Per usual, Steve cannot NOT reply to him.

> > Literally. What the Hell are you, Steve, and you, Brian, even
doing

bb is me. I don't engage them, and Steve is as low as I go. I'm still
trying to find some redeeming quality in him, but he's one marine
that's got his head buried in the sand or "SOMEthing." Hi!

> Yes...that's Brian. He went gutless and won't sign his name to

Billy Beeper is bb, in case Steve can't make the connection. The spam
in my regular e-mail account has dropped to almost nothing since using
this throwaway account. Of course, Steve sees something nefarious in
my doing this, yet I have never denied who I am.

> > Anyway...yes, Steve and Brian both, we have had disagreements. The

Yeh, Steve, good idea. You've single-handedly found them a new home on rrap. Thanks.

Besides, I've been nipping at Brian's heels to own up
> to his OTHER assertions, but the little coward won't answer questions
> vis-a-vis his OWN assertions.

Steve set a record for new lies this past week. He questioned a YLs honor, and then lied about. Then he lied about who objected to it. Then he lied about lying about it.

Meanwhile he's been shooting his mouth off to some of the rra.misc freaks. I'm suprised none have taken his advice to put bricks through windows, slash tires, or terrorize wives. After all, Steve says that's been know to happen when a person shoots off their mouth. Right now they're just making vile comments about Steve's family.

Kim, nice hearing from you.

bb

Not nearly. Our hospitals "play" 8-hour shifts per exercise day,
which works out just nicely. From prior exercises, we find that 4
hours on and four hours off is a no-sweat deal. A lot of it is
sitting around waiting for something to happen. SAC it ain't.

Our portion, we were told last week, was split off into a two-day
state-wide exercise in June. This area doesn't get to play the full
game until TOPOFF-4 which is a couple of years down the road. Maybe
by that time "they" will have ironed out the kinks that this year's
exercise revealed.

No problem - we still get plenty of mini-callouts to deal with, such
as the AMTRAK derailment last Sunday. Our ER didn't know how many
cases would be diverted to us (fortunately the number was zero) so
we were all on standby for two hours.

Your behavio[u]r here indicates otherwise.

> Now...about your assertion that ARES can't/won't respond to
> emergencies...Are you going to provide some validation of that
> statement?
>
> Steve, K4YZ

ARES will respond to emergencies as they are able, just like cell
phones may or may not work in an emergency.

OK, below is the information that Phil provided.

> > It's a two-day exercise, and I can make it both days.

> > >I would guess that you have to pull two shifts because there are
not
> > >enough amateur volunteers.

> > Actually, we have six operators qualified for that location, and
we
> > work in teams of three (county voice net, inter-hospital voice
net,
> > county-wide packet net) so we'll have plenty of operators.

> Now c'mon Phil. I used to write duty schedules, so I know how many
> times two teams of three fit into a calendar day. Is this a two-day
> ORI?

You inform me that it is a four day exercise, or 96 hours. Assuming
12-hour shifts, that is 8 time slots.

Phil and 5 other volunteers are participating, and each "team" is
comprised of three volunteers. That makes two teams. Team A, and Team
B.

Let's put Phil on Team A, and Phil is pulling two shifts.

Day 1, Team A: Day
Team B: Night

Day 2, Team A: Day
Team B: Night

Day 3, Team A: Day (no Phil, team is short handed)
Team B: Night

Day 4, Team A: Day (no Phil, team is short handed)
Team B: Night

Remember, the conditions are that there are only six (6) qualified operators, so there is a deficit of volunteers unless they are pulling some 24 hour shifts. We don't know how few or many shifts the other volunteers will pull.

Sorry, Steve, but thems the numbers. And I would guess that Phil's group is quite active.

Quite true. However, Robeson is in the constant
aggravated antagonistic mode and therefore makes
up lies about what other people have written.

This newsgroup was originally opened to take the morse
code test discussion/argument out of rec.radio.amateur.misc
to revlieve the crowding there. According to Paul's
often-stated welcome message text, it is concerned with
all topics of amateur radio POLICY.

Unfortunately, that's not the de facto situation with
message topics...which have ranged widely from the
(usual) bragging and self-glorification of individuals
to U.S. national politics and political figures to
choo-choo trains and other items in-between.

>> Finally get tired of getting your head bashed in over and over

In order to bandage himself, he has to look into a
mirror. That's difficult if he can't see his

reflection. :-)

>> > LenAnderson@ieee.org
>>
>> Putz.
>
>Penis envy or just penis inuendo and infatuation?

It's just ENVY on Robeson's part because he's never been IN electronics engineering in any way (a short-term job as a purchasing agent doesn't qualify for electronics engineering). He never got into military communications handling despite having that vaunted amateur radio license before first joining. He never got to be any kind of military pilot despite having a private pilot's ticket before joining. [we still don't know the When and Where of those claimed "seven hostile actions"...]

He bitterly resents ANYONE talking against him, as witness this latest barrage of antagonistic postings against others. He holds a terrible grudge on others from a long time ago (Heil suffers from the same malady) and doesn't mind venting in here, courtesy be damned (on his part).

Not being Jewish or even claimed closeness with any Yiddisher, he picks up what he thinks is a cutesy "cuss word" (putz) and tries to use it as a semi-perjorative. So few know the meaning of that Yiddish expression (including himself), that he thinks he can get away with it.

What is curious is that Robeson cries/whines/bitches about "civility" and use of "nasty" words, yet uses them himself and is most uncivil in his remarks. See the "complaint" he alleges he made to Google about Todd (who has received far too many nastygrams for a non-amateur-policy subject).

Robeson "shoots from the lip" about other things far too often. The old "MARS >>IS<< ham radio" subject was (perhaps) the prime one. Now we have the total confusion between "Peter Jennings" the ABC TV news anchor and another of the same name who is an amateur radio licensee...all couched in some sort of emotional "message of support" for a cancer victim.

Robeson often (far too often) DEMANDS "cites" for someone stating anything against him which was patently obvious to other readers of this newsgroup. He fakes "outrage" that others would do such a thing to HIM! :-) On the

other hand, as the compleat hypocrite, he tells rather bad, unreferencible LIES about others. Not a problem to Robeson, but a problem to others since they don't care that much about Robeson's "outrage." That "outrage" is NOT a part of amateur radio policy and, as a result, has helped (greatly) to turn this newsgroup into a petty internecine personalily warfare blog.

There's NO real impetus for anyone to discuss amateur radio policy in here...EXCEPT that everything should be concerned with an absolute adherence to the Status Quo. Anyone expressing any other viewpoint is ganged-up on, shouted down, and denigrated...for the simple reason of disagreeing with the cherished Status Quo. Ergo, there's no possible room in here to discuss issues. There's no hope of discussing any pros or cons of the morse code test since the Status Quo maintains an absolute "necessity" to forever keep the code test. All the Status Quists took that test, therefore all others MUST do so. :-)

Oh, but don't be so quick to dismiss this as the work of Christian Kooks.
Right here on rec.radio.amateur.policy we have N9OGL inventing the very
transmitters that the ELF God is using. He makes incredible claims for
transmitting these hidden messages by compressing voice signals into digital
signals and transmitting them on ELF. Scary stuff!

Here's a sample of his "work"

> From N9OGL

> Tuesday, March 22, 2005

I never said I was going to "shut your site down", Todd.

I said I will get your offending comments and threats off of it.

Again, you seem to think that thinkgs happen over night. It may take a few weeks, even a few months, but eventually you'll cooperate or go bankrupt paying lawyers fees.

> BTW ###HOLE, I not gay, but maybe you are.

But YOU are the one ALWAYS making reference to the anus, Todd. You certainly demonstrate a preference for it. You may indeed not be gay (laughing at myself wondering what kind of woman would get into bed with you, though...), but you certainly have a fetish for it.

And like any choice in life...it was just that. You, on the
otherhand, seem to think that "electronic engineering" was the do-all
and end-all of life. Maybe for YOU, but many of us found more things
to do in our lives.

Furthermore, there's no evidence, empirical or otherwise, that you
were ever of any impact on "electronics engineering" yourself. You've
been asked repeatedly to show us SOME project that came to fruition
under your supervision, but so far all we've been treated to is your
litany of jobs and a few long-forgotten articles in a long-defunct
magazine. Never once has any of THOSE "papers" been cited as part and
parcel of any other project.

Your name does not appear on ANY "professional" papers as author
or co-author that I've been able to find. You've been asked to provide
them. You haven't.

> He never got into military
> communications handling despite having that vaunted
> amateur radio license before first joining.

Wrong.

> He never
> got to be any kind of military pilot despite having
> a private pilot's ticket before joining.

I'm curious as to how having an PPSEL ticket (48 hours in a Cessna
150 at that point) had to do with being a military aviator, Lennie.

You've made that statement before and I've asked you before as to
what it "means". Still no answer.

> [we still
> don't know the When and Where of those claimed "seven
> hostile actions"...]

Only because I know it chaps your hide that you can't swish your
swagger stick around demanding to know and not get what you want.

> He bitterly resents ANYONE talking against him, as
> witness this latest barrage of antagonistic postings
> against others. He holds a terrible grudge on others
> from a long time ago (Heil suffers from the same
> malady) and doesn't mind venting in here, courtesy
> be damned (on his part).

There's no "grudge", Lennie.

You lie, you deceive and you misrepresent Amateur Radio. It takes
precious little effort to undermine your efforts to do so, so I do.

Make's ya mad, but that's YOUR issue to deal with!

> Not being Jewish or even claimed closeness with any
> Yiddisher, he picks up what he thinks is a cutesy
> "cuss word" (putz) and tries to use it as a semi-
> perjorative. So few know the meaning of that Yiddish
> expression (including himself), that he thinks he can
> get away with it.

It's not about "getting away" with anything, Lennie.

You really ARE a putz. It really is THAT simple.

Big snip of usual Lennesque diversion to...

> There's NO real impetus for anyone to discuss amateur
> radio policy in here...EXCEPT that everything should be
> concerned with an absolute adherence to the Status Quo.

Nope. No "absolute adherence to status quo".

Again, you make misrepresentations that anyone who cares to
research from this forum will know is not true.

MOST of the lack of "impetus" is the presence of foul mouth idiots
like Todd, his anonymous lying friends, and persons such as yourself

who are NOT licensed Amateurs and who DON'T have any experience from
which to make informed opinions yet insist they have some greater
knowing of what Amateur Radio is and how it should "run".

> LenAnderson@ieee.org
>
> retired (from regular hours) electronic engineer person

And prime time putz.

comment?

Because there was no "crappy little comment", Brian.

> "Always at a deficit for information, aren't you, Brian?"

That's not "crappy", Brian...It's the truth. That YOU don't LIKE
it is one thing...

> If I cannot trust the information that the participant provides, then
> what can I trust?

Yeah...I guess when RRAP is the ONLY place you get your
"information" from, then you're pretty much at loggerheads as to what
you "know"...

> > YOU, however, were the one making the comments about how many
> > shifts he was pulling-vs-qualified operators to do it.
>

> amateur community, as I said.

I didn't say it was a reflection on Phil, Brian.

It's about your own insinuations of why it was "necessary" for
Phil to pull more than one "shift" on this exercise.

> > > > Brian...You CAN pull more than two shifts under ONE of
those

> > Sorry, Steve, but thems the numbers. And I would guess that Phil's
> > group is quite active.

And you have made the assumption that they are working 12 hour
shifts. Your re-arrangement still does not substantiate your other
claims.

And Phil states they "work in teams of three".

He does not state that all three are "on duty" at all times. I've
never been on ANY mission or exercise, USMC, CAP, Red Cross, ARES, etc,
where ALL operators were "on duty" at one time.

Sorry, Brian...Your contentions are still grasping for straws.

Nice try, though.

No...I claim that your assertion that ARES is "dependent" on aging men who can't/won't respond due to age/infirmity or are over obligated is misleading and untrue.

I've asked you SEVERAL TIMES now to show me JUST ONE example of some situation where ARES was asked to respond to a situation but couldn't due to any of the criteria YOU cited.

YOU claimed that "unlicensed devices play a major role" in "emergency comms". I've asked your to substantiate THAT claim with some sort of valid reference, but you;ve balked at that one, too.

You claim, I ask you to validate the claim. You refuse. No facts = invalid claim.

It really is THAT simple.

spam
> in my regular e-mail account has dropped to almost nothing since
using
> this throwaway account. Of course, Steve sees something nefarious in
> my doing this, yet I have never denied who I am.

And it was pointed out to him that he could sign his real name and
call to the bottom of posts and not risk "spam".

I not only use my real e-mail address, but sign my real name and
real callsign to my posts and don't see 10 pieces of spam make it
through my filters in a week. Never have.

Brian just doesn't want his name associated with his idiotic
assertions and blatant lying.

Too late.

> > Oh, C'mon now, Kim...You two had a "thing"...!!!! =0

What Techs have been "chased away"?

Who chased them away, if they were? Perhaps you simply meant
"chased away by poor propagation"? I doubt it, but let's hear your
rationale for this claim.

What motive would any operator have for "chas(ing) away" any other
operator where the more opertors you work the more awards you can
amass?

But what happens is that people in wanting to legitimize the hobby,
seek out famous people who happen to have ham licenses. But they
sometimes don't check enough, assuming that someone with the same
name must be the same person. I've seen this before, though I
can't think of examples at the moment.

When I saw your first post, my reaction was "I didn't know he
was a ham" and knowing that this happens, I did check.

I see you made a typo. His call is AB6WM (not AB6MW in the subject header) and that is indeed allocated to a "Peter R. Jennings" according to QRZ, while the Radio Amateur's of Canada website show that VE3SUN belongs to Peter Ralph Jennings.

But under the QRZ entry, there is a link to his website (which I found earlier with a websearch) http://www.benlo.com and it clearly isn't the same Peter Jennings.

> If they are not one-in-the same, my apologies to THIS "Peter
> Jennings".
>
> And why couldn't the news anchor Peter Jennings have not been the
> author of the program you cite? He's obviously a very well educated
> person. I bet he walks and chews gum very easily!
>
Because the one with a ham license was relatively known in small computer circles in the late seventies. You'd read about him, and no mention of him being a tv anchor. I think he wrote some articles for the hobby computer magazines, and I think he appeared at early small computer conventions. Not only would he have been noticed if he was the news guy, but I don't think his schedule would fit going to such conventions and such.

He had a company to sell Micro-chess (which originally ran on the KIM-1 in its 1K of memory), but after a while it was merged with Personal Software. Sometime after that, they started selling Visicalc.

Finally, doing some more websearching turns up this page http://users.tellurian.com/gjurrens/famous_hams_rumors.html that is about mistakes like this, and mentions that Peter Jennings the ham is not the tv anchor.

I had seen it in two different references. Obviously both were
wrong, and I have acknowledged that I made the error not checking
further myself.

> I see you made a typo. His call is AB6WM (not AB6MW in the subject

> computer circles in the late seventies. You'd read about him, and
> no mention of him being a tv anchor.

I have to own up to having never been interested in "computers" in
the 70's. Most of my "experience" with them were home version of
"Pong" and basic file storage systems. I never had much use for one.

> I think he wrote some articles
> for the hobby computer magazines, and I think he appeared at early
> small computer conventions. Not only would he have been noticed
> if he was the news guy, but I don't think his schedule would fit
> going to such conventions and such.

Again, I've not "followed" either one, so other than occassionally
catching the TV version on the evening news, I really knew nothing of

either.

I will have to state, however, that the TV Jennings IS from Canada, and hence my reason for so readily accepting the previous "report" of his being VE3SUN.

> He had a company to sell Micro-chess (which originally ran on the KIM-1

You're quite correct.

However I still offer my deepest and heartfelt wishes for Mr. Jennings (of ABC) Godspeed in his treatment.

Source record: 105347

Todd,

As I wrote my last response to you in another thread, it came to me that if your "blog" and any of it's spin off's were removed or censored, it really would depreciate life in general.

You see, there has to be a "lowest common denominator" from which we can base the rest of which we call society, and Son, you're just about the lowest anyone having human DNA can be and still be called human. I'd only put the Hitlers, Kevorkians, Dahmers and Bundys any farther down than you.

So you go right on ahead with your profanities, your "inventions" and your violations of federal acts. It will catch up to you sooner or later, and in that moment, you will know that I am going to be laughing at you at every turn!

Good luck, Todd! You're going to need it!

Steve, K4YZ

BTW: I'm preparing some letters of my own! Stay tuned!

But according to the "website" of Todd's "Langley Park
Telecommunications group, they WERE allocated a frequency and build

permit in 2001!!!

QUOTE:

107.9 FM

COMMUNITY RADIO PROVIDING PROGRAMMING AND FREE PUBLIC ACCESS TO THE AIRWAVES

LATEST NEWS Langley Park Telecommunications is one of the 255 applicants approved by the F.C.C.

UNQUOTE:

I even went to the FCC and found this:

QUOTE:

BNPL-20000828ACC NEW TAYLORVILLE, IL
LANGLEY PARK TELECOMMUNUICATIONS
REQ: 107.9 MHz Channel No. 300

UNQUOTE:

So it would appear that Todd and company (most likely just Todd...I don't beleive there's any "company" involved) screwed the pooch AFTER getting an "OK" from the feds FOR their operation!

Of course Todd's earlier expressions of disdain for FCC regulations might have had something to do with their decision to reconsider granting him a license:

QUOTE:

> from alt.radio pirate, May 1999
>
> Well mark I tell you what, I applied twice for a licnese and both
> time it was returned so your right SCREW THEM!!! I'm going on the air

> without a License.
>
> Todd
> N9OGL

UNQUOTE

Of course it may have something to do with his frequent changing of his name. The Feds don't look favorably on name changes that aren't due to marriage or entrance to the Witness Protection Program.

Witness:

> from alt.tv.public-access, Jan. 2001

> ~Born a Pirate, Die a Pirate~

He's been "...in the public Access business longer then the
"microbroadcasting movement" I know how it works on public access and
my opinion that's whats going to happen to these low power stations,"

Well, obviously not true since he can't seem to file the
appropriate documentation with the FCC in a timely manner.

And again, represents himself with the false last name for a
television station that doesn't exist.

>

Just muddling throught the grammar on that one was an effort. But
basically my comment to Todd is that if you'd stop waving an "I'm
Intentionally Breaking the Law" flag, people, myself included, wouldn't
give you a hard time.

But you do (arguing that it's your "free speech" to do so) so just suck it up and suffer the consequences, Todd.

You're a law breaker. You've acknowledged it yourself. It really is THAT simple.

Well...Unfortunately that's how feebel minds work.

They think if they go around yelling "I'LL SUE! I'LL SUE!" that
they'll get their way without further adeiu.

If Todd thinks that any of his pontification or posturing
vis-a-vis his misconduct or illegal activities goes does anything more
than elicit a round of chuckles, he's sadly mistaken.

He's a marionette. A foul mouthed one, but a marionette none the
less.

For those who aren't sure they want to commit a machine (or even just a partition) to an unknown OS, but would like a "look see" at Linux, this is an excellent chance to have a peek outside of Windoze without risk of farkling your current system. He's included a surprising variety of very nice applications in the package.

The download is kinda long, but Harv will send you a CD if you ask nicely.

It's been a while since we've heard anything about the Bloated Broadcaster from Belgrade Lakes, so here is a little follow up concerning the Fat One.

Reliable sources tell us our chubby misfit was employed at an FM station in Augusta Maine - briefly - before he was fired! Yes, he was briefly employed as an engineer [believe it or not] until management realized they had made a Big, Fat, Greasy mistake.

The porky one was canned and at his unemployment compensation hearing, the lawyer made a remark about him that got tubby a little peeved. The 'Chronicle' can't say what the comment was, but sources indicate it was not that he is a "child molester," or that he's "chronically impotent," an "alcoholic," that he "dresses in women's undergarments," or anything related to numerous articles published about him in the Manchester Newsletter, but the comment was apparently related to his (poor?) job performance.

http://www.cleaves.org/pdf/05-48.pdf

Anyhow, to make a long and funny story a little shorter, the weight watchers life member took the comment as an insult, and sued for defamation! [How can you defame a flaming asshole? -Ed.] The Porcine Prince lost his case locally, so he appealed to the Supreme Court of Maine, where he -naturally- lost again. After all, he's a loser and that's what losers do. They lose!

But, his loss is our gain, because out of the loss comes a funny story that we can tell about him over and over again on the air and in the newsgroups! Watch this space for news of pending FCC action against his license. From everyone at MalPen Labs, 73 and good listening!

I've never made the assertion that you are, Todd. I just think you're as socially defective as our local filth monger.

Your fantasy claims about assisting a congressman, assisting a church group in problems with your cable company, about inventing anything and about being a broadcaster are the stuff of a fifteen-year-old's brain in the body of a man.

I can only shudder when I think of someone like you sending a public access cable program into peoples' homes.

Dave K8MN

So am I! Me, too! Hey, would you, I mean, I, stop it?

Cut it out, gang, it's getting crowded in here!

(No, wait, that's multiple personality!)

Re-arrangement??? The 12 hour shift scenario is a Best Case Scenario. If the shifts were 8 hours, the volunteer deficits would be even greater.

> And Phil states they "work in teams of three".
>
> He does not state that all three are "on duty" at all times.
I've

So you were in the "Day Weanie" Marine Corps? Weather and ATC are 24/7. So is Comms. But you, the mighty day weanie marine warrior know otherwise. Hi, hi!

OK, 8 hour shifts:

Let's put Phil on Team A, and Phil is pulling two shifts.

Day 1, Team A: Day
Team B: Swing
Team C: Mid (deficit of 3)

Day 2, Team A: Day
Team B: Swing
Team nothing: Mid (deficit of 3)

Day 3, Team A: Day (no Phil, deficit of 1)
Team B: Swing
Team C: Mid (deficit of 3)

Day 4, Team A: Day (no Phil, deficit of 1)
Team B: Swing
Team C: Mid (deficit of 3)

Steve, have it your way. It makes the situation worse.

> Sorry, Brian...Your contentions are still grasping for straws.
>
> Nice try, though.

Idiot. Would you like me to show you what 6 or 4 hour shifts look
like???

> Steve, K4YZ

Not true ASSHOLE, first there is a "comapny" mostly made up of amateur
radio operators. Second the Application was dismissed after congress
passed the Radio Broadcast Perservation Act of 2001. Before you go
spewing for LIES I would really suggest you get all the facts. You
don't know all the facts, you weren't there....so my opinion is fuck
off!

> Of course Todd's earlier expressions of disdain for FCC
regulations
> might have had something to do with their decision to reconsider
> granting him a license:
They NEVER DID ASSHOLE......BEFORE YOU OPEN YOUR BIG MOUTH WHY DO YOU

GET ALL THE FACTS. To tell you the truth I don't think the FCC wants
to open that can of worms.

Not from here. Especially if they have 6 people to cover a 48
hour period that they are participating...

And you STILL have not shown me ONE instance where ARES has failed
to respond to ANY incident when asked to do so.

> > My behaviour here has nothing to do with what happens in the

> greater.

"Best case" for whom? Best case ONLY to support YOUR contention of
a volunteer deficit >>IF<< and >>ONLY IF<< you assume that each
volunteer only participates once in an exercise.

> > And Phil states they "work in teams of three".
> >

> Team B: Swing

> Team C: Mid (deficit of 3)
>
> Steve, have it your way. It makes the situation worse.

No, it doesn't. You can still cover all operating periods with staff. I doubt you were ever a supervisor in the USAF, Brain, from your "all hands on duty now" contention.

> > Sorry, Brian...Your contentions are still grasping for straws.
> >
> > Nice try, though.
>
> Idiot. Would you like me to show you what 6 or 4 hour shifts look
> like???

Brian, six people for a 48 hour period is thin, but adequate. Sorry you don't agree, but then it appears you don't have the supervisory skills to make it work.

DICKHEAD, they never looked at my application or waiver, and if the FCC denies a waiver they have to show good cause why. Like I said go ahead and bitch to the FCC or who ever(which I really doubt you will) what your doing is opening a bad can of worms.....I would like to point out the FCC has know for YEARS that I was pirating......they won't tounch me because they will have to explain to the court of Appeals why for 20 to 30 years they have lied to the courts about waivers....and by GOD I will bring it up! SO GO RIGHT AHEAD GET YOUR NUTS OFF!!!

Well toady, it looks like you hang out there also.
1.You just said that you read the post there.
2.You posted your gay picture there!

To answer you loser quesion
Your question

Look at how's calling other people a loser!

>I only got into ham radio for the purpose of experimenting, and unlike
> your little bitch boyfriend,(who only talks on the radio to his little
> bitch(YOU) that's what the majority of my amatuer activites consist of

You stupid gay boy, how in the world do you know why I or anybody else
got into ham radio. Unlike you, I don't lie, I've already told you that
I've never talked to steve. So there you go again, you have these gay
fantasies, butts and ass's, you should seek professional help soon. You
have posted that you'd get on the liberty net but you had to hook up
your antenna, is that a hard job, or just more lies? Talking on the lib
net is experimenting? The only thing you can call bitch about me is that
if you got in my face and tried your gay stuff on me, I might think
about bitch slapping myself just to scare you, but that wont happen
cause you're a sissy fake gay liar! You are paththetic, I almost feel
sorry for you!
,
> experimenting. I am very seldom on the radio (although i've spent close
> to $10,000 or radio's since I began)

Well I get it now, you are better then me because you have more money to
spend on radio stuff? I don't have any radios at all. Oh wait, there
goes your story about me talking to Steve on the radio!

Toady, please seek help very soon, When I took Abnormal Psychology, I
like to call it Nutz & Sluts, there was a chapter about pathological
liars the capitalized inappropriately. You capitalize hole sentences
sometimes only words such as "YOU", but when you talk about yourself,
you don't use caps? Look above where you wrote "(although i've spent
close to $10,000 or radio's since I began) Shouldn't i've be I've?

i hope that answer the question

(I) (answers)

There it is again i should be I, and no it doesn't answer any questions at all, just that you have gay fantasies and are a border line psycho!

Nursie want a cracker?

> Very poignant, anonymous coward

Nursie want a cracker?

> Noi, it wouldn't

Showing off those Pulitzer prize spelling skills, Nursie, "no"?

> I am sure you wished it were true...then I might find
pictures of
> you there? Do they have "Gay Anonymous Cowards Revealed"
issues?

You must have first hand knowledge what they have, Nursie.

> Perhaps. But you're still an anonymous coward.

Nursie want a cracker?

> How is that?

That girdle you wear under your jumpsuit just isn't making it,
Nursie.

> Stick a pin in my QRZ address and draw a fifty mile
radius of it.

I'd rather do what I've been doing, Nursie, sticking a pin in
you online, you blowhard.

> Then look in a phone book for all the cites within that circle.

I know where you and your fat heiffer coworkers are, Nursie.

> (Hint...You can exclude AL and GA since I don't have any out-
of-state
> nursing licenses at present)

You probably couldn't get them with your performance record,
Nursie.

> You lack of ability to identify a single item of specific
detail
> is all the proof I need.

Your lack of ability to compose a decent response is all I need,
Nursie.

> Nope.

Yep.

> Nope. Simple typo. "r" and "t" are side-by-side on the
keyboard.
> If that's the BEST you can do for a "gotya", thyen you're
even lamer
> than I gave you credit for!

Nursie, it's always hilarious when you make excuses for yout
screwups "then" make another one while you do it.

> If you say so.

The dictionary says so, Nursie. Not that you'd know.

> And as I said, you are lying. You haven't got a clue as to
where I
> work.

Bleat, Nursie, bleat.

> Still a simple typing error.

But you still can't spell it, Nursie.

> That's still the "best" you can do...?!?!

It makes you get your panties in a twist every time, Nursie.

> Lying in public behind an anonymous screen name is
"living"...?!?!

Again, Nursie,you are too dense to understand.
Do you ever stop whining?

> Hardly.

We know.

> You're a lying anonymous coward. The only thing that
makes you
> THINK you are more "alive" than anyone is that you think you
are
> somehow in "control" since your immeidate screen name and
identity are
> anonymous.

You got mighty defensive, Nursie. "And what is "immeidate"????
Did you mean "immediate"????

> Since you are able to keep that bit of information from
public is
> your ONLY "control" over your life. You're a loser with no
where to go
> and nothing to show for what you claim is your life.

Says the moron who can't spell simple words.

> Sucks to be you.

No, Nursie, it sucks to be a whining illiterate blowhard like
you.

No talking to the liberty net is not experimenting, and yes I did hook up my antenna to talk to them, again I very seldom on the radio period. Secondly bitchwhore, you don't know me and you can not call me a fucking liar....the one lying here is crybaby K4YZ. SECONDLY, you horsefucker, why don't quit calling people gay and go back to what you were doing before you got here, downloading Kiddy Porn...because we ALL know you love them little kiddies.

You're losing it there gay boy! Calm down a little, please think about
seeking help as soon as you can! You say you don't lie but in your next
gay breath you say that I download kiddy porn? Is the word porn
capitalized in your circle of friends? Are you talking to me or K4YZ?
You seem to have Steve on your small mind, you make mention of him in
every post? I didn't call you a F****** liar, I called you a liar,
which I have proven in every gay post you make! Do you refer to the
voices in your head as we? You said " because we ALL know you love them
little kiddies. "
Who the heck is "we"
And there's that inappropriate capitalizing again!
I'm not calling people gay toad, I'm calling you gay, and there's
nothing wrong with that, as long as you keep it where it belongs and you
can discuss it in a health way!

>>>experimenting. I am very seldom on the radio (although i've spent

Now you've seemed to get off the gay remarks and into kiddy porn, toady,
please seek help before it's too late and you try to make your fantasies
real! All you ever do is make lying remarks of some perversion, is that
the best you can do? Is this all that's on your warped mind?
I'm glad that you can admit to posting on QRZ, it's just too bad that
you have to blame somebody else for making you do it, could this
somebody be the little voices in your little head?

> > could he have "interfered" with anybody, dumbass?
>
> I'll be happy to loan you a book on HF wave propagation. Just
drive on
> over...

Why would I ? I don't have a ham license, dumbass? Your outdated
information would be of no use to anybody. And I don't live in
West Virginia, so I can't "drive over".

And you didn't answer the question.

> Because it isn't necessary to do so, Un-Wiseman.

Then "interference" wasn't the reason for Wiseman's retest.
Even the letter which has been posted when it was first issued
didn't give a reason.

> Because it was your suggestion, that's why.

Wrong, doofus. How did you live so long and be so stupid?

> > Wiseman's "retest" letter has been posted to Google
> > before. It has no reason stated in the letter for the retest.
>
> And you are the only person who seems to believe that the FCC
retests
> licensees for no reason whatever.

You still didn't answer the question above.

And even in the Part 97 rules you are supposed to know, it says
the FCC can retest any VE administered ham licensee at any time.

> > See your statement above. You maintain he is never heard.
>
> That's right, I do maintain that. One can't keep tabs on what
isn't

> there.

But you are the one who says he isn't heard. You wouldn't know
that if you didn't keep tabs on him, stalker.

> Sure. It is.

Sure it is, sure it is, liar.

> Where's the statement?

Where's the answer to the above question?

> Then I'm stalking Madonna, Senator Byrd and David Letterman
too. They
> aren't heard on the ham bands here either.

But you specifically said Wiseman wasn't heard. Like you care
about whether he is or not. You must, you wouldn'thave posted it.

> A local station not heard one time in a five year period?
That'd be
> highly unlikely.

Yep, you are too stupid to find him on the air.

> That'd be while I operate all HF bands from home and
> in the car. That'd be while scanning all area 2m and 70cm FM
repeaters.

When I'm not in ham radio, why would I be heard in your area or
anywhere else, dumbass?

> You've not been heard a single time.
> But I know you *listen* to 2m as
> you've posted material here which would be unknown to anyone
except
> someone overhearing a conversation on 2m FM locally.

I did? I'm not even in ham radio, you fucking isiot. How would I
be able to hear you?

> > > Gee, Roger,
> >
> > There you go thinking everybody is Roger, again.
>
> Everyone? Nope.

Yep. Obsessed stalker.

> Easily substantiated, Roger.

There you go thinking everybody is Roger again.

> No one may be hired without a security
> background investigation. No one may retain his clearance

without a

Tried to browse on http://www.k1man.com.

Network Solutions splash screen told me:

"k1man.com
This domain name expired on 03/31/2005 and is pending renewal or deletion."

Do ya think N9OGL's hero needs a loan to rent his domain name?

73,

Barnabus Grumwitch Oberbyte

I think we should all chip in and help this great american out, In my humble opinion Mr. Baxter has done a lot for amateur radio, and with our help he can continue his work to give the amateur radio community REAL hardcore information, unlike that W1AW.

Toddy,

Why don't you just give up. There is nobody on this board, or any
other board for that matter, that wants to listen to your BS. Let's
face the facts Toddy boy, you are a two-bit loser that tried to get a
commercial radio license about 7 times and were rejected by the FCC.
You are a friggin moron with the IQ of a friggin 2 yr old trying to
convince people on your blog that you are a smart person. You are a
complete idiot that doesn't understand when you've been beat and when
you have lost. JUST GIVE IT UP AND GET THE F#@K OFF THE AIR AND OFF
THESE NEWSGROUPS!!!

Absolutely, Julio. Toddy ain't got no job so he can devote all of his time to such things as building an ELF transmitter. It operates from 1-30 hz, a frequency so low it probably sucks his cock for him. Round these parts we would call it a nigger boom box.

> Why would I ? I don't have a ham license, dumbass?

Then you'll not concern yourself with RF and radio interference,
Un-Wiseman.

> Your outdated
> information would be of no use to anybody.

> And I don't live in
> West Virginia, so I can't "drive over".

Oh shucks, I forgot. You're under deep cover and likely living in
Honolulu.

> And you didn't answer the question.

I told you: You don't get to play question and answer any more.
I've told you what I've done for amateur radio. It's your turn.

> > Because it isn't necessary to do so, Un-Wiseman.
>
> Then "interference" wasn't the reason for Wiseman's retest.
> Even the letter which has been posted when it was first issued
> didn't give a reason.

The FCC doesn't force licensees to retest for no reason. What do you think the reason might be?

> > > Wiseman's "retest" letter has been posted to Google
> > > before. It has no reason stated in the letter for the retest.
> >
> > And you are the only person who seems to believe that the FCC
> retests
> > licensees for no reason whatever.
>
> You still didn't answer the question above.

You don't get to play question and answer any more.

> And even in the Part 97 rules you are supposed to know, it says
> the FCC can retest any VE administered ham licensee at any time.

Duh. The Commission does not retest without reason. Roger Wiseman gave 'em a reason.

> > > See your statement above. You maintain he is never heard.
> >
> > That's right, I do maintain that. One can't keep tabs on what

> But you are the one who says he isn't heard.

Yes, I'm aware of that.

> You wouldn't know
> that if you didn't keep tabs on him, stalker.

You can't keep tabs on what is not there.

> > Where's the statement?
>
> Where's the answer to the above question?

You don't get to play question and answer any more. You asked a question about what I've done for amateur radio. I provided a full response. Your turn.

> > Then I'm stalking Madonna, Senator Byrd and David Letterman
> too. They
> > aren't heard on the ham bands here either.
>
> But you specifically said Wiseman wasn't heard.

I'm now specifically stating that Madonna, Senator Byrd and David Letterman have not been heard on the ham bands.

> Like you care about whether he is or not.

Oh, don't get me wrong. I care. I much prefer not to hear Roger Wiseman on the ham bands. I like it that way. He's deep under cover,

don't you know.

> You must, you wouldn'thave posted it.

That's right. There's no "The antenna here is a wounded octopus" or "I'm driving to see a friend in Stuebenville" (okay, it is a bit far-fetched to think that Wiseman has a friend), or "Yeah, Bill, I've spent my morning posting filth to various newsgroups". Zippo, nada, zilch, nuttin'.

> > A local station not heard one time in a five year period?
> That'd be
> > highly unlikely.
>
> Yep, you are too stupid to find him on the air.

You have to know better.

> > That'd be while I operate all HF bands from home and

Out of simple curiosity (and boredom) upon reading the N9OGL exchanges with others, I decided to take a look at one of N9OGL's blogs. Needless to say I couldn't get past his opening paragraph, quoted below. I didn't read the rest of the blog because I felt that if the rest of it was anything like the opening paragraph, it wasn't worth the effort.

"I've deiced to write out some of my old idea and explain in greater detail about some of the theories and concept behind it. The reason behind this revamping of some of my old idea and theories is due to a group of people in are societies who have little or no intelligent, these people are called Amateur Radio operators."

I laughed and then shook my head at the irony of it all. Here he is, stating that Hams have "little or no 'intelligent'." when this man so exemplifies the very lack of that for which he belittles others.

///
Note the beginning of the paragraph," I've 'deiced' to write.", then the misuse of plurals such as "some of my old idea" and "theories and concept".

Then this Roger Wiseman clone goes on to say, "people in 'are' societies", and repeats "little or no 'intelligent'".

(I'm sure the misspelling of 'decided' and 'our' were simply typos, hmmm?)

N9OGL is apparently using the same dictionary Roger Wiseman uses, and one finds oneself wondering how much inbreeding has been involved in their families.

The blog is a real hoot, some of the best comedy I've seen in Usenet in months.

3945. FCC Announces Lottery for Extra Class Licenses

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-09 04:30:08 UTC
From: "Mel A. Nomah" <Hightower@cosmos.net>
Message-ID: <kTI5e.3013$An2.2610@newsread2.news.pas.earthlink.net>
Source record: 105361
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Citing the success of the its licensing restructuring of May, 2000, the FCC has announced an impending shortage of the top-grade "Extra" licenses, and that only a limited number of these prestigious licenses remain available.

"The positive response to our restructuring caught us completely off guard, and the supply of these licenses is almost exhausted. Only 15,000 remain to be issued." said Riley Hollingsworth, a top insider on condition of anonymity.

"The only fair way to distribute these remaining licenses if via a lottery, so that all citizens have an equal opportunity for this coveted honor." he said.

Registration for this lottery will be via usenet newsgroup rec.radio.amateur.policy, with registration opening immediately and ending on June 1st 2005. Each registrant is required to send a message to any USENET newsgroup stating "I deserve to be an Extra because (_____)" filling the blank with 25 words or less. (Note: Any newsgroup can be used except alt.binaries.pictures.erotica.penguins and rec.radio.amateur.arrl-sucks)

On June 2nd the lottery will be held, based on the following fairness criteria:

--5,000 Extra licenses will be sent to those who register correctly, randomly drawn with a 15 point preference to residents of Belgrade Lakes, Maine.
--5,000 Extra licenses will be sent to those who register incorrectly, provided that they currently hold a Technician license and have not passed a Morse code test.
--5,000 Extra licenses will be sent to a random selection of persons who did not register at all, ensuring all citizens even those without an interest in ham radio can participate.

NO SKILL IS REQUIRED.
NO ACTION IS REQUIRED.
REGISTER NOW.
THERE IS A STRICT JUNE 1ST DEADLINE.
THE TIME TO START IS NOW!!

Poor mentally ill Lardass!

There are no Daleks under your command 'tard boy. They are fictional robots used in a television show! You need to get mental help again failure boy.

You have been a failure in everything you have ever done, PERIOD!

You are indeed "pale" you never venture forth outside except for your minimum wage "job," and to buy more of that pussy Bud Lite beer. A real man's beer would probably kill a big fat pussy like yourself.

You need to seriously take a long hard look at yourself in a properly lit mirror in that roach infested hovel you call home and then take action. Lose weight, get mental help, stay off the computer for hours on end and face reality. You are 31 years of age, you deliver pizzas, you play with dolls, you get drunk and spew your filth and delusions on here and usenet. Nobody, I repeat, nobody except for a couple of geeks like yourself can stand you. The best thing you could do is to slit your wrists while in that shitty vehicle of yours this summer, then if the police didn't find you right away, the Alabama summer heat would do it without you having to be cremated. You are a blathering asshole that is a boil in the crack of America's ass. You irritate us, end it now Porky, do it!

You need to either kill yourself or get help, that's it, do it!

And you are the one drooling over the idea of it, Nursie? I bet
you just love giving those enemas to your bedridden patients.

> You may indeed not be gay (laughing at myself wondering what
kind of woman would get into bed
> with you, though...), but you certainly have a fetish for it.

No, Nursie, you just bed down drug using ones who bear you
defective children who die.
But your inferior genes had a hand in it's demise, too.

Nice to see you are so obsessed with him you keep tabs on him,
Nazi.

> Then you'll not concern yourself with RF and radio
interference,
> Un-Wiseman.

I'll concern myself with anything I damn well please, Nazi. Oh,
and despite your claims to the contrary, I'm still not Roger
Wiseman.

> Oh shucks, I forgot. You're under deep cover and likely
living in
> Honolulu.

Must be that dementia of yours setting in. You should get help
for your mental illness, Nazi.

> > And you didn't answer the question.
>
> I told you: You don't get to play question and answer any
more.
> I've told you what I've done for amateur radio. It's your
turn.

You've still posted unsubstantiated bullshit and didn't answer
the question.

> The FCC doesn't force licensees to retest for no reason. What
do you
> think the reason might be?

Why don't you ask them? I can Google the retest letter and see
there is no reason given. Maybe you need glasses.

> You don't get to play question and answer any more.

Yet, here you are. Good puppy.

> Duh. The Commission does not retest without reason. Roger
Wiseman gave

> 'em a reason.

Did he? Then why isn't it mentioned in the retest letter?

Did you know you look like a complete jackass on here?

> Yes, I'm aware of that.

I'm sure you are.

> You can't keep tabs on what is not there.

But you are the one who made the statement that he isn't heard.
You must be the one who is obsessed with him you have to stalk
him. You are the one concerned with where he is.

> You don't get to play question and answer any more.

Oh, I get to play throw the stick and the Nazi fetches, though.

> You asked a question about what I've done for amateur radio.
I provided a full
> response. Your turn.

Ah, you still didn't answer the question asked if Wiseman lives
in such an RF "hole" how could he have interfered with anybody.

> I'm now specifically stating that Madonna, Senator Byrd and
David
> Letterman have not been heard on the ham bands.

But, I noticed you didn't answer the question.

> Oh, don't get me wrong. I care.

Yes, you seem obsessed.

> I much prefer not to hear Roger Wiseman on the ham bands. I
like it that way. He's deep under cover,
> don't you know.

How do you know he's not? Are you admitting you are stalking
him, Nazi?

> That's right.

Oh, so you ARE stalking him.

> There's no "The antenna here is a wounded octopus" or

His antenna is a DX-CC from all accounts. Looks like your
"information" is like you, flawed.

> "I'm driving to see a friend in Stuebenville" (okay, it is a
bit
> far-fetched to think that Wiseman has a friend),

You mean he has friends that aren't assholes like your friend Bertie or liars like your friend Nursie Steve.

> or "Yeah, Bill, I've spent my morning posting filth to various newsgroups".

You mean like your filth, hypocrite.

What is your I.Q., Nazi?

> Zippo, nada, zilch, nuttin'.

You've already admitted to stalking him.

> > Yep, you are too stupid to find him on the air.
>
> You have to know better.

You obviously don't.

> Yeah, I forgot--you're in deep cover, anonymous internet posts, unlisted
> amateur radio callsign. ;-)

I don't have a "callsign", Nazi. Boy, are you slow. You must've bribed the person who gave you your test.

> You're playing this I'm-not-me routine to the hilt, huh?

While you're playing the role of stupid jackass/asshole to the end. You should get an Oscar, except you really aren't playing, are you?

> Feel free to do any slight amount of research before making yourself
> look more foolish.

Feel free to go fuck yourself, liar.

> You must have forgotten again.

You must've forgotten the question you never answered.

> Yes, I maintain that I have not heard KC8JBO or AB8MQ in nearly five

Lardass, you still have that cocksucking lisp.

There are no Daleks under your command 'tard boy. They are fictional robots used in a television show! You need to get mental help again failure boy.

You have been a failure in everything you have ever done, PERIOD!

You are indeed "pale" you never venture forth outside except for your minimum wage "job," and to buy more of that pussy Bud Lite beer. A real man's beer would probably kill a big fat pussy like yourself.

You need to seriously take a long hard look at yourself in a properly lit mirror in that roach infested hovel you call home and then take action. Lose weight, get mental help, stay off the computer for hours on end and face reality. You are 31 years of age, you deliver pizzas, you play with dolls, you get drunk and spew your filth and delusions on here and usenet. Nobody, I repeat, nobody except for a couple of geeks like yourself can stand you. The best thing you could do is to slit your wrists while in that shitty vehicle of yours this summer, then if the police didn't find you right away, the Alabama summer heat would do it without you having to be cremated. You are a blathering asshole that is a boil in the crack of America's ass. You irritate us, end it now Porky, do it!

You need to either kill yourself or get help, that's it, do it!

I don't know which makes you look more assinine, Todd...

(1) The fact that you claim to be a pending college graduate yet
are functionally illiterate

or

(2) The fact that you try to blow it off on your iMac system!

Personally, I think you're just lying about it. (Actually, I KNOW
you're lying!) Even if the spellchecker DID flag errors for you, you
wouldn't know what the CORRECT spelling was to clear the error!

I think we should all chip in and help this great american out, In my
humble opinion Mr. Baxter has done a lot for amateur radio, and with
our help he can continue his work to give the amateur radio community
REAL hardcore information, unlike that W1AW.

TODD N9OGL

You just keep showing your ignorance, don't you Toad? All Baxter did was
plagerize ARRL and Newsline audio and put it out on his distorted Collins
junk. Except when was ''editorializing'' by slandering anyone that didn't
follow his "party line". Get a life Toad.

FIRST OFF DICKHEAD!!!! I applied for a license long before I went on the air without a license. Like I said before Steve you fucking asshole you don't know what happen and your best bet is shut your fucking pie hole.

>Then Todd, there's your answer. Don't blame one more thing on the
>FCC or any other agency or entity.
>Todd Daugherty is solely responsible for the failure of Todd
>Daugherty to get his LPFM license. Period.

Hey Dickhead, let me give some fucking background, because you don't know what the fuck your talking about and you can passs this on to your little sluts at the FCC. Back in the late 90's (around 1997-1998) I applied six times for a Low Power Television License for "a community that doesn't have a local television service" (Waiver at 2) each time I applied for for a license with a waiver the FCC would send them back without considering them. (see Part 1.3 of Communication Act of 1934)
"The provisions of this chapter may be suspended, revoked,
amended, or waived for good cause shown, in whole or in part, at any time by the Commission, subject to the provisions of the Administrative Procedure Act and the provisions of this chapter. Any provision of the rules may
be waived by the Commission on its own motion or on petition if good cause therefor is shown." (47CFR1.3)
The Court of Appeal has even gone farther stating the FCC "MUST consider waivers" (Wait Radio v. FCC (1969) See Turro v. FCC(1986) See Rio Grande Family Radio Fellowship, Inc. v. FCC (1968) See United States v. Storer Broadcasting Co.(1956) See Dunifer v.FCC (1998)
After applying six times for a license with a waiver I figured it was a waste of time and MONEY (unlike ham's who are handed a license)So I went on the air without a license. I stopped after a short period and applied for a low power radio license which we were one of 255 who applied. That was short lived after teh National Association of Broadcasters (NAB) pushed congress to pass the Radio Broadcast Preservation Act of 2001 and we lost are license because of it.
If this was ever to go to court I will argue that the FCC has lied all these years about the waiver process. The FCC would go to court against a pirate radio station and argue that all they had to do is apply for a license and ask for a waiver. But, when a person who never pirated does apply for a license with a waiver they dismiss it without

consider it. The second thing I would ask the court by not consider my waiver was it in the public interest. Because before we applied for a low power television license we went around the community and asked the people in the community if they would want a "Local TV" station and all agree they did, So Where the public interest at???? Perhaps your little Butt Buddies at the FCC can explain that to the courts.

BTW O'Dochartaigh is my surname you fucking Nazi Scumbag

I came here tonight wondering how far I would have to go in to the discussion before N9OGL popped up.

Well, only took me one thread. Right on top "blah blah N9OGL"

Can't we get past this, ignore all this troll bait and just have a productive Ham Radio discussion forum?

If not, 73!

Reamping of last post:

FIRST OFF DICKHEAD!!!! I applied for a license long before I went on
the air without a license. Like I said before Steve you fucking asshole

you don't know what happen and your best bet is shut your fucking pie
hole.
Hey Dickhead, let me give some fucking background, because you don't
know what the fuck your talking about and you can passs this on to your

little sluts at the FCC. Back in the late 90's (around 1997-1998) I
applied six times for a Low Power Television License for "a community
that doesn't have a local television service" (Waiver at 2) each time I

applied for for a license with a waiver the FCC would send them back
without considering them. (see Part 1.3 of Communication Act of 1934)

"The provisions of this chapter may be suspended, revoked,
amended, or waived for good cause shown, in whole or in part, at any
time by the Commission, subject to the provisions of the Administrative

Procedure Act and the provisions of this chapter. Any provision of the
rules may be waived by the Commission on its own motion or on petition
if good
cause therefor is shown." (47CFR1.3)
The Court of Appeal has even gone farther stating the FCC "MUST

consider waivers" (Wait Radio v. FCC (1969) See Turro v. FCC(1986) See
Rio Grande Family Radio Fellowship, Inc. v. FCC (1968) See United
States v. Storer Broadcasting Co.(1956) See Dunifer v.FCC (1998)
After applying six times for a license with a waiver I figured
it
was a waste of time and MONEY (unlike ham's who are handed a license)So

I went on the air without a license. I stopped after a short period and

applied for a low power radio license which we were one of 255 who
applied. That was short lived after the National Association of
Broadcasters (NAB) pushed congress to pass the Radio Broadcast
Preservation Act of 2001 and we lost are license because of it.
If this was ever to go to court I will argue that the FCC has
lied
all these years about the waiver process. The FCC would go to court
against a pirate radio station and argue that all they had to do is
apply for a license and ask for a waiver. But, when a person who never
pirated does apply for a license with a waiver they dismiss it without
consider it. The second thing I would ask the court by not consider my

waiver wasn't it in the public interest. Because before we applied for
a
low power television license we went around the community and asked the

people in the community if they would want a "Local TV" station and all

agree they did, So Where the public interest at???? Perhaps your little

Butt Buddies at the FCC can explain that to the courts.
BTW O'Dochartaigh is my surname you fucking Nazi Scumbag

You can quote the National Anthem, Todd, and it won't change the fact that YOU DO NOT QUALIFY TO BE AN FCC LICENSEE"...! ! ! !

> After applying six times for a license with a waiver I figured it
> was a waste of time and MONEY (unlike ham's who are handed a license)So
> I went on the air without a license.

Todd, the FCC doesn't care why you go on the air without a license.

If you operate a radio transmitter without an appropriate station license for any purpose other than summoning assistance in a life threatening emergency, you're BREAKING THE LAW.

It really is THAT simple.

There is NO EXCUSE (other than the aforementioned LIFE THREATENING emergency) for you to break ANY of those laws pertaining to the operating of a rdio station in the United States.

Period.

> I stopped after a short period and

Oh boo hoo. You didn't qualify to be a licensee any way.

> If this was ever to go to court I will argue that the FCC has lied
> all these years about the waiver process.

Todd, it's been four years now. You're not in court. The only reason YOU will be in court due to any FCC-related issue will be YOUR wanton violation of the Communications Act.

> The FCC would go to court
> against a pirate radio station and argue that all they had to do is
> apply for a license and ask for a waiver. But, when a person who never

Letting a foul mouthed, illiterate punk like you have a broadcast
station license is in the Public interest..?!?!

(Enter extremely long BWHAHAHAH here...I'll save bandwidth...)

> Because before we applied for a
> low power television license we went around the community and asked
the
> people in the community if they would want a "Local TV" station and
all
> agree they did, So Where the public interest at????

Then perhaps the community can retain a competent communications
lawyer to file an appropriate petition with the FCC to overcome their
unwillingness to let YOU have a station license.

And I say "competent communications lawyer" because letting YOU
handle "communications issues" is like letting Don Rickles handle
"sensitivity training" seminars.

> Perhaps your little
> Butt Buddies at the FCC can explain that to the courts.

What's to explain? You're not qualified to be a licensee. It
really is that simple.

> BTW O'Dochartaigh is my surname you ####ing Nazi scumbag.

No, it's not, Todd. It may have been an old family name, but it's
not now. At least not on legal documents that you have filed with the
FCC.

And my point, you illiterate idiot, is that in the OTHER post you
SPELLED IT WRONG!

BBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA

> That's ok you little perv, go back to downloading your kiddy porn.

He asked you to answer questions, Todd, and you call him a
"perv"...

Yet SO FAR, the ONLY person I've seen posting picture of women and "men" in lewd or indecent poses here is YOU.

(I put "men" in quotation marks since the person in the pic was you, and otehr than pubic hairs, we still have no evidence that you are an adult.)

Guess that "perv" claim didn't fall far from the tree, did it...?!?!

It will be interesting to watch you children. I wonder how long it will be before you grow up.

It is fun to watch you..

"He said"
"She said"
<snipped>

OGL said...

He said...

<snipped>

And your childish beat goes on and on and on.

OGL is not far removed from a petulant, pubescent child. He always HAS to get the last word in whether it makes sense or not.
And, Nurse. Why bother with the likes of him in the first place?

A wise person once told me that, "If you play with a skunk long enough, it won't be long before you smell like one, too."

Would it not be much easier to simply ignore OGL? I mean, the guy "ain't all there anyway", so why bother?

Dealing with OGL is akin to dealing with AB8MQ. Step around the turds and don't look back. That way you don't have to step in their shit and you can put their smelly comments behind.

ABOUT LANGLEY PARK TELECOMMUNICATIONS

LANGLEY PARK TELECOMMUNICATION IS A NON-PROFIT ORGINIZATION WHICH
PROMOTES THEATER, TELECOMMUNICATIONS, AND THE PREFORMING ARTS....(SNIP)

But obviously does not support basic reading, writing and grammar
skills...which leads one to ask how can someone enjoy the "preforming
arts" if they are illiterate?

LANGLEY PARK WAS ESTABLISHED IN 1999-2000 BY TODD DAUGHERTY N9OGL AND
JIM BEUSINGER N9FU ALONG WITH OTHER HAM OPERATORS.

Ahhhhhhhhh....Here it's "Daugherty"...

"I'VE ALWAYS WANTED TO ENTERTAIN PEOPLE" SAID TODD DAUGHERTY
CEO/PRESIDENT OF LANGLEY PARK.

Well, then, Toddy m'boy, You've succeeded!

"LANGLEY PARK WILL CREATE A PLACE WHERE IDEAS CAN ROAM FREE AND PEOPLE
CAN SHOW OFF THEIR TALENTS"

Hence this picture of you?
http://img61.exs.cx/img61/6216/steve5ye.jpg

Some talent.

Hi Rick. This forum long-since lost any pretense of being a truly viable forum for the discussion of valid issues.

It's solely for mudwrestling. Of course QRZ and eHam DO have open forums that are very productive and don't tend to tolerate the likes of some of our own ner-do-wells. That's where I go when I want to read/participate in anything remotely approaching a "productive Ham Radio discussion forum".

"C O M P A N Y", Todd. Just like I spelled it the first time.

And since you claim this group is made of of licensed Amateurs,
how about a roll call? Who are these other Amateurs? Names?
Callsigns?

By the way, Todd, if your "Langley Park Telecommunications" group
is a LEGAL "company" chartered in the state of Illinois, you are
obligated, when asked, to identify the principal officers of the
company.

Whellllp....You've been asked.

Personally...I bet it's just one more example of your illiterate
imagination.

Interesting first post to an Amateur Radio newsgroup...

> It is fun to watch you..

Glad that you are able to take something positive away from this.

> And, Nurse. Why bother with the likes of him in the first place?

Good question.

In both of my chosen professions, first the United States Marine Corps and now Nursing, I found that a lot of my colleagues fell prey to substance abuse. For many of these folks it was simply a matter of weakness of character...not being strong enough to stay away from the bottle or misappropriated narcotics to avoid the realities of life.

Every day I see people "my age" who are already "washed up", ready to give up the ghost at any moment because they never figured out how to deal with stress in a productive or expressive way.

Todd and his ilk provide a readily available and abundant way for me to unload those daily stresses. Todd's one of those people who ENJOYS being humiliated in public..He does it to himself.

Witness his own lack of self respect and humiliation: (Warning: Patently Offensive, but hey, it's Todd so what did you expect?):

http://img61.exs.cx/img61/6216/steve5ye.jpg

> A wise person once told me that, "If you play with a skunk long

> it won't be long before you smell like one, too."

I have a bar of soap.

> Would it not be much easier to simply ignore OGL? I mean, the guy
"ain't
> all there anyway", so why bother?

Because it's fun! He's a weakminded fool that enjoys being publically humiliated. I simply accomodate his needs in an efficient way that we can BOTH enjoy it!

> Dealing with OGL is akin to dealing with AB8MQ. Step around the turds

> and don't look back. That way you don't have to step in their #####
and
> you can put their smelly comments behind.

I understand where you're going withn this, and in SOME principle,
I agree...However it's been my experience that when you leave lying,
deceitful and mistruthful people to promulgate thier lies unfettered,
you tacitly give them your support and approval.

Todd is foulmouthed. He's admitted to violating numerous sections
of the Communications Act, and he purports to represent some cross
section of Amateur Radio operators in doing so.

That he apparently holds an Amateur Radio license is unfortunate.
I am sure that somewhere, underneath all that garbage, Todd means well,
but that still doesn't mean that the ends justifies the means.

I don't see it happening, Dee.

There's been numerous attemps to truly use this forum in a productive and meaningful way, but it always wind's up being pulled into yet another "elitist extras ruining ham radio becasue of morse code" rantfests.

Myself and a couple other posters, on varying occassions, have tried to discuss and promote the various spectrum protection initiatives, for example.

Every one that I started was immediately beset upon by you-know-who and his usual "the real issue is Morse Code testing...)rantings. The other two weren't any more successful.

And so far we (Amateur Radio in general) have gone through four or five evolutions of bills in Washington without success...Of course the argument AGAINST discussing them HERE is that, allegedly, everyone "supports" the idea...Well...Obviously not.

Most digital or technical issues wind up on TAPR or other sites, as do other specialized discussions. Witness Mike Coslo's opening of the subject of high altitude balloons and telemetery.

My other "try to be serious" issues have dealt with redefining the WRITTEN tests and their objectives, since "dumbing down" seems to be an area of contention. Well, no one wants to discuss doing anything other than making fewer tests and making them easier...as if having the verbatim questions and answers isn't already easy enough. If we finally get it down to fifty cents and two cereal box tops, someone will want it to be one box top....

No...I don't think THIS particular forum will ever produce a single viable discussion with any palpable results. Without the infrastructure of a guided discussion, nothing productive is possible.

More silliness from Todd's "Blog"...

QUOTE:

THE FUTURE OF AMATEUR RADIO

Usual grammatical guagmire snipped to...:

When someone comes up with an idea for a new system for amateur radio
they are laugh at other amateur's who poke fun at their idea. So the
real question isn't What's in the future for amateur radio but, do we
really need amateur radio?

Let's look at the purpose of the amateur radio service and see if
amateur radio is really needed.

UNQUOTE

No one laughs at other amateurs who poke fun at your ideas, Todd.

(You really didn't stop and think about that snetence, did you?)

I find it to be a bit egotistical on Todd's part to suggest the
impending doom of Amateur Radio just because persons more level headed
than he have been ripping his point-to-point "data system" apart.

Amateur Radio is not meant to be the "leading edge" of technology.
It provides the resources for individual experimenters to "do their
thing" for personal edification. If they can turn that work into some
viable, useful technology, so-much-the better.

And Todd, your "system" would bog us down with a system three
develpmental generations old. That's "advancement"...???

Amateur Radio in it's present form meets and exceeds the mandates
of the Basis and Purpose of Part 97 and then some.

Todd's sole premise for any "demise" of Amateur Radio is due
solely and exclusively due to his insistance that his poorly
conceptualized and presented "ideas" have been unfairly laid bare by
persons who also happen to be licensed Amateur Radio operators.

Sorry, Todd. They ARE dumb ideas. But keep trying...And get rid
of the iMac that allegedly doesn't allow you to use a spellchecker, OK?

More insanity from N9OGL:

1. Introduction

I've decided to write out some of my old idea and explain in greater detail about what is behind some of my theories and concept. The reason for revamping of some of my old idea and theories is due in part to a group of people in are societies who have little or no intelligent, these people are called Amateur Radio operators. Amateur radio operators are nothing more, then licensed CB radio operators whose only real skill is talking through a microphone. It has always been my philosophy that I'm not here to prove myself to anyone. Nor, it is my intent to share my ideas to half-wit "licensed" CB radio operators who are narrow minded.

UNQUOTE:

Sheesh, Todd...It's only been 2 weeks since you screwed it up the first time, and you STILL haven't got the spelling or grammar even close...

Yet you would presume to sway the opinions of persons who find you blog about Amateur Radio...

Rick,

Welcome to the newsgroup formerly know as rec.amateur.radio.policy.
Unfortunately you've arrived too late, kinda like arriving for a dinner
party after the guests have long departed and the fly eggs have hatched and
maggots are infesting the leftovers.

The last amateur radio discussion here was terminated in a previous century,
and all the hams have left. Only the maggots remain.

M.A.N.

If O'Dochartaigh is his legal name, and the FCC data base shows it as Daugherty then his license isn't valid, thus he is in violation of FCC rules everytime he "broadcast" one of his "bulletins". Maybe the FCC needs to be clued in.

Steve,

Thanks for the heads-up. I guess what I suspected is true.

I'll try QRZ and eHam and move on.

I almost hate to ask this because the idiots will probably come out of the woodwork but what is it, do you suppose, that motivates people to hang out on a Newsgroup or forum for the sole purpose of starting a flame?

If you go to a Mac group there are the PC/Linux dudes telling everyone what fools they are to use a Mac. On the Ham Radio groups there are a bunch of jerks telling everyone what idiots hams are, the higher the license class the bigger the idiot!

If they aren't interested in the things being discussed on a given forum why do they read it and then feel compelled to jump in?

My guess is that on the Radio groups the troublemakers are mostly the ones that can't cut it and they have to take it out on the ones that can.

On the Mac (or whatever) groups they feel they have made the only "right" decision and they must tell everyone how superior their logic is and what cretins the rest are for not seeing the world their way.

Oh the sadness of what I call "digital thinking"

Read this post by toad

"no where does it give them the authority to regulate ham radio or
pirate radio. Both are still the juridiction of the FCC.
Todd Daugherty N9OGL
Langley Park Telecommunication"

http://www.frn.net/vines/Forum2/HTML/001969.html

You have to wonder why it uses the word "juridiction" in place of
jurisdiction, what's on his gay little mind?

Or his profile. He doesn't consider himself human!

http://www.frn.net/scripts/john/vines/ubbmisc.cgi?action=getbio&UserName=N9OGL

If this isn't gay then nothing is.

http://216.176.81.228/n9ogl.htm

You ever find yourself a little Japanese girl yet perv?

Did you fill them in?

Especially if they have 6 people to cover a 48
> hour period that they are participating...

Correction. Two teams of 3 people each.

> And you STILL have not shown me ONE instance where ARES has
failed
> to respond to ANY incident when asked to do so.

I've showed one instance where one volunteer is overextended. Are you
the only overextended volunteer in the ARS?

> > > My behaviour here has nothing to do with what happens in the

> Nice stretch, Brian.

Not a stretch. When ATC fumbles a phonetic or pressure atlitude, do
you key the mic and keep repeating "LIAR, LIAR, LIAR?"

That's the Steve Robeson in RRAP. Introduce us to the Steve Robeson,
CAP Ace sometime.

For covering all of the shifts.

Best case ONLY to support YOUR contention of
> a volunteer deficit >>IF<< and >>ONLY IF<< you assume that each
> volunteer only participates once in an exercise.

Phil acknowledged that he is participating twice. You acknowledged
that it is a 96 hour exercise. I provided a best case scenario where
only two 12 hour shifts in the four day period had a deficit of one
volunteer each. Thems the facts.

> > > And Phil states they "work in teams of three".

> > > Nice try, though.
> >
> > Idiot. Would you like me to show you what 6 or 4 hour shifts look
> > like???
>
> Brian, six people for a 48 hour period is thin, but adequate.

Inadequate for the 96 hour period that you specified, and the "team of
3" requirement that Phil specified.

Them's the facts.

> Sorry you don't agree, but then it appears you don't have the
> supervisory skills to make it work.
>
> Steve, K4YZ

The supervisor fills in when there are a lack of personnel. But you
didn't see much of that in the USMC, didja, ya Day-Weanie Marine.

Look, it's a new week and I'm in a good mood. Just got back from a
great scout camping trip. Wx was perfect, invigorating hike, gourmet
chicken in a foil pack dinner last night, must not have snored too much
last night because my throat isn't sore.

Just admit to your lies, say you're sorry, and begin this week with a
fresh start. The truth will set you free.

4042. K1MAN GONE FROM THE WWW AND FROM THE AIR

Newsgroup: rec.radio.amateur.policy
Date: 2005-04-10 21:35:19 UTC
From: channel391@juno.com
Message-ID: <1113168919.492076.315960@o13g2000cwo.googlegroups.com>
Source record: 105608

K1MAN seems to have lost his website and his will to continue fighting the ARRL and FCC. This is posted on qrz.com:

Posted: April 07 2005,04:48

So.. first I don't hear him on the air any more. I assumed that maybe Riley finally did him in.

Then, I do a lookup of his www.k1man.com website and it's no longer there. In fact, I can't find a remnant of the AARA anywhere.

He always made it out to seem as if the AARA had a large amount of members in its ranks. If this was the case, how come they aren't backing him up; i.e. getting his website back up and getting him back on the air. Did his entire "empire" go bankrupt?

Sorry for the re-hash.. but honestly, I felt this too funny not to post about.

Any info out there... let's hear it.

Lardass, you still have that cocksucking lisp.

There are no Daleks under your command 'tard boy. They are
fictional robots used in a television show! You need to get
mental help again failure boy.

You have been a failure in everything you have ever done, PERIOD!

You are indeed "pale" you never venture forth outside except for
your minimum wage "job," and to buy more of that pussy Bud Lite
beer. A real man's beer would probably kill a big fat pussy like
yourself.

You need to seriously take a long hard look at yourself in a
properly lit mirror in that roach infested hovel you call home
and then take action. Lose weight, get mental help, stay off the
computer for hours on end and face reality. You are 31 years of
age, you deliver pizzas, you play with dolls, you get drunk and
spew your filth and delusions on here and usenet. Nobody, I
repeat, nobody except for a couple of geeks like yourself can
stand you. The best thing you could do is to slit your wrists
while in that shitty vehicle of yours this summer, then if the
police didn't find you right away, the Alabama summer heat would
do it without you having to be cremated. You are a blathering
asshole that is a boil in the crack of America's ass. You
irritate us, end it now Porky, do it!

You need to either kill yourself or get help, that's it, do it!

Wouldn't be "lie" anything.

You've still not listed 1 through 8 of the laleged lies to start
with.

> > Brian just doesn't want his name associated with his idiotic
> > assertions and blatant lying.
> >
> > Too late.

There's no idiotic assertions or blatant lying on my part,
Brian....Just making an even bigger fool out of you evry time YOU post
due to YOUR misconduct.

It doesn't have to be that way. Just stop lying and making
assertions that cant be substantiated.

> > And you've still not proved the FIRST assertion, make all the

You've not proved (or disproved" a single thing. Not one. Other
than you ahve severe honesty and character issues, Brian. You need to
get them fixed. Soon.

Sure it is.

You said I made threats.

You've not shown where anyone, let alone me, has made the threats
you've alluded to.

That would make you a liar, Brian.

> > > After all, Steve says that's

The reason some people don't know for sure
if they are going to Heaven when they die
is because they just don't know.

The good news is that you can know for
sure that you are going to Heaven which is
described in the Holy Bible as a beautiful
place with no death, sorrow, sickness or
pain.

God tells us in the Holy Bible how simple
it is to be saved so that we can live
forever with Him in Heaven.

"For if you confess with your mouth Jesus
is Lord and believe in your heart that God
raised Him from the dead, you
WILL BE SAVED." (Romans 10:9)

Over 2000 years ago God came from Heaven
to earth in the person of Jesus Christ to
shed His blood and die on a cross to pay
our sin debt in full.

Jesus Christ was born in Israel
supernaturally to a virgin Jewish woman
named Mary and lived a sinless life for
thirty-three years.

At the age of thirty-three Jesus was scourged and had a crown of thorns pressed onto His head then Jesus was crucified.

Three days after Jesus died on a cross and was placed in a grave Jesus rose from the dead as Jesus said would happen before Jesus died.

If someone tells you that they are going to die and in three days come back to life again and it happens then this person must be the real deal.

Jesus Christ is the only person that ever lived a perfect sinless life.

This is why Jesus is able to cover our sins(misdeeds) with His own blood because Jesus is sinless.

The Holy Bible says, "In Him(Jesus) we have redemption through His blood, the forgiveness of sins..." (Ephesians 1:7)

If you would like God to forgive you of your past, present and future sins just ask Jesus Christ to be your Lord and Saviour.

It doesn't matter how old you are or how many bad things that you have done in your life including lying and stealing all the way up to murder.

Just pray the prayer below with your mouth and mean it from your heart and God will hear you and save you.

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven with You when I die. I agree with You that I am a sinner. I believe that You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins and that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thanks Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

Welcome to the family of God if you just allowed God to save you. Now you are a real

Christian and you can know for sure that
you will live in Heaven forever when this
life comes to an end.

As a child of God we are to avoid
sin(wrong doing), but if you do sin the
Holy Bible says, "My dear children, I
write this to you so that you will not sin.
But if anybody does sin, we have one who
speaks to the Father in our defense Jesus
Christ, the Righteous One."

Those of you that have not yet decided to
place your trust in the Lord Jesus Christ
may never get another chance to do so
because you do not know when you will die.

This means that if you die without
trusting in Jesus Christ as your Lord and
Saviour you will be forever separated from
the love of God in a place called Hell.

The Holy Bible descibes Hell as a place of
eternal torment, suffering, pain and agony
for all those who have rejected Jesus Christ.

The good news is that you can avoid Hell by
allowing Jesus Christ to save you today.
Only then will you have true peace in your
life knowing that no matter what happens you
are on your way to Heaven.

Servant of the Lord Jesus Christ,
Internet Evangelist
Ronald L. Grossi

A ham friend told me that he heard that DSPs really work at least a little bit. He doesn't have one and neither do I (although many of the newer and more expensive rigs have them, and there are one or two outboard DSPs that are available that can be added to older rigs in some ways). I don't know all that they can do (auto null heterodynes? auto noise reduction [what kind of noise reduction?]? audio enhancement [or audio bandpass shaping] of some kind?) but if static crashes can be really removed or attenuated, that would be of use to me. Auto null of heterodynes would be nice on those occassions when tuner-uppers decide to tune up on my frequency in which I am already in two way contact with others (on ssb phone). And, maybe there are some other useful characteristics I don't know about. But, are these really effective? For example, a 20 db heterodyne null is not much. Nulls have to be about 50-60 db to be useful.

I'll take any kind of comments, suggestions, refernces to testing, or personal experience, pro & con recomendations, ...anything...

There are some good demos at
http://www.radio.bhinstrumentation.co.uk/html/demonstration.html . I have a
cheap Radio Shack DSP40 that performs at the lower end of the scale as far
as these go. It does a remarkable job of multiple heterodyne reduction and
selectable audio passband but its noise blanker is next to useless and it
does not do noise reduction other than through selectivity.

The performance of a DSP is very dependant on the software it runs
under.

If they didn't work, none of the current military radio systems would be any
use - they all use DSP! I've designed an audio processing DSP system using
one of the new dsPIC devices and a codec - just two small chips. The codec
includes a mic pre-amp and headphone amp.

No I don't. I'm very sincere when I say that Brian P Burke is a
coward and a liar. And there's nothing dishonest in that statement.

Of course it's documented in Google, so there's really not that
much more for me to do or say about it, except it sucks to be you,
Brian.

I've not had a lot of opportunity to use DSP for Amateur
applications, however I have used it in the Icom IC-718 for Civil Air
Patrol applications.

Several of CAP's 4mHz frequencies suffer from foreign hetrodynes
and other ectopics. The DSP has been over 90% effective in making the
channel "usable".

If O'Dochartaigh is his legal name, and the FCC data base shows it as
Daugherty then his license isn't valid, thus he is in violation of FCC
rules everytime he "broadcast" one of his "bulletins". Maybe the FCC
needs to be clued in.

I bet they already are, Commander!

Born on July 5, 1968 in the small community of Taylorville, in central
Illinois. Went to Taylorville High School and graduated in 1987, Now
attending Lincoln Land Community College.

If I were one of the trustees at LLCC, I'd (A) hide my face in
shame, considering that they can't seem to teach Todd how to write, and
(B) Sue him to stop mentioning them in his public correspondence.

Been a licensed Amateur Radio operator since 1991 and began flying
airplane in 2004.

Well golly gee whillikers! Toady claims that all Amateur Radio
licensees are demon seed...Guess he speaks from personal
self-assessment, eh?

And Todd...That's not an airplane. It's an ultralight.

Traveled around the world and the United States.

Too bad he hasn't "traveled" to an Elementary School reading and
writing class lately.

Well...I have to honestly claim a partial "guilty" here, Rick. I did enter here for the same reasons you have, but after butting my head against the wall for so long, I realized that nothing was getting accomplished. I consider this to be the least common denominator of "discussion".

Witness N9OGL, N0IMD, et al. They just make it so easy to do when they make assertions that are so easily refuted by publically accessible resources.

> If you go to a Mac group there are the PC/Linux dudes telling

> license class the bigger the idiot!

Must be some of the same DNA in a lot of the folks here. We have one antagonist in particular who was an Army radio mechanic in the 50's and held a GROL (but never an Amateur license) who spends inordinate amounts of time trying to tell us how to be Amateurs. Go figure.

> If they aren't interested in the things being discussed on a given
> forum why do they read it and then feel compelled to jump in?

Most of the folks who do that here are the Anonymous Cowards. Those who have enough intestinal fortitude to sign their names at least comment about the subject, even if it's skewed.

> My guess is that on the Radio groups the troublemakers are mostly the
> ones that can't cut it and they have to take it out on the ones that
> can.

The aforementioned antagonist being one of them. He's gone as far as suggesting in official comments to the FCC that there should be a minimum age for Amateur licensure despite the fact he's in his 70's and he's never raised kids. Never one bit of documentation that "kids" have been "discipline" problems at Gettysburg either.

> On the Mac (or whatever) groups they feel they have made the only
> "right" decision and they must tell everyone how superior their logic
> is and what cretins the rest are for not seeing the world their way.

Or they start in with the "Nazi", "thugs", "elitists", etc. Of course that's relatively mild to the ####head, ###hole, mother####er, etc that eminates from the keyboard of N9OGL and company.

> Oh the sadness of what I call "digital thinking"

They are the "facts" only if all three team members are at the
station and on the air 100% of the time.

Anyone who ahs really done any of these knows that's NOT the
facts, Brian...Like you...

Take your own advice, Brian.

Start off by TRYING to cite my alleged 11 lies. Then you can
provide us with some evidence to support your "ARES won't respond"
assertion. Then move on to your "unlicensed devices" issue. We're
still waiting for documentation of the legality of your Somalia
operation and some evidence of your claims of having worked the
equilvilent of DXCC from two or three other DX locations.

You're a chronic liar, Brian. It really is THAT simple.

Steve, K4YZ

Of course they work. How well, as Michael points out, depends on the
software.

> are available that can be added to older rigs in some ways). I don't know
> all that they can do (auto null heterodynes? auto noise reduction [what

DSPs can be programmed to do almost anything, but in amateur radios, they
generally are used to reduce noise and null hetrodynes.

> of some kind?) but if static crashes can be really removed or attenuated,

In general, the point of DSPs tends not to be to remove static crashes.
Some of the newer noise blankers are, in fact, processors that might be hard
to distinguish from DSPs. They tend to do a very good job on pulse noise,
but I haven't tripped across any that are even decent on static crashes.

> really effective? For example, a 20 db heterodyne null is not much. Nulls
> have to be about 50-60 db to be useful.

Remember, these things are software rather than filters. The stronger the
heterodyne, the easier it is for the software to recognize it.
Unfortunately, it's not magic. A really strong heterodyne is going to be
driving your AGC and perhaps overloading some amps in your chain, so it
isn't like it magically disappears with no other effect. Still, very often
the DSP can make life more pleasant in the presence of lids.

Essay graded by Microsoft Word and found to be almost at 7th grade
grammar level. Punctuation errors are common.

===(begin analysis)===
Lardass, you still have that cocksucking lisp.

There are no Daleks under your command 'tard boy. They are fictional
robots used in a television show! You need to get mental help again
failure boy.

You have been a failure in everything you have ever done, PERIOD!

You are indeed "pale" you never venture forth outside except for your
minimum wage "job," and to buy more of that pussy Bud Lite beer. A
real man's beer would probably kill a big fat pussy like yourself.

===
ERROR: Reflexive pronoun use. Replace "like yourself" with "like you."
===

You need to seriously take a long hard look at yourself in a properly
lit mirror in that roach infested hovel you call home and then take
action. Lose weight, get mental help, stay off the computer for hours
on end and face reality. You are 31 years of age, you deliver pizzas,
you play with dolls, you get drunk and

===
ERROR: Comma use. "you play with dolls, and you ..."
===

spew your filth and delusions on here and usenet. Nobody, I repeat,
nobody except for a couple of geeks like yourself can stand you. The
best thing you could do is to slit your wrists while in that shitty
vehicle of yours this summer, then if the police didn't find you right
away, the Alabama summer heat would do it without you having to be
cremated. You are a blathering asshole that is a boil in the crack of
America's ass. You irritate us, end it now Porky, do it!

===
ERROR: Comma use. "... irritate us, end it now Porky, do it!" First
comma should be a period; second comma should be a semicolon.
===

You need to either kill yourself or get help, that's it, do it!

===
ERROR: Comma use. "... get help, that's it, do it!" First comma

should be a period; second comma should be a semicolon.
===(end analysis)===

Hey, has anybody ever noticed that when they issue an Amber Alert that the word 'amber' is also sent in Morse code?

I was helping my wife with the clothes when a loud distinctive .- -- -... . .-. interrupted the normal voice audio. "Did you leave your radio on?" asked my wife. When I told her I'd copied 'amber,' we both realized that an Amber Alert message was scrolling across the bottom of the TV screen.

F.Y.I. ;-)

All Amber Alerts that I have heard "out here" are enclosed in a
"standard" EAS message, what we broadcast engineers call the "duck
fart".

Anyhow, I get mine (for whatever value they are) through the
California Emergency Digital Information Service (EDIS), both by
e-mail and (whenever I am in range) by over-the-air packet on a UHF
Broadcast Auxiliary circuit (my ham packet setup works just fine to
receive that), a no-cost non-commercial service of the California
Office of Emergency Services.

For those who want to subscribe to the e-mail version and get a
glut of status, test, and weather warning messages clogging your
e-mail every day, see: <http://www.incident.com/edismail.html>

Whoa!

After you posted "Always at a deficit for information, aren't you,
Brian?" you linked us to a website that showed that this was a four day
exercise. So why are you trying to make it into a two day exercise
again? More lies and misdirection?

And without working any one or several individual(s) a double shift,
and maintaining the requirement of three person shifts of qualified
communicators...

> > Especially if they have 6 people to cover a 48
> > > hour period that they are participating...
> >

They do. Unless your experience is so limited that you've yet to see
it.

You never flew combat air patrols for anyone, but you've got flight
suits and medals...

Remember the customer? The customer that is never, ever, ever denied?

You gotta cover all the shifts with the right number of qualified ops.

Three qualified operators per team. Them's the facts.

> getting your nose rubbed in your own inadequacies, aren't you?

You're the only inedaquate equation in this. You have yet to show how
to cover the 96 hour exercise, with the available personnel, while
maintaining the required number of qualified operators per team.

I do. Every day. I start off by not lying.

> Start off by TRYING to cite my alleged 11 lies. Then you can
> provide us with some evidence to support your "ARES won't respond"
> assertion.

You need to requote that.

> Then move on to your "unlicensed devices" issue.

You need to requote that.

We're
> still waiting for documentation of the legality of your Somalia
> operation

Why? You are not in my Somalia log and you will not receive a QSL
card. You are not the Somalia minister of communications. You are not
the US Air Foce on site commander. You are not the United Nations.
You are not the ARRL.

and some evidence of your claims of having worked the
> equilvilent of DXCC from two or three other DX locations.
>
> You're a chronic liar, Brian. It really is THAT simple.
>
> Steve, K4YZ

You make claims, Steve. You do it often and loudly. But your claims
aren't worth spit because they are lies.

Now show me your Top-Off 96 hour duty schedule where all shifts are
covered with the proper number of qualified radio operators, and
without abusing the volunteers. You claim you could, so do it.

Best of Luck.

Yes, you do. It's all archived.

I claim that your assertion that ARES is "dependent" on aging
> men who can't/won't respond due to age/infirmity or are over
obligated
> is misleading and untrue.

How is my opinion wrong?

> I've asked you SEVERAL TIMES now to show me JUST ONE example of
> some situation where ARES was asked to respond to a situation but
> couldn't due to any of the criteria YOU cited.

Phil provided his situation.

> YOU claimed that "unlicensed devices play a major role" in
> "emergency comms". I've asked your to substantiate THAT claim with
some
> sort of valid reference, but you;ve balked at that one, too.

Practically all first responders use cell phones. Cell phones are
often how a person is initially notified that they are in an emergency
period. The military relies on them quite heavily.

> You claim, I ask you to validate the claim. You refuse. No
facts
> = invalid claim.

If a fact isn't presented then the opinion is wrong? You da man!

> It really is THAT simple.
>
> Steve, K4YZ

It really is quite simple to see that you claim people's opinions are
wrong. Then you start the "liar, liar" routine. It's all archived.
Again and again.

Where's Paul when you need him? He and his group did some fine rescue
work getting the K0AIR call out of the hands of micreants like K4CAP.

> to other readers of this newsgroup.

I just learned from him that unless an opinion is fully documented with
facts, that it is a lie.
